## **Abstract**

Wonderful article

# 1 Derivative

Let us find the derivative of the following function:

$$(x+1)^{\frac{\sin x}{2}} \cdot \left( \arctan \sqrt{x^2+1} \right)^{x-2} \quad (1)$$

The object of our ultimate interest is the following:

$$1 \quad (2)$$

Clearly, the derivative of this is equal to

$$0 \quad (3)$$

We are going to study the following:

$$x^2 \quad (4)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (5)$$

One shall regard the object in question with utmost interest:

$$x - 2 \quad (6)$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \quad (7)$$

One shall regard the object in question with utmost interest:

$$x + 1 \quad (8)$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \quad (9)$$

The object of our ultimate interest is the following:

$$2 \quad (10)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (11)$$

The following is worth a closer look:

$$\sin x \quad (12)$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \quad (13)$$

Now the proof that the derivative of this function is equal to

$$(x+1)^{\frac{\sin x}{2}} \cdot (A) \cdot \left( \arctan \sqrt{x^2+1} \right)^{x-2} + (x+1)^{\frac{\sin x}{2}} \cdot \left( \arctan \sqrt{x^2+1} \right)^{x-2} \cdot (C) \quad (14)$$

Where:

- $A = \frac{\cos x \cdot 1 \cdot 2 - \sin x \cdot 0}{2^2} \cdot \ln(x+1) + \frac{\sin x}{2} \cdot \frac{1+0}{x+1}$
- $B = \frac{1}{1+(\sqrt{x^2+1})^2} \cdot \frac{1}{2 \cdot \sqrt{x^2+1}} \cdot (2 \cdot x^{2-1} \cdot 1 + 0)$

- $C = (1 - 0) \cdot \ln \arctan \sqrt{x^2 + 1} + (x - 2) \cdot \frac{B}{\arctan \sqrt{x^2 + 1}}$

is left out for the reader to solve themselves. Unsurprisingly, if we simplify this we wil get

$$A \cdot \left( \arctan \sqrt{x^2 + 1} \right)^{x-2} + (x + 1)^{\frac{\sin x}{2}} \cdot C \quad (15)$$

Where:

- $A = (x + 1)^{\frac{\sin x}{2}} \cdot \left( \frac{\cos x \cdot 2}{4} \cdot \ln(x + 1) + \frac{\sin x}{2} \cdot \frac{1}{x+1} \right)$
- $B = \frac{1}{1 + (\sqrt{x^2 + 1})^2} \cdot \frac{1}{2 \cdot \sqrt{x^2 + 1}} \cdot 2 \cdot x$
- $C = \left( \arctan \sqrt{x^2 + 1} \right)^{x-2} \cdot \left( \ln \arctan \sqrt{x^2 + 1} + (x - 2) \cdot \frac{B}{\arctan \sqrt{x^2 + 1}} \right)$

## 2 Taylor series

Let us find the Taylor series at  $x = 0$  of the following function:

$$(x + 1)^{\frac{\sin x}{2}} \cdot \left( \arctan \sqrt{x^2 + 1} \right)^{x-2} \quad (16)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \quad (17)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (18)$$

The object of our ultimate interest is the following:

$$x^2 \quad (19)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (20)$$

We are going to study the following:

$$x - 2 \quad (21)$$

As you can see, the derivative of this is equal to

$$1 - 0 \quad (22)$$

The following is worth a closer look:

$$x + 1 \quad (23)$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \quad (24)$$

We will take a closer look at this:

$$2 \quad (25)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (26)$$

Let us take a look at this:

$$\sin x \quad (27)$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \quad (28)$$

Let us take a look at this:

$$1 \quad (29)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (30)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (31)$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (32)$$

We shall ponder the following:

$$2 \cdot x \quad (33)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (34)$$

The object of our ultimate interest is the following:

$$1 \quad (35)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (36)$$

The object of our ultimate interest is the following:

$$x^2 \quad (37)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (38)$$

We shall ponder the following:

$$2 \quad (39)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (40)$$

We shall ponder the following:

$$1 \quad (41)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (42)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \quad (43)$$

Obviously, the derivative of this is equal to

$$0 \quad (44)$$

We shall ponder the following:

$$x^2 \quad (45)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (46)$$

Let us take a look at this:

$$1 \quad (47)$$

Obviously, the derivative of this is equal to

$$0 \quad (48)$$

We are going to study the following:

$$1 \tag{49}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{50}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{51}$$

Obviously, the derivative of this is equal to

$$1 - 0 \tag{52}$$

Let us take a look at this:

$$1 \tag{53}$$

Obviously, the derivative of this is equal to

$$0 \tag{54}$$

Consider the following:

$$x^2 \tag{55}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{56}$$

Let us take a look at this:

$$1 \tag{57}$$

As you can see, the derivative of this is equal to

$$0 \tag{58}$$

We are going to study the following:

$$x^2 \tag{59}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{60}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x - 2 \tag{61}$$

As you can see, the derivative of this is equal to

$$1 - 0 \tag{62}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{63}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{64}$$

Let us take a look at this:

$$2 \tag{65}$$

Clearly, the derivative of this is equal to

$$0 \tag{66}$$

Let us take a look at this:

$$\sin x \tag{67}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{68}$$

We will take a closer look at this:

$$1 \tag{69}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{70}$$

The following is worth a closer look:

$$x^2 \tag{71}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{72}$$

We shall ponder the following:

$$x - 2 \tag{73}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{74}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{75}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{76}$$

The following is worth a closer look:

$$1 \tag{77}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{78}$$

We shall ponder the following:

$$2 \tag{79}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{80}$$

We will take a closer look at this:

$$\sin x \tag{81}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{82}$$

We shall ponder the following:

$$x + 1 \tag{83}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{84}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$4 \tag{85}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{86}$$

Consider the following:

$$2 \tag{87}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{88}$$

We shall ponder the following:

$$\cos x \tag{89}$$

Unsurprisingly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{90}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x + 1 \tag{91}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{92}$$

We are going to study the following:

$$2 \tag{93}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{94}$$

Consider the following:

$$\sin x \tag{95}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{96}$$

We shall ponder the following:

$$1 \tag{97}$$

Clearly, the derivative of this is equal to

$$0 \tag{98}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{99}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{100}$$

We are going to study the following:

$$2 \cdot x \tag{101}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{102}$$

One shall regard the object in question with utmost interest:

$$1 \tag{103}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{104}$$

Consider the following:

$$x^2 \tag{105}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{106}$$

The object of our ultimate interest is the following:

$$2 \tag{107}$$

Trivially, the derivative of this is equal to

$$0 \tag{108}$$

One shall regard the object in question with utmost interest:

$$1 \tag{109}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{110}$$

Consider the following:

$$1 \tag{111}$$

Clearly, the derivative of this is equal to

$$0 \tag{112}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{113}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{114}$$

The following is worth a closer look:

$$1 \tag{115}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{116}$$

Consider the following:

$$1 \tag{117}$$

Clearly, the derivative of this is equal to

$$0 \tag{118}$$

We shall ponder the following:

$$2 \cdot x \tag{119}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{120}$$

We shall ponder the following:

$$1 \tag{121}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{122}$$

The object of our ultimate interest is the following:

$$x^2 \tag{123}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{124}$$

We are going to study the following:

$$2 \tag{125}$$

Obviously, the derivative of this is equal to

$$0 \tag{126}$$

Let us take a look at this:

$$1 \tag{127}$$

Clearly, the derivative of this is equal to

$$0 \tag{128}$$

We are going to study the following:

$$1 \tag{129}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{130}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{131}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{132}$$

Consider the following:

$$1 \tag{133}$$

Trivially, the derivative of this is equal to

$$0 \tag{134}$$

Consider the following:

$$1 \tag{135}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{136}$$

One shall regard the object in question with utmost interest:

$$1 \tag{137}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{138}$$

We shall ponder the following:

$$x^2 \tag{139}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{140}$$

Consider the following:

$$2 \cdot x \tag{141}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{142}$$

The following is worth a closer look:

$$1 \tag{143}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{144}$$

We are going to study the following:

$$x^2 \tag{145}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{146}$$

Let us take a look at this:

$$2 \tag{147}$$

As you can see, the derivative of this is equal to

$$0 \tag{148}$$

Let us take a look at this:

$$1 \tag{149}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{150}$$

We shall ponder the following:

$$1 \tag{151}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{152}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{153}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (154)$$

The following is worth a closer look:

$$1 \quad (155)$$

As you can see, the derivative of this is equal to

$$0 \quad (156)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \quad (157)$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (158)$$

Let us take a look at this:

$$1 \quad (159)$$

Trivially, the derivative of this is equal to

$$0 \quad (160)$$

We shall ponder the following:

$$x^2 \quad (161)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (162)$$

Consider the following:

$$2 \quad (163)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (164)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \quad (165)$$

Obviously, the derivative of this is equal to

$$0 \quad (166)$$

The following is worth a closer look:

$$1 \quad (167)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (168)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \quad (169)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (170)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{171}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{172}$$

We shall ponder the following:

$$2 \cdot x \tag{173}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{174}$$

One shall regard the object in question with utmost interest:

$$1 \tag{175}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{176}$$

We shall ponder the following:

$$x^2 \tag{177}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{178}$$

Consider the following:

$$2 \tag{179}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{180}$$

Consider the following:

$$2 \cdot x \tag{181}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{182}$$

The object of our ultimate interest is the following:

$$1 \tag{183}$$

Clearly, the derivative of this is equal to

$$0 \tag{184}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{185}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{186}$$

We shall ponder the following:

$$2 \tag{187}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{188}$$

The following is worth a closer look:

$$1 \tag{189}$$

As you can see, the derivative of this is equal to

$$0 \tag{190}$$

We are going to study the following:

$$2 \tag{191}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{192}$$

We shall ponder the following:

$$2 \tag{193}$$

Clearly, the derivative of this is equal to

$$0 \tag{194}$$

Consider the following:

$$1 \tag{195}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{196}$$

We will take a closer look at this:

$$x^2 \tag{197}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{198}$$

We shall ponder the following:

$$2 \tag{199}$$

Obviously, the derivative of this is equal to

$$0 \tag{200}$$

The object of our ultimate interest is the following:

$$1 \tag{201}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{202}$$

The object of our ultimate interest is the following:

$$1 \tag{203}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{204}$$

We are going to study the following:

$$x^2 \tag{205}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{206}$$

We will take a closer look at this:

$$1 \tag{207}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{208}$$

Consider the following:

$$1 \tag{209}$$

Obviously, the derivative of this is equal to

$$0 \tag{210}$$

Let us take a look at this:

$$x - 2 \tag{211}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{212}$$

Let us take a look at this:

$$1 \tag{213}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{214}$$

The object of our ultimate interest is the following:

$$x^2 \tag{215}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{216}$$

The following is worth a closer look:

$$2 \cdot x \tag{217}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{218}$$

The object of our ultimate interest is the following:

$$1 \tag{219}$$

As you can see, the derivative of this is equal to

$$0 \tag{220}$$

We are going to study the following:

$$x^2 \tag{221}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{222}$$

The following is worth a closer look:

$$2 \tag{223}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{224}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{225}$$

Trivially, the derivative of this is equal to

$$0 \tag{226}$$

The following is worth a closer look:

$$1 \tag{227}$$

Obviously, the derivative of this is equal to

$$0 \tag{228}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{229}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{230}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{231}$$

As you can see, the derivative of this is equal to

$$0 \tag{232}$$

We will take a closer look at this:

$$1 \tag{233}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{234}$$

Consider the following:

$$2 \cdot x \tag{235}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{236}$$

The object of our ultimate interest is the following:

$$1 \tag{237}$$

Obviously, the derivative of this is equal to

$$0 \tag{238}$$

Let us take a look at this:

$$x^2 \tag{239}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{240}$$

Consider the following:

$$2 \tag{241}$$

Clearly, the derivative of this is equal to

$$0 \tag{242}$$

The object of our ultimate interest is the following:

$$1 \tag{243}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{244}$$

We will take a closer look at this:

$$1 \tag{245}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{246}$$

We will take a closer look at this:

$$x^2 \tag{247}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{248}$$

The following is worth a closer look:

$$1 \tag{249}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{250}$$

Let us take a look at this:

$$1 \tag{251}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{252}$$

We will take a closer look at this:

$$1 \tag{253}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{254}$$

The following is worth a closer look:

$$x^2 \tag{255}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{256}$$

We shall ponder the following:

$$1 \tag{257}$$

As you can see, the derivative of this is equal to

$$0 \tag{258}$$

We will take a closer look at this:

$$1 \tag{259}$$

Trivially, the derivative of this is equal to

$$0 \tag{260}$$

We will take a closer look at this:

$$x^2 \tag{261}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{262}$$

Consider the following:

$$x - 2 \tag{263}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{264}$$

Let us take a look at this:

$$1 \tag{265}$$

Clearly, the derivative of this is equal to

$$0 \tag{266}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{267}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{268}$$

We are going to study the following:

$$2 \cdot x \tag{269}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{270}$$

Consider the following:

$$1 \tag{271}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{272}$$

The object of our ultimate interest is the following:

$$x^2 \tag{273}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{274}$$

The following is worth a closer look:

$$2 \tag{275}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{276}$$

We shall ponder the following:

$$1 \tag{277}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{278}$$

Consider the following:

$$1 \tag{279}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{280}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{281}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{282}$$

We shall ponder the following:

$$1 \tag{283}$$

Clearly, the derivative of this is equal to

$$0 \tag{284}$$

Consider the following:

$$1 \tag{285}$$

As you can see, the derivative of this is equal to

$$0 \tag{286}$$

We shall ponder the following:

$$x - 2 \tag{287}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{288}$$

Let us take a look at this:

$$1 \tag{289}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{290}$$

Let us take a look at this:

$$x^2 \tag{291}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{292}$$

We shall ponder the following:

$$1 \tag{293}$$

Obviously, the derivative of this is equal to

$$0 \tag{294}$$

We are going to study the following:

$$x^2 \tag{295}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{296}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{297}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{298}$$

The following is worth a closer look:

$$1 \tag{299}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{300}$$

We are going to study the following:

$$x^2 \tag{301}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{302}$$

Consider the following:

$$2 \tag{303}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{304}$$

Consider the following:

$$1 \tag{305}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{306}$$

The following is worth a closer look:

$$1 \tag{307}$$

Clearly, the derivative of this is equal to

$$0 \tag{308}$$

Consider the following:

$$x^2 \tag{309}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{310}$$

One shall regard the object in question with utmost interest:

$$1 \tag{311}$$

As you can see, the derivative of this is equal to

$$0 \tag{312}$$

The object of our ultimate interest is the following:

$$1 \tag{313}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{314}$$

We are going to study the following:

$$x - 2 \tag{315}$$

As you can see, the derivative of this is equal to

$$1 - 0 \tag{316}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{317}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{318}$$

We are going to study the following:

$$x^2 \tag{319}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{320}$$

We shall ponder the following:

$$1 \tag{321}$$

Clearly, the derivative of this is equal to

$$0 \tag{322}$$

The object of our ultimate interest is the following:

$$x^2 \tag{323}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{324}$$

We are going to study the following:

$$x - 2 \tag{325}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{326}$$

The following is worth a closer look:

$$x + 1 \tag{327}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{328}$$

The object of our ultimate interest is the following:

$$2 \tag{329}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{330}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\sin x \tag{331}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{332}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{333}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{334}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{335}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{336}$$

We will take a closer look at this:

$$2 \cdot x \tag{337}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{338}$$

We are going to study the following:

$$1 \tag{339}$$

Obviously, the derivative of this is equal to

$$0 \tag{340}$$

The following is worth a closer look:

$$x^2 \tag{341}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{342}$$

We shall ponder the following:

$$2 \tag{343}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{344}$$

We are going to study the following:

$$1 \tag{345}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{346}$$

We will take a closer look at this:

$$1 \tag{347}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{348}$$

The following is worth a closer look:

$$x^2 \tag{349}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{350}$$

We shall ponder the following:

$$1 \tag{351}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{352}$$

We are going to study the following:

$$1 \tag{353}$$

Clearly, the derivative of this is equal to

$$0 \tag{354}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{355}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{356}$$

Consider the following:

$$1 \tag{357}$$

Obviously, the derivative of this is equal to

$$0 \tag{358}$$

We shall ponder the following:

$$x^2 \tag{359}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{360}$$

We shall ponder the following:

$$1 \tag{361}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{362}$$

Let us take a look at this:

$$x^2 \tag{363}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{364}$$

The following is worth a closer look:

$$x - 2 \tag{365}$$

Obviously, the derivative of this is equal to

$$1 - 0 \tag{366}$$

We are going to study the following:

$$x + 1 \tag{367}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{368}$$

We shall ponder the following:

$$1 \tag{369}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{370}$$

We will take a closer look at this:

$$2 \tag{371}$$

Obviously, the derivative of this is equal to

$$0 \tag{372}$$

Let us take a look at this:

$$\sin x \tag{373}$$

Clearly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{374}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{375}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{376}$$

We are going to study the following:

$$4 \tag{377}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{378}$$

Let us take a look at this:

$$2 \tag{379}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{380}$$

We shall ponder the following:

$$\cos x \tag{381}$$

Obviously, the derivative of this is equal to

$$- \sin x \cdot 1 \quad (382)$$

One shall regard the object in question with utmost interest:

$$x + 1 \quad (383)$$

Clearly, the derivative of this is equal to

$$1 + 0 \quad (384)$$

Let us take a look at this:

$$2 \quad (385)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (386)$$

We will take a closer look at this:

$$\sin x \quad (387)$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \quad (388)$$

We are going to study the following:

$$1 \quad (389)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (390)$$

Let us take a look at this:

$$x^2 \quad (391)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (392)$$

Let us take a look at this:

$$2 \cdot x \quad (393)$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (394)$$

The following is worth a closer look:

$$1 \quad (395)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (396)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (397)$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (398)$$

We are going to study the following:

$$2 \tag{399}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{400}$$

We shall ponder the following:

$$1 \tag{401}$$

As you can see, the derivative of this is equal to

$$0 \tag{402}$$

Let us take a look at this:

$$1 \tag{403}$$

Trivially, the derivative of this is equal to

$$0 \tag{404}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{405}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{406}$$

The object of our ultimate interest is the following:

$$1 \tag{407}$$

As you can see, the derivative of this is equal to

$$0 \tag{408}$$

Consider the following:

$$1 \tag{409}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{410}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{411}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{412}$$

The following is worth a closer look:

$$1 \tag{413}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{414}$$

The object of our ultimate interest is the following:

$$x^2 \tag{415}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (416)$$

One shall regard the object in question with utmost interest:

$$1 \quad (417)$$

As you can see, the derivative of this is equal to

$$0 \quad (418)$$

Consider the following:

$$x^2 \quad (419)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (420)$$

We will take a closer look at this:

$$x - 2 \quad (421)$$

As you can see, the derivative of this is equal to

$$1 - 0 \quad (422)$$

The following is worth a closer look:

$$x + 1 \quad (423)$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \quad (424)$$

Let us take a look at this:

$$1 \quad (425)$$

Obviously, the derivative of this is equal to

$$0 \quad (426)$$

We are going to study the following:

$$2 \quad (427)$$

Trivially, the derivative of this is equal to

$$0 \quad (428)$$

The following is worth a closer look:

$$\sin x \quad (429)$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \quad (430)$$

We are going to study the following:

$$x + 1 \quad (431)$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \quad (432)$$

Let us take a look at this:

$$4 \quad (433)$$

Trivially, the derivative of this is equal to

$$0 \tag{434}$$

We shall ponder the following:

$$2 \tag{435}$$

As you can see, the derivative of this is equal to

$$0 \tag{436}$$

Let us take a look at this:

$$\cos x \tag{437}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{438}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{439}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{440}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{441}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{442}$$

Let us take a look at this:

$$\sin x \tag{443}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{444}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{445}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{446}$$

The object of our ultimate interest is the following:

$$x^2 \tag{447}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{448}$$

We will take a closer look at this:

$$x - 2 \tag{449}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{450}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x + 1 \tag{451}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{452}$$

The object of our ultimate interest is the following:

$$1 \tag{453}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{454}$$

We will take a closer look at this:

$$2 \tag{455}$$

Obviously, the derivative of this is equal to

$$0 \tag{456}$$

We will take a closer look at this:

$$\sin x \tag{457}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{458}$$

We are going to study the following:

$$x + 1 \tag{459}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{460}$$

We are going to study the following:

$$1 \tag{461}$$

Obviously, the derivative of this is equal to

$$0 \tag{462}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$4 \tag{463}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{464}$$

One shall regard the object in question with utmost interest:

$$2 \tag{465}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{466}$$

We will take a closer look at this:

$$\cos x \tag{467}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{468}$$

Consider the following:

$$x + 1 \tag{469}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{470}$$

One shall regard the object in question with utmost interest:

$$16 \tag{471}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{472}$$

One shall regard the object in question with utmost interest:

$$0 \tag{473}$$

As you can see, the derivative of this is equal to

$$0 \tag{474}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$4 \tag{475}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{476}$$

We shall ponder the following:

$$2 \tag{477}$$

Trivially, the derivative of this is equal to

$$0 \tag{478}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{479}$$

Obviously, the derivative of this is equal to

$$0 \tag{480}$$

The object of our ultimate interest is the following:

$$\sin x \tag{481}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{482}$$

Let us take a look at this:

$$x + 1 \tag{483}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{484}$$

We shall ponder the following:

$$1 \tag{485}$$

Trivially, the derivative of this is equal to

$$0 \tag{486}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$4 \tag{487}$$

Obviously, the derivative of this is equal to

$$0 \tag{488}$$

The following is worth a closer look:

$$2 \tag{489}$$

Clearly, the derivative of this is equal to

$$0 \tag{490}$$

Consider the following:

$$\cos x \tag{491}$$

Clearly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{492}$$

Let us take a look at this:

$$x + 1 \tag{493}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{494}$$

We are going to study the following:

$$2 \tag{495}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{496}$$

We shall ponder the following:

$$\sin x \tag{497}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{498}$$

Let us take a look at this:

$$x + 1 \tag{499}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{500}$$

Let us take a look at this:

$$1 \tag{501}$$

Clearly, the derivative of this is equal to

$$0 \tag{502}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{503}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{504}$$

Consider the following:

$$\sin x \tag{505}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{506}$$

We shall ponder the following:

$$x + 1 \tag{507}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{508}$$

The following is worth a closer look:

$$4 \tag{509}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{510}$$

One shall regard the object in question with utmost interest:

$$2 \tag{511}$$

Clearly, the derivative of this is equal to

$$0 \tag{512}$$

Let us take a look at this:

$$\cos x \tag{513}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{514}$$

We shall ponder the following:

$$x + 1 \tag{515}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{516}$$

Consider the following:

$$1 \tag{517}$$

As you can see, the derivative of this is equal to

$$0 \tag{518}$$

Consider the following:

$$2 \tag{519}$$

Obviously, the derivative of this is equal to

$$0 \tag{520}$$

The object of our ultimate interest is the following:

$$\sin x \tag{521}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{522}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{523}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{524}$$

Let us take a look at this:

$$4 \tag{525}$$

Clearly, the derivative of this is equal to

$$0 \tag{526}$$

The object of our ultimate interest is the following:

$$2 \tag{527}$$

Clearly, the derivative of this is equal to

$$0 \tag{528}$$

We are going to study the following:

$$\cos x \tag{529}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{530}$$

We are going to study the following:

$$x + 1 \tag{531}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{532}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{533}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{534}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\sin x \tag{535}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{536}$$

Let us take a look at this:

$$1 \tag{537}$$

Trivially, the derivative of this is equal to

$$0 \tag{538}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{539}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{540}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{541}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{542}$$

Consider the following:

$$1 \tag{543}$$

Clearly, the derivative of this is equal to

$$0 \tag{544}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{545}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{546}$$

The object of our ultimate interest is the following:

$$2 \tag{547}$$

Trivially, the derivative of this is equal to

$$0 \tag{548}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{549}$$

Obviously, the derivative of this is equal to

$$0 \tag{550}$$

The following is worth a closer look:

$$1 \tag{551}$$

Obviously, the derivative of this is equal to

$$0 \tag{552}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{553}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{554}$$

We are going to study the following:

$$1 \tag{555}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{556}$$

Consider the following:

$$1 \tag{557}$$

Clearly, the derivative of this is equal to

$$0 \tag{558}$$

We shall ponder the following:

$$1 \tag{559}$$

As you can see, the derivative of this is equal to

$$0 \tag{560}$$

Consider the following:

$$x^2 \tag{561}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{562}$$

Consider the following:

$$2 \tag{563}$$

As you can see, the derivative of this is equal to

$$0 \tag{564}$$

The following is worth a closer look:

$$2 \cdot x \tag{565}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{566}$$

The following is worth a closer look:

$$1 \tag{567}$$

Trivially, the derivative of this is equal to

$$0 \tag{568}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{569}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{570}$$

The object of our ultimate interest is the following:

$$2 \tag{571}$$

As you can see, the derivative of this is equal to

$$0 \tag{572}$$

We are going to study the following:

$$1 \tag{573}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{574}$$

We will take a closer look at this:

$$1 \tag{575}$$

Clearly, the derivative of this is equal to

$$0 \tag{576}$$

We will take a closer look at this:

$$x^2 \tag{577}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{578}$$

The object of our ultimate interest is the following:

$$1 \tag{579}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{580}$$

The following is worth a closer look:

$$1 \tag{581}$$

As you can see, the derivative of this is equal to

$$0 \tag{582}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{583}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{584}$$

One shall regard the object in question with utmost interest:

$$1 \tag{585}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{586}$$

We are going to study the following:

$$x^2 \tag{587}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{588}$$

We shall ponder the following:

$$2 \tag{589}$$

As you can see, the derivative of this is equal to

$$0 \tag{590}$$

We shall ponder the following:

$$1 \tag{591}$$

Clearly, the derivative of this is equal to

$$0 \tag{592}$$

Consider the following:

$$1 \tag{593}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{594}$$

We will take a closer look at this:

$$x^2 \tag{595}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{596}$$

The object of our ultimate interest is the following:

$$1 \tag{597}$$

Obviously, the derivative of this is equal to

$$0 \tag{598}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{599}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{600}$$

The following is worth a closer look:

$$1 \tag{601}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{602}$$

Consider the following:

$$x^2 \tag{603}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{604}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{605}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{606}$$

The following is worth a closer look:

$$1 \tag{607}$$

Clearly, the derivative of this is equal to

$$0 \tag{608}$$

The following is worth a closer look:

$$x^2 \tag{609}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{610}$$

Consider the following:

$$2 \tag{611}$$

Trivially, the derivative of this is equal to

$$0 \tag{612}$$

The object of our ultimate interest is the following:

$$1 \tag{613}$$

As you can see, the derivative of this is equal to

$$0 \tag{614}$$

We are going to study the following:

$$1 \tag{615}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{616}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{617}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{618}$$

We are going to study the following:

$$1 \tag{619}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{620}$$

The following is worth a closer look:

$$2 \cdot x \tag{621}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{622}$$

We shall ponder the following:

$$1 \tag{623}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{624}$$

We will take a closer look at this:

$$x^2 \tag{625}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{626}$$

The object of our ultimate interest is the following:

$$2 \tag{627}$$

As you can see, the derivative of this is equal to

$$0 \tag{628}$$

The object of our ultimate interest is the following:

$$1 \tag{629}$$

As you can see, the derivative of this is equal to

$$0 \tag{630}$$

The following is worth a closer look:

$$1 \tag{631}$$

Obviously, the derivative of this is equal to

$$0 \tag{632}$$

We will take a closer look at this:

$$x^2 \tag{633}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{634}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{635}$$

Obviously, the derivative of this is equal to

$$0 \tag{636}$$

The following is worth a closer look:

$$2 \cdot x \tag{637}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{638}$$

The object of our ultimate interest is the following:

$$1 \tag{639}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{640}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{641}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{642}$$

The object of our ultimate interest is the following:

$$2 \tag{643}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{644}$$

Consider the following:

$$2 \cdot x \tag{645}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{646}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{647}$$

Trivially, the derivative of this is equal to

$$0 \tag{648}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{649}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{650}$$

We will take a closer look at this:

$$2 \tag{651}$$

As you can see, the derivative of this is equal to

$$0 \tag{652}$$

We are going to study the following:

$$1 \tag{653}$$

As you can see, the derivative of this is equal to

$$0 \tag{654}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{655}$$

Obviously, the derivative of this is equal to

$$0 \tag{656}$$

We are going to study the following:

$$2 \tag{657}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{658}$$

We are going to study the following:

$$1 \tag{659}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{660}$$

The following is worth a closer look:

$$x^2 \tag{661}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{662}$$

The object of our ultimate interest is the following:

$$2 \tag{663}$$

Trivially, the derivative of this is equal to

$$0 \tag{664}$$

Consider the following:

$$1 \tag{665}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{666}$$

The object of our ultimate interest is the following:

$$1 \tag{667}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{668}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{669}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{670}$$

We will take a closer look at this:

$$1 \tag{671}$$

Trivially, the derivative of this is equal to

$$0 \tag{672}$$

Let us take a look at this:

$$1 \tag{673}$$

Clearly, the derivative of this is equal to

$$0 \tag{674}$$

We will take a closer look at this:

$$1 \tag{675}$$

Clearly, the derivative of this is equal to

$$0 \tag{676}$$

The object of our ultimate interest is the following:

$$x^2 \tag{677}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{678}$$

The following is worth a closer look:

$$2 \cdot x \tag{679}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{680}$$

We are going to study the following:

$$1 \tag{681}$$

As you can see, the derivative of this is equal to

$$0 \tag{682}$$

Let us take a look at this:

$$x^2 \tag{683}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{684}$$

The object of our ultimate interest is the following:

$$2 \tag{685}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{686}$$

Let us take a look at this:

$$1 \tag{687}$$

Trivially, the derivative of this is equal to

$$0 \tag{688}$$

The following is worth a closer look:

$$1 \tag{689}$$

As you can see, the derivative of this is equal to

$$0 \tag{690}$$

The following is worth a closer look:

$$x^2 \tag{691}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{692}$$

We will take a closer look at this:

$$1 \tag{693}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{694}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{695}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{696}$$

One shall regard the object in question with utmost interest:

$$1 \tag{697}$$

Obviously, the derivative of this is equal to

$$0 \tag{698}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{699}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{700}$$

We are going to study the following:

$$2 \tag{701}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{702}$$

We are going to study the following:

$$1 \tag{703}$$

Trivially, the derivative of this is equal to

$$0 \tag{704}$$

We are going to study the following:

$$1 \tag{705}$$

Obviously, the derivative of this is equal to

$$0 \tag{706}$$

Let us take a look at this:

$$x^2 \tag{707}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{708}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{709}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{710}$$

We shall ponder the following:

$$2 \cdot x \tag{711}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{712}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{713}$$

Obviously, the derivative of this is equal to

$$0 \tag{714}$$

We shall ponder the following:

$$x^2 \tag{715}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{716}$$

One shall regard the object in question with utmost interest:

$$2 \tag{717}$$

Obviously, the derivative of this is equal to

$$0 \tag{718}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{719}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{720}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{721}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{722}$$

We will take a closer look at this:

$$x^2 \tag{723}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{724}$$

We shall ponder the following:

$$2 \tag{725}$$

As you can see, the derivative of this is equal to

$$0 \tag{726}$$

The following is worth a closer look:

$$1 \tag{727}$$

Clearly, the derivative of this is equal to

$$0 \tag{728}$$

We are going to study the following:

$$2 \tag{729}$$

Clearly, the derivative of this is equal to

$$0 \tag{730}$$

The object of our ultimate interest is the following:

$$2 \tag{731}$$

Clearly, the derivative of this is equal to

$$0 \tag{732}$$

Consider the following:

$$1 \tag{733}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{734}$$

Let us take a look at this:

$$x^2 \tag{735}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{736}$$

Consider the following:

$$2 \tag{737}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{738}$$

The following is worth a closer look:

$$1 \tag{739}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{740}$$

One shall regard the object in question with utmost interest:

$$1 \tag{741}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{742}$$

Let us take a look at this:

$$x^2 \tag{743}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{744}$$

We are going to study the following:

$$1 \tag{745}$$

Trivially, the derivative of this is equal to

$$0 \tag{746}$$

One shall regard the object in question with utmost interest:

$$1 \tag{747}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{748}$$

We will take a closer look at this:

$$2 \cdot x \tag{749}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{750}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{751}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{752}$$

The following is worth a closer look:

$$x^2 \tag{753}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{754}$$

Consider the following:

$$2 \tag{755}$$

Trivially, the derivative of this is equal to

$$0 \tag{756}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{757}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{758}$$

We will take a closer look at this:

$$1 \tag{759}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{760}$$

Let us take a look at this:

$$x^2 \tag{761}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{762}$$

One shall regard the object in question with utmost interest:

$$1 \tag{763}$$

As you can see, the derivative of this is equal to

$$0 \tag{764}$$

We are going to study the following:

$$1 \tag{765}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{766}$$

Consider the following:

$$2 \cdot x \tag{767}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{768}$$

One shall regard the object in question with utmost interest:

$$1 \tag{769}$$

Obviously, the derivative of this is equal to

$$0 \tag{770}$$

Consider the following:

$$x^2 \tag{771}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{772}$$

Consider the following:

$$2 \tag{773}$$

Clearly, the derivative of this is equal to

$$0 \tag{774}$$

We are going to study the following:

$$1 \tag{775}$$

As you can see, the derivative of this is equal to

$$0 \tag{776}$$

We are going to study the following:

$$1 \tag{777}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{778}$$

The object of our ultimate interest is the following:

$$x^2 \tag{779}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{780}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{781}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{782}$$

Consider the following:

$$1 \tag{783}$$

As you can see, the derivative of this is equal to

$$0 \tag{784}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{785}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{786}$$

The following is worth a closer look:

$$1 \tag{787}$$

As you can see, the derivative of this is equal to

$$0 \tag{788}$$

Let us take a look at this:

$$x^2 \tag{789}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{790}$$

Let us take a look at this:

$$2 \tag{791}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{792}$$

One shall regard the object in question with utmost interest:

$$1 \tag{793}$$

As you can see, the derivative of this is equal to

$$0 \tag{794}$$

The following is worth a closer look:

$$1 \tag{795}$$

As you can see, the derivative of this is equal to

$$0 \tag{796}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{797}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{798}$$

We shall ponder the following:

$$1 \tag{799}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{800}$$

We shall ponder the following:

$$2 \cdot x \tag{801}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{802}$$

We will take a closer look at this:

$$1 \tag{803}$$

Obviously, the derivative of this is equal to

$$0 \tag{804}$$

The object of our ultimate interest is the following:

$$x^2 \tag{805}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{806}$$

Let us take a look at this:

$$2 \tag{807}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{808}$$

The following is worth a closer look:

$$1 \tag{809}$$

Trivially, the derivative of this is equal to

$$0 \tag{810}$$

We will take a closer look at this:

$$1 \tag{811}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{812}$$

Let us take a look at this:

$$x^2 \tag{813}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{814}$$

We will take a closer look at this:

$$2 \tag{815}$$

Trivially, the derivative of this is equal to

$$0 \tag{816}$$

We are going to study the following:

$$2 \cdot x \tag{817}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{818}$$

The following is worth a closer look:

$$1 \tag{819}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{820}$$

The following is worth a closer look:

$$x^2 \tag{821}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{822}$$

Let us take a look at this:

$$2 \tag{823}$$

Trivially, the derivative of this is equal to

$$0 \tag{824}$$

Consider the following:

$$2 \cdot x \tag{825}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{826}$$

Consider the following:

$$1 \tag{827}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{828}$$

We shall ponder the following:

$$x^2 \tag{829}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{830}$$

We shall ponder the following:

$$2 \tag{831}$$

Obviously, the derivative of this is equal to

$$0 \tag{832}$$

The object of our ultimate interest is the following:

$$1 \tag{833}$$

As you can see, the derivative of this is equal to

$$0 \tag{834}$$

The object of our ultimate interest is the following:

$$2 \tag{835}$$

As you can see, the derivative of this is equal to

$$0 \tag{836}$$

We shall ponder the following:

$$2 \tag{837}$$

Trivially, the derivative of this is equal to

$$0 \tag{838}$$

Let us take a look at this:

$$1 \tag{839}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{840}$$

We will take a closer look at this:

$$x^2 \tag{841}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{842}$$

Let us take a look at this:

$$2 \tag{843}$$

Clearly, the derivative of this is equal to

$$0 \tag{844}$$

We shall ponder the following:

$$1 \tag{845}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{846}$$

Let us take a look at this:

$$1 \tag{847}$$

Obviously, the derivative of this is equal to

$$0 \tag{848}$$

We will take a closer look at this:

$$x^2 \tag{849}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{850}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{851}$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (852)$$

The following is worth a closer look:

$$1 \quad (853)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (854)$$

Consider the following:

$$1 \quad (855)$$

Obviously, the derivative of this is equal to

$$0 \quad (856)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \quad (857)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (858)$$

We are going to study the following:

$$2 \cdot x \quad (859)$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (860)$$

One shall regard the object in question with utmost interest:

$$1 \quad (861)$$

Obviously, the derivative of this is equal to

$$0 \quad (862)$$

Let us take a look at this:

$$x^2 \quad (863)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (864)$$

The object of our ultimate interest is the following:

$$2 \quad (865)$$

As you can see, the derivative of this is equal to

$$0 \quad (866)$$

We will take a closer look at this:

$$2 \cdot x \quad (867)$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (868)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \quad (869)$$

As you can see, the derivative of this is equal to

$$0 \tag{870}$$

Consider the following:

$$x^2 \tag{871}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{872}$$

The following is worth a closer look:

$$2 \tag{873}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{874}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{875}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{876}$$

One shall regard the object in question with utmost interest:

$$2 \tag{877}$$

As you can see, the derivative of this is equal to

$$0 \tag{878}$$

The object of our ultimate interest is the following:

$$2 \tag{879}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{880}$$

The object of our ultimate interest is the following:

$$1 \tag{881}$$

As you can see, the derivative of this is equal to

$$0 \tag{882}$$

Consider the following:

$$x^2 \tag{883}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{884}$$

Let us take a look at this:

$$2 \tag{885}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{886}$$

We are going to study the following:

$$1 \tag{887}$$

Obviously, the derivative of this is equal to

$$0 \tag{888}$$

We are going to study the following:

$$1 \tag{889}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{890}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{891}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{892}$$

We are going to study the following:

$$1 \tag{893}$$

Clearly, the derivative of this is equal to

$$0 \tag{894}$$

Let us take a look at this:

$$2 \cdot x \tag{895}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{896}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{897}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{898}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{899}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{900}$$

We will take a closer look at this:

$$2 \tag{901}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{902}$$

Consider the following:

$$1 \tag{903}$$

Clearly, the derivative of this is equal to

$$0 \tag{904}$$

We are going to study the following:

$$1 \tag{905}$$

As you can see, the derivative of this is equal to

$$0 \tag{906}$$

We are going to study the following:

$$x^2 \tag{907}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{908}$$

Let us take a look at this:

$$2 \tag{909}$$

Clearly, the derivative of this is equal to

$$0 \tag{910}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{911}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{912}$$

We shall ponder the following:

$$1 \tag{913}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{914}$$

Consider the following:

$$x^2 \tag{915}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{916}$$

Let us take a look at this:

$$2 \tag{917}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{918}$$

Let us take a look at this:

$$1 \tag{919}$$

As you can see, the derivative of this is equal to

$$0 \tag{920}$$

The object of our ultimate interest is the following:

$$1 \tag{921}$$

Obviously, the derivative of this is equal to

$$0 \tag{922}$$

We shall ponder the following:

$$x^2 \tag{923}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{924}$$

The object of our ultimate interest is the following:

$$1 \tag{925}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{926}$$

Let us take a look at this:

$$2 \cdot x \tag{927}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{928}$$

The following is worth a closer look:

$$1 \tag{929}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{930}$$

Let us take a look at this:

$$x^2 \tag{931}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{932}$$

We will take a closer look at this:

$$2 \tag{933}$$

Obviously, the derivative of this is equal to

$$0 \tag{934}$$

The object of our ultimate interest is the following:

$$1 \tag{935}$$

As you can see, the derivative of this is equal to

$$0 \tag{936}$$

We are going to study the following:

$$1 \tag{937}$$

Obviously, the derivative of this is equal to

$$0 \tag{938}$$

The following is worth a closer look:

$$x^2 \tag{939}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{940}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{941}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{942}$$

Let us take a look at this:

$$1 \tag{943}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{944}$$

We will take a closer look at this:

$$x^2 \tag{945}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{946}$$

We shall ponder the following:

$$1 \tag{947}$$

As you can see, the derivative of this is equal to

$$0 \tag{948}$$

Let us take a look at this:

$$2 \tag{949}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{950}$$

Consider the following:

$$2 \cdot x \tag{951}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{952}$$

We shall ponder the following:

$$1 \tag{953}$$

As you can see, the derivative of this is equal to

$$0 \tag{954}$$

We will take a closer look at this:

$$x^2 \tag{955}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{956}$$

We shall ponder the following:

$$2 \tag{957}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{958}$$

One shall regard the object in question with utmost interest:

$$1 \tag{959}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{960}$$

We shall ponder the following:

$$1 \tag{961}$$

Clearly, the derivative of this is equal to

$$0 \tag{962}$$

Consider the following:

$$x^2 \tag{963}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{964}$$

The object of our ultimate interest is the following:

$$2 \tag{965}$$

Obviously, the derivative of this is equal to

$$0 \tag{966}$$

Let us take a look at this:

$$1 \tag{967}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{968}$$

The following is worth a closer look:

$$x^2 \tag{969}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{970}$$

Consider the following:

$$1 \tag{971}$$

As you can see, the derivative of this is equal to

$$0 \tag{972}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{973}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{974}$$

We shall ponder the following:

$$1 \tag{975}$$

Clearly, the derivative of this is equal to

$$0 \tag{976}$$

Consider the following:

$$x^2 \tag{977}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{978}$$

The following is worth a closer look:

$$2 \tag{979}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{980}$$

We are going to study the following:

$$2 \cdot x \tag{981}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{982}$$

Consider the following:

$$1 \tag{983}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{984}$$

Consider the following:

$$x^2 \tag{985}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{986}$$

We shall ponder the following:

$$2 \tag{987}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{988}$$

The following is worth a closer look:

$$1 \tag{989}$$

Trivially, the derivative of this is equal to

$$0 \tag{990}$$

Consider the following:

$$2 \tag{991}$$

Clearly, the derivative of this is equal to

$$0 \tag{992}$$

We shall ponder the following:

$$2 \tag{993}$$

Clearly, the derivative of this is equal to

$$0 \tag{994}$$

We shall ponder the following:

$$1 \tag{995}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{996}$$

The object of our ultimate interest is the following:

$$x^2 \tag{997}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{998}$$

Let us take a look at this:

$$2 \tag{999}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1000}$$

The following is worth a closer look:

$$1 \tag{1001}$$

As you can see, the derivative of this is equal to

$$0 \tag{1002}$$

We are going to study the following:

$$1 \tag{1003}$$

Trivially, the derivative of this is equal to

$$0 \tag{1004}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1005}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1006}$$

We will take a closer look at this:

$$2 \tag{1007}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1008}$$

We will take a closer look at this:

$$2 \cdot x \tag{1009}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1010}$$

We shall ponder the following:

$$1 \tag{1011}$$

Trivially, the derivative of this is equal to

$$0 \tag{1012}$$

Let us take a look at this:

$$x^2 \tag{1013}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1014}$$

We are going to study the following:

$$2 \tag{1015}$$

Clearly, the derivative of this is equal to

$$0 \tag{1016}$$

Consider the following:

$$1 \tag{1017}$$

Clearly, the derivative of this is equal to

$$0 \tag{1018}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1019}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1020}$$

Let us take a look at this:

$$1 \tag{1021}$$

Clearly, the derivative of this is equal to

$$0 \tag{1022}$$

The following is worth a closer look:

$$x^2 \tag{1023}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1024}$$

The following is worth a closer look:

$$2 \tag{1025}$$

Clearly, the derivative of this is equal to

$$0 \tag{1026}$$

We will take a closer look at this:

$$1 \tag{1027}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1028}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1029}$$

Trivially, the derivative of this is equal to

$$0 \tag{1030}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1031}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1032}$$

Consider the following:

$$1 \tag{1033}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1034}$$

We shall ponder the following:

$$x^2 \tag{1035}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1036}$$

We shall ponder the following:

$$2 \tag{1037}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1038}$$

We are going to study the following:

$$2 \cdot x \tag{1039}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1040}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1041}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1042}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1043}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1044)$$

Consider the following:

$$2 \quad (1045)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (1046)$$

The object of our ultimate interest is the following:

$$1 \quad (1047)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (1048)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \quad (1049)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (1050)$$

We will take a closer look at this:

$$2 \cdot x \quad (1051)$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (1052)$$

The following is worth a closer look:

$$1 \quad (1053)$$

Obviously, the derivative of this is equal to

$$0 \quad (1054)$$

We will take a closer look at this:

$$x^2 \quad (1055)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1056)$$

We shall ponder the following:

$$2 \quad (1057)$$

Clearly, the derivative of this is equal to

$$0 \quad (1058)$$

We are going to study the following:

$$2 \cdot x \quad (1059)$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (1060)$$

We will take a closer look at this:

$$1 \tag{1061}$$

Clearly, the derivative of this is equal to

$$0 \tag{1062}$$

Consider the following:

$$x^2 \tag{1063}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1064}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1065}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1066}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1067}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1068}$$

Consider the following:

$$2 \tag{1069}$$

Clearly, the derivative of this is equal to

$$0 \tag{1070}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1071}$$

Obviously, the derivative of this is equal to

$$0 \tag{1072}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1073}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1074}$$

The object of our ultimate interest is the following:

$$2 \tag{1075}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1076}$$

We shall ponder the following:

$$2 \tag{1077}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1078}$$

Let us take a look at this:

$$2 \cdot x \tag{1079}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1080}$$

We shall ponder the following:

$$1 \tag{1081}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1082}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1083}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1084}$$

We are going to study the following:

$$2 \tag{1085}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1086}$$

We shall ponder the following:

$$1 \tag{1087}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1088}$$

Consider the following:

$$2 \tag{1089}$$

Trivially, the derivative of this is equal to

$$0 \tag{1090}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1091}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1092}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1093}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1094}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{1095}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1096}$$

The following is worth a closer look:

$$2 \cdot x \tag{1097}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1098}$$

We will take a closer look at this:

$$1 \tag{1099}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1100}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1101}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1102}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{1103}$$

Obviously, the derivative of this is equal to

$$0 \tag{1104}$$

Consider the following:

$$2 \cdot x \tag{1105}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1106}$$

We shall ponder the following:

$$1 \tag{1107}$$

Trivially, the derivative of this is equal to

$$0 \tag{1108}$$

We are going to study the following:

$$x^2 \tag{1109}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1110}$$

We are going to study the following:

$$2 \tag{1111}$$

Clearly, the derivative of this is equal to (1112)

$$0$$

One shall regard the object in question with utmost interest:

$$1 \tag{1113}$$

As you can see, the derivative of this is equal to

$$0 \tag{1114}$$

Consider the following:

$$2 \tag{1115}$$

Clearly, the derivative of this is equal to

$$0 \tag{1116}$$

We shall ponder the following:

$$2 \tag{1117}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1118}$$

We shall ponder the following:

$$1 \tag{1119}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1120}$$

We will take a closer look at this:

$$x^2 \tag{1121}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1122}$$

We shall ponder the following:

$$2 \tag{1123}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1124}$$

The following is worth a closer look:

$$1 \tag{1125}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1126}$$

We shall ponder the following:

$$2 \tag{1127}$$

Clearly, the derivative of this is equal to

$$0 \tag{1128}$$

We will take a closer look at this:

$$2 \tag{1129}$$

Obviously, the derivative of this is equal to

$$0 \tag{1130}$$

We will take a closer look at this:

$$1 \tag{1131}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1132}$$

The following is worth a closer look:

$$x^2 \tag{1133}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1134}$$

The object of our ultimate interest is the following:

$$2 \tag{1135}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1136}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1137}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1138}$$

We will take a closer look at this:

$$1 \tag{1139}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1140}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1141}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1142}$$

We shall ponder the following:

$$2 \tag{1143}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1144}$$

We shall ponder the following:

$$1 \tag{1145}$$

As you can see, the derivative of this is equal to

$$0 \tag{1146}$$

The following is worth a closer look:

$$2 \tag{1147}$$

Trivially, the derivative of this is equal to

$$0 \tag{1148}$$

Let us take a look at this:

$$1 \tag{1149}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1150}$$

We will take a closer look at this:

$$x^2 \tag{1151}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1152}$$

Let us take a look at this:

$$1 \tag{1153}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1154}$$

The object of our ultimate interest is the following:

$$1 \tag{1155}$$

As you can see, the derivative of this is equal to

$$0 \tag{1156}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1157}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1158}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1159}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1160}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1161}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1162}$$

We will take a closer look at this:

$$2 \tag{1163}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1164}$$

We shall ponder the following:

$$2 \cdot x \tag{1165}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1166}$$

We will take a closer look at this:

$$1 \tag{1167}$$

Obviously, the derivative of this is equal to

$$0 \tag{1168}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1169}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1170}$$

Let us take a look at this:

$$2 \tag{1171}$$

Clearly, the derivative of this is equal to

$$0 \tag{1172}$$

The following is worth a closer look:

$$1 \tag{1173}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1174}$$

The following is worth a closer look:

$$2 \tag{1175}$$

Obviously, the derivative of this is equal to

$$0 \tag{1176}$$

The object of our ultimate interest is the following:

$$2 \tag{1177}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1178}$$

Consider the following:

$$1 \tag{1179}$$

Obviously, the derivative of this is equal to

$$0 \tag{1180}$$

We are going to study the following:

$$x^2 \tag{1181}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1182}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{1183}$$

As you can see, the derivative of this is equal to

$$0 \tag{1184}$$

The following is worth a closer look:

$$1 \tag{1185}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1186}$$

We shall ponder the following:

$$1 \tag{1187}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1188}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1189}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1190}$$

We are going to study the following:

$$1 \tag{1191}$$

Trivially, the derivative of this is equal to

$$0 \tag{1192}$$

The following is worth a closer look:

$$2 \cdot x \tag{1193}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1194}$$

The object of our ultimate interest is the following:

$$1 \tag{1195}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1196}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1197}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1198}$$

We will take a closer look at this:

$$2 \tag{1199}$$

Trivially, the derivative of this is equal to

$$0 \tag{1200}$$

We shall ponder the following:

$$1 \tag{1201}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1202}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1203}$$

Trivially, the derivative of this is equal to

$$0 \tag{1204}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1205}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1206}$$

We are going to study the following:

$$2 \tag{1207}$$

Clearly, the derivative of this is equal to

$$0 \tag{1208}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1209}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1210}$$

The following is worth a closer look:

$$1 \tag{1211}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1212}$$

The following is worth a closer look:

$$x^2 \tag{1213}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1214}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1215}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1216}$$

The object of our ultimate interest is the following:

$$1 \tag{1217}$$

Trivially, the derivative of this is equal to

$$0 \tag{1218}$$

Let us take a look at this:

$$1 \tag{1219}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1220}$$

We are going to study the following:

$$x^2 \tag{1221}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1222}$$

Let us take a look at this:

$$1 \tag{1223}$$

Trivially, the derivative of this is equal to

$$0 \tag{1224}$$

We are going to study the following:

$$1 \tag{1225}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1226}$$

Consider the following:

$$2 \cdot x \tag{1227}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1228}$$

The object of our ultimate interest is the following:

$$1 \tag{1229}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1230}$$

We shall ponder the following:

$$x^2 \tag{1231}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1232}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{1233}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1234}$$

Let us take a look at this:

$$1 \tag{1235}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1236}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1237}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1238}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1239}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1240}$$

We will take a closer look at this:

$$1 \tag{1241}$$

Clearly, the derivative of this is equal to

$$0 \tag{1242}$$

We will take a closer look at this:

$$2 \cdot x \tag{1243}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1244}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1245}$$

As you can see, the derivative of this is equal to

$$0 \tag{1246}$$

The following is worth a closer look:

$$x^2 \tag{1247}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1248}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1249}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1250}$$

We are going to study the following:

$$1 \tag{1251}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1252}$$

Consider the following:

$$1 \tag{1253}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1254}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1255}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1256}$$

Let us take a look at this:

$$2 \tag{1257}$$

Obviously, the derivative of this is equal to

$$0 \tag{1258}$$

We are going to study the following:

$$2 \cdot x \tag{1259}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1260}$$

We are going to study the following:

$$1 \tag{1261}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1262}$$

The following is worth a closer look:

$$x^2 \tag{1263}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1264}$$

The following is worth a closer look:

$$2 \tag{1265}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1266}$$

We are going to study the following:

$$2 \cdot x \tag{1267}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1268}$$

Let us take a look at this:

$$1 \tag{1269}$$

Obviously, the derivative of this is equal to

$$0 \tag{1270}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1271}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1272}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{1273}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1274}$$

Consider the following:

$$1 \tag{1275}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1276}$$

We will take a closer look at this:

$$2 \tag{1277}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1278}$$

Consider the following:

$$2 \tag{1279}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1280}$$

We shall ponder the following:

$$1 \tag{1281}$$

As you can see, the derivative of this is equal to

$$0 \tag{1282}$$

The following is worth a closer look:

$$x^2 \tag{1283}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1284}$$

The following is worth a closer look:

$$2 \tag{1285}$$

Obviously, the derivative of this is equal to

$$0 \tag{1286}$$

Consider the following:

$$1 \tag{1287}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1288}$$

The following is worth a closer look:

$$1 \tag{1289}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1290}$$

We are going to study the following:

$$x^2 \tag{1291}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1292}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1293}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1294}$$

The object of our ultimate interest is the following:

$$1 \tag{1295}$$

Trivially, the derivative of this is equal to

$$0 \tag{1296}$$

Let us take a look at this:

$$x - 2 \tag{1297}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{1298}$$

Let us take a look at this:

$$1 \tag{1299}$$

Trivially, the derivative of this is equal to

$$0 \tag{1300}$$

We will take a closer look at this:

$$x^2 \tag{1301}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1302}$$

Consider the following:

$$2 \cdot x \tag{1303}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1304}$$

Let us take a look at this:

$$1 \tag{1305}$$

As you can see, the derivative of this is equal to

$$0 \tag{1306}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1307}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1308}$$

Consider the following:

$$2 \tag{1309}$$

As you can see, the derivative of this is equal to

$$0 \tag{1310}$$

We will take a closer look at this:

$$1 \tag{1311}$$

Clearly, the derivative of this is equal to

$$0 \tag{1312}$$

We shall ponder the following:

$$1 \tag{1313}$$

Obviously, the derivative of this is equal to

$$0 \tag{1314}$$

We are going to study the following:

$$x^2 \tag{1315}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1316}$$

Let us take a look at this:

$$1 \tag{1317}$$

Clearly, the derivative of this is equal to

$$0 \tag{1318}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1319}$$

Clearly, the derivative of this is equal to

$$0 \tag{1320}$$

We will take a closer look at this:

$$2 \cdot x \tag{1321}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1322}$$

The object of our ultimate interest is the following:

$$1 \tag{1323}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1324}$$

We will take a closer look at this:

$$x^2 \tag{1325}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1326}$$

Let us take a look at this:

$$2 \tag{1327}$$

As you can see, the derivative of this is equal to

$$0 \tag{1328}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1329}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1330}$$

Consider the following:

$$1 \tag{1331}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1332}$$

We shall ponder the following:

$$x^2 \tag{1333}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1334}$$

The following is worth a closer look:

$$1 \tag{1335}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1336}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1337}$$

Obviously, the derivative of this is equal to

$$0 \tag{1338}$$

We will take a closer look at this:

$$1 \tag{1339}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1340}$$

Let us take a look at this:

$$x^2 \tag{1341}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1342}$$

Let us take a look at this:

$$2 \cdot x \tag{1343}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1344}$$

Consider the following:

$$1 \tag{1345}$$

As you can see, the derivative of this is equal to

$$0 \tag{1346}$$

Let us take a look at this:

$$x^2 \tag{1347}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1348}$$

We will take a closer look at this:

$$2 \tag{1349}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1350}$$

Let us take a look at this:

$$1 \tag{1351}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1352}$$

We are going to study the following:

$$1 \tag{1353}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1354}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1355}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1356}$$

We will take a closer look at this:

$$1 \tag{1357}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1358}$$

Let us take a look at this:

$$2 \cdot x \tag{1359}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1360}$$

The following is worth a closer look:

$$1 \tag{1361}$$

Obviously, the derivative of this is equal to

$$0 \tag{1362}$$

Consider the following:

$$x^2 \tag{1363}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1364}$$

We are going to study the following:

$$2 \tag{1365}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1366}$$

We will take a closer look at this:

$$1 \tag{1367}$$

As you can see, the derivative of this is equal to

$$0 \tag{1368}$$

Let us take a look at this:

$$1 \tag{1369}$$

Obviously, the derivative of this is equal to

$$0 \tag{1370}$$

We are going to study the following:

$$x^2 \tag{1371}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1372)$$

One shall regard the object in question with utmost interest:

$$2 \quad (1373)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (1374)$$

We will take a closer look at this:

$$2 \cdot x \quad (1375)$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (1376)$$

We shall ponder the following:

$$1 \quad (1377)$$

Obviously, the derivative of this is equal to

$$0 \quad (1378)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (1379)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1380)$$

One shall regard the object in question with utmost interest:

$$2 \quad (1381)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (1382)$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \quad (1383)$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (1384)$$

Let us take a look at this:

$$1 \quad (1385)$$

Obviously, the derivative of this is equal to

$$0 \quad (1386)$$

Consider the following:

$$x^2 \quad (1387)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1388)$$

One shall regard the object in question with utmost interest:

$$2 \tag{1389}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1390}$$

We are going to study the following:

$$1 \tag{1391}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1392}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1393}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1394}$$

We are going to study the following:

$$2 \tag{1395}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1396}$$

We are going to study the following:

$$1 \tag{1397}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1398}$$

Consider the following:

$$x^2 \tag{1399}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1400}$$

The object of our ultimate interest is the following:

$$2 \tag{1401}$$

Clearly, the derivative of this is equal to

$$0 \tag{1402}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1403}$$

Trivially, the derivative of this is equal to

$$0 \tag{1404}$$

The following is worth a closer look:

$$1 \tag{1405}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1406}$$

Consider the following:

$$x^2 \tag{1407}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1408}$$

The following is worth a closer look:

$$1 \tag{1409}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1410}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1411}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1412}$$

The object of our ultimate interest is the following:

$$1 \tag{1413}$$

Clearly, the derivative of this is equal to

$$0 \tag{1414}$$

We shall ponder the following:

$$x^2 \tag{1415}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1416}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1417}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1418}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1419}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1420}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1421}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1422}$$

Let us take a look at this:

$$2 \tag{1423}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1424}$$

Let us take a look at this:

$$1 \tag{1425}$$

Clearly, the derivative of this is equal to

$$0 \tag{1426}$$

Let us take a look at this:

$$1 \tag{1427}$$

As you can see, the derivative of this is equal to

$$0 \tag{1428}$$

The following is worth a closer look:

$$x^2 \tag{1429}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1430}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1431}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1432}$$

The following is worth a closer look:

$$1 \tag{1433}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1434}$$

Let us take a look at this:

$$2 \cdot x \tag{1435}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1436}$$

Consider the following:

$$1 \tag{1437}$$

As you can see, the derivative of this is equal to

$$0 \tag{1438}$$

The following is worth a closer look:

$$x^2 \tag{1439}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1440}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1441}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1442}$$

We are going to study the following:

$$1 \tag{1443}$$

Trivially, the derivative of this is equal to

$$0 \tag{1444}$$

Consider the following:

$$1 \tag{1445}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1446}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1447}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1448}$$

The following is worth a closer look:

$$1 \tag{1449}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1450}$$

The following is worth a closer look:

$$1 \tag{1451}$$

Clearly, the derivative of this is equal to

$$0 \tag{1452}$$

We are going to study the following:

$$1 \tag{1453}$$

Trivially, the derivative of this is equal to

$$0 \tag{1454}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1455}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1456}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1457}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1458}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1459}$$

Trivially, the derivative of this is equal to

$$0 \tag{1460}$$

We are going to study the following:

$$x^2 \tag{1461}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1462}$$

The following is worth a closer look:

$$2 \tag{1463}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1464}$$

The object of our ultimate interest is the following:

$$1 \tag{1465}$$

Trivially, the derivative of this is equal to

$$0 \tag{1466}$$

Consider the following:

$$1 \tag{1467}$$

Clearly, the derivative of this is equal to

$$0 \tag{1468}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1469}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1470}$$

We shall ponder the following:

$$1 \tag{1471}$$

Clearly, the derivative of this is equal to

$$0 \tag{1472}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{1473}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1474}$$

We shall ponder the following:

$$1 \tag{1475}$$

Trivially, the derivative of this is equal to

$$0 \tag{1476}$$

We will take a closer look at this:

$$x^2 \tag{1477}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1478}$$

We will take a closer look at this:

$$2 \tag{1479}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1480}$$

The object of our ultimate interest is the following:

$$1 \tag{1481}$$

Obviously, the derivative of this is equal to

$$0 \tag{1482}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1483}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1484}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1485}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1486}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1487}$$

As you can see, the derivative of this is equal to

$$0 \tag{1488}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1489}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1490}$$

The following is worth a closer look:

$$1 \tag{1491}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1492}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1493}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1494}$$

We shall ponder the following:

$$2 \tag{1495}$$

As you can see, the derivative of this is equal to

$$0 \tag{1496}$$

We are going to study the following:

$$2 \cdot x \tag{1497}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1498}$$

The object of our ultimate interest is the following:

$$1 \tag{1499}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1500}$$

We are going to study the following:

$$x^2 \tag{1501}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1502}$$

We will take a closer look at this:

$$2 \tag{1503}$$

As you can see, the derivative of this is equal to

$$0 \tag{1504}$$

We will take a closer look at this:

$$1 \tag{1505}$$

Trivially, the derivative of this is equal to

$$0 \tag{1506}$$

The following is worth a closer look:

$$2 \tag{1507}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1508}$$

Let us take a look at this:

$$2 \tag{1509}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1510}$$

We will take a closer look at this:

$$1 \tag{1511}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1512}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1513}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1514}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{1515}$$

Clearly, the derivative of this is equal to

$$0 \tag{1516}$$

We are going to study the following:

$$1 \tag{1517}$$

As you can see, the derivative of this is equal to

$$0 \tag{1518}$$

Consider the following:

$$1 \tag{1519}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1520}$$

We will take a closer look at this:

$$x^2 \tag{1521}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1522}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1523}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1524}$$

We are going to study the following:

$$1 \tag{1525}$$

Clearly, the derivative of this is equal to

$$0 \tag{1526}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{1527}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1528}$$

The object of our ultimate interest is the following:

$$1 \tag{1529}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1530}$$

Consider the following:

$$x^2 \tag{1531}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1532}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1533}$$

Trivially, the derivative of this is equal to

$$0 \tag{1534}$$

The following is worth a closer look:

$$1 \tag{1535}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1536}$$

We are going to study the following:

$$1 \tag{1537}$$

Clearly, the derivative of this is equal to

$$0 \tag{1538}$$

Consider the following:

$$x^2 \tag{1539}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1540}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1541}$$

Obviously, the derivative of this is equal to

$$0 \tag{1542}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1543}$$

Clearly, the derivative of this is equal to

$$0 \tag{1544}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1545}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1546}$$

We are going to study the following:

$$x^2 \tag{1547}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1548}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{1549}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1550}$$

We are going to study the following:

$$1 \tag{1551}$$

Trivially, the derivative of this is equal to

$$0 \tag{1552}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1553}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1554}$$

The following is worth a closer look:

$$2 \tag{1555}$$

Trivially, the derivative of this is equal to

$$0 \tag{1556}$$

We will take a closer look at this:

$$1 \tag{1557}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1558}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1559}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1560}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1561}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1562}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1563}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1564}$$

Let us take a look at this:

$$1 \tag{1565}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1566}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1567}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1568}$$

Let us take a look at this:

$$1 \tag{1569}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1570}$$

We are going to study the following:

$$x^2 \tag{1571}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1572}$$

We will take a closer look at this:

$$2 \tag{1573}$$

As you can see, the derivative of this is equal to

$$0 \tag{1574}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1575}$$

Obviously, the derivative of this is equal to

$$0 \tag{1576}$$

Let us take a look at this:

$$1 \tag{1577}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1578}$$

Let us take a look at this:

$$x^2 \tag{1579}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1580}$$

The object of our ultimate interest is the following:

$$1 \tag{1581}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1582}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1583}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1584}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1585}$$

Obviously, the derivative of this is equal to

$$0 \tag{1586}$$

The following is worth a closer look:

$$x^2 \tag{1587}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1588}$$

We will take a closer look at this:

$$2 \tag{1589}$$

Obviously, the derivative of this is equal to

$$0 \tag{1590}$$

The following is worth a closer look:

$$1 \tag{1591}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1592}$$

The following is worth a closer look:

$$1 \tag{1593}$$

Obviously, the derivative of this is equal to

$$0 \tag{1594}$$

We shall ponder the following:

$$x^2 \tag{1595}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1596}$$

Consider the following:

$$2 \tag{1597}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1598}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1599}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1600}$$

The object of our ultimate interest is the following:

$$1 \tag{1601}$$

As you can see, the derivative of this is equal to

$$0 \tag{1602}$$

We shall ponder the following:

$$x^2 \tag{1603}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1604}$$

The following is worth a closer look:

$$2 \tag{1605}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1606}$$

The following is worth a closer look:

$$2 \cdot x \tag{1607}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1608}$$

We are going to study the following:

$$1 \tag{1609}$$

Obviously, the derivative of this is equal to (1610)

Consider the following: (1611)

Unsurprisingly, the derivative of this is equal to (1612)

The object of our ultimate interest is the following: (1613)

Unsurprisingly, the derivative of this is equal to (1614)

We are going to study the following: (1615)

It is now obvious, that the derivative of this is equal to (1616)

Let us take a look at this: (1617)

As you can see, the derivative of this is equal to (1618)

Consider the following: (1619)

As you can see, the derivative of this is equal to (1620)

Let us take a look at this: (1621)

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to (1622)

We shall ponder the following: (1623)

Trivially, the derivative of this is equal to (1624)

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder: (1625)

Unsurprisingly, the derivative of this is equal to (1626)

We shall ponder the following:

$$1 \tag{1627}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1628}$$

We shall ponder the following:

$$1 \tag{1629}$$

As you can see, the derivative of this is equal to

$$0 \tag{1630}$$

Let us take a look at this:

$$x^2 \tag{1631}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1632}$$

Let us take a look at this:

$$1 \tag{1633}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1634}$$

The following is worth a closer look:

$$1 \tag{1635}$$

As you can see, the derivative of this is equal to

$$0 \tag{1636}$$

The object of our ultimate interest is the following:

$$1 \tag{1637}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1638}$$

We will take a closer look at this:

$$x^2 \tag{1639}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1640}$$

Let us take a look at this:

$$1 \tag{1641}$$

Clearly, the derivative of this is equal to

$$0 \tag{1642}$$

The object of our ultimate interest is the following:

$$1 \tag{1643}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1644}$$

Let us take a look at this:

$$x^2 \tag{1645}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1646}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{1647}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{1648}$$

Let us take a look at this:

$$1 \tag{1649}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1650}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1651}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1652}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1653}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1654}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1655}$$

Clearly, the derivative of this is equal to

$$0 \tag{1656}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1657}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1658}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1659}$$

Clearly, the derivative of this is equal to

$$0 \tag{1660}$$

Consider the following:

$$1 \tag{1661}$$

Obviously, the derivative of this is equal to

$$0 \tag{1662}$$

The object of our ultimate interest is the following:

$$1 \tag{1663}$$

Clearly, the derivative of this is equal to

$$0 \tag{1664}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1665}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1666}$$

Consider the following:

$$1 \tag{1667}$$

Clearly, the derivative of this is equal to

$$0 \tag{1668}$$

We are going to study the following:

$$1 \tag{1669}$$

Trivially, the derivative of this is equal to

$$0 \tag{1670}$$

Let us take a look at this:

$$2 \cdot x \tag{1671}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1672}$$

Consider the following:

$$1 \tag{1673}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1674}$$

We will take a closer look at this:

$$x^2 \tag{1675}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1676}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1677}$$

Clearly, the derivative of this is equal to

$$0 \tag{1678}$$

The object of our ultimate interest is the following:

$$1 \tag{1679}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1680}$$

We shall ponder the following:

$$1 \tag{1681}$$

Clearly, the derivative of this is equal to

$$0 \tag{1682}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1683}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1684}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1685}$$

Clearly, the derivative of this is equal to

$$0 \tag{1686}$$

We will take a closer look at this:

$$1 \tag{1687}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1688}$$

Let us take a look at this:

$$1 \tag{1689}$$

Clearly, the derivative of this is equal to

$$0 \tag{1690}$$

We are going to study the following:

$$x^2 \tag{1691}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1692}$$

We are going to study the following:

$$2 \cdot x \tag{1693}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1694}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1695}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1696}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1697}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1698}$$

The object of our ultimate interest is the following:

$$2 \tag{1699}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1700}$$

The following is worth a closer look:

$$1 \tag{1701}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1702}$$

We shall ponder the following:

$$1 \tag{1703}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1704}$$

We shall ponder the following:

$$x^2 \tag{1705}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1706}$$

The following is worth a closer look:

$$1 \tag{1707}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1708}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1709}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1710}$$

The following is worth a closer look:

$$1 \tag{1711}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1712}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1713}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1714}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{1715}$$

As you can see, the derivative of this is equal to

$$0 \tag{1716}$$

We shall ponder the following:

$$1 \tag{1717}$$

Trivially, the derivative of this is equal to

$$0 \tag{1718}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1719}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1720}$$

We will take a closer look at this:

$$x^2 \tag{1721}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1722}$$

Let us take a look at this:

$$2 \tag{1723}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1724}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1725}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1726}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1727}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1728}$$

We are going to study the following:

$$x^2 \tag{1729}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1730}$$

We will take a closer look at this:

$$2 \tag{1731}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1732}$$

Consider the following:

$$2 \cdot x \tag{1733}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1734}$$

Consider the following:

$$1 \tag{1735}$$

Obviously, the derivative of this is equal to

$$0 \tag{1736}$$

Consider the following:

$$x^2 \tag{1737}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1738}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1739}$$

Obviously, the derivative of this is equal to

$$0 \tag{1740}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1741}$$

Trivially, the derivative of this is equal to

$$0 \tag{1742}$$

Consider the following:

$$2 \tag{1743}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1744}$$

The object of our ultimate interest is the following:

$$2 \tag{1745}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1746}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1747}$$

Clearly, the derivative of this is equal to

$$0 \tag{1748}$$

We shall ponder the following:

$$x^2 \tag{1749}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1750}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{1751}$$

Obviously, the derivative of this is equal to

$$0 \tag{1752}$$

We shall ponder the following:

$$1 \tag{1753}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1754}$$

Let us take a look at this:

$$1 \tag{1755}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1756}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1757}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1758}$$

Consider the following:

$$1 \tag{1759}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1760}$$

We shall ponder the following:

$$1 \tag{1761}$$

As you can see, the derivative of this is equal to

$$0 \tag{1762}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{1763}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{1764}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1765}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1766}$$

We are going to study the following:

$$x^2 \tag{1767}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1768}$$

We will take a closer look at this:

$$2 \cdot x \tag{1769}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1770}$$

We will take a closer look at this:

$$1 \tag{1771}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1772}$$

Consider the following:

$$x^2 \tag{1773}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1774}$$

We will take a closer look at this:

$$2 \tag{1775}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1776}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1777}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1778}$$

We are going to study the following:

$$1 \tag{1779}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1780}$$

We shall ponder the following:

$$x^2 \tag{1781}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1782}$$

We will take a closer look at this:

$$1 \tag{1783}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1784}$$

We will take a closer look at this:

$$1 \tag{1785}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1786}$$

We are going to study the following:

$$2 \cdot x \tag{1787}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1788}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1789}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1790}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1791}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1792}$$

We shall ponder the following:

$$2 \tag{1793}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1794}$$

The object of our ultimate interest is the following:

$$1 \tag{1795}$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (1796)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \quad (1797)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (1798)$$

The following is worth a closer look:

$$x^2 \quad (1799)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1800)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \quad (1801)$$

Clearly, the derivative of this is equal to

$$0 \quad (1802)$$

Consider the following:

$$1 \quad (1803)$$

Clearly, the derivative of this is equal to

$$0 \quad (1804)$$

We will take a closer look at this:

$$1 \quad (1805)$$

Obviously, the derivative of this is equal to

$$0 \quad (1806)$$

We are going to study the following:

$$x^2 \quad (1807)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1808)$$

One shall regard the object in question with utmost interest:

$$1 \quad (1809)$$

Clearly, the derivative of this is equal to

$$0 \quad (1810)$$

The object of our ultimate interest is the following:

$$1 \quad (1811)$$

As you can see, the derivative of this is equal to

$$0 \quad (1812)$$

The following is worth a closer look:

$$x^2 \tag{1813}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1814}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1815}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1816}$$

We are going to study the following:

$$1 \tag{1817}$$

Clearly, the derivative of this is equal to

$$0 \tag{1818}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1819}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1820}$$

We will take a closer look at this:

$$2 \tag{1821}$$

Obviously, the derivative of this is equal to

$$0 \tag{1822}$$

We are going to study the following:

$$1 \tag{1823}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1824}$$

The following is worth a closer look:

$$1 \tag{1825}$$

Clearly, the derivative of this is equal to

$$0 \tag{1826}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{1827}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1828}$$

We will take a closer look at this:

$$1 \tag{1829}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1830}$$

We will take a closer look at this:

$$1 \tag{1831}$$

Clearly, the derivative of this is equal to

$$0 \tag{1832}$$

We will take a closer look at this:

$$x - 2 \tag{1833}$$

As you can see, the derivative of this is equal to

$$1 - 0 \tag{1834}$$

The object of our ultimate interest is the following:

$$1 \tag{1835}$$

Trivially, the derivative of this is equal to

$$0 \tag{1836}$$

The following is worth a closer look:

$$x^2 \tag{1837}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1838}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1839}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1840}$$

Consider the following:

$$x^2 \tag{1841}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1842}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x - 2 \tag{1843}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{1844}$$

The following is worth a closer look:

$$1 \tag{1845}$$

As you can see, the derivative of this is equal to

$$0 \tag{1846}$$

Let us take a look at this:

$$x^2 \tag{1847}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1848}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1849}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1850}$$

The following is worth a closer look:

$$1 \tag{1851}$$

Trivially, the derivative of this is equal to

$$0 \tag{1852}$$

The following is worth a closer look:

$$x^2 \tag{1853}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1854}$$

The following is worth a closer look:

$$2 \tag{1855}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1856}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1857}$$

Obviously, the derivative of this is equal to

$$0 \tag{1858}$$

We shall ponder the following:

$$1 \tag{1859}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1860}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1861}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1862}$$

The object of our ultimate interest is the following:

$$1 \tag{1863}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1864}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1865}$$

Trivially, the derivative of this is equal to

$$0 \tag{1866}$$

The following is worth a closer look:

$$2 \cdot x \tag{1867}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1868}$$

Consider the following:

$$1 \tag{1869}$$

As you can see, the derivative of this is equal to

$$0 \tag{1870}$$

We will take a closer look at this:

$$x^2 \tag{1871}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1872}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1873}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1874}$$

We are going to study the following:

$$1 \tag{1875}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1876}$$

The object of our ultimate interest is the following:

$$1 \tag{1877}$$

Clearly, the derivative of this is equal to

$$0 \tag{1878}$$

We shall ponder the following:

$$x^2 \tag{1879}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1880}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1881}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1882}$$

We shall ponder the following:

$$1 \tag{1883}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1884}$$

The object of our ultimate interest is the following:

$$1 \tag{1885}$$

Clearly, the derivative of this is equal to

$$0 \tag{1886}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1887}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1888}$$

Let us take a look at this:

$$2 \cdot x \tag{1889}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1890}$$

We shall ponder the following:

$$1 \tag{1891}$$

As you can see, the derivative of this is equal to

$$0 \tag{1892}$$

The following is worth a closer look:

$$x^2 \tag{1893}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1894}$$

We shall ponder the following:

$$2 \tag{1895}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1896}$$

The object of our ultimate interest is the following:

$$1 \tag{1897}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1898}$$

The object of our ultimate interest is the following:

$$1 \tag{1899}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1900}$$

We are going to study the following:

$$x^2 \tag{1901}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1902}$$

We are going to study the following:

$$1 \tag{1903}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1904}$$

We shall ponder the following:

$$2 \cdot x \tag{1905}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1906}$$

We will take a closer look at this:

$$1 \tag{1907}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1908}$$

We will take a closer look at this:

$$x^2 \tag{1909}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1910}$$

Let us take a look at this:

$$2 \tag{1911}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1912}$$

Consider the following:

$$1 \tag{1913}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1914}$$

The object of our ultimate interest is the following:

$$1 \tag{1915}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1916}$$

The following is worth a closer look:

$$x^2 \tag{1917}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1918}$$

Consider the following:

$$2 \tag{1919}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1920}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1921}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1922}$$

We shall ponder the following:

$$1 \tag{1923}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1924}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1925}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1926}$$

We will take a closer look at this:

$$2 \tag{1927}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1928}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{1929}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1930}$$

Consider the following:

$$1 \tag{1931}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1932}$$

We will take a closer look at this:

$$x^2 \tag{1933}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1934)$$

The following is worth a closer look:

$$2 \quad (1935)$$

Trivially, the derivative of this is equal to

$$0 \quad (1936)$$

The following is worth a closer look:

$$1 \quad (1937)$$

Obviously, the derivative of this is equal to

$$0 \quad (1938)$$

Let us take a look at this:

$$2 \quad (1939)$$

As you can see, the derivative of this is equal to

$$0 \quad (1940)$$

Consider the following:

$$2 \quad (1941)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (1942)$$

We shall ponder the following:

$$1 \quad (1943)$$

As you can see, the derivative of this is equal to

$$0 \quad (1944)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (1945)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1946)$$

We are going to study the following:

$$2 \quad (1947)$$

As you can see, the derivative of this is equal to

$$0 \quad (1948)$$

The object of our ultimate interest is the following:

$$1 \quad (1949)$$

Obviously, the derivative of this is equal to

$$0 \quad (1950)$$

One shall regard the object in question with utmost interest:

$$1 \quad (1951)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1952}$$

The following is worth a closer look:

$$x^2 \tag{1953}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1954}$$

We shall ponder the following:

$$1 \tag{1955}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1956}$$

Let us take a look at this:

$$1 \tag{1957}$$

Obviously, the derivative of this is equal to

$$0 \tag{1958}$$

Let us take a look at this:

$$x - 2 \tag{1959}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{1960}$$

The object of our ultimate interest is the following:

$$1 \tag{1961}$$

Trivially, the derivative of this is equal to

$$0 \tag{1962}$$

We will take a closer look at this:

$$x^2 \tag{1963}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1964}$$

The following is worth a closer look:

$$2 \cdot x \tag{1965}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1966}$$

The object of our ultimate interest is the following:

$$1 \tag{1967}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1968}$$

We shall ponder the following:

$$x^2 \tag{1969}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1970}$$

Consider the following:

$$2 \tag{1971}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1972}$$

Let us take a look at this:

$$1 \tag{1973}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1974}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1975}$$

As you can see, the derivative of this is equal to

$$0 \tag{1976}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1977}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1978}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1979}$$

Clearly, the derivative of this is equal to

$$0 \tag{1980}$$

We are going to study the following:

$$1 \tag{1981}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1982}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{1983}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1984}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{1985}$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (1986)$$

We shall ponder the following:

$$x^2 \quad (1987)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1988)$$

We shall ponder the following:

$$2 \quad (1989)$$

As you can see, the derivative of this is equal to

$$0 \quad (1990)$$

One shall regard the object in question with utmost interest:

$$1 \quad (1991)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (1992)$$

Let us take a look at this:

$$1 \quad (1993)$$

Clearly, the derivative of this is equal to

$$0 \quad (1994)$$

The following is worth a closer look:

$$x^2 \quad (1995)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1996)$$

Consider the following:

$$1 \quad (1997)$$

Clearly, the derivative of this is equal to

$$0 \quad (1998)$$

We shall ponder the following:

$$1 \quad (1999)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2000)$$

Let us take a look at this:

$$1 \quad (2001)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2002)$$

Consider the following:

$$x^2 \quad (2003)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2004}$$

We are going to study the following:

$$1 \tag{2005}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2006}$$

We will take a closer look at this:

$$1 \tag{2007}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2008}$$

We shall ponder the following:

$$x^2 \tag{2009}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2010}$$

Let us take a look at this:

$$2 \cdot x \tag{2011}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2012}$$

Let us take a look at this:

$$1 \tag{2013}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2014}$$

We are going to study the following:

$$x^2 \tag{2015}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2016}$$

The object of our ultimate interest is the following:

$$2 \tag{2017}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2018}$$

We will take a closer look at this:

$$1 \tag{2019}$$

Obviously, the derivative of this is equal to

$$0 \tag{2020}$$

We are going to study the following:

$$1 \tag{2021}$$

Trivially, the derivative of this is equal to

$$0 \tag{2022}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2023}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2024}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2025}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2026}$$

The following is worth a closer look:

$$1 \tag{2027}$$

Obviously, the derivative of this is equal to

$$0 \tag{2028}$$

We are going to study the following:

$$x - 2 \tag{2029}$$

Obviously, the derivative of this is equal to

$$1 - 0 \tag{2030}$$

Let us take a look at this:

$$1 \tag{2031}$$

Obviously, the derivative of this is equal to

$$0 \tag{2032}$$

We are going to study the following:

$$x^2 \tag{2033}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2034}$$

The following is worth a closer look:

$$1 \tag{2035}$$

Clearly, the derivative of this is equal to

$$0 \tag{2036}$$

We shall ponder the following:

$$x^2 \tag{2037}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2038}$$

Consider the following:

$$x - 2 \tag{2039}$$

Obviously, the derivative of this is equal to

$$1 - 0 \tag{2040}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2041}$$

Obviously, the derivative of this is equal to

$$0 \tag{2042}$$

We shall ponder the following:

$$x^2 \tag{2043}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2044}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2045}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2046}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2047}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2048}$$

Let us take a look at this:

$$x^2 \tag{2049}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2050}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{2051}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2052}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2053}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2054}$$

We shall ponder the following:

$$1 \tag{2055}$$

Obviously, the derivative of this is equal to

$$0 \tag{2056}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2057}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2058}$$

Consider the following:

$$1 \tag{2059}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2060}$$

We will take a closer look at this:

$$1 \tag{2061}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2062}$$

We are going to study the following:

$$x - 2 \tag{2063}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{2064}$$

We are going to study the following:

$$1 \tag{2065}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2066}$$

We are going to study the following:

$$x^2 \tag{2067}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2068}$$

We shall ponder the following:

$$1 \tag{2069}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2070}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2071}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2072}$$

We are going to study the following:

$$2 \cdot x \tag{2073}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2074}$$

We will take a closer look at this:

$$1 \tag{2075}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2076}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2077}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2078}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{2079}$$

Clearly, the derivative of this is equal to

$$0 \tag{2080}$$

Let us take a look at this:

$$1 \tag{2081}$$

Obviously, the derivative of this is equal to

$$0 \tag{2082}$$

The following is worth a closer look:

$$1 \tag{2083}$$

Trivially, the derivative of this is equal to

$$0 \tag{2084}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2085}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2086}$$

We shall ponder the following:

$$1 \tag{2087}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2088}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2089}$$

Clearly, the derivative of this is equal to

$$0 \tag{2090}$$

The following is worth a closer look:

$$2 \cdot x \tag{2091}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2092}$$

We shall ponder the following:

$$1 \tag{2093}$$

Trivially, the derivative of this is equal to

$$0 \tag{2094}$$

We will take a closer look at this:

$$x^2 \tag{2095}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2096}$$

Consider the following:

$$2 \tag{2097}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2098}$$

Let us take a look at this:

$$1 \tag{2099}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2100}$$

The following is worth a closer look:

$$1 \tag{2101}$$

As you can see, the derivative of this is equal to

$$0 \tag{2102}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2103}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2104}$$

We shall ponder the following:

$$1 \tag{2105}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2106}$$

Let us take a look at this:

$$1 \tag{2107}$$

Trivially, the derivative of this is equal to

$$0 \tag{2108}$$

We shall ponder the following:

$$1 \tag{2109}$$

As you can see, the derivative of this is equal to

$$0 \tag{2110}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2111}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2112}$$

We will take a closer look at this:

$$2 \cdot x \tag{2113}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2114}$$

The following is worth a closer look:

$$1 \tag{2115}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2116}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2117}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2118}$$

Let us take a look at this:

$$2 \tag{2119}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2120}$$

We shall ponder the following:

$$1 \tag{2121}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2122}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2123}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2124}$$

Let us take a look at this:

$$x^2 \tag{2125}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2126}$$

The object of our ultimate interest is the following:

$$1 \tag{2127}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2128}$$

The following is worth a closer look:

$$2 \cdot x \tag{2129}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2130}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2131}$$

Obviously, the derivative of this is equal to

$$0 \tag{2132}$$

The following is worth a closer look:

$$x^2 \tag{2133}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2134}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2135}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2136}$$

The object of our ultimate interest is the following:

$$1 \tag{2137}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2138}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2139}$$

Obviously, the derivative of this is equal to

$$0 \tag{2140}$$

We will take a closer look at this:

$$x^2 \tag{2141}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2142)$$

We will take a closer look at this:

$$2 \quad (2143)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2144)$$

The object of our ultimate interest is the following:

$$2 \cdot x \quad (2145)$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2146)$$

Consider the following:

$$1 \quad (2147)$$

Trivially, the derivative of this is equal to

$$0 \quad (2148)$$

We will take a closer look at this:

$$x^2 \quad (2149)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2150)$$

We are going to study the following:

$$2 \quad (2151)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2152)$$

Consider the following:

$$2 \cdot x \quad (2153)$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2154)$$

The object of our ultimate interest is the following:

$$1 \quad (2155)$$

Clearly, the derivative of this is equal to

$$0 \quad (2156)$$

We are going to study the following:

$$x^2 \quad (2157)$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2158)$$

We will take a closer look at this:

$$2 \tag{2159}$$

Trivially, the derivative of this is equal to

$$0 \tag{2160}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2161}$$

As you can see, the derivative of this is equal to

$$0 \tag{2162}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{2163}$$

Clearly, the derivative of this is equal to

$$0 \tag{2164}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{2165}$$

Clearly, the derivative of this is equal to

$$0 \tag{2166}$$

We will take a closer look at this:

$$1 \tag{2167}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2168}$$

We are going to study the following:

$$x^2 \tag{2169}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2170}$$

We will take a closer look at this:

$$2 \tag{2171}$$

As you can see, the derivative of this is equal to

$$0 \tag{2172}$$

The object of our ultimate interest is the following:

$$1 \tag{2173}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2174}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2175}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2176}$$

Consider the following:

$$x^2 \tag{2177}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2178}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2179}$$

Trivially, the derivative of this is equal to

$$0 \tag{2180}$$

The following is worth a closer look:

$$1 \tag{2181}$$

As you can see, the derivative of this is equal to

$$0 \tag{2182}$$

We are going to study the following:

$$x - 2 \tag{2183}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{2184}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2185}$$

As you can see, the derivative of this is equal to

$$0 \tag{2186}$$

We are going to study the following:

$$x^2 \tag{2187}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2188}$$

The following is worth a closer look:

$$2 \cdot x \tag{2189}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2190}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2191}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2192}$$

Let us take a look at this:

$$x^2 \tag{2193}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2194}$$

The following is worth a closer look:

$$2 \tag{2195}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2196}$$

The following is worth a closer look:

$$1 \tag{2197}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2198}$$

The object of our ultimate interest is the following:

$$1 \tag{2199}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2200}$$

We will take a closer look at this:

$$x^2 \tag{2201}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2202}$$

Consider the following:

$$1 \tag{2203}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2204}$$

Consider the following:

$$1 \tag{2205}$$

As you can see, the derivative of this is equal to

$$0 \tag{2206}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2207}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2208}$$

The object of our ultimate interest is the following:

$$1 \tag{2209}$$

Trivially, the derivative of this is equal to

$$0 \tag{2210}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2211}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2212}$$

We are going to study the following:

$$2 \tag{2213}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2214}$$

The object of our ultimate interest is the following:

$$1 \tag{2215}$$

Obviously, the derivative of this is equal to

$$0 \tag{2216}$$

We are going to study the following:

$$1 \tag{2217}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2218}$$

We shall ponder the following:

$$x^2 \tag{2219}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2220}$$

We are going to study the following:

$$1 \tag{2221}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2222}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2223}$$

Obviously, the derivative of this is equal to

$$0 \tag{2224}$$

We will take a closer look at this:

$$1 \tag{2225}$$

Trivially, the derivative of this is equal to

$$0 \tag{2226}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2227}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2228)$$

We will take a closer look at this:

$$1 \quad (2229)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2230)$$

We are going to study the following:

$$1 \quad (2231)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2232)$$

We are going to study the following:

$$x^2 \quad (2233)$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2234)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x - 2 \quad (2235)$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \quad (2236)$$

We shall ponder the following:

$$1 \quad (2237)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2238)$$

We will take a closer look at this:

$$x^2 \quad (2239)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2240)$$

We are going to study the following:

$$2 \cdot x \quad (2241)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2242)$$

We will take a closer look at this:

$$1 \quad (2243)$$

Obviously, the derivative of this is equal to

$$0 \quad (2244)$$

The object of our ultimate interest is the following:

$$x^2 \tag{2245}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2246}$$

Let us take a look at this:

$$2 \tag{2247}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2248}$$

The following is worth a closer look:

$$1 \tag{2249}$$

Obviously, the derivative of this is equal to

$$0 \tag{2250}$$

We shall ponder the following:

$$1 \tag{2251}$$

As you can see, the derivative of this is equal to

$$0 \tag{2252}$$

We are going to study the following:

$$x^2 \tag{2253}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2254}$$

Consider the following:

$$1 \tag{2255}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2256}$$

We are going to study the following:

$$1 \tag{2257}$$

Clearly, the derivative of this is equal to

$$0 \tag{2258}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{2259}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{2260}$$

The object of our ultimate interest is the following:

$$1 \tag{2261}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2262}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2263}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2264}$$

We shall ponder the following:

$$1 \tag{2265}$$

As you can see, the derivative of this is equal to

$$0 \tag{2266}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2267}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2268}$$

Let us take a look at this:

$$2 \cdot x \tag{2269}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2270}$$

The following is worth a closer look:

$$1 \tag{2271}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2272}$$

We shall ponder the following:

$$x^2 \tag{2273}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2274}$$

The object of our ultimate interest is the following:

$$2 \tag{2275}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2276}$$

The following is worth a closer look:

$$1 \tag{2277}$$

As you can see, the derivative of this is equal to

$$0 \tag{2278}$$

We are going to study the following:

$$1 \tag{2279}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2280}$$

Let us take a look at this:

$$x^2 \tag{2281}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2282}$$

We shall ponder the following:

$$1 \tag{2283}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2284}$$

The object of our ultimate interest is the following:

$$1 \tag{2285}$$

As you can see, the derivative of this is equal to

$$0 \tag{2286}$$

We are going to study the following:

$$x - 2 \tag{2287}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{2288}$$

We are going to study the following:

$$1 \tag{2289}$$

Clearly, the derivative of this is equal to

$$0 \tag{2290}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2291}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2292}$$

The following is worth a closer look:

$$1 \tag{2293}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2294}$$

The following is worth a closer look:

$$x^2 \tag{2295}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2296}$$

The following is worth a closer look:

$$x - 2 \tag{2297}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{2298}$$

We shall ponder the following:

$$x + 1 \tag{2299}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{2300}$$

Consider the following:

$$2 \tag{2301}$$

Trivially, the derivative of this is equal to

$$0 \tag{2302}$$

The following is worth a closer look:

$$\sin x \tag{2303}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{2304}$$

The object of our ultimate interest is the following:

$$1 \tag{2305}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2306}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2307}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2308}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{2309}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2310}$$

Consider the following:

$$1 \tag{2311}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2312}$$

Consider the following:

$$x^2 \tag{2313}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2314}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{2315}$$

Clearly, the derivative of this is equal to (2316)

Consider the following: (2317)

Unsurprisingly, the derivative of this is equal to (2318)

The object of our ultimate interest is the following: (2319)

As you can see, the derivative of this is equal to (2320)

One shall regard the object in question with utmost interest: (2321)

It can be easily proved, that the derivative of this is equal to (2322)

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder: (2323)

Trivially, the derivative of this is equal to (2324)

The object of our ultimate interest is the following: (2325)

As you can see, the derivative of this is equal to (2326)

We shall ponder the following: (2327)

As you can see, the derivative of this is equal to (2328)

The following is worth a closer look: (2329)

Clearly, the derivative of this is equal to (2330)

The following is worth a closer look: (2331)

Obviously, the derivative of this is equal to (2332)

We shall ponder the following:

$$2 \tag{2333}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2334}$$

The following is worth a closer look:

$$1 \tag{2335}$$

Clearly, the derivative of this is equal to

$$0 \tag{2336}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2337}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2338}$$

We will take a closer look at this:

$$x^2 \tag{2339}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2340}$$

Let us take a look at this:

$$1 \tag{2341}$$

Clearly, the derivative of this is equal to

$$0 \tag{2342}$$

Let us take a look at this:

$$1 \tag{2343}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2344}$$

We will take a closer look at this:

$$1 \tag{2345}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2346}$$

We are going to study the following:

$$x^2 \tag{2347}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2348}$$

Consider the following:

$$2 \cdot x \tag{2349}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2350}$$

We will take a closer look at this:

$$1 \tag{2351}$$

Trivially, the derivative of this is equal to

$$0 \tag{2352}$$

Let us take a look at this:

$$x^2 \tag{2353}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2354}$$

The following is worth a closer look:

$$2 \tag{2355}$$

As you can see, the derivative of this is equal to

$$0 \tag{2356}$$

The following is worth a closer look:

$$1 \tag{2357}$$

As you can see, the derivative of this is equal to

$$0 \tag{2358}$$

We shall ponder the following:

$$1 \tag{2359}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2360}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2361}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2362}$$

We will take a closer look at this:

$$1 \tag{2363}$$

As you can see, the derivative of this is equal to

$$0 \tag{2364}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{2365}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2366}$$

Let us take a look at this:

$$1 \tag{2367}$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2368)$$

We will take a closer look at this:

$$x^2 \quad (2369)$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2370)$$

We will take a closer look at this:

$$2 \quad (2371)$$

As you can see, the derivative of this is equal to

$$0 \quad (2372)$$

We are going to study the following:

$$1 \quad (2373)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2374)$$

One shall regard the object in question with utmost interest:

$$1 \quad (2375)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2376)$$

The following is worth a closer look:

$$x^2 \quad (2377)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2378)$$

One shall regard the object in question with utmost interest:

$$2 \quad (2379)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2380)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \quad (2381)$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2382)$$

Let us take a look at this:

$$1 \quad (2383)$$

As you can see, the derivative of this is equal to

$$0 \tag{2384}$$

We are going to study the following:

$$x^2 \tag{2385}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2386}$$

The object of our ultimate interest is the following:

$$2 \tag{2387}$$

Trivially, the derivative of this is equal to

$$0 \tag{2388}$$

Consider the following:

$$2 \cdot x \tag{2389}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2390}$$

The following is worth a closer look:

$$1 \tag{2391}$$

Trivially, the derivative of this is equal to

$$0 \tag{2392}$$

Let us take a look at this:

$$x^2 \tag{2393}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2394}$$

We are going to study the following:

$$2 \tag{2395}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2396}$$

The following is worth a closer look:

$$1 \tag{2397}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2398}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{2399}$$

Obviously, the derivative of this is equal to

$$0 \tag{2400}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2401}$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2402)$$

We shall ponder the following:

$$1 \quad (2403)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2404)$$

Let us take a look at this:

$$x^2 \quad (2405)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2406)$$

Let us take a look at this:

$$2 \quad (2407)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2408)$$

Let us take a look at this:

$$1 \quad (2409)$$

Obviously, the derivative of this is equal to

$$0 \quad (2410)$$

One shall regard the object in question with utmost interest:

$$1 \quad (2411)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2412)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \quad (2413)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2414)$$

We are going to study the following:

$$1 \quad (2415)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2416)$$

We will take a closer look at this:

$$1 \quad (2417)$$

Clearly, the derivative of this is equal to

$$0 \quad (2418)$$

Consider the following:

$$x - 2 \tag{2419}$$

As you can see, the derivative of this is equal to

$$1 - 0 \tag{2420}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2421}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2422}$$

Let us take a look at this:

$$x^2 \tag{2423}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2424}$$

We shall ponder the following:

$$2 \cdot x \tag{2425}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2426}$$

We shall ponder the following:

$$1 \tag{2427}$$

As you can see, the derivative of this is equal to

$$0 \tag{2428}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2429}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2430}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2431}$$

As you can see, the derivative of this is equal to

$$0 \tag{2432}$$

The object of our ultimate interest is the following:

$$1 \tag{2433}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2434}$$

We are going to study the following:

$$1 \tag{2435}$$

Clearly, the derivative of this is equal to

$$0 \quad (2436)$$

We shall ponder the following:

$$x^2 \quad (2437)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2438)$$

The following is worth a closer look:

$$1 \quad (2439)$$

Obviously, the derivative of this is equal to

$$0 \quad (2440)$$

We shall ponder the following:

$$1 \quad (2441)$$

Obviously, the derivative of this is equal to

$$0 \quad (2442)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \quad (2443)$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2444)$$

The following is worth a closer look:

$$1 \quad (2445)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2446)$$

Let us take a look at this:

$$x^2 \quad (2447)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2448)$$

The following is worth a closer look:

$$2 \quad (2449)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2450)$$

The following is worth a closer look:

$$1 \quad (2451)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2452)$$

We shall ponder the following:

$$1 \quad (2453)$$

Trivially, the derivative of this is equal to

$$0 \tag{2454}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2455}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2456}$$

Consider the following:

$$1 \tag{2457}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2458}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2459}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2460}$$

The object of our ultimate interest is the following:

$$1 \tag{2461}$$

Clearly, the derivative of this is equal to

$$0 \tag{2462}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2463}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2464}$$

We will take a closer look at this:

$$1 \tag{2465}$$

Clearly, the derivative of this is equal to

$$0 \tag{2466}$$

Let us take a look at this:

$$1 \tag{2467}$$

Clearly, the derivative of this is equal to

$$0 \tag{2468}$$

The following is worth a closer look:

$$x^2 \tag{2469}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2470}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x - 2 \tag{2471}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{2472}$$

We will take a closer look at this:

$$1 \tag{2473}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2474}$$

The following is worth a closer look:

$$x^2 \tag{2475}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2476}$$

We are going to study the following:

$$2 \cdot x \tag{2477}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2478}$$

We are going to study the following:

$$1 \tag{2479}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2480}$$

We shall ponder the following:

$$x^2 \tag{2481}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2482}$$

Consider the following:

$$2 \tag{2483}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2484}$$

We shall ponder the following:

$$1 \tag{2485}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2486}$$

Let us take a look at this:

$$1 \tag{2487}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2488}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2489}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2490}$$

We will take a closer look at this:

$$1 \tag{2491}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2492}$$

The object of our ultimate interest is the following:

$$1 \tag{2493}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2494}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{2495}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{2496}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2497}$$

Trivially, the derivative of this is equal to

$$0 \tag{2498}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2499}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2500}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2501}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2502}$$

Consider the following:

$$x^2 \tag{2503}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2504)$$

We are going to study the following:

$$2 \cdot x \quad (2505)$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2506)$$

One shall regard the object in question with utmost interest:

$$1 \quad (2507)$$

Clearly, the derivative of this is equal to

$$0 \quad (2508)$$

Consider the following:

$$x^2 \quad (2509)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2510)$$

Consider the following:

$$2 \quad (2511)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2512)$$

The following is worth a closer look:

$$1 \quad (2513)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2514)$$

We will take a closer look at this:

$$1 \quad (2515)$$

Clearly, the derivative of this is equal to

$$0 \quad (2516)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (2517)$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2518)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \quad (2519)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2520)$$

The object of our ultimate interest is the following:

$$1 \tag{2521}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2522}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{2523}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{2524}$$

We shall ponder the following:

$$1 \tag{2525}$$

Trivially, the derivative of this is equal to

$$0 \tag{2526}$$

Let us take a look at this:

$$x^2 \tag{2527}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2528}$$

We shall ponder the following:

$$1 \tag{2529}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2530}$$

Consider the following:

$$x^2 \tag{2531}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2532}$$

Let us take a look at this:

$$x - 2 \tag{2533}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{2534}$$

The following is worth a closer look:

$$x + 1 \tag{2535}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{2536}$$

The object of our ultimate interest is the following:

$$1 \tag{2537}$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2538)$$

Let us take a look at this:

$$2 \quad (2539)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2540)$$

We are going to study the following:

$$\sin x \quad (2541)$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \quad (2542)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x + 1 \quad (2543)$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \quad (2544)$$

The object of our ultimate interest is the following:

$$4 \quad (2545)$$

Obviously, the derivative of this is equal to

$$0 \quad (2546)$$

We shall ponder the following:

$$2 \quad (2547)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2548)$$

We shall ponder the following:

$$\cos x \quad (2549)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$- \sin x \cdot 1 \quad (2550)$$

Let us take a look at this:

$$x + 1 \quad (2551)$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \quad (2552)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \quad (2553)$$

Trivially, the derivative of this is equal to

$$0 \quad (2554)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\sin x \tag{2555}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2556}$$

The object of our ultimate interest is the following:

$$1 \tag{2557}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2558}$$

Consider the following:

$$x^2 \tag{2559}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2560}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{2561}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2562}$$

We are going to study the following:

$$1 \tag{2563}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2564}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2565}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2566}$$

We will take a closer look at this:

$$2 \tag{2567}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2568}$$

We shall ponder the following:

$$1 \tag{2569}$$

Clearly, the derivative of this is equal to

$$0 \tag{2570}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2571}$$

Obviously, the derivative of this is equal to

$$0 \quad (2572)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (2573)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2574)$$

We will take a closer look at this:

$$1 \quad (2575)$$

Clearly, the derivative of this is equal to

$$0 \quad (2576)$$

Consider the following:

$$1 \quad (2577)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2578)$$

Let us take a look at this:

$$2 \cdot x \quad (2579)$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2580)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \quad (2581)$$

As you can see, the derivative of this is equal to

$$0 \quad (2582)$$

The following is worth a closer look:

$$x^2 \quad (2583)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2584)$$

Consider the following:

$$2 \quad (2585)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2586)$$

One shall regard the object in question with utmost interest:

$$1 \quad (2587)$$

Clearly, the derivative of this is equal to

$$0 \quad (2588)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2589}$$

Trivially, the derivative of this is equal to

$$0 \tag{2590}$$

We shall ponder the following:

$$x^2 \tag{2591}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2592}$$

The object of our ultimate interest is the following:

$$1 \tag{2593}$$

Obviously, the derivative of this is equal to

$$0 \tag{2594}$$

Consider the following:

$$1 \tag{2595}$$

As you can see, the derivative of this is equal to

$$0 \tag{2596}$$

We will take a closer look at this:

$$1 \tag{2597}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2598}$$

Consider the following:

$$x^2 \tag{2599}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2600}$$

We are going to study the following:

$$2 \cdot x \tag{2601}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2602}$$

We shall ponder the following:

$$1 \tag{2603}$$

Obviously, the derivative of this is equal to

$$0 \tag{2604}$$

Let us take a look at this:

$$x^2 \tag{2605}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2606}$$

We are going to study the following:

$$2 \tag{2607}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2608}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2609}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2610}$$

The object of our ultimate interest is the following:

$$1 \tag{2611}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2612}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2613}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2614}$$

We are going to study the following:

$$1 \tag{2615}$$

Obviously, the derivative of this is equal to

$$0 \tag{2616}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{2617}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2618}$$

Let us take a look at this:

$$1 \tag{2619}$$

Clearly, the derivative of this is equal to

$$0 \tag{2620}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2621}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2622}$$

Consider the following:

$$2 \tag{2623}$$

Trivially, the derivative of this is equal to (2624)

$$0$$

Consider the following:

$$1 \tag{2625}$$

Obviously, the derivative of this is equal to

$$0 \tag{2626}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2627}$$

Obviously, the derivative of this is equal to

$$0 \tag{2628}$$

The following is worth a closer look:

$$x^2 \tag{2629}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2630}$$

We are going to study the following:

$$2 \tag{2631}$$

Trivially, the derivative of this is equal to

$$0 \tag{2632}$$

We will take a closer look at this:

$$2 \cdot x \tag{2633}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2634}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2635}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2636}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2637}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2638}$$

We will take a closer look at this:

$$2 \tag{2639}$$

Clearly, the derivative of this is equal to

$$0 \tag{2640}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{2641}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2642}$$

We shall ponder the following:

$$1 \tag{2643}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2644}$$

We shall ponder the following:

$$x^2 \tag{2645}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2646}$$

The following is worth a closer look:

$$2 \tag{2647}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2648}$$

We are going to study the following:

$$1 \tag{2649}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2650}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{2651}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2652}$$

We are going to study the following:

$$2 \tag{2653}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2654}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2655}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2656}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2657}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2658}$$

We shall ponder the following:

$$2 \tag{2659}$$

Trivially, the derivative of this is equal to

$$0 \tag{2660}$$

The following is worth a closer look:

$$1 \tag{2661}$$

Obviously, the derivative of this is equal to

$$0 \tag{2662}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2663}$$

Trivially, the derivative of this is equal to

$$0 \tag{2664}$$

We shall ponder the following:

$$x^2 \tag{2665}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2666}$$

Consider the following:

$$1 \tag{2667}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2668}$$

Consider the following:

$$1 \tag{2669}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2670}$$

Consider the following:

$$x - 2 \tag{2671}$$

As you can see, the derivative of this is equal to

$$1 - 0 \tag{2672}$$

The object of our ultimate interest is the following:

$$1 \tag{2673}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2674}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2675}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2676)$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \quad (2677)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2678)$$

We are going to study the following:

$$1 \quad (2679)$$

Trivially, the derivative of this is equal to

$$0 \quad (2680)$$

Consider the following:

$$x^2 \quad (2681)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2682)$$

Let us take a look at this:

$$2 \quad (2683)$$

Trivially, the derivative of this is equal to

$$0 \quad (2684)$$

We are going to study the following:

$$1 \quad (2685)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2686)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \quad (2687)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2688)$$

We shall ponder the following:

$$x^2 \quad (2689)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2690)$$

We are going to study the following:

$$1 \quad (2691)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2692)$$

We are going to study the following:

$$1 \quad (2693)$$

Obviously, the derivative of this is equal to

$$0 \tag{2694}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{2695}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2696}$$

We will take a closer look at this:

$$1 \tag{2697}$$

Obviously, the derivative of this is equal to

$$0 \tag{2698}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2699}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2700}$$

The object of our ultimate interest is the following:

$$2 \tag{2701}$$

Obviously, the derivative of this is equal to

$$0 \tag{2702}$$

The object of our ultimate interest is the following:

$$1 \tag{2703}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2704}$$

We will take a closer look at this:

$$1 \tag{2705}$$

Trivially, the derivative of this is equal to

$$0 \tag{2706}$$

We are going to study the following:

$$x^2 \tag{2707}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2708}$$

Let us take a look at this:

$$1 \tag{2709}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2710}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2711}$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2712)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \quad (2713)$$

Obviously, the derivative of this is equal to

$$0 \quad (2714)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (2715)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2716)$$

Let us take a look at this:

$$1 \quad (2717)$$

Clearly, the derivative of this is equal to

$$0 \quad (2718)$$

Let us take a look at this:

$$1 \quad (2719)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2720)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \quad (2721)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2722)$$

The following is worth a closer look:

$$x - 2 \quad (2723)$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \quad (2724)$$

We are going to study the following:

$$1 \quad (2725)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2726)$$

The following is worth a closer look:

$$x^2 \quad (2727)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2728)$$

The following is worth a closer look:

$$2 \cdot x \tag{2729}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2730}$$

The object of our ultimate interest is the following:

$$1 \tag{2731}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2732}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2733}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2734}$$

The following is worth a closer look:

$$2 \tag{2735}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2736}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2737}$$

Obviously, the derivative of this is equal to

$$0 \tag{2738}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2739}$$

As you can see, the derivative of this is equal to

$$0 \tag{2740}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2741}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2742}$$

We will take a closer look at this:

$$1 \tag{2743}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2744}$$

Consider the following:

$$1 \tag{2745}$$

As you can see, the derivative of this is equal to

$$0 \tag{2746}$$

Let us take a look at this:

$$x - 2 \tag{2747}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{2748}$$

Consider the following:

$$1 \tag{2749}$$

As you can see, the derivative of this is equal to

$$0 \tag{2750}$$

We are going to study the following:

$$x^2 \tag{2751}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2752}$$

We shall ponder the following:

$$1 \tag{2753}$$

Obviously, the derivative of this is equal to

$$0 \tag{2754}$$

We shall ponder the following:

$$x^2 \tag{2755}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2756}$$

The following is worth a closer look:

$$2 \cdot x \tag{2757}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2758}$$

The object of our ultimate interest is the following:

$$1 \tag{2759}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2760}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2761}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2762)$$

We are going to study the following:

$$2 \quad (2763)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2764)$$

The object of our ultimate interest is the following:

$$1 \quad (2765)$$

Clearly, the derivative of this is equal to

$$0 \quad (2766)$$

We are going to study the following:

$$1 \quad (2767)$$

Obviously, the derivative of this is equal to

$$0 \quad (2768)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (2769)$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2770)$$

We will take a closer look at this:

$$1 \quad (2771)$$

Clearly, the derivative of this is equal to

$$0 \quad (2772)$$

We will take a closer look at this:

$$1 \quad (2773)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2774)$$

The object of our ultimate interest is the following:

$$x - 2 \quad (2775)$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \quad (2776)$$

One shall regard the object in question with utmost interest:

$$1 \quad (2777)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2778)$$

The object of our ultimate interest is the following:

$$x^2 \tag{2779}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2780}$$

The following is worth a closer look:

$$1 \tag{2781}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2782}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2783}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2784}$$

We shall ponder the following:

$$x - 2 \tag{2785}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{2786}$$

We are going to study the following:

$$x + 1 \tag{2787}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{2788}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2789}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2790}$$

The object of our ultimate interest is the following:

$$2 \tag{2791}$$

As you can see, the derivative of this is equal to

$$0 \tag{2792}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{2793}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2794}$$

We shall ponder the following:

$$x + 1 \tag{2795}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{2796}$$

The following is worth a closer look:

$$4 \tag{2797}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2798}$$

We shall ponder the following:

$$2 \tag{2799}$$

Trivially, the derivative of this is equal to

$$0 \tag{2800}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\cos x \tag{2801}$$

Clearly, the derivative of this is equal to

$$- \sin x \cdot 1 \tag{2802}$$

Consider the following:

$$x + 1 \tag{2803}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{2804}$$

Consider the following:

$$2 \tag{2805}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2806}$$

Let us take a look at this:

$$\sin x \tag{2807}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2808}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2809}$$

Clearly, the derivative of this is equal to

$$0 \tag{2810}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{2811}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2812}$$

We will take a closer look at this:

$$2 \cdot x \tag{2813}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2814}$$

We are going to study the following:

$$1 \tag{2815}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2816}$$

We will take a closer look at this:

$$x^2 \tag{2817}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2818}$$

The following is worth a closer look:

$$2 \tag{2819}$$

Clearly, the derivative of this is equal to

$$0 \tag{2820}$$

Let us take a look at this:

$$1 \tag{2821}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2822}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2823}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2824}$$

We shall ponder the following:

$$x^2 \tag{2825}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2826}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2827}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2828}$$

We will take a closer look at this:

$$1 \tag{2829}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2830}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{2831}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{2832}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2833}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2834}$$

The following is worth a closer look:

$$x^2 \tag{2835}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2836}$$

Consider the following:

$$1 \tag{2837}$$

As you can see, the derivative of this is equal to

$$0 \tag{2838}$$

Let us take a look at this:

$$x^2 \tag{2839}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2840}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{2841}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{2842}$$

Consider the following:

$$x + 1 \tag{2843}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{2844}$$

The object of our ultimate interest is the following:

$$1 \tag{2845}$$

Trivially, the derivative of this is equal to

$$0 \tag{2846}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{2847}$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2848)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\sin x \quad (2849)$$

Clearly, the derivative of this is equal to

$$\cos x \cdot 1 \quad (2850)$$

We are going to study the following:

$$x + 1 \quad (2851)$$

Clearly, the derivative of this is equal to

$$1 + 0 \quad (2852)$$

Let us take a look at this:

$$1 \quad (2853)$$

As you can see, the derivative of this is equal to

$$0 \quad (2854)$$

We shall ponder the following:

$$4 \quad (2855)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2856)$$

We will take a closer look at this:

$$2 \quad (2857)$$

As you can see, the derivative of this is equal to

$$0 \quad (2858)$$

Let us take a look at this:

$$\cos x \quad (2859)$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \quad (2860)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x + 1 \quad (2861)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \quad (2862)$$

We shall ponder the following:

$$16 \quad (2863)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2864)$$

We will take a closer look at this:

$$0 \tag{2865}$$

Clearly, the derivative of this is equal to

$$0 \tag{2866}$$

One shall regard the object in question with utmost interest:

$$4 \tag{2867}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2868}$$

Let us take a look at this:

$$2 \tag{2869}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2870}$$

We shall ponder the following:

$$1 \tag{2871}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2872}$$

We are going to study the following:

$$\sin x \tag{2873}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2874}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{2875}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{2876}$$

The object of our ultimate interest is the following:

$$1 \tag{2877}$$

As you can see, the derivative of this is equal to

$$0 \tag{2878}$$

We are going to study the following:

$$4 \tag{2879}$$

Obviously, the derivative of this is equal to

$$0 \tag{2880}$$

The following is worth a closer look:

$$2 \tag{2881}$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2882)$$

The following is worth a closer look:

$$\cos x \quad (2883)$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \quad (2884)$$

We will take a closer look at this:

$$x + 1 \quad (2885)$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \quad (2886)$$

One shall regard the object in question with utmost interest:

$$2 \quad (2887)$$

Clearly, the derivative of this is equal to

$$0 \quad (2888)$$

We will take a closer look at this:

$$\sin x \quad (2889)$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \quad (2890)$$

Consider the following:

$$x + 1 \quad (2891)$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \quad (2892)$$

We will take a closer look at this:

$$1 \quad (2893)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2894)$$

Let us take a look at this:

$$2 \quad (2895)$$

Clearly, the derivative of this is equal to

$$0 \quad (2896)$$

We are going to study the following:

$$\sin x \quad (2897)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \quad (2898)$$

Let us take a look at this:

$$x + 1 \quad (2899)$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{2900}$$

We are going to study the following:

$$4 \tag{2901}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2902}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2903}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2904}$$

We shall ponder the following:

$$\cos x \tag{2905}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{2906}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x + 1 \tag{2907}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{2908}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2909}$$

As you can see, the derivative of this is equal to

$$0 \tag{2910}$$

We shall ponder the following:

$$2 \tag{2911}$$

Trivially, the derivative of this is equal to

$$0 \tag{2912}$$

We are going to study the following:

$$\sin x \tag{2913}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{2914}$$

We shall ponder the following:

$$x + 1 \tag{2915}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{2916}$$

We are going to study the following:

$$4 \tag{2917}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2918}$$

The object of our ultimate interest is the following:

$$2 \tag{2919}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2920}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{2921}$$

Clearly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{2922}$$

We will take a closer look at this:

$$x + 1 \tag{2923}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{2924}$$

We are going to study the following:

$$2 \tag{2925}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2926}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{2927}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2928}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2929}$$

As you can see, the derivative of this is equal to

$$0 \tag{2930}$$

We are going to study the following:

$$x^2 \tag{2931}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2932}$$

We are going to study the following:

$$2 \cdot x \tag{2933}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2934)$$

The object of our ultimate interest is the following:

$$1 \quad (2935)$$

Trivially, the derivative of this is equal to

$$0 \quad (2936)$$

We will take a closer look at this:

$$x^2 \quad (2937)$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2938)$$

Consider the following:

$$2 \quad (2939)$$

Trivially, the derivative of this is equal to

$$0 \quad (2940)$$

We will take a closer look at this:

$$1 \quad (2941)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2942)$$

Let us take a look at this:

$$1 \quad (2943)$$

As you can see, the derivative of this is equal to

$$0 \quad (2944)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (2945)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2946)$$

Consider the following:

$$1 \quad (2947)$$

As you can see, the derivative of this is equal to

$$0 \quad (2948)$$

The object of our ultimate interest is the following:

$$1 \quad (2949)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2950)$$

Consider the following:

$$2 \cdot x \tag{2951}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2952}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{2953}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2954}$$

We are going to study the following:

$$x^2 \tag{2955}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2956}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2957}$$

As you can see, the derivative of this is equal to

$$0 \tag{2958}$$

We will take a closer look at this:

$$1 \tag{2959}$$

As you can see, the derivative of this is equal to

$$0 \tag{2960}$$

The object of our ultimate interest is the following:

$$1 \tag{2961}$$

Obviously, the derivative of this is equal to

$$0 \tag{2962}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2963}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2964}$$

The object of our ultimate interest is the following:

$$1 \tag{2965}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2966}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2967}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2968}$$

The following is worth a closer look:

$$1 \tag{2969}$$

Trivially, the derivative of this is equal to

$$0 \tag{2970}$$

We shall ponder the following:

$$x^2 \tag{2971}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2972}$$

We are going to study the following:

$$2 \cdot x \tag{2973}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2974}$$

The object of our ultimate interest is the following:

$$1 \tag{2975}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2976}$$

We will take a closer look at this:

$$x^2 \tag{2977}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2978}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{2979}$$

Clearly, the derivative of this is equal to

$$0 \tag{2980}$$

We shall ponder the following:

$$1 \tag{2981}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2982}$$

The object of our ultimate interest is the following:

$$1 \tag{2983}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2984}$$

The following is worth a closer look:

$$x^2 \tag{2985}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2986}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2987}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2988}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2989}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2990}$$

We are going to study the following:

$$1 \tag{2991}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2992}$$

We are going to study the following:

$$x^2 \tag{2993}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2994}$$

Let us take a look at this:

$$2 \tag{2995}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2996}$$

Let us take a look at this:

$$1 \tag{2997}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2998}$$

The following is worth a closer look:

$$1 \tag{2999}$$

Trivially, the derivative of this is equal to

$$0 \tag{3000}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{3001}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3002}$$

The following is worth a closer look:

$$2 \tag{3003}$$

Trivially, the derivative of this is equal to

$$0 \tag{3004}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{3005}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3006}$$

We will take a closer look at this:

$$1 \tag{3007}$$

As you can see, the derivative of this is equal to

$$0 \tag{3008}$$

Let us take a look at this:

$$x^2 \tag{3009}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3010}$$

The object of our ultimate interest is the following:

$$2 \tag{3011}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3012}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \cdot x \tag{3013}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3014}$$

The following is worth a closer look:

$$1 \tag{3015}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3016}$$

We are going to study the following:

$$x^2 \tag{3017}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3018}$$

We are going to study the following:

$$2 \tag{3019}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3020}$$

We will take a closer look at this:

$$1 \tag{3021}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3022}$$

We shall ponder the following:

$$2 \tag{3023}$$

As you can see, the derivative of this is equal to

$$0 \tag{3024}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3025}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3026}$$

The following is worth a closer look:

$$1 \tag{3027}$$

Obviously, the derivative of this is equal to

$$0 \tag{3028}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{3029}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3030}$$

The following is worth a closer look:

$$2 \tag{3031}$$

As you can see, the derivative of this is equal to

$$0 \tag{3032}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{3033}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3034}$$

The object of our ultimate interest is the following:

$$1 \tag{3035}$$

Obviously, the derivative of this is equal to

$$0 \tag{3036}$$

We shall ponder the following:

$$x^2 \tag{3037}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3038}$$

We shall ponder the following:

$$1 \tag{3039}$$

As you can see, the derivative of this is equal to

$$0 \tag{3040}$$

The object of our ultimate interest is the following:

$$1 \tag{3041}$$

As you can see, the derivative of this is equal to

$$0 \tag{3042}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x - 2 \tag{3043}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{3044}$$

The object of our ultimate interest is the following:

$$1 \tag{3045}$$

Trivially, the derivative of this is equal to

$$0 \tag{3046}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{3047}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3048}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{3049}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3050}$$

Consider the following:

$$1 \tag{3051}$$

Obviously, the derivative of this is equal to

$$0 \tag{3052}$$

Let us take a look at this:

$$x^2 \tag{3053}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3054}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3055}$$

As you can see, the derivative of this is equal to

$$0 \tag{3056}$$

The following is worth a closer look:

$$1 \tag{3057}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3058}$$

We will take a closer look at this:

$$1 \tag{3059}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3060}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{3061}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3062}$$

We shall ponder the following:

$$1 \tag{3063}$$

Obviously, the derivative of this is equal to

$$0 \tag{3064}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{3065}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3066}$$

Let us take a look at this:

$$2 \cdot x \tag{3067}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3068}$$

Consider the following:

$$1 \tag{3069}$$

Clearly, the derivative of this is equal to

$$0 \tag{3070}$$

We shall ponder the following:

$$x^2 \tag{3071}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3072}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{3073}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3074}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3075}$$

As you can see, the derivative of this is equal to

$$0 \tag{3076}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3077}$$

Trivially, the derivative of this is equal to

$$0 \tag{3078}$$

We are going to study the following:

$$x^2 \tag{3079}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3080}$$

We shall ponder the following:

$$1 \tag{3081}$$

Trivially, the derivative of this is equal to

$$0 \tag{3082}$$

Let us take a look at this:

$$1 \tag{3083}$$

As you can see, the derivative of this is equal to

$$0 \tag{3084}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{3085}$$

Obviously, the derivative of this is equal to

$$0 \tag{3086}$$

We shall ponder the following:

$$x^2 \tag{3087}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3088}$$

The following is worth a closer look:

$$1 \tag{3089}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3090}$$

The object of our ultimate interest is the following:

$$1 \tag{3091}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3092}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \tag{3093}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3094}$$

The following is worth a closer look:

$$x - 2 \tag{3095}$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{3096}$$

We will take a closer look at this:

$$1 \tag{3097}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3098}$$

The following is worth a closer look:

$$x^2 \tag{3099}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3100}$$

We shall ponder the following:

$$2 \cdot x \tag{3101}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3102}$$

We will take a closer look at this:

$$1 \tag{3103}$$

Obviously, the derivative of this is equal to

$$0 \tag{3104}$$

Consider the following:

$$x^2 \tag{3105}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3106}$$

Consider the following:

$$2 \tag{3107}$$

Obviously, the derivative of this is equal to

$$0 \tag{3108}$$

The following is worth a closer look:

$$1 \tag{3109}$$

Trivially, the derivative of this is equal to

$$0 \tag{3110}$$

We will take a closer look at this:

$$1 \tag{3111}$$

Clearly, the derivative of this is equal to

$$0 \tag{3112}$$

We are going to study the following:

$$x^2 \tag{3113}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3114}$$

Let us take a look at this:

$$1 \tag{3115}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3116}$$

Let us take a look at this:

$$1 \tag{3117}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3118}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x - 2 \tag{3119}$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{3120}$$

Consider the following:

$$1 \tag{3121}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3122}$$

Consider the following:

$$x^2 \tag{3123}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3124}$$

Consider the following:

$$1 \tag{3125}$$

Obviously, the derivative of this is equal to

$$0 \tag{3126}$$

We shall ponder the following:

$$x^2 \tag{3127}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3128}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{3129}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3130}$$

We will take a closer look at this:

$$1 \tag{3131}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3132}$$

The following is worth a closer look:

$$x^2 \tag{3133}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3134}$$

We shall ponder the following:

$$2 \tag{3135}$$

Clearly, the derivative of this is equal to

$$0 \tag{3136}$$

Let us take a look at this:

$$1 \tag{3137}$$

Obviously, the derivative of this is equal to

$$0 \tag{3138}$$

Let us take a look at this:

$$1 \tag{3139}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3140}$$

We will take a closer look at this:

$$x^2 \tag{3141}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3142}$$

Let us take a look at this:

$$1 \tag{3143}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3144}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{3145}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3146}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{3147}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{3148}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{3149}$$

Obviously, the derivative of this is equal to

$$0 \tag{3150}$$

We are going to study the following:

$$x^2 \tag{3151}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3152}$$

The following is worth a closer look:

$$1 \tag{3153}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3154}$$

We shall ponder the following:

$$x^2 \tag{3155}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3156}$$

We will take a closer look at this:

$$x - 2 \tag{3157}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{3158}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x + 1 \tag{3159}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3160}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3161}$$

Clearly, the derivative of this is equal to

$$0 \tag{3162}$$

We shall ponder the following:

$$2 \tag{3163}$$

As you can see, the derivative of this is equal to

$$0 \tag{3164}$$

Consider the following:

$$\sin x \tag{3165}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3166}$$

We will take a closer look at this:

$$x + 1 \tag{3167}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3168}$$

The object of our ultimate interest is the following:

$$4 \tag{3169}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3170}$$

The following is worth a closer look:

$$2 \tag{3171}$$

As you can see, the derivative of this is equal to

$$0 \tag{3172}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{3173}$$

Trivially, the derivative of this is equal to

$$-\sin x \cdot 1 \quad (3174)$$

One shall regard the object in question with utmost interest:

$$x + 1 \quad (3175)$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \quad (3176)$$

We shall ponder the following:

$$2 \quad (3177)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (3178)$$

The object of our ultimate interest is the following:

$$\sin x \quad (3179)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \quad (3180)$$

We shall ponder the following:

$$1 \quad (3181)$$

Obviously, the derivative of this is equal to

$$0 \quad (3182)$$

Consider the following:

$$x^2 \quad (3183)$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3184)$$

We are going to study the following:

$$2 \cdot x \quad (3185)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (3186)$$

Consider the following:

$$1 \quad (3187)$$

Trivially, the derivative of this is equal to

$$0 \quad (3188)$$

We will take a closer look at this:

$$x^2 \quad (3189)$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3190)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{3191}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3192}$$

Let us take a look at this:

$$1 \tag{3193}$$

Clearly, the derivative of this is equal to

$$0 \tag{3194}$$

The following is worth a closer look:

$$1 \tag{3195}$$

Trivially, the derivative of this is equal to

$$0 \tag{3196}$$

Let us take a look at this:

$$x^2 \tag{3197}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3198}$$

We shall ponder the following:

$$1 \tag{3199}$$

Clearly, the derivative of this is equal to

$$0 \tag{3200}$$

We are going to study the following:

$$1 \tag{3201}$$

Trivially, the derivative of this is equal to

$$0 \tag{3202}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{3203}$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{3204}$$

We will take a closer look at this:

$$1 \tag{3205}$$

Obviously, the derivative of this is equal to

$$0 \tag{3206}$$

The object of our ultimate interest is the following:

$$x^2 \tag{3207}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3208}$$

Let us take a look at this:

$$1 \quad (3209)$$

Clearly, the derivative of this is equal to

$$0 \quad (3210)$$

We are going to study the following:

$$x^2 \quad (3211)$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3212)$$

The object of our ultimate interest is the following:

$$x - 2 \quad (3213)$$

Clearly, the derivative of this is equal to

$$1 - 0 \quad (3214)$$

We will take a closer look at this:

$$x + 1 \quad (3215)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \quad (3216)$$

We are going to study the following:

$$1 \quad (3217)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (3218)$$

Consider the following:

$$2 \quad (3219)$$

Obviously, the derivative of this is equal to

$$0 \quad (3220)$$

We are going to study the following:

$$\sin x \quad (3221)$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \quad (3222)$$

We will take a closer look at this:

$$x + 1 \quad (3223)$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \quad (3224)$$

We are going to study the following:

$$1 \quad (3225)$$

As you can see, the derivative of this is equal to

$$0 \quad (3226)$$

One shall regard the object in question with utmost interest:

$$4 \tag{3227}$$

Clearly, the derivative of this is equal to

$$0 \tag{3228}$$

Let us take a look at this:

$$2 \tag{3229}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3230}$$

We shall ponder the following:

$$\cos x \tag{3231}$$

Trivially, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3232}$$

We will take a closer look at this:

$$x + 1 \tag{3233}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3234}$$

The following is worth a closer look:

$$16 \tag{3235}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3236}$$

The object of our ultimate interest is the following:

$$0 \tag{3237}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3238}$$

The following is worth a closer look:

$$4 \tag{3239}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3240}$$

We will take a closer look at this:

$$2 \tag{3241}$$

Obviously, the derivative of this is equal to

$$0 \tag{3242}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3243}$$

Trivially, the derivative of this is equal to

$$0 \tag{3244}$$

We will take a closer look at this:

$$\sin x \tag{3245}$$

Clearly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3246}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{3247}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3248}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{3249}$$

As you can see, the derivative of this is equal to

$$0 \tag{3250}$$

One shall regard the object in question with utmost interest:

$$4 \tag{3251}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3252}$$

We are going to study the following:

$$2 \tag{3253}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3254}$$

We shall ponder the following:

$$\cos x \tag{3255}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3256}$$

The following is worth a closer look:

$$x + 1 \tag{3257}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3258}$$

Consider the following:

$$2 \tag{3259}$$

Obviously, the derivative of this is equal to

$$0 \tag{3260}$$

The following is worth a closer look:

$$\sin x \tag{3261}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3262}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3263}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3264}$$

We will take a closer look at this:

$$1 \tag{3265}$$

Clearly, the derivative of this is equal to

$$0 \tag{3266}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3267}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3268}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3269}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3270}$$

Let us take a look at this:

$$x + 1 \tag{3271}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3272}$$

We will take a closer look at this:

$$4 \tag{3273}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3274}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3275}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3276}$$

We are going to study the following:

$$\cos x \tag{3277}$$

As you can see, the derivative of this is equal to

$$- \sin x \cdot 1 \tag{3278}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{3279}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3280}$$

We shall ponder the following:

$$1 \tag{3281}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3282}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3283}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3284}$$

We shall ponder the following:

$$\sin x \tag{3285}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3286}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3287}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3288}$$

We shall ponder the following:

$$4 \tag{3289}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3290}$$

Consider the following:

$$2 \tag{3291}$$

As you can see, the derivative of this is equal to

$$0 \tag{3292}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\cos x \tag{3293}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3294}$$

The following is worth a closer look:

$$x + 1 \tag{3295}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3296}$$

We shall ponder the following:

$$2 \tag{3297}$$

Trivially, the derivative of this is equal to

$$0 \tag{3298}$$

We will take a closer look at this:

$$\sin x \tag{3299}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3300}$$

Let us take a look at this:

$$1 \tag{3301}$$

Obviously, the derivative of this is equal to

$$0 \tag{3302}$$

We will take a closer look at this:

$$x^2 \tag{3303}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3304}$$

We are going to study the following:

$$2 \cdot x \tag{3305}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3306}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{3307}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3308}$$

The following is worth a closer look:

$$x^2 \tag{3309}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3310}$$

Let us take a look at this:

$$2 \tag{3311}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3312}$$

Consider the following:

$$1 \tag{3313}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3314}$$

We shall ponder the following:

$$1 \tag{3315}$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (3316)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \quad (3317)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3318)$$

We shall ponder the following:

$$1 \quad (3319)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (3320)$$

We are going to study the following:

$$1 \quad (3321)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (3322)$$

The following is worth a closer look:

$$x - 2 \quad (3323)$$

As you can see, the derivative of this is equal to

$$1 - 0 \quad (3324)$$

The following is worth a closer look:

$$1 \quad (3325)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (3326)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x^2 \quad (3327)$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3328)$$

We are going to study the following:

$$1 \quad (3329)$$

Obviously, the derivative of this is equal to

$$0 \quad (3330)$$

Let us take a look at this:

$$x^2 \quad (3331)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3332)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x - 2 \quad (3333)$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{3334}$$

The following is worth a closer look:

$$x + 1 \tag{3335}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3336}$$

Consider the following:

$$1 \tag{3337}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3338}$$

Consider the following:

$$2 \tag{3339}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3340}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3341}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3342}$$

The following is worth a closer look:

$$x + 1 \tag{3343}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3344}$$

The following is worth a closer look:

$$1 \tag{3345}$$

Clearly, the derivative of this is equal to

$$0 \tag{3346}$$

Let us take a look at this:

$$4 \tag{3347}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3348}$$

The object of our ultimate interest is the following:

$$2 \tag{3349}$$

Clearly, the derivative of this is equal to

$$0 \tag{3350}$$

We will take a closer look at this:

$$\cos x \quad (3351)$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \quad (3352)$$

Consider the following:

$$x + 1 \quad (3353)$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \quad (3354)$$

We are going to study the following:

$$16 \quad (3355)$$

As you can see, the derivative of this is equal to

$$0 \quad (3356)$$

We are going to study the following:

$$4 \quad (3357)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (3358)$$

Consider the following:

$$2 \quad (3359)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (3360)$$

One shall regard the object in question with utmost interest:

$$\sin x \quad (3361)$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \quad (3362)$$

We are going to study the following:

$$x + 1 \quad (3363)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \quad (3364)$$

One shall regard the object in question with utmost interest:

$$1 \quad (3365)$$

As you can see, the derivative of this is equal to

$$0 \quad (3366)$$

We shall ponder the following:

$$4 \quad (3367)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3368}$$

The following is worth a closer look:

$$2 \tag{3369}$$

As you can see, the derivative of this is equal to

$$0 \tag{3370}$$

Let us take a look at this:

$$\cos x \tag{3371}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3372}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x + 1 \tag{3373}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3374}$$

We shall ponder the following:

$$2 \tag{3375}$$

Obviously, the derivative of this is equal to

$$0 \tag{3376}$$

We are going to study the following:

$$\sin x \tag{3377}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3378}$$

We shall ponder the following:

$$x + 1 \tag{3379}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3380}$$

We will take a closer look at this:

$$1 \tag{3381}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3382}$$

The object of our ultimate interest is the following:

$$2 \tag{3383}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3384}$$

Consider the following:

$$\sin x \tag{3385}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3386}$$

Consider the following:

$$x + 1 \tag{3387}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3388}$$

The object of our ultimate interest is the following:

$$4 \tag{3389}$$

Obviously, the derivative of this is equal to

$$0 \tag{3390}$$

The object of our ultimate interest is the following:

$$2 \tag{3391}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3392}$$

Let us take a look at this:

$$\cos x \tag{3393}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3394}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x + 1 \tag{3395}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3396}$$

Consider the following:

$$1 \tag{3397}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3398}$$

We will take a closer look at this:

$$2 \tag{3399}$$

Clearly, the derivative of this is equal to

$$0 \tag{3400}$$

The following is worth a closer look:

$$\sin x \tag{3401}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3402}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3403}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3404}$$

One shall regard the object in question with utmost interest:

$$4 \tag{3405}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3406}$$

We are going to study the following:

$$2 \tag{3407}$$

Obviously, the derivative of this is equal to

$$0 \tag{3408}$$

Let us take a look at this:

$$\cos x \tag{3409}$$

Unsurprisingly, the derivative of this is equal to

$$- \sin x \cdot 1 \tag{3410}$$

Consider the following:

$$x + 1 \tag{3411}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3412}$$

The object of our ultimate interest is the following:

$$2 \tag{3413}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3414}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\sin x \tag{3415}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3416}$$

Consider the following:

$$1 \tag{3417}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3418}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{3419}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3420)$$

We will take a closer look at this:

$$x - 2 \quad (3421)$$

Trivially, the derivative of this is equal to

$$1 - 0 \quad (3422)$$

Consider the following:

$$x + 1 \quad (3423)$$

Obviously, the derivative of this is equal to

$$1 + 0 \quad (3424)$$

We are going to study the following:

$$x + 1 \quad (3425)$$

As you can see, the derivative of this is equal to

$$1 + 0 \quad (3426)$$

We will take a closer look at this:

$$2 \quad (3427)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (3428)$$

We will take a closer look at this:

$$2 \quad (3429)$$

Trivially, the derivative of this is equal to

$$0 \quad (3430)$$

The object of our ultimate interest is the following:

$$\sin x \quad (3431)$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \quad (3432)$$

We are going to study the following:

$$x + 1 \quad (3433)$$

Clearly, the derivative of this is equal to

$$1 + 0 \quad (3434)$$

We are going to study the following:

$$1 \quad (3435)$$

Obviously, the derivative of this is equal to

$$0 \quad (3436)$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$4 \quad (3437)$$

As you can see, the derivative of this is equal to

$$0 \quad (3438)$$

One shall regard the object in question with utmost interest:

$$2 \tag{3439}$$

As you can see, the derivative of this is equal to

$$0 \tag{3440}$$

Let us take a look at this:

$$\cos x \tag{3441}$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3442}$$

We are going to study the following:

$$x + 1 \tag{3443}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3444}$$

We will take a closer look at this:

$$1 \tag{3445}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3446}$$

Let us take a look at this:

$$4 \tag{3447}$$

Trivially, the derivative of this is equal to

$$0 \tag{3448}$$

We shall ponder the following:

$$2 \tag{3449}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3450}$$

Consider the following:

$$\cos x \tag{3451}$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3452}$$

We shall ponder the following:

$$x + 1 \tag{3453}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3454}$$

Consider the following:

$$1 \tag{3455}$$

Clearly, the derivative of this is equal to

$$0 \tag{3456}$$

Let us take a look at this:

$$16 \tag{3457}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3458}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$4 \tag{3459}$$

As you can see, the derivative of this is equal to

$$0 \tag{3460}$$

Let us take a look at this:

$$2 \tag{3461}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3462}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\sin x \tag{3463}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3464}$$

The following is worth a closer look:

$$x + 1 \tag{3465}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3466}$$

The object of our ultimate interest is the following:

$$1 \tag{3467}$$

As you can see, the derivative of this is equal to

$$0 \tag{3468}$$

One shall regard the object in question with utmost interest:

$$16 \tag{3469}$$

Trivially, the derivative of this is equal to

$$0 \tag{3470}$$

The object of our ultimate interest is the following:

$$4 \tag{3471}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3472}$$

We shall ponder the following:

$$2 \tag{3473}$$

Clearly, the derivative of this is equal to

$$0 \tag{3474}$$

We will take a closer look at this:

$$\sin x \tag{3475}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3476}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3477}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3478}$$

We will take a closer look at this:

$$256 \tag{3479}$$

Obviously, the derivative of this is equal to

$$0 \tag{3480}$$

Let us take a look at this:

$$16 \tag{3481}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3482}$$

We will take a closer look at this:

$$4 \tag{3483}$$

Clearly, the derivative of this is equal to

$$0 \tag{3484}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{3485}$$

Obviously, the derivative of this is equal to

$$0 \tag{3486}$$

We will take a closer look at this:

$$\cos x \tag{3487}$$

Obviously, the derivative of this is equal to

$$- \sin x \cdot 1 \tag{3488}$$

We will take a closer look at this:

$$x + 1 \tag{3489}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3490}$$

Let us take a look at this:

$$1 \tag{3491}$$

Trivially, the derivative of this is equal to

$$0 \tag{3492}$$

We are going to study the following:

$$4 \tag{3493}$$

As you can see, the derivative of this is equal to

$$0 \tag{3494}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{3495}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3496}$$

The following is worth a closer look:

$$\cos x \tag{3497}$$

It is now obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3498}$$

We shall ponder the following:

$$x + 1 \tag{3499}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3500}$$

We are going to study the following:

$$1 \tag{3501}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3502}$$

Let us take a look at this:

$$16 \tag{3503}$$

Trivially, the derivative of this is equal to

$$0 \tag{3504}$$

The object of our ultimate interest is the following:

$$4 \tag{3505}$$

Trivially, the derivative of this is equal to

$$0 \tag{3506}$$

We shall ponder the following:

$$2 \tag{3507}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3508}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3509}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3510}$$

We will take a closer look at this:

$$x + 1 \tag{3511}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3512}$$

We shall ponder the following:

$$2 \tag{3513}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3514}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3515}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3516}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3517}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3518}$$

Let us take a look at this:

$$1 \tag{3519}$$

Trivially, the derivative of this is equal to

$$0 \tag{3520}$$

The following is worth a closer look:

$$2 \tag{3521}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3522}$$

We shall ponder the following:

$$\sin x \tag{3523}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3524}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3525}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3526}$$

Consider the following:

$$1 \tag{3527}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3528}$$

We are going to study the following:

$$4 \tag{3529}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3530}$$

Let us take a look at this:

$$2 \tag{3531}$$

Obviously, the derivative of this is equal to

$$0 \tag{3532}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{3533}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3534}$$

Consider the following:

$$x + 1 \tag{3535}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3536}$$

Consider the following:

$$16 \tag{3537}$$

As you can see, the derivative of this is equal to

$$0 \tag{3538}$$

The object of our ultimate interest is the following:

$$4 \tag{3539}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3540}$$

Let us take a look at this:

$$2 \tag{3541}$$

As you can see, the derivative of this is equal to

$$0 \tag{3542}$$

The object of our ultimate interest is the following:

$$\sin x \tag{3543}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3544}$$

We shall ponder the following:

$$x + 1 \tag{3545}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3546}$$

The following is worth a closer look:

$$1 \tag{3547}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3548}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$4 \tag{3549}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3550}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3551}$$

Obviously, the derivative of this is equal to

$$0 \tag{3552}$$

Consider the following:

$$\cos x \tag{3553}$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3554}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{3555}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3556}$$

Let us take a look at this:

$$1 \tag{3557}$$

Trivially, the derivative of this is equal to

$$0 \tag{3558}$$

The object of our ultimate interest is the following:

$$2 \tag{3559}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3560}$$

The object of our ultimate interest is the following:

$$\sin x \tag{3561}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3562}$$

We will take a closer look at this:

$$x + 1 \tag{3563}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3564}$$

One shall regard the object in question with utmost interest:

$$4 \tag{3565}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3566}$$

We are going to study the following:

$$2 \tag{3567}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3568}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\cos x \tag{3569}$$

Obviously, the derivative of this is equal to

$$- \sin x \cdot 1 \tag{3570}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{3571}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3572}$$

We are going to study the following:

$$2 \tag{3573}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3574}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\sin x \tag{3575}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3576}$$

We will take a closer look at this:

$$x + 1 \tag{3577}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3578}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$1 \tag{3579}$$

As you can see, the derivative of this is equal to

$$0 \tag{3580}$$

Consider the following:

$$2 \tag{3581}$$

Trivially, the derivative of this is equal to

$$0 \tag{3582}$$

Let us take a look at this:

$$\sin x \tag{3583}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3584}$$

We shall ponder the following:

$$x + 1 \tag{3585}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3586}$$

We shall ponder the following:

$$1 \tag{3587}$$

Obviously, the derivative of this is equal to

$$0 \tag{3588}$$

The following is worth a closer look:

$$4 \tag{3589}$$

Trivially, the derivative of this is equal to

$$0 \tag{3590}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{3591}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3592}$$

We will take a closer look at this:

$$\cos x \tag{3593}$$

As you can see, the derivative of this is equal to

$$- \sin x \cdot 1 \tag{3594}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3595}$$

Clearly, the derivative of this is equal to (3596)

$$1 + 0$$

The following is worth a closer look:

$$16 \tag{3597}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3598}$$

We are going to study the following:

$$0 \tag{3599}$$

Trivially, the derivative of this is equal to

$$0 \tag{3600}$$

The object of our ultimate interest is the following:

$$4 \tag{3601}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3602}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{3603}$$

As you can see, the derivative of this is equal to

$$0 \tag{3604}$$

Let us take a look at this:

$$1 \tag{3605}$$

Clearly, the derivative of this is equal to

$$0 \tag{3606}$$

We are going to study the following:

$$\sin x \tag{3607}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3608}$$

Let us take a look at this:

$$x + 1 \tag{3609}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3610}$$

The object of our ultimate interest is the following:

$$1 \tag{3611}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3612}$$

The following is worth a closer look:

$$4 \tag{3613}$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (3614)$$

Consider the following:

$$2 \quad (3615)$$

Trivially, the derivative of this is equal to

$$0 \quad (3616)$$

We shall ponder the following:

$$\cos x \quad (3617)$$

Unsurprisingly, the derivative of this is equal to

$$-\sin x \cdot 1 \quad (3618)$$

We are going to study the following:

$$x + 1 \quad (3619)$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \quad (3620)$$

We are going to study the following:

$$1 \quad (3621)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (3622)$$

Consider the following:

$$2 \quad (3623)$$

Obviously, the derivative of this is equal to

$$0 \quad (3624)$$

Consider the following:

$$\sin x \quad (3625)$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \quad (3626)$$

The following is worth a closer look:

$$x + 1 \quad (3627)$$

Trivially, the derivative of this is equal to

$$1 + 0 \quad (3628)$$

We will take a closer look at this:

$$4 \quad (3629)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (3630)$$

We are going to study the following:

$$2 \quad (3631)$$

As you can see, the derivative of this is equal to

$$0 \quad (3632)$$

The object of our ultimate interest is the following:

$$\cos x \tag{3633}$$

Trivially, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3634}$$

Consider the following:

$$x + 1 \tag{3635}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3636}$$

Consider the following:

$$2 \tag{3637}$$

Trivially, the derivative of this is equal to

$$0 \tag{3638}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\sin x \tag{3639}$$

Clearly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3640}$$

We are going to study the following:

$$x + 1 \tag{3641}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3642}$$

We shall ponder the following:

$$1 \tag{3643}$$

As you can see, the derivative of this is equal to

$$0 \tag{3644}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3645}$$

Obviously, the derivative of this is equal to

$$0 \tag{3646}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3647}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3648}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3649}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3650}$$

We shall ponder the following:

$$4 \tag{3651}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3652}$$

Consider the following:

$$2 \tag{3653}$$

Trivially, the derivative of this is equal to

$$0 \tag{3654}$$

Let us take a look at this:

$$\cos x \tag{3655}$$

Obviously, the derivative of this is equal to

$$- \sin x \cdot 1 \tag{3656}$$

Let us take a look at this:

$$x + 1 \tag{3657}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3658}$$

We are going to study the following:

$$1 \tag{3659}$$

As you can see, the derivative of this is equal to

$$0 \tag{3660}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{3661}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3662}$$

Let us take a look at this:

$$\sin x \tag{3663}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3664}$$

Let us take a look at this:

$$x + 1 \tag{3665}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3666}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3667}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3668}$$

We shall ponder the following:

$$4 \tag{3669}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3670}$$

The following is worth a closer look:

$$2 \tag{3671}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3672}$$

Let us take a look at this:

$$\cos x \tag{3673}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3674}$$

The following is worth a closer look:

$$x + 1 \tag{3675}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3676}$$

We will take a closer look at this:

$$16 \tag{3677}$$

Obviously, the derivative of this is equal to

$$0 \tag{3678}$$

We are going to study the following:

$$0 \tag{3679}$$

As you can see, the derivative of this is equal to

$$0 \tag{3680}$$

Consider the following:

$$4 \tag{3681}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3682}$$

Let us take a look at this:

$$2 \tag{3683}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3684}$$

We shall ponder the following:

$$1 \tag{3685}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3686}$$

Let us take a look at this:

$$\sin x \tag{3687}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3688}$$

We will take a closer look at this:

$$x + 1 \tag{3689}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3690}$$

We shall ponder the following:

$$1 \tag{3691}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3692}$$

The following is worth a closer look:

$$4 \tag{3693}$$

Clearly, the derivative of this is equal to

$$0 \tag{3694}$$

Let us take a look at this:

$$2 \tag{3695}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3696}$$

The object of our ultimate interest is the following:

$$\cos x \tag{3697}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3698}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$x + 1 \tag{3699}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3700}$$

We shall ponder the following:

$$2 \tag{3701}$$

Trivially, the derivative of this is equal to

$$0 \tag{3702}$$

The object of our ultimate interest is the following:

$$\sin x \tag{3703}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3704}$$

We are going to study the following:

$$x + 1 \tag{3705}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3706}$$

The object of our ultimate interest is the following:

$$1 \tag{3707}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3708}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$2 \tag{3709}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3710}$$

Consider the following:

$$\sin x \tag{3711}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3712}$$

The following is worth a closer look:

$$x + 1 \tag{3713}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3714}$$

We are going to study the following:

$$4 \tag{3715}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3716}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3717}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3718}$$

We will allow ourselves to divert the reader's attentions to this gem of mathematical wonder:

$$\cos x \tag{3719}$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \quad (3720)$$

We are going to study the following:

$$x + 1 \quad (3721)$$

Obviously, the derivative of this is equal to

$$1 + 0 \quad (3722)$$

One shall regard the object in question with utmost interest:

$$1 \quad (3723)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (3724)$$

The object of our ultimate interest is the following:

$$2 \quad (3725)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (3726)$$

The object of our ultimate interest is the following:

$$\sin x \quad (3727)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \quad (3728)$$

We will take a closer look at this:

$$x + 1 \quad (3729)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \quad (3730)$$

Consider the following:

$$4 \quad (3731)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (3732)$$

The object of our ultimate interest is the following:

$$2 \quad (3733)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (3734)$$

We will take a closer look at this:

$$\cos x \quad (3735)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$- \sin x \cdot 1 \quad (3736)$$

The following is worth a closer look:

$$x + 1 \quad (3737)$$

Clearly, the derivative of this is equal to

$$1 + 0 \quad (3738)$$

The object of our ultimate interest is the following:

$$2 \quad (3739)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (3740)$$

The object of our ultimate interest is the following:

$$\sin x \quad (3741)$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \quad (3742)$$

Now the proof that the Taylor series of this function at  $x = 0$  is equal to

$$B + \left( (\arctan 1)^{-2} + A \right) \cdot \frac{x^2}{2} + (G + H) \cdot \frac{x^3}{6} \quad (3743)$$

Where:

- $A = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot (\ln \arctan 1 - 2 \cdot 0) - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $B = 0 + (\arctan 1)^{-2} \cdot \frac{x^0}{1} + (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot \frac{x^1}{1}$
- $C = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot (\ln \arctan 1 - 2 \cdot 0) - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $D = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $E = \frac{1}{\arctan 1} \cdot 0.5 + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2} + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2} - 2 \cdot 0$
- $F = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $G = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) - 1.5 \cdot (\arctan 1)^{-2} + (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0)$
- $H = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) + (C) \cdot (\ln \arctan 1 - 2 \cdot 0) - D + (\arctan 1)^{-2} \cdot (E) - F$

shall be considered an amusing exercise for the reader. It can be easily proved, that if we simplify this we wil get

$$G + \left( F + (\arctan 1)^{-2} \cdot \ln \arctan 1 + D + E \right) \cdot \frac{x^3}{6} \quad (3744)$$

Where:

- $A = (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot \ln \arctan 1 - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $B = (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot \ln \arctan 1 - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $C = \frac{1}{\arctan 1} \cdot 0.5 + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2} + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $D = (B) \cdot \ln \arctan 1 - (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $E = (\arctan 1)^{-2} \cdot (C) - (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $F = (\arctan 1)^{-2} \cdot \ln \arctan 1 - 1.5 \cdot (\arctan 1)^{-2} + (\arctan 1)^{-2} \cdot \ln \arctan 1$
- $G = (\arctan 1)^{-2} + (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot x + \left( (\arctan 1)^{-2} + A \right) \cdot \frac{x^2}{2}$
