Abstract

Wonderful article

1 Derivative

Let us find the derivative of the following function:

$$(x+1)^{\frac{\sin x}{2}} \cdot \left(\arctan \sqrt{x^2+1} \right)^{x-2} \quad (1)$$

We shall ponder the following:

$$1 \quad (2)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (3)$$

The following is worth a closer look:

$$x^2 \quad (4)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (5)$$

We shall ponder the following:

$$x-2 \quad (6)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1-0 \quad (7)$$

We shall ponder the following:

$$x+1 \quad (8)$$

As you can see, the derivative of this is equal to

$$1+0 \quad (9)$$

Let us take a look at this:

$$2 \quad (10)$$

Obviously, the derivative of this is equal to

$$0 \quad (11)$$

The object of our ultimate interest is the following:

$$\sin x \quad (12)$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \quad (13)$$

Now the proof that the derivative of this function is equal to

$$(x+1)^{\frac{\sin x}{2}} \cdot (A) \cdot \left(\arctan \sqrt{x^2+1} \right)^{x-2} + (x+1)^{\frac{\sin x}{2}} \cdot \left(\arctan \sqrt{x^2+1} \right)^{x-2} \cdot (C) \quad (14)$$

Where:

- $A = \frac{\cos x \cdot 1 \cdot 2 - \sin x \cdot 0}{2^2} \cdot \ln(x+1) + \frac{\sin x}{2} \cdot \frac{1+0}{x+1}$
- $B = \frac{1}{1+(\sqrt{x^2+1})^2} \cdot \frac{1}{2 \cdot \sqrt{x^2+1}} \cdot (2 \cdot x^{2-1} \cdot 1 + 0)$
- $C = (1-0) \cdot \ln \arctan \sqrt{x^2+1} + (x-2) \cdot \frac{B}{\arctan \sqrt{x^2+1}}$

has a truly wondrous solution, which is sadly too massive to be shown here. It can be easily proved, that if we simplify this we wil get

$$A \cdot \left(\arctan \sqrt{x^2 + 1} \right)^{x-2} + (x+1)^{\frac{\sin x}{2}} \cdot C \quad (15)$$

Where:

- $A = (x+1)^{\frac{\sin x}{2}} \cdot \left(\frac{\cos x \cdot 2}{4} \cdot \ln(x+1) + \frac{\sin x}{2} \cdot \frac{1}{x+1} \right)$
- $B = \frac{1}{1+(\sqrt{x^2+1})^2} \cdot \frac{1}{2 \cdot \sqrt{x^2+1}} \cdot 2 \cdot x$
- $C = \left(\arctan \sqrt{x^2 + 1} \right)^{x-2} \cdot \left(\ln \arctan \sqrt{x^2 + 1} + (x-2) \cdot \frac{B}{\arctan \sqrt{x^2+1}} \right)$

2 Taylor series

Let us find the Taylor series at $x = 0$ of the following function:

$$(x + 1)^{\frac{\sin x}{2}} \cdot \left(\arctan \sqrt{x^2 + 1} \right)^{x-2} \quad (16)$$

The following is worth a closer look:

$$1 \quad (17)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (18)$$

We are going to study the following:

$$x^2 \quad (19)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (20)$$

We shall ponder the following:

$$x - 2 \quad (21)$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \quad (22)$$

The object of our ultimate interest is the following:

$$x + 1 \quad (23)$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \quad (24)$$

We will take a closer look at this:

$$2 \quad (25)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (26)$$

We are going to study the following:

$$\sin x \quad (27)$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \quad (28)$$

One shall regard the object in question with utmost interest:

$$1 \quad (29)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (30)$$

We will take a closer look at this:

$$x^2 \quad (31)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{32}$$

The following is worth a closer look:

$$2 \cdot x \tag{33}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{34}$$

The following is worth a closer look:

$$1 \tag{35}$$

Clearly, the derivative of this is equal to

$$0 \tag{36}$$

The object of our ultimate interest is the following:

$$x^2 \tag{37}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{38}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{39}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{40}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{41}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{42}$$

Consider the following:

$$1 \tag{43}$$

Clearly, the derivative of this is equal to

$$0 \tag{44}$$

The object of our ultimate interest is the following:

$$x^2 \tag{45}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{46}$$

The object of our ultimate interest is the following:

$$1 \tag{47}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{48}$$

The following is worth a closer look:

$$1 \tag{49}$$

As you can see, the derivative of this is equal to

$$0 \tag{50}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x - 2 \tag{51}$$

Obviously, the derivative of this is equal to

$$1 - 0 \tag{52}$$

Consider the following:

$$1 \tag{53}$$

Trivially, the derivative of this is equal to

$$0 \tag{54}$$

We shall ponder the following:

$$x^2 \tag{55}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{56}$$

We are going to study the following:

$$1 \tag{57}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{58}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{59}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{60}$$

We are going to study the following:

$$x - 2 \tag{61}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{62}$$

We shall ponder the following:

$$x + 1 \tag{63}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{64}$$

We will take a closer look at this:

$$2 \tag{65}$$

Clearly, the derivative of this is equal to

$$0 \tag{66}$$

Consider the following:

$$\sin x \tag{67}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{68}$$

We will take a closer look at this:

$$1 \tag{69}$$

Clearly, the derivative of this is equal to

$$0 \tag{70}$$

We shall ponder the following:

$$x^2 \tag{71}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{72}$$

We will take a closer look at this:

$$x - 2 \tag{73}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{74}$$

Let us take a look at this:

$$x + 1 \tag{75}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{76}$$

We are going to study the following:

$$1 \tag{77}$$

Trivially, the derivative of this is equal to

$$0 \tag{78}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{79}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{80}$$

We will take a closer look at this:

$$\sin x \tag{81}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{82}$$

We shall ponder the following:

$$x + 1 \tag{83}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{84}$$

Let us take a look at this:

$$4 \tag{85}$$

As you can see, the derivative of this is equal to

$$0 \tag{86}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{87}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{88}$$

Let us take a look at this:

$$\cos x \tag{89}$$

As you can see, the derivative of this is equal to

$$- \sin x \cdot 1 \tag{90}$$

The following is worth a closer look:

$$x + 1 \tag{91}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{92}$$

Let us take a look at this:

$$2 \tag{93}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{94}$$

Consider the following:

$$\sin x \tag{95}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{96}$$

One shall regard the object in question with utmost interest:

$$1 \tag{97}$$

Trivially, the derivative of this is equal to

$$0 \tag{98}$$

The following is worth a closer look:

$$x^2 \tag{99}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{100}$$

The following is worth a closer look:

$$2 \cdot x \tag{101}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{102}$$

One shall regard the object in question with utmost interest:

$$1 \tag{103}$$

Obviously, the derivative of this is equal to

$$0 \tag{104}$$

Let us take a look at this:

$$x^2 \tag{105}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{106}$$

One shall regard the object in question with utmost interest:

$$2 \tag{107}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{108}$$

Let us take a look at this:

$$1 \tag{109}$$

Obviously, the derivative of this is equal to

$$0 \tag{110}$$

Let us take a look at this:

$$1 \tag{111}$$

Obviously, the derivative of this is equal to

$$0 \tag{112}$$

We are going to study the following:

$$x^2 \tag{113}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{114}$$

We will take a closer look at this:

$$1 \tag{115}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{116}$$

Let us take a look at this:

$$1 \tag{117}$$

As you can see, the derivative of this is equal to

$$0 \tag{118}$$

We shall ponder the following:

$$2 \cdot x \tag{119}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{120}$$

The object of our ultimate interest is the following:

$$1 \tag{121}$$

Obviously, the derivative of this is equal to

$$0 \tag{122}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{123}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{124}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{125}$$

As you can see, the derivative of this is equal to

$$0 \tag{126}$$

We will take a closer look at this:

$$1 \tag{127}$$

Obviously, the derivative of this is equal to

$$0 \tag{128}$$

The following is worth a closer look:

$$1 \tag{129}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{130}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{131}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{132}$$

The following is worth a closer look:

$$1 \tag{133}$$

As you can see, the derivative of this is equal to

$$0 \tag{134}$$

The following is worth a closer look:

$$1 \tag{135}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{136}$$

We are going to study the following:

$$1 \tag{137}$$

As you can see, the derivative of this is equal to

$$0 \tag{138}$$

We will take a closer look at this:

$$x^2 \tag{139}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{140}$$

We will take a closer look at this:

$$2 \cdot x \tag{141}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{142}$$

We shall ponder the following:

$$1 \tag{143}$$

Clearly, the derivative of this is equal to

$$0 \tag{144}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{145}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{146}$$

The following is worth a closer look:

$$2 \tag{147}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{148}$$

The object of our ultimate interest is the following:

$$1 \tag{149}$$

Trivially, the derivative of this is equal to

$$0 \tag{150}$$

Consider the following:

$$1 \tag{151}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{152}$$

The following is worth a closer look:

$$x^2 \tag{153}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{154}$$

We shall ponder the following:

$$1 \tag{155}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{156}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{157}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{158}$$

The object of our ultimate interest is the following:

$$1 \tag{159}$$

As you can see, the derivative of this is equal to

$$0 \tag{160}$$

We are going to study the following:

$$x^2 \tag{161}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{162}$$

The following is worth a closer look:

$$2 \tag{163}$$

Clearly, the derivative of this is equal to

$$0 \tag{164}$$

Consider the following:

$$1 \tag{165}$$

Clearly, the derivative of this is equal to

$$0 \tag{166}$$

Consider the following:

$$1 \tag{167}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{168}$$

Let us take a look at this:

$$x^2 \tag{169}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{170}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{171}$$

Trivially, the derivative of this is equal to

$$0 \tag{172}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{173}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{174}$$

We are going to study the following:

$$1 \tag{175}$$

As you can see, the derivative of this is equal to

$$0 \tag{176}$$

Consider the following:

$$x^2 \tag{177}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{178}$$

We are going to study the following:

$$2 \tag{179}$$

As you can see, the derivative of this is equal to

$$0 \tag{180}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{181}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{182}$$

Let us take a look at this:

$$1 \tag{183}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{184}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{185}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{186}$$

Consider the following:

$$2 \tag{187}$$

As you can see, the derivative of this is equal to

$$0 \tag{188}$$

We will take a closer look at this:

$$1 \tag{189}$$

Clearly, the derivative of this is equal to

$$0 \tag{190}$$

We will take a closer look at this:

$$2 \tag{191}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{192}$$

One shall regard the object in question with utmost interest:

$$2 \tag{193}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{194}$$

The following is worth a closer look:

$$1 \tag{195}$$

Obviously, the derivative of this is equal to

$$0 \tag{196}$$

We shall ponder the following:

$$x^2 \tag{197}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{198}$$

Consider the following:

$$2 \tag{199}$$

Trivially, the derivative of this is equal to

$$0 \tag{200}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{201}$$

As you can see, the derivative of this is equal to

$$0 \tag{202}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{203}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{204}$$

The following is worth a closer look:

$$x^2 \tag{205}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{206}$$

We shall ponder the following:

$$1 \tag{207}$$

Obviously, the derivative of this is equal to

$$0 \tag{208}$$

Consider the following:

$$1 \tag{209}$$

Clearly, the derivative of this is equal to

$$0 \tag{210}$$

The following is worth a closer look:

$$x - 2 \tag{211}$$

As you can see, the derivative of this is equal to

$$1 - 0 \tag{212}$$

We are going to study the following:

$$1 \tag{213}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{214}$$

We shall ponder the following:

Trivially, the derivative of this is equal to

$$0 \tag{244}$$

Consider the following:

$$1 \tag{245}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{246}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{247}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{248}$$

Consider the following:

$$1 \tag{249}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{250}$$

One shall regard the object in question with utmost interest:

$$1 \tag{251}$$

As you can see, the derivative of this is equal to

$$0 \tag{252}$$

One shall regard the object in question with utmost interest:

$$1 \tag{253}$$

Obviously, the derivative of this is equal to

$$0 \tag{254}$$

The following is worth a closer look:

$$x^2 \tag{255}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{256}$$

The object of our ultimate interest is the following:

$$1 \tag{257}$$

Obviously, the derivative of this is equal to

$$0 \tag{258}$$

We are going to study the following:

$$1 \tag{259}$$

Trivially, the derivative of this is equal to

$$0 \tag{260}$$

Consider the following:

$$x^2 \tag{261}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{262}$$

The following is worth a closer look:

$$x - 2 \tag{263}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{264}$$

We are going to study the following:

$$1 \tag{265}$$

Trivially, the derivative of this is equal to

$$0 \tag{266}$$

The following is worth a closer look:

$$x^2 \tag{267}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{268}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{269}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{270}$$

We are going to study the following:

$$1 \tag{271}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{272}$$

The following is worth a closer look:

$$x^2 \tag{273}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{274}$$

We will take a closer look at this:

$$2 \tag{275}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{276}$$

We will take a closer look at this:

$$1 \tag{277}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{278}$$

One shall regard the object in question with utmost interest:

$$1 \tag{279}$$

As you can see, the derivative of this is equal to

$$0 \tag{280}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{281}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{282}$$

We will take a closer look at this:

$$1 \tag{283}$$

Clearly, the derivative of this is equal to

$$0 \tag{284}$$

One shall regard the object in question with utmost interest:

$$1 \tag{285}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{286}$$

The following is worth a closer look:

$$x - 2 \tag{287}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{288}$$

Consider the following:

$$1 \tag{289}$$

Obviously, the derivative of this is equal to

$$0 \tag{290}$$

We shall ponder the following:

$$x^2 \tag{291}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{292}$$

We are going to study the following:

$$1 \tag{293}$$

As you can see, the derivative of this is equal to

$$0 \tag{294}$$

We will take a closer look at this:

$$x^2 \tag{295}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{296}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{297}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{298}$$

We shall ponder the following:

$$1 \tag{299}$$

Obviously, the derivative of this is equal to

$$0 \tag{300}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{301}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{302}$$

One shall regard the object in question with utmost interest:

$$2 \tag{303}$$

Trivially, the derivative of this is equal to

$$0 \tag{304}$$

The following is worth a closer look:

$$1 \tag{305}$$

Trivially, the derivative of this is equal to

$$0 \tag{306}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{307}$$

As you can see, the derivative of this is equal to

$$0 \tag{308}$$

The object of our ultimate interest is the following:

$$x^2 \tag{309}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (310)$$

The object of our ultimate interest is the following:

$$1 \quad (311)$$

Obviously, the derivative of this is equal to

$$0 \quad (312)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \quad (313)$$

Clearly, the derivative of this is equal to

$$0 \quad (314)$$

We shall ponder the following:

$$x - 2 \quad (315)$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \quad (316)$$

We shall ponder the following:

$$1 \quad (317)$$

Clearly, the derivative of this is equal to

$$0 \quad (318)$$

We shall ponder the following:

$$x^2 \quad (319)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (320)$$

We shall ponder the following:

$$1 \quad (321)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (322)$$

The object of our ultimate interest is the following:

$$x^2 \quad (323)$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (324)$$

The following is worth a closer look:

$$x - 2 \quad (325)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \quad (326)$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{327}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{328}$$

We are going to study the following:

$$2 \tag{329}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{330}$$

Let us take a look at this:

$$\sin x \tag{331}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{332}$$

Let us take a look at this:

$$1 \tag{333}$$

Clearly, the derivative of this is equal to

$$0 \tag{334}$$

We shall ponder the following:

$$x^2 \tag{335}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{336}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{337}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{338}$$

Let us take a look at this:

$$1 \tag{339}$$

As you can see, the derivative of this is equal to

$$0 \tag{340}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{341}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{342}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{343}$$

Trivially, the derivative of this is equal to

$$0 \tag{344}$$

Let us take a look at this:

$$1 \tag{345}$$

Obviously, the derivative of this is equal to

$$0 \tag{346}$$

One shall regard the object in question with utmost interest:

$$1 \tag{347}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{348}$$

The following is worth a closer look:

$$x^2 \tag{349}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{350}$$

One shall regard the object in question with utmost interest:

$$1 \tag{351}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{352}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{353}$$

Obviously, the derivative of this is equal to

$$0 \tag{354}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{355}$$

Obviously, the derivative of this is equal to

$$1 - 0 \tag{356}$$

Consider the following:

$$1 \tag{357}$$

Trivially, the derivative of this is equal to

$$0 \tag{358}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{359}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{360}$$

Consider the following:

$$1 \tag{361}$$

Obviously, the derivative of this is equal to

$$0 \tag{362}$$

We are going to study the following:

$$x^2 \tag{363}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{364}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{365}$$

Obviously, the derivative of this is equal to

$$1 - 0 \tag{366}$$

Consider the following:

$$x + 1 \tag{367}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{368}$$

The following is worth a closer look:

$$1 \tag{369}$$

As you can see, the derivative of this is equal to

$$0 \tag{370}$$

We are going to study the following:

$$2 \tag{371}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{372}$$

We shall ponder the following:

$$\sin x \tag{373}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{374}$$

The following is worth a closer look:

$$x + 1 \tag{375}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{376}$$

One shall regard the object in question with utmost interest:

$$4 \tag{377}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{378}$$

Consider the following:

$$2 \tag{379}$$

Clearly, the derivative of this is equal to

$$0 \tag{380}$$

Let us take a look at this:

$$\cos x \tag{381}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{382}$$

We will take a closer look at this:

$$x + 1 \tag{383}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{384}$$

One shall regard the object in question with utmost interest:

$$2 \tag{385}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{386}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\sin x \tag{387}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{388}$$

Consider the following:

$$1 \tag{389}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{390}$$

Consider the following:

$$x^2 \tag{391}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{392}$$

Let us take a look at this:

$$2 \cdot x \tag{393}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{394}$$

We shall ponder the following:

$$1 \tag{395}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{396}$$

We shall ponder the following:

$$x^2 \tag{397}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{398}$$

Let us take a look at this:

$$2 \tag{399}$$

Obviously, the derivative of this is equal to

$$0 \tag{400}$$

One shall regard the object in question with utmost interest:

$$1 \tag{401}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{402}$$

We shall ponder the following:

$$1 \tag{403}$$

Obviously, the derivative of this is equal to

$$0 \tag{404}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{405}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{406}$$

The following is worth a closer look:

$$1 \tag{407}$$

Obviously, the derivative of this is equal to

$$0 \tag{408}$$

The following is worth a closer look:

$$1 \tag{409}$$

Trivially, the derivative of this is equal to

$$0 \tag{410}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{411}$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{412}$$

The object of our ultimate interest is the following:

$$1 \tag{413}$$

Obviously, the derivative of this is equal to

$$0 \tag{414}$$

Consider the following:

$$x^2 \tag{415}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{416}$$

We shall ponder the following:

$$1 \tag{417}$$

Trivially, the derivative of this is equal to

$$0 \tag{418}$$

The object of our ultimate interest is the following:

$$x^2 \tag{419}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{420}$$

We shall ponder the following:

$$x - 2 \tag{421}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{422}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{423}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{424}$$

We will take a closer look at this:

$$1 \tag{425}$$

Obviously, the derivative of this is equal to

$$0 \tag{426}$$

We will take a closer look at this:

$$2 \tag{427}$$

Trivially, the derivative of this is equal to

$$0 \tag{428}$$

We shall ponder the following:

$$\sin x \tag{429}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{430}$$

The following is worth a closer look:

$$x + 1 \tag{431}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{432}$$

One shall regard the object in question with utmost interest:

$$4 \tag{433}$$

As you can see, the derivative of this is equal to

$$0 \tag{434}$$

Let us take a look at this:

$$2 \tag{435}$$

Trivially, the derivative of this is equal to

$$0 \tag{436}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{437}$$

Unsurprisingly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{438}$$

We will take a closer look at this:

$$x + 1 \tag{439}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{440}$$

Consider the following:

$$2 \tag{441}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{442}$$

The object of our ultimate interest is the following:

$$\sin x \tag{443}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{444}$$

The following is worth a closer look:

$$1 \tag{445}$$

Trivially, the derivative of this is equal to

$$0 \tag{446}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{447}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{448}$$

Consider the following:

$$x - 2 \tag{449}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{450}$$

The following is worth a closer look:

$$x + 1 \tag{451}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{452}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{453}$$

Obviously, the derivative of this is equal to

$$0 \tag{454}$$

We will take a closer look at this:

$$2 \tag{455}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{456}$$

We shall ponder the following:

$$\sin x \tag{457}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{458}$$

Let us take a look at this:

$$x + 1 \tag{459}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{460}$$

One shall regard the object in question with utmost interest:

$$1 \tag{461}$$

Clearly, the derivative of this is equal to

$$0 \tag{462}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \tag{463}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{464}$$

We shall ponder the following:

$$2 \tag{465}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{466}$$

The following is worth a closer look:

$$\cos x \tag{467}$$

It is now obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{468}$$

The following is worth a closer look:

$$x + 1 \tag{469}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{470}$$

We shall ponder the following:

$$16 \tag{471}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{472}$$

Consider the following:

$$0 \tag{473}$$

Trivially, the derivative of this is equal to

$$0 \tag{474}$$

The object of our ultimate interest is the following:

$$4 \tag{475}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{476}$$

The following is worth a closer look:

$$2 \tag{477}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{478}$$

The following is worth a closer look:

$$1 \tag{479}$$

As you can see, the derivative of this is equal to

$$0 \tag{480}$$

The following is worth a closer look:

$$\sin x \tag{481}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{482}$$

Consider the following:

$$x + 1 \tag{483}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{484}$$

Consider the following:

$$1 \tag{485}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{486}$$

One shall regard the object in question with utmost interest:

$$4 \tag{487}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{488}$$

We will take a closer look at this:

$$2 \tag{489}$$

Trivially, the derivative of this is equal to

$$0 \tag{490}$$

The object of our ultimate interest is the following:

$$\cos x \tag{491}$$

It is now obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{492}$$

We shall ponder the following:

$$x + 1 \tag{493}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{494}$$

The object of our ultimate interest is the following:

$$2 \tag{495}$$

As you can see, the derivative of this is equal to

$$0 \tag{496}$$

We shall ponder the following:

$$\sin x \tag{497}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{498}$$

We are going to study the following:

$$x + 1 \tag{499}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{500}$$

One shall regard the object in question with utmost interest:

$$1 \tag{501}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{502}$$

The following is worth a closer look:

$$2 \tag{503}$$

As you can see, the derivative of this is equal to

$$0 \tag{504}$$

Let us take a look at this:

$$\sin x \tag{505}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{506}$$

We will take a closer look at this:

$$x + 1 \tag{507}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{508}$$

We will take a closer look at this:

$$4 \tag{509}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{510}$$

Consider the following:

$$2 \tag{511}$$

Trivially, the derivative of this is equal to

$$0 \tag{512}$$

We shall ponder the following:

$$\cos x \tag{513}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{514}$$

We shall ponder the following:

$$x + 1 \tag{515}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{516}$$

The following is worth a closer look:

$$1 \tag{517}$$

Trivially, the derivative of this is equal to

$$0 \tag{518}$$

We will take a closer look at this:

$$2 \tag{519}$$

As you can see, the derivative of this is equal to

$$0 \tag{520}$$

The following is worth a closer look:

$$\sin x \tag{521}$$

Clearly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{522}$$

Let us take a look at this:

$$x + 1 \tag{523}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{524}$$

We are going to study the following:

$$4 \tag{525}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{526}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{527}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{528}$$

Consider the following:

$$\cos x \tag{529}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{530}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{531}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{532}$$

The following is worth a closer look:

$$2 \tag{533}$$

As you can see, the derivative of this is equal to

$$0 \tag{534}$$

The following is worth a closer look:

$$\sin x \tag{535}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{536}$$

The object of our ultimate interest is the following:

$$1 \tag{537}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{538}$$

The following is worth a closer look:

$$x^2 \tag{539}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{540}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{541}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{542}$$

We will take a closer look at this:

$$1 \tag{543}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{544}$$

The object of our ultimate interest is the following:

$$x^2 \tag{545}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{546}$$

One shall regard the object in question with utmost interest:

$$2 \tag{547}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{548}$$

We shall ponder the following:

$$1 \tag{549}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{550}$$

Consider the following:

$$1 \tag{551}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{552}$$

We will take a closer look at this:

$$x^2 \tag{553}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{554}$$

We will take a closer look at this:

$$1 \tag{555}$$

Obviously, the derivative of this is equal to

$$0 \tag{556}$$

Consider the following:

$$1 \tag{557}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{558}$$

We shall ponder the following:

$$1 \tag{559}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{560}$$

The object of our ultimate interest is the following:

$$x^2 \tag{561}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{562}$$

Let us take a look at this:

$$2 \tag{563}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{564}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{565}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{566}$$

One shall regard the object in question with utmost interest:

$$1 \tag{567}$$

Trivially, the derivative of this is equal to

$$0 \tag{568}$$

We shall ponder the following:

$$x^2 \tag{569}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{570}$$

The following is worth a closer look:

$$2 \tag{571}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{572}$$

We shall ponder the following:

$$1 \tag{573}$$

Obviously, the derivative of this is equal to

$$0 \tag{574}$$

We will take a closer look at this:

$$1 \tag{575}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{576}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{577}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{578}$$

One shall regard the object in question with utmost interest:

$$1 \tag{579}$$

As you can see, the derivative of this is equal to

$$0 \tag{580}$$

The object of our ultimate interest is the following:

$$1 \tag{581}$$

Obviously, the derivative of this is equal to

$$0 \tag{582}$$

The following is worth a closer look:

$$2 \cdot x \tag{583}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{584}$$

We shall ponder the following:

$$1 \tag{585}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{586}$$

Consider the following:

$$x^2 \tag{587}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{588}$$

We shall ponder the following:

$$2 \tag{589}$$

As you can see, the derivative of this is equal to

$$0 \tag{590}$$

One shall regard the object in question with utmost interest:

$$1 \tag{591}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{592}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{593}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{594}$$

The object of our ultimate interest is the following:

$$x^2 \tag{595}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{596}$$

The object of our ultimate interest is the following:

$$1 \tag{597}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{598}$$

Consider the following:

$$1 \tag{599}$$

Obviously, the derivative of this is equal to

$$0 \tag{600}$$

One shall regard the object in question with utmost interest:

$$1 \tag{601}$$

Clearly, the derivative of this is equal to

$$0 \tag{602}$$

The object of our ultimate interest is the following:

$$x^2 \tag{603}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{604}$$

We will take a closer look at this:

$$2 \cdot x \tag{605}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{606}$$

Let us take a look at this:

$$1 \tag{607}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{608}$$

We are going to study the following:

$$x^2 \tag{609}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{610}$$

The object of our ultimate interest is the following:

$$2 \tag{611}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{612}$$

One shall regard the object in question with utmost interest:

$$1 \tag{613}$$

Obviously, the derivative of this is equal to

$$0 \tag{614}$$

Let us take a look at this:

$$1 \tag{615}$$

Clearly, the derivative of this is equal to

$$0 \tag{616}$$

We are going to study the following:

$$x^2 \tag{617}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{618}$$

We will take a closer look at this:

$$1 \tag{619}$$

Trivially, the derivative of this is equal to

$$0 \tag{620}$$

We shall ponder the following:

$$2 \cdot x \tag{621}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{622}$$

Consider the following:

$$1 \tag{623}$$

Obviously, the derivative of this is equal to

$$0 \tag{624}$$

The object of our ultimate interest is the following:

$$x^2 \tag{625}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{626}$$

One shall regard the object in question with utmost interest:

$$2 \tag{627}$$

Trivially, the derivative of this is equal to

$$0 \tag{628}$$

We are going to study the following:

$$1 \tag{629}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{630}$$

We shall ponder the following:

$$1 \tag{631}$$

Obviously, the derivative of this is equal to

$$0 \tag{632}$$

The following is worth a closer look:

$$x^2 \tag{633}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{634}$$

We are going to study the following:

$$2 \tag{635}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{636}$$

We are going to study the following:

$$2 \cdot x \tag{637}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{638}$$

One shall regard the object in question with utmost interest:

$$1 \tag{639}$$

As you can see, the derivative of this is equal to

$$0 \tag{640}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{641}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{642}$$

We are going to study the following:

$$2 \tag{643}$$

As you can see, the derivative of this is equal to

$$0 \tag{644}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{645}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{646}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{647}$$

Clearly, the derivative of this is equal to

$$0 \tag{648}$$

We shall ponder the following:

$$x^2 \tag{649}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{650}$$

We shall ponder the following:

$$2 \tag{651}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{652}$$

Consider the following:

$$1 \tag{653}$$

Clearly, the derivative of this is equal to

$$0 \tag{654}$$

Let us take a look at this:

$$2 \tag{655}$$

As you can see, the derivative of this is equal to

$$0 \tag{656}$$

The following is worth a closer look:

$$2 \tag{657}$$

As you can see, the derivative of this is equal to

$$0 \tag{658}$$

We are going to study the following:

$$1 \tag{659}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{660}$$

We shall ponder the following:

$$x^2 \tag{661}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{662}$$

Let us take a look at this:

$$2 \tag{663}$$

Clearly, the derivative of this is equal to

$$0 \tag{664}$$

We shall ponder the following:

$$1 \tag{665}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{666}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{667}$$

Trivially, the derivative of this is equal to

$$0 \tag{668}$$

The object of our ultimate interest is the following:

$$x^2 \tag{669}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{670}$$

The object of our ultimate interest is the following:

$$1 \tag{671}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{672}$$

We are going to study the following:

$$1 \tag{673}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{674}$$

The object of our ultimate interest is the following:

$$1 \tag{675}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{676}$$

Let us take a look at this:

$$x^2 \tag{677}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{678}$$

We will take a closer look at this:

$$2 \cdot x \tag{679}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{680}$$

Let us take a look at this:

$$1 \tag{681}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{682}$$

Let us take a look at this:

$$x^2 \tag{683}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{684}$$

The following is worth a closer look:

$$2 \tag{685}$$

Obviously, the derivative of this is equal to

$$0 \tag{686}$$

We are going to study the following:

$$1 \tag{687}$$

Clearly, the derivative of this is equal to

$$0 \tag{688}$$

Consider the following:

$$1 \tag{689}$$

As you can see, the derivative of this is equal to

$$0 \tag{690}$$

The following is worth a closer look:

$$x^2 \tag{691}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{692}$$

Let us take a look at this:

$$1 \tag{693}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{694}$$

Let us take a look at this:

$$2 \cdot x \tag{695}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{696}$$

The following is worth a closer look:

$$1 \tag{697}$$

Obviously, the derivative of this is equal to

$$0 \tag{698}$$

We are going to study the following:

$$x^2 \tag{699}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{700}$$

One shall regard the object in question with utmost interest:

$$2 \tag{701}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{702}$$

We are going to study the following:

$$1 \tag{703}$$

As you can see, the derivative of this is equal to

$$0 \tag{704}$$

We are going to study the following:

$$1 \tag{705}$$

Clearly, the derivative of this is equal to

$$0 \tag{706}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{707}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{708}$$

The object of our ultimate interest is the following:

$$2 \tag{709}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{710}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{711}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{712}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{713}$$

As you can see, the derivative of this is equal to

$$0 \tag{714}$$

The following is worth a closer look:

$$x^2 \tag{715}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{716}$$

One shall regard the object in question with utmost interest:

$$2 \tag{717}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{718}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{719}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{720}$$

We shall ponder the following:

$$1 \tag{721}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{722}$$

We are going to study the following:

$$x^2 \tag{723}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{724}$$

One shall regard the object in question with utmost interest:

$$2 \tag{725}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{726}$$

We will take a closer look at this:

$$1 \tag{727}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{728}$$

We will take a closer look at this:

$$2 \tag{729}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{730}$$

The following is worth a closer look:

$$2 \tag{731}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{732}$$

We shall ponder the following:

$$1 \tag{733}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{734}$$

Consider the following:

$$x^2 \tag{735}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{736}$$

The following is worth a closer look:

$$2 \tag{737}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{738}$$

One shall regard the object in question with utmost interest:

$$1 \tag{739}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{740}$$

We are going to study the following:

$$1 \tag{741}$$

Obviously, the derivative of this is equal to

$$0 \tag{742}$$

The following is worth a closer look:

$$x^2 \tag{743}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{744}$$

We are going to study the following:

$$1 \tag{745}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{746}$$

We will take a closer look at this:

$$1 \tag{747}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{748}$$

We will take a closer look at this:

$$2 \cdot x \tag{749}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{750}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{751}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{752}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{753}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{754}$$

The object of our ultimate interest is the following:

$$2 \tag{755}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{756}$$

The following is worth a closer look:

$$1 \tag{757}$$

As you can see, the derivative of this is equal to

$$0 \tag{758}$$

We shall ponder the following:

$$1 \tag{759}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{760}$$

Consider the following:

$$x^2 \tag{761}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{762}$$

The object of our ultimate interest is the following:

$$1 \tag{763}$$

Clearly, the derivative of this is equal to

$$0 \tag{764}$$

Let us take a look at this:

$$1 \tag{765}$$

Clearly, the derivative of this is equal to

$$0 \tag{766}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{767}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{768}$$

We are going to study the following:

$$1 \tag{769}$$

Obviously, the derivative of this is equal to

$$0 \tag{770}$$

We are going to study the following:

$$x^2 \tag{771}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{772}$$

The object of our ultimate interest is the following:

$$2 \tag{773}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{774}$$

The following is worth a closer look:

$$1 \tag{775}$$

Trivially, the derivative of this is equal to

$$0 \tag{776}$$

Let us take a look at this:

$$1 \tag{777}$$

Trivially, the derivative of this is equal to

$$0 \tag{778}$$

We are going to study the following:

$$x^2 \tag{779}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{780}$$

The object of our ultimate interest is the following:

$$1 \tag{781}$$

Trivially, the derivative of this is equal to

$$0 \tag{782}$$

We will take a closer look at this:

$$1 \tag{783}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{784}$$

The following is worth a closer look:

$$2 \cdot x \tag{785}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{786}$$

The following is worth a closer look:

$$1 \tag{787}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{788}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{789}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{790}$$

We shall ponder the following:

$$2 \tag{791}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{792}$$

The following is worth a closer look:

$$1 \tag{793}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{794}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{795}$$

As you can see, the derivative of this is equal to

$$0 \tag{796}$$

The object of our ultimate interest is the following:

$$x^2 \tag{797}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{798}$$

We are going to study the following:

$$1 \tag{799}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{800}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{801}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{802}$$

We shall ponder the following:

$$1 \tag{803}$$

As you can see, the derivative of this is equal to

$$0 \tag{804}$$

We are going to study the following:

$$x^2 \tag{805}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{806}$$

One shall regard the object in question with utmost interest:

$$2 \tag{807}$$

Trivially, the derivative of this is equal to

$$0 \tag{808}$$

Consider the following:

$$1 \tag{809}$$

Clearly, the derivative of this is equal to

$$0 \tag{810}$$

The object of our ultimate interest is the following:

$$1 \tag{811}$$

Obviously, the derivative of this is equal to

$$0 \tag{812}$$

Consider the following:

$$x^2 \tag{813}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{814}$$

The following is worth a closer look:

$$2 \tag{815}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{816}$$

Consider the following:

$$2 \cdot x \tag{817}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{818}$$

One shall regard the object in question with utmost interest:

$$1 \tag{819}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{820}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{821}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{822}$$

We will take a closer look at this:

$$2 \tag{823}$$

Trivially, the derivative of this is equal to

$$0 \tag{824}$$

Consider the following:

$$2 \cdot x \tag{825}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{826}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{827}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{828}$$

We will take a closer look at this:

$$x^2 \tag{829}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{830}$$

We will take a closer look at this:

$$2 \tag{831}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{832}$$

The following is worth a closer look:

$$1 \tag{833}$$

As you can see, the derivative of this is equal to

$$0 \tag{834}$$

The following is worth a closer look:

$$2 \tag{835}$$

Clearly, the derivative of this is equal to

$$0 \tag{836}$$

Consider the following:

$$2 \tag{837}$$

As you can see, the derivative of this is equal to

$$0 \tag{838}$$

One shall regard the object in question with utmost interest:

$$1 \tag{839}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{840}$$

We shall ponder the following:

$$x^2 \tag{841}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{842}$$

The following is worth a closer look:

$$2 \tag{843}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{844}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{845}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{846}$$

We shall ponder the following:

$$1 \tag{847}$$

Obviously, the derivative of this is equal to

$$0 \tag{848}$$

Let us take a look at this:

$$x^2 \tag{849}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{850}$$

Let us take a look at this:

$$1 \tag{851}$$

Obviously, the derivative of this is equal to

$$0 \tag{852}$$

We shall ponder the following:

$$1 \tag{853}$$

Clearly, the derivative of this is equal to

$$0 \tag{854}$$

The following is worth a closer look:

$$1 \tag{855}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{856}$$

The following is worth a closer look:

$$x^2 \tag{857}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{858}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{859}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{860}$$

We shall ponder the following:

$$1 \tag{861}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{862}$$

We will take a closer look at this:

$$x^2 \tag{863}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{864}$$

We will take a closer look at this:

$$2 \tag{865}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{866}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{867}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{868}$$

We will take a closer look at this:

$$1 \tag{869}$$

Clearly, the derivative of this is equal to

$$0 \tag{870}$$

Consider the following:

$$x^2 \tag{871}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{872}$$

One shall regard the object in question with utmost interest:

$$2 \tag{873}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{874}$$

We are going to study the following:

$$1 \tag{875}$$

As you can see, the derivative of this is equal to

$$0 \tag{876}$$

We are going to study the following:

$$2 \tag{877}$$

Trivially, the derivative of this is equal to

$$0 \tag{878}$$

One shall regard the object in question with utmost interest:

$$2 \tag{879}$$

Trivially, the derivative of this is equal to

$$0 \tag{880}$$

We will take a closer look at this:

$$1 \tag{881}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{882}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{883}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{884}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{885}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{886}$$

One shall regard the object in question with utmost interest:

$$1 \tag{887}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{888}$$

We are going to study the following:

$$1 \tag{889}$$

As you can see, the derivative of this is equal to

$$0 \tag{890}$$

The object of our ultimate interest is the following:

$$x^2 \tag{891}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{892}$$

One shall regard the object in question with utmost interest:

$$1 \tag{893}$$

As you can see, the derivative of this is equal to

$$0 \tag{894}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{895}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{896}$$

We are going to study the following:

$$1 \tag{897}$$

Trivially, the derivative of this is equal to

$$0 \tag{898}$$

We are going to study the following:

$$x^2 \tag{899}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{900}$$

The object of our ultimate interest is the following:

$$2 \tag{901}$$

Obviously, the derivative of this is equal to

$$0 \tag{902}$$

One shall regard the object in question with utmost interest:

$$1 \tag{903}$$

Clearly, the derivative of this is equal to

$$0 \tag{904}$$

One shall regard the object in question with utmost interest:

$$1 \tag{905}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{906}$$

We will take a closer look at this:

$$x^2 \tag{907}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{908}$$

The object of our ultimate interest is the following:

$$2 \tag{909}$$

Clearly, the derivative of this is equal to

$$0 \tag{910}$$

Let us take a look at this:

$$2 \cdot x \tag{911}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{912}$$

We are going to study the following:

$$1 \tag{913}$$

Obviously, the derivative of this is equal to

$$0 \tag{914}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{915}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{916}$$

The object of our ultimate interest is the following:

$$2 \tag{917}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{918}$$

The object of our ultimate interest is the following:

$$1 \tag{919}$$

Clearly, the derivative of this is equal to

$$0 \tag{920}$$

One shall regard the object in question with utmost interest:

$$1 \tag{921}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{922}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{923}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{924}$$

The following is worth a closer look:

$$1 \tag{925}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{926}$$

Consider the following:

$$2 \cdot x \tag{927}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{928}$$

The object of our ultimate interest is the following:

$$1 \tag{929}$$

Clearly, the derivative of this is equal to

$$0 \tag{930}$$

We will take a closer look at this:

$$x^2 \tag{931}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{932}$$

We will take a closer look at this:

$$2 \tag{933}$$

Clearly, the derivative of this is equal to

$$0 \tag{934}$$

We are going to study the following:

$$1 \tag{935}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{936}$$

We will take a closer look at this:

$$1 \tag{937}$$

Trivially, the derivative of this is equal to

$$0 \tag{938}$$

The object of our ultimate interest is the following:

$$x^2 \tag{939}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{940}$$

Consider the following:

$$2 \tag{941}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{942}$$

The object of our ultimate interest is the following:

$$1 \tag{943}$$

Obviously, the derivative of this is equal to

$$0 \tag{944}$$

We will take a closer look at this:

$$x^2 \tag{945}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{946}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{947}$$

Obviously, the derivative of this is equal to

$$0 \tag{948}$$

We shall ponder the following:

$$2 \tag{949}$$

Clearly, the derivative of this is equal to

$$0 \tag{950}$$

We will take a closer look at this:

$$2 \cdot x \tag{951}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{952}$$

Let us take a look at this:

$$1 \tag{953}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{954}$$

Consider the following:

$$x^2 \tag{955}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{956}$$

The following is worth a closer look:

$$2 \tag{957}$$

Clearly, the derivative of this is equal to

$$0 \tag{958}$$

We shall ponder the following:

$$1 \tag{959}$$

Clearly, the derivative of this is equal to

$$0 \tag{960}$$

The object of our ultimate interest is the following:

$$1 \tag{961}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{962}$$

Let us take a look at this:

$$x^2 \tag{963}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{964}$$

The following is worth a closer look:

$$2 \tag{965}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{966}$$

The object of our ultimate interest is the following:

$$1 \tag{967}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{968}$$

We shall ponder the following:

$$x^2 \tag{969}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{970}$$

Let us take a look at this:

$$1 \tag{971}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{972}$$

The following is worth a closer look:

$$2 \cdot x \tag{973}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{974}$$

Consider the following:

$$1 \tag{975}$$

As you can see, the derivative of this is equal to

$$0 \tag{976}$$

Let us take a look at this:

$$x^2 \tag{977}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{978}$$

We shall ponder the following:

$$2 \tag{979}$$

Clearly, the derivative of this is equal to

$$0 \tag{980}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{981}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{982}$$

Let us take a look at this:

$$1 \tag{983}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{984}$$

We are going to study the following:

$$x^2 \tag{985}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{986}$$

One shall regard the object in question with utmost interest:

$$2 \tag{987}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{988}$$

The object of our ultimate interest is the following:

$$1 \tag{989}$$

Obviously, the derivative of this is equal to

$$0 \tag{990}$$

The object of our ultimate interest is the following:

$$2 \tag{991}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{992}$$

One shall regard the object in question with utmost interest:

$$2 \tag{993}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{994}$$

One shall regard the object in question with utmost interest:

$$1 \tag{995}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{996}$$

We are going to study the following:

$$x^2 \tag{997}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{998}$$

The following is worth a closer look:

$$2 \tag{999}$$

Obviously, the derivative of this is equal to

$$0 \tag{1000}$$

Let us take a look at this:

$$1 \tag{1001}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1002}$$

We shall ponder the following:

$$1 \tag{1003}$$

Clearly, the derivative of this is equal to

$$0 \tag{1004}$$

We are going to study the following:

$$x^2 \tag{1005}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1006}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{1007}$$

As you can see, the derivative of this is equal to

$$0 \tag{1008}$$

We are going to study the following:

$$2 \cdot x \tag{1009}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1010}$$

Consider the following:

$$1 \tag{1011}$$

Trivially, the derivative of this is equal to

$$0 \tag{1012}$$

We shall ponder the following:

$$x^2 \tag{1013}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1014}$$

The object of our ultimate interest is the following:

$$2 \tag{1015}$$

As you can see, the derivative of this is equal to

$$0 \tag{1016}$$

We will take a closer look at this:

$$1 \tag{1017}$$

Obviously, the derivative of this is equal to

$$0 \tag{1018}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1019}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1020}$$

We are going to study the following:

$$1 \tag{1021}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1022}$$

We are going to study the following:

$$x^2 \tag{1023}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1024}$$

We will take a closer look at this:

$$2 \tag{1025}$$

Trivially, the derivative of this is equal to

$$0 \tag{1026}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1027}$$

As you can see, the derivative of this is equal to

$$0 \tag{1028}$$

The object of our ultimate interest is the following:

$$2 \tag{1029}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1030}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1031}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1032}$$

The following is worth a closer look:

$$1 \tag{1033}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1034}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1035}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1036}$$

The following is worth a closer look:

$$2 \tag{1037}$$

Clearly, the derivative of this is equal to

$$0 \tag{1038}$$

The following is worth a closer look:

$$2 \cdot x \tag{1039}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1040}$$

We are going to study the following:

$$1 \tag{1041}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1042}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1043}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1044}$$

Let us take a look at this:

$$2 \tag{1045}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1046}$$

Consider the following:

$$1 \tag{1047}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1048}$$

The object of our ultimate interest is the following:

$$2 \tag{1049}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1050}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1051}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1052}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1053}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1054}$$

The following is worth a closer look:

$$x^2 \tag{1055}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1056}$$

Let us take a look at this:

$$2 \tag{1057}$$

Clearly, the derivative of this is equal to

$$0 \tag{1058}$$

Let us take a look at this:

$$2 \cdot x \tag{1059}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1060}$$

The object of our ultimate interest is the following:

$$1 \tag{1061}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1062}$$

We shall ponder the following:

$$x^2 \tag{1063}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1064}$$

Consider the following:

$$2 \tag{1065}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1066}$$

We will take a closer look at this:

$$1 \tag{1067}$$

Obviously, the derivative of this is equal to

$$0 \tag{1068}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1069}$$

Trivially, the derivative of this is equal to

$$0 \tag{1070}$$

Let us take a look at this:

$$1 \tag{1071}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1072}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1073}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1074}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{1075}$$

Clearly, the derivative of this is equal to

$$0 \tag{1076}$$

Let us take a look at this:

$$2 \tag{1077}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1078}$$

Let us take a look at this:

$$2 \cdot x \tag{1079}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1080}$$

We will take a closer look at this:

$$1 \tag{1081}$$

Trivially, the derivative of this is equal to

$$0 \tag{1082}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1083}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1084}$$

Let us take a look at this:

$$2 \tag{1085}$$

Trivially, the derivative of this is equal to (1086)

Consider the following: (1087)

Trivially, the derivative of this is equal to (1088)

We will take a closer look at this: (1089)

Trivially, the derivative of this is equal to (1090)

We are going to study the following: (1091)

It is now obvious, that the derivative of this is equal to (1092)

The following is worth a closer look: (1093)

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to (1094)

The object of our ultimate interest is the following: (1095)

It is now obvious, that the derivative of this is equal to (1096)

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder: (1097)

It can be easily proved, that the derivative of this is equal to (1098)

We will take a closer look at this: (1099)

As you can see, the derivative of this is equal to (1100)

We shall ponder the following: (1101)

Trivially, the derivative of this is equal to (1102)

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder: (1103)

Obviously, the derivative of this is equal to (1104)

$$0$$

Consider the following:

$$2 \cdot x \tag{1105}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1106}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1107}$$

Clearly, the derivative of this is equal to

$$0 \tag{1108}$$

We are going to study the following:

$$x^2 \tag{1109}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1110}$$

We shall ponder the following:

$$2 \tag{1111}$$

As you can see, the derivative of this is equal to

$$0 \tag{1112}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1113}$$

As you can see, the derivative of this is equal to

$$0 \tag{1114}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{1115}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1116}$$

We shall ponder the following:

$$2 \tag{1117}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1118}$$

Consider the following:

$$1 \tag{1119}$$

Clearly, the derivative of this is equal to

$$0 \tag{1120}$$

We are going to study the following:

$$x^2 \tag{1121}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1122}$$

We shall ponder the following:

$$2 \tag{1123}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1124}$$

Consider the following:

$$1 \tag{1125}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1126}$$

Consider the following:

$$2 \tag{1127}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1128}$$

We will take a closer look at this:

$$2 \tag{1129}$$

Obviously, the derivative of this is equal to

$$0 \tag{1130}$$

We will take a closer look at this:

$$1 \tag{1131}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1132}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1133}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1134}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1135}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1136}$$

The following is worth a closer look:

$$2 \cdot x \tag{1137}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1138}$$

We shall ponder the following:

$$1 \tag{1139}$$

As you can see, the derivative of this is equal to

$$0 \tag{1140}$$

The following is worth a closer look:

$$x^2 \tag{1141}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1142}$$

The following is worth a closer look:

$$2 \tag{1143}$$

Clearly, the derivative of this is equal to

$$0 \tag{1144}$$

The following is worth a closer look:

$$1 \tag{1145}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1146}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{1147}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1148}$$

We shall ponder the following:

$$1 \tag{1149}$$

As you can see, the derivative of this is equal to

$$0 \tag{1150}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1151}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1152}$$

We will take a closer look at this:

$$1 \tag{1153}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1154}$$

Consider the following:

$$1 \tag{1155}$$

Clearly, the derivative of this is equal to

$$0 \tag{1156}$$

We will take a closer look at this:

$$2 \cdot x \tag{1157}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1158}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1159}$$

Clearly, the derivative of this is equal to

$$0 \tag{1160}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1161}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1162}$$

We shall ponder the following:

$$2 \tag{1163}$$

Clearly, the derivative of this is equal to

$$0 \tag{1164}$$

The following is worth a closer look:

$$2 \cdot x \tag{1165}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1166}$$

We shall ponder the following:

$$1 \tag{1167}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1168}$$

We are going to study the following:

$$x^2 \tag{1169}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1170}$$

We are going to study the following:

$$2 \tag{1171}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1172}$$

We shall ponder the following:

$$1 \tag{1173}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1174}$$

The following is worth a closer look:

$$2 \tag{1175}$$

Clearly, the derivative of this is equal to

$$0 \tag{1176}$$

We are going to study the following:

$$2 \tag{1177}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1178}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1179}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1180}$$

We are going to study the following:

$$x^2 \tag{1181}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1182}$$

Consider the following:

$$2 \tag{1183}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1184}$$

The object of our ultimate interest is the following:

$$1 \tag{1185}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1186}$$

We shall ponder the following:

$$1 \tag{1187}$$

Clearly, the derivative of this is equal to

$$0 \tag{1188}$$

The following is worth a closer look:

$$x^2 \tag{1189}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1190}$$

The following is worth a closer look:

$$1 \tag{1191}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1192}$$

We will take a closer look at this:

$$2 \cdot x \tag{1193}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1194}$$

We shall ponder the following:

$$1 \tag{1195}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1196}$$

The following is worth a closer look:

$$x^2 \tag{1197}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1198}$$

We will take a closer look at this:

$$2 \tag{1199}$$

As you can see, the derivative of this is equal to

$$0 \tag{1200}$$

Let us take a look at this:

$$1 \tag{1201}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1202}$$

We are going to study the following:

$$1 \tag{1203}$$

As you can see, the derivative of this is equal to

$$0 \tag{1204}$$

We are going to study the following:

$$x^2 \tag{1205}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1206}$$

The object of our ultimate interest is the following:

$$2 \tag{1207}$$

Obviously, the derivative of this is equal to

$$0 \tag{1208}$$

We shall ponder the following:

$$2 \cdot x \tag{1209}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1210}$$

We will take a closer look at this:

$$1 \tag{1211}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1212}$$

We will take a closer look at this:

$$x^2 \tag{1213}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1214}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{1215}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1216}$$

We will take a closer look at this:

$$1 \tag{1217}$$

Clearly, the derivative of this is equal to

$$0 \tag{1218}$$

The following is worth a closer look:

$$1 \tag{1219}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1220}$$

We shall ponder the following:

$$x^2 \tag{1221}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1222}$$

We will take a closer look at this:

$$1 \tag{1223}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1224}$$

We will take a closer look at this:

$$1 \tag{1225}$$

Obviously, the derivative of this is equal to

$$0 \tag{1226}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1227}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1228}$$

We will take a closer look at this:

$$1 \tag{1229}$$

Clearly, the derivative of this is equal to

$$0 \tag{1230}$$

Consider the following:

$$x^2 \tag{1231}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1232}$$

Let us take a look at this:

$$2 \tag{1233}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1234}$$

The object of our ultimate interest is the following:

$$1 \tag{1235}$$

Clearly, the derivative of this is equal to

$$0 \tag{1236}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1237}$$

Obviously, the derivative of this is equal to

$$0 \tag{1238}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1239}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1240}$$

We shall ponder the following:

$$1 \tag{1241}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1242}$$

The following is worth a closer look:

$$2 \cdot x \tag{1243}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1244}$$

We shall ponder the following:

$$1 \tag{1245}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1246}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1247}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1248}$$

We are going to study the following:

$$2 \tag{1249}$$

Obviously, the derivative of this is equal to

$$0 \tag{1250}$$

Let us take a look at this:

$$1 \tag{1251}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1252}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1253}$$

Obviously, the derivative of this is equal to

$$0 \tag{1254}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1255}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1256}$$

We will take a closer look at this:

$$2 \tag{1257}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1258}$$

We will take a closer look at this:

$$2 \cdot x \tag{1259}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1260}$$

We shall ponder the following:

$$1 \tag{1261}$$

Trivially, the derivative of this is equal to

$$0 \tag{1262}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1263}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1264}$$

We are going to study the following:

$$2 \tag{1265}$$

Clearly, the derivative of this is equal to

$$0 \tag{1266}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1267}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1268}$$

Consider the following:

$$1 \tag{1269}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1270}$$

Consider the following:

$$x^2 \tag{1271}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1272}$$

We shall ponder the following:

$$2 \tag{1273}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1274}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1275}$$

Trivially, the derivative of this is equal to

$$0 \tag{1276}$$

Consider the following:

$$2 \tag{1277}$$

Trivially, the derivative of this is equal to

$$0 \tag{1278}$$

Let us take a look at this:

$$2 \tag{1279}$$

As you can see, the derivative of this is equal to

$$0 \tag{1280}$$

We will take a closer look at this:

$$1 \tag{1281}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1282}$$

We shall ponder the following:

$$x^2 \tag{1283}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1284}$$

We are going to study the following:

$$2 \tag{1285}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1286}$$

Let us take a look at this:

$$1 \tag{1287}$$

Trivially, the derivative of this is equal to

$$0 \tag{1288}$$

We shall ponder the following:

$$1 \tag{1289}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1290}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1291}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1292}$$

We are going to study the following:

$$1 \tag{1293}$$

Obviously, the derivative of this is equal to

$$0 \tag{1294}$$

Let us take a look at this:

$$1 \tag{1295}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1296}$$

We shall ponder the following:

$$x - 2 \tag{1297}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{1298}$$

We shall ponder the following:

$$1 \tag{1299}$$

Obviously, the derivative of this is equal to

$$0 \tag{1300}$$

We are going to study the following:

$$x^2 \tag{1301}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1302}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1303}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1304}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1305}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1306}$$

Let us take a look at this:

$$x^2 \tag{1307}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1308}$$

The following is worth a closer look:

$$2 \tag{1309}$$

Clearly, the derivative of this is equal to

$$0 \tag{1310}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1311}$$

Trivially, the derivative of this is equal to

$$0 \tag{1312}$$

The following is worth a closer look:

$$1 \tag{1313}$$

Clearly, the derivative of this is equal to

$$0 \tag{1314}$$

Let us take a look at this:

$$x^2 \tag{1315}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1316}$$

The following is worth a closer look:

$$1 \tag{1317}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1318}$$

Consider the following:

$$1 \tag{1319}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1320}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1321}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1322}$$

The object of our ultimate interest is the following:

$$1 \tag{1323}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1324}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1325}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1326}$$

We are going to study the following:

$$2 \tag{1327}$$

Clearly, the derivative of this is equal to

$$0 \tag{1328}$$

Consider the following:

$$1 \tag{1329}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1330}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1331}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1332}$$

Let us take a look at this:

$$x^2 \tag{1333}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1334}$$

We are going to study the following:

$$1 \tag{1335}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1336}$$

The following is worth a closer look:

$$1 \tag{1337}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1338}$$

Consider the following:

$$1 \tag{1339}$$

Clearly, the derivative of this is equal to

$$0 \tag{1340}$$

We are going to study the following:

$$x^2 \tag{1341}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1342}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1343}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1344}$$

The following is worth a closer look:

$$1 \tag{1345}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1346}$$

Consider the following:

$$x^2 \tag{1347}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1348}$$

We shall ponder the following:

$$2 \tag{1349}$$

Obviously, the derivative of this is equal to

$$0 \tag{1350}$$

We shall ponder the following:

$$1 \tag{1351}$$

As you can see, the derivative of this is equal to

$$0 \tag{1352}$$

We shall ponder the following:

$$1 \tag{1353}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1354}$$

The following is worth a closer look:

$$x^2 \tag{1355}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1356}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1357}$$

Clearly, the derivative of this is equal to

$$0 \tag{1358}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1359}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1360}$$

The following is worth a closer look:

$$1 \tag{1361}$$

Clearly, the derivative of this is equal to

$$0 \tag{1362}$$

Let us take a look at this:

$$x^2 \tag{1363}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1364}$$

Let us take a look at this:

$$2 \tag{1365}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1366}$$

We will take a closer look at this:

$$1 \tag{1367}$$

As you can see, the derivative of this is equal to

$$0 \tag{1368}$$

We are going to study the following:

$$1 \tag{1369}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1370}$$

Let us take a look at this:

$$x^2 \tag{1371}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1372}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1373}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1374}$$

We will take a closer look at this:

$$2 \cdot x \tag{1375}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1376}$$

The object of our ultimate interest is the following:

$$1 \tag{1377}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1378}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1379}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1380}$$

We will take a closer look at this:

$$2 \tag{1381}$$

As you can see, the derivative of this is equal to

$$0 \tag{1382}$$

We will take a closer look at this:

$$2 \cdot x \tag{1383}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1384}$$

Consider the following:

$$1 \tag{1385}$$

As you can see, the derivative of this is equal to

$$0 \tag{1386}$$

Consider the following:

$$x^2 \tag{1387}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1388}$$

We shall ponder the following:

$$2 \tag{1389}$$

As you can see, the derivative of this is equal to

$$0 \tag{1390}$$

Let us take a look at this:

$$1 \tag{1391}$$

Obviously, the derivative of this is equal to

$$0 \tag{1392}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{1393}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1394}$$

Consider the following:

$$2 \tag{1395}$$

Obviously, the derivative of this is equal to

$$0 \tag{1396}$$

The following is worth a closer look:

$$1 \tag{1397}$$

Trivially, the derivative of this is equal to

$$0 \tag{1398}$$

We are going to study the following:

$$x^2 \tag{1399}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1400}$$

We will take a closer look at this:

$$2 \tag{1401}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1402}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1403}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1404}$$

The following is worth a closer look:

$$1 \tag{1405}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1406}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1407}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1408}$$

We are going to study the following:

$$1 \tag{1409}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1410}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1411}$$

Trivially, the derivative of this is equal to

$$0 \tag{1412}$$

Let us take a look at this:

$$1 \tag{1413}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1414}$$

The following is worth a closer look:

$$x^2 \tag{1415}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1416}$$

We will take a closer look at this:

$$2 \cdot x \tag{1417}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1418}$$

We shall ponder the following:

$$1 \tag{1419}$$

Trivially, the derivative of this is equal to

$$0 \tag{1420}$$

The following is worth a closer look:

$$x^2 \tag{1421}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1422}$$

Let us take a look at this:

$$2 \tag{1423}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1424}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1425}$$

Trivially, the derivative of this is equal to

$$0 \tag{1426}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1427}$$

Trivially, the derivative of this is equal to

$$0 \tag{1428}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1429}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1430}$$

Let us take a look at this:

$$1 \tag{1431}$$

Obviously, the derivative of this is equal to

$$0 \tag{1432}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1433}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1434}$$

We are going to study the following:

$$2 \cdot x \tag{1435}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1436}$$

Consider the following:

$$1 \tag{1437}$$

Clearly, the derivative of this is equal to

$$0 \tag{1438}$$

The following is worth a closer look:

$$x^2 \tag{1439}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1440}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{1441}$$

Obviously, the derivative of this is equal to

$$0 \tag{1442}$$

The following is worth a closer look:

$$1 \tag{1443}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1444}$$

We will take a closer look at this:

$$1 \tag{1445}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1446}$$

Consider the following:

$$x^2 \tag{1447}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1448}$$

The object of our ultimate interest is the following:

$$1 \tag{1449}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1450}$$

Consider the following:

$$1 \tag{1451}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1452}$$

Consider the following:

$$1 \tag{1453}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1454}$$

The following is worth a closer look:

$$x^2 \tag{1455}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1456}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1457}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1458}$$

Consider the following:

$$1 \tag{1459}$$

Trivially, the derivative of this is equal to

$$0 \tag{1460}$$

Consider the following:

$$x^2 \tag{1461}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1462}$$

The object of our ultimate interest is the following:

$$2 \tag{1463}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1464}$$

Let us take a look at this:

$$1 \tag{1465}$$

As you can see, the derivative of this is equal to

$$0 \tag{1466}$$

Let us take a look at this:

$$1 \tag{1467}$$

Obviously, the derivative of this is equal to

$$0 \tag{1468}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1469}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1470}$$

The object of our ultimate interest is the following:

$$1 \tag{1471}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1472}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1473}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1474}$$

We are going to study the following:

$$1 \tag{1475}$$

Clearly, the derivative of this is equal to

$$0 \tag{1476}$$

Consider the following:

$$x^2 \tag{1477}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1478}$$

Consider the following:

$$2 \tag{1479}$$

Clearly, the derivative of this is equal to

$$0 \tag{1480}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1481}$$

As you can see, the derivative of this is equal to

$$0 \tag{1482}$$

The object of our ultimate interest is the following:

$$1 \tag{1483}$$

As you can see, the derivative of this is equal to

$$0 \tag{1484}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1485}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1486}$$

The following is worth a closer look:

$$2 \tag{1487}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1488}$$

We are going to study the following:

$$2 \cdot x \tag{1489}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1490}$$

The object of our ultimate interest is the following:

$$1 \tag{1491}$$

Clearly, the derivative of this is equal to

$$0 \tag{1492}$$

Let us take a look at this:

$$x^2 \tag{1493}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1494}$$

We are going to study the following:

$$2 \tag{1495}$$

As you can see, the derivative of this is equal to

$$0 \tag{1496}$$

We shall ponder the following:

$$2 \cdot x \tag{1497}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1498}$$

Consider the following:

$$1 \tag{1499}$$

As you can see, the derivative of this is equal to

$$0 \tag{1500}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1501}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1502}$$

We are going to study the following:

$$2 \tag{1503}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1504}$$

We are going to study the following:

$$1 \tag{1505}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1506}$$

We are going to study the following:

$$2 \tag{1507}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1508}$$

We shall ponder the following:

$$2 \tag{1509}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1510}$$

Let us take a look at this:

$$1 \tag{1511}$$

Trivially, the derivative of this is equal to

$$0 \tag{1512}$$

We will take a closer look at this:

$$x^2 \tag{1513}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1514}$$

The following is worth a closer look:

$$2 \tag{1515}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1516}$$

We are going to study the following:

$$1 \tag{1517}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1518}$$

Consider the following:

$$1 \tag{1519}$$

Obviously, the derivative of this is equal to

$$0 \tag{1520}$$

Let us take a look at this:

$$x^2 \tag{1521}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1522}$$

Let us take a look at this:

$$1 \tag{1523}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1524}$$

The object of our ultimate interest is the following:

$$1 \tag{1525}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1526}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1527}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1528}$$

Consider the following:

$$1 \tag{1529}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1530}$$

We are going to study the following:

$$x^2 \tag{1531}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1532}$$

We will take a closer look at this:

$$2 \tag{1533}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1534}$$

We shall ponder the following:

$$1 \tag{1535}$$

As you can see, the derivative of this is equal to

$$0 \tag{1536}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1537}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1538}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1539}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1540}$$

We will take a closer look at this:

$$1 \tag{1541}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1542}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1543}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1544}$$

The object of our ultimate interest is the following:

$$1 \tag{1545}$$

Trivially, the derivative of this is equal to

$$0 \tag{1546}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1547}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1548}$$

We shall ponder the following:

$$2 \cdot x \tag{1549}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1550}$$

The object of our ultimate interest is the following:

$$1 \tag{1551}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1552}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1553}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1554}$$

The object of our ultimate interest is the following:

$$2 \tag{1555}$$

Clearly, the derivative of this is equal to

$$0 \tag{1556}$$

We are going to study the following:

$$1 \tag{1557}$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (1558)$$

Let us take a look at this:

$$1 \quad (1559)$$

Clearly, the derivative of this is equal to

$$0 \quad (1560)$$

Let us take a look at this:

$$x^2 \quad (1561)$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1562)$$

We are going to study the following:

$$1 \quad (1563)$$

Clearly, the derivative of this is equal to

$$0 \quad (1564)$$

The object of our ultimate interest is the following:

$$1 \quad (1565)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (1566)$$

The object of our ultimate interest is the following:

$$2 \cdot x \quad (1567)$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (1568)$$

We are going to study the following:

$$1 \quad (1569)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (1570)$$

We will take a closer look at this:

$$x^2 \quad (1571)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1572)$$

Consider the following:

$$2 \quad (1573)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (1574)$$

Let us take a look at this:

$$1 \tag{1575}$$

As you can see, the derivative of this is equal to

$$0 \tag{1576}$$

Let us take a look at this:

$$1 \tag{1577}$$

Obviously, the derivative of this is equal to

$$0 \tag{1578}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1579}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1580}$$

The object of our ultimate interest is the following:

$$1 \tag{1581}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1582}$$

The following is worth a closer look:

$$2 \cdot x \tag{1583}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1584}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1585}$$

Trivially, the derivative of this is equal to

$$0 \tag{1586}$$

Consider the following:

$$x^2 \tag{1587}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1588}$$

We shall ponder the following:

$$2 \tag{1589}$$

Obviously, the derivative of this is equal to

$$0 \tag{1590}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1591}$$

Trivially, the derivative of this is equal to

$$0 \tag{1592}$$

We shall ponder the following:

$$1 \tag{1593}$$

Trivially, the derivative of this is equal to

$$0 \tag{1594}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1595}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1596}$$

We will take a closer look at this:

$$2 \tag{1597}$$

Trivially, the derivative of this is equal to

$$0 \tag{1598}$$

We shall ponder the following:

$$2 \cdot x \tag{1599}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1600}$$

The following is worth a closer look:

$$1 \tag{1601}$$

Obviously, the derivative of this is equal to

$$0 \tag{1602}$$

We are going to study the following:

$$x^2 \tag{1603}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1604}$$

Consider the following:

$$2 \tag{1605}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1606}$$

We are going to study the following:

$$2 \cdot x \tag{1607}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1608}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1609}$$

As you can see, the derivative of this is equal to

$$0 \tag{1610}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1611}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1612}$$

Consider the following:

$$2 \tag{1613}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1614}$$

Consider the following:

$$1 \tag{1615}$$

As you can see, the derivative of this is equal to

$$0 \tag{1616}$$

We shall ponder the following:

$$2 \tag{1617}$$

Clearly, the derivative of this is equal to

$$0 \tag{1618}$$

Consider the following:

$$2 \tag{1619}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1620}$$

Let us take a look at this:

$$1 \tag{1621}$$

Obviously, the derivative of this is equal to

$$0 \tag{1622}$$

We shall ponder the following:

$$x^2 \tag{1623}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1624}$$

Let us take a look at this:

$$2 \tag{1625}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1626}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1627}$$

Obviously, the derivative of this is equal to

$$0 \tag{1628}$$

Consider the following:

$$1 \tag{1629}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1630}$$

The following is worth a closer look:

$$x^2 \tag{1631}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1632}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1633}$$

Clearly, the derivative of this is equal to

$$0 \tag{1634}$$

The object of our ultimate interest is the following:

$$1 \tag{1635}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1636}$$

The object of our ultimate interest is the following:

$$1 \tag{1637}$$

Trivially, the derivative of this is equal to

$$0 \tag{1638}$$

We will take a closer look at this:

$$x^2 \tag{1639}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1640}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1641}$$

Clearly, the derivative of this is equal to

$$0 \tag{1642}$$

Let us take a look at this:

$$1 \tag{1643}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1644}$$

We shall ponder the following:

$$x^2 \tag{1645}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1646}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x - 2 \tag{1647}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{1648}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1649}$$

Trivially, the derivative of this is equal to

$$0 \tag{1650}$$

The following is worth a closer look:

$$x^2 \tag{1651}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1652}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1653}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1654}$$

The object of our ultimate interest is the following:

$$1 \tag{1655}$$

Trivially, the derivative of this is equal to

$$0 \tag{1656}$$

Consider the following:

$$x^2 \tag{1657}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1658}$$

The object of our ultimate interest is the following:

$$2 \tag{1659}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1660}$$

Consider the following:

$$1 \tag{1661}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1662}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1663}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1664}$$

We shall ponder the following:

$$x^2 \tag{1665}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1666}$$

Consider the following:

$$1 \tag{1667}$$

Clearly, the derivative of this is equal to

$$0 \tag{1668}$$

The following is worth a closer look:

$$1 \tag{1669}$$

Clearly, the derivative of this is equal to

$$0 \tag{1670}$$

Consider the following:

$$2 \cdot x \tag{1671}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1672}$$

We shall ponder the following:

$$1 \tag{1673}$$

As you can see, the derivative of this is equal to

$$0 \tag{1674}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1675}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1676}$$

The object of our ultimate interest is the following:

$$2 \tag{1677}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1678}$$

The following is worth a closer look:

$$1 \tag{1679}$$

Obviously, the derivative of this is equal to

$$0 \tag{1680}$$

Let us take a look at this:

$$1 \tag{1681}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1682}$$

Consider the following:

$$x^2 \tag{1683}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1684}$$

The following is worth a closer look:

$$1 \tag{1685}$$

Clearly, the derivative of this is equal to

$$0 \tag{1686}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1687}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1688}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1689}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1690}$$

Let us take a look at this:

$$x^2 \tag{1691}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1692}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1693}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1694}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1695}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1696}$$

The following is worth a closer look:

$$x^2 \tag{1697}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1698}$$

The object of our ultimate interest is the following:

$$2 \tag{1699}$$

Clearly, the derivative of this is equal to

$$0 \tag{1700}$$

Consider the following:

$$1 \tag{1701}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1702}$$

We will take a closer look at this:

$$1 \tag{1703}$$

Clearly, the derivative of this is equal to

$$0 \tag{1704}$$

We will take a closer look at this:

$$x^2 \tag{1705}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1706}$$

We shall ponder the following:

$$1 \tag{1707}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1708}$$

We will take a closer look at this:

$$2 \cdot x \tag{1709}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1710}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1711}$$

Obviously, the derivative of this is equal to

$$0 \tag{1712}$$

We shall ponder the following:

$$x^2 \tag{1713}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1714}$$

Let us take a look at this:

$$2 \tag{1715}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1716}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1717}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1718}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1719}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1720}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1721}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1722}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1723}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1724}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1725}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1726}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1727}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1728}$$

The following is worth a closer look:

$$x^2 \tag{1729}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1730}$$

We shall ponder the following:

$$2 \tag{1731}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1732}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1733}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1734}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1735}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1736}$$

We are going to study the following:

$$x^2 \tag{1737}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1738}$$

We will take a closer look at this:

$$2 \tag{1739}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1740}$$

Consider the following:

$$1 \tag{1741}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1742}$$

The object of our ultimate interest is the following:

$$2 \tag{1743}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1744}$$

Let us take a look at this:

$$2 \tag{1745}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1746}$$

Consider the following:

$$1 \tag{1747}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1748}$$

We are going to study the following:

$$x^2 \tag{1749}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1750}$$

Consider the following:

$$2 \tag{1751}$$

Trivially, the derivative of this is equal to

$$0 \tag{1752}$$

The object of our ultimate interest is the following:

$$1 \tag{1753}$$

As you can see, the derivative of this is equal to

$$0 \tag{1754}$$

The following is worth a closer look:

$$1 \tag{1755}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1756}$$

We are going to study the following:

$$x^2 \tag{1757}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1758}$$

We will take a closer look at this:

$$1 \tag{1759}$$

Clearly, the derivative of this is equal to

$$0 \tag{1760}$$

Consider the following:

$$1 \tag{1761}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1762}$$

We will take a closer look at this:

$$x - 2 \tag{1763}$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{1764}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1765}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1766}$$

We shall ponder the following:

$$x^2 \tag{1767}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1768}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1769}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1770}$$

The following is worth a closer look:

$$1 \tag{1771}$$

Obviously, the derivative of this is equal to

$$0 \tag{1772}$$

We shall ponder the following:

$$x^2 \tag{1773}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1774}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{1775}$$

As you can see, the derivative of this is equal to

$$0 \tag{1776}$$

The following is worth a closer look:

$$1 \tag{1777}$$

Obviously, the derivative of this is equal to

$$0 \tag{1778}$$

Consider the following:

$$1 \tag{1779}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1780}$$

Let us take a look at this:

$$x^2 \tag{1781}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1782}$$

We shall ponder the following:

$$1 \tag{1783}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1784}$$

We shall ponder the following:

$$1 \tag{1785}$$

As you can see, the derivative of this is equal to

$$0 \tag{1786}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1787}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1788}$$

Let us take a look at this:

$$1 \tag{1789}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1790}$$

The following is worth a closer look:

$$x^2 \tag{1791}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1792}$$

We are going to study the following:

$$2 \tag{1793}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1794}$$

We shall ponder the following:

$$1 \tag{1795}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1796}$$

Let us take a look at this:

$$1 \tag{1797}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1798}$$

We are going to study the following:

$$x^2 \tag{1799}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1800}$$

The following is worth a closer look:

$$1 \tag{1801}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1802}$$

We are going to study the following:

$$1 \tag{1803}$$

Trivially, the derivative of this is equal to

$$0 \tag{1804}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1805}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1806}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1807}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1808}$$

We shall ponder the following:

$$1 \tag{1809}$$

Clearly, the derivative of this is equal to

$$0 \tag{1810}$$

Consider the following:

$$1 \tag{1811}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1812}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1813}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1814}$$

Consider the following:

$$2 \cdot x \tag{1815}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1816}$$

The object of our ultimate interest is the following:

$$1 \tag{1817}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1818}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1819}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1820}$$

The following is worth a closer look:

$$2 \tag{1821}$$

As you can see, the derivative of this is equal to

$$0 \tag{1822}$$

We are going to study the following:

$$1 \tag{1823}$$

Obviously, the derivative of this is equal to

$$0 \tag{1824}$$

The following is worth a closer look:

$$1 \tag{1825}$$

As you can see, the derivative of this is equal to

$$0 \tag{1826}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1827}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1828}$$

Consider the following:

$$1 \tag{1829}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1830}$$

The following is worth a closer look:

$$1 \tag{1831}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1832}$$

The following is worth a closer look:

$$x - 2 \tag{1833}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{1834}$$

The following is worth a closer look:

$$1 \tag{1835}$$

Clearly, the derivative of this is equal to

$$0 \tag{1836}$$

The following is worth a closer look:

$$x^2 \tag{1837}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1838}$$

We are going to study the following:

$$1 \tag{1839}$$

Trivially, the derivative of this is equal to

$$0 \tag{1840}$$

We shall ponder the following:

$$x^2 \tag{1841}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1842}$$

We will take a closer look at this:

$$x - 2 \tag{1843}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{1844}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1845}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1846}$$

We will take a closer look at this:

$$x^2 \tag{1847}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1848}$$

We are going to study the following:

$$2 \cdot x \tag{1849}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1850}$$

We are going to study the following:

$$1 \tag{1851}$$

As you can see, the derivative of this is equal to

$$0 \tag{1852}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1853}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1854}$$

We shall ponder the following:

$$2 \tag{1855}$$

Obviously, the derivative of this is equal to

$$0 \tag{1856}$$

The following is worth a closer look:

$$1 \tag{1857}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1858}$$

We will take a closer look at this:

$$1 \tag{1859}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1860}$$

The following is worth a closer look:

$$x^2 \tag{1861}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1862}$$

Consider the following:

$$1 \tag{1863}$$

Clearly, the derivative of this is equal to

$$0 \tag{1864}$$

Consider the following:

$$1 \tag{1865}$$

As you can see, the derivative of this is equal to

$$0 \tag{1866}$$

We shall ponder the following:

$$2 \cdot x \tag{1867}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1868}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1869}$$

As you can see, the derivative of this is equal to

$$0 \tag{1870}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1871}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1872}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1873}$$

Clearly, the derivative of this is equal to

$$0 \tag{1874}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1875}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1876}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1877}$$

As you can see, the derivative of this is equal to

$$0 \tag{1878}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1879}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1880}$$

Let us take a look at this:

$$1 \tag{1881}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1882}$$

Consider the following:

$$1 \tag{1883}$$

Obviously, the derivative of this is equal to

$$0 \tag{1884}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1885}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1886}$$

The following is worth a closer look:

$$x^2 \tag{1887}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1888}$$

We shall ponder the following:

$$2 \cdot x \tag{1889}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1890}$$

The following is worth a closer look:

$$1 \tag{1891}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1892}$$

We are going to study the following:

$$x^2 \tag{1893}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1894}$$

The object of our ultimate interest is the following:

$$2 \tag{1895}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1896}$$

We shall ponder the following:

$$1 \tag{1897}$$

Trivially, the derivative of this is equal to

$$0 \tag{1898}$$

We will take a closer look at this:

$$1 \tag{1899}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1900}$$

The following is worth a closer look:

$$x^2 \tag{1901}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1902}$$

The following is worth a closer look:

$$1 \tag{1903}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1904}$$

We shall ponder the following:

$$2 \cdot x \tag{1905}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1906}$$

Let us take a look at this:

$$1 \tag{1907}$$

Clearly, the derivative of this is equal to

$$0 \tag{1908}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1909}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1910}$$

We shall ponder the following:

$$2 \tag{1911}$$

Trivially, the derivative of this is equal to

$$0 \tag{1912}$$

Let us take a look at this:

$$1 \tag{1913}$$

Trivially, the derivative of this is equal to

$$0 \tag{1914}$$

We will take a closer look at this:

$$1 \tag{1915}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1916}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1917}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1918}$$

The following is worth a closer look:

$$2 \tag{1919}$$

Obviously, the derivative of this is equal to

$$0 \tag{1920}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1921}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1922}$$

The object of our ultimate interest is the following:

$$1 \tag{1923}$$

Clearly, the derivative of this is equal to

$$0 \tag{1924}$$

We will take a closer look at this:

$$x^2 \tag{1925}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1926}$$

Let us take a look at this:

$$2 \tag{1927}$$

Obviously, the derivative of this is equal to

$$0 \tag{1928}$$

Let us take a look at this:

$$2 \cdot x \tag{1929}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1930}$$

The following is worth a closer look:

$$1 \tag{1931}$$

As you can see, the derivative of this is equal to

$$0 \tag{1932}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1933}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1934}$$

Let us take a look at this:

$$2 \tag{1935}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1936}$$

The following is worth a closer look:

$$1 \tag{1937}$$

As you can see, the derivative of this is equal to

$$0 \tag{1938}$$

Let us take a look at this:

$$2 \tag{1939}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1940}$$

We are going to study the following:

$$2 \tag{1941}$$

Trivially, the derivative of this is equal to

$$0 \tag{1942}$$

The object of our ultimate interest is the following:

$$1 \tag{1943}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1944}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1945}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1946}$$

Let us take a look at this:

$$2 \tag{1947}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1948}$$

We are going to study the following:

$$1 \tag{1949}$$

Obviously, the derivative of this is equal to

$$0 \tag{1950}$$

Consider the following:

$$1 \tag{1951}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1952}$$

The following is worth a closer look:

$$x^2 \tag{1953}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1954}$$

The following is worth a closer look:

$$1 \tag{1955}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1956}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1957}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1958}$$

We will take a closer look at this:

$$x - 2 \tag{1959}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{1960}$$

The following is worth a closer look:

$$1 \tag{1961}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1962}$$

We will take a closer look at this:

$$x^2 \tag{1963}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1964}$$

We shall ponder the following:

$$2 \cdot x \tag{1965}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1966}$$

We will take a closer look at this:

$$1 \tag{1967}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1968}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1969}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1970}$$

Let us take a look at this:

$$2 \tag{1971}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (1972)$$

We are going to study the following:

$$1 \quad (1973)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (1974)$$

Consider the following:

$$1 \quad (1975)$$

Trivially, the derivative of this is equal to

$$0 \quad (1976)$$

Consider the following:

$$x^2 \quad (1977)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1978)$$

Let us take a look at this:

$$1 \quad (1979)$$

As you can see, the derivative of this is equal to

$$0 \quad (1980)$$

The following is worth a closer look:

$$1 \quad (1981)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (1982)$$

The following is worth a closer look:

$$2 \cdot x \quad (1983)$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (1984)$$

We are going to study the following:

$$1 \quad (1985)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (1986)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (1987)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1988)$$

Consider the following:

$$2 \quad (1989)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (1990)$$

Consider the following:

$$1 \quad (1991)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (1992)$$

Consider the following:

$$1 \quad (1993)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (1994)$$

Consider the following:

$$x^2 \quad (1995)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (1996)$$

We shall ponder the following:

$$1 \quad (1997)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (1998)$$

We are going to study the following:

$$1 \quad (1999)$$

Trivially, the derivative of this is equal to

$$0 \quad (2000)$$

The object of our ultimate interest is the following:

$$1 \quad (2001)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2002)$$

Consider the following:

$$x^2 \quad (2003)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2004)$$

Let us take a look at this:

$$1 \quad (2005)$$

As you can see, the derivative of this is equal to

$$0 \quad (2006)$$

The object of our ultimate interest is the following:

$$1 \tag{2007}$$

As you can see, the derivative of this is equal to

$$0 \tag{2008}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2009}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2010}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2011}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2012}$$

The following is worth a closer look:

$$1 \tag{2013}$$

As you can see, the derivative of this is equal to

$$0 \tag{2014}$$

Let us take a look at this:

$$x^2 \tag{2015}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2016}$$

We shall ponder the following:

$$2 \tag{2017}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2018}$$

We are going to study the following:

$$1 \tag{2019}$$

Obviously, the derivative of this is equal to

$$0 \tag{2020}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2021}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2022}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2023}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2024}$$

We will take a closer look at this:

$$1 \tag{2025}$$

As you can see, the derivative of this is equal to

$$0 \tag{2026}$$

Let us take a look at this:

$$1 \tag{2027}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2028}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x - 2 \tag{2029}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{2030}$$

We shall ponder the following:

$$1 \tag{2031}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2032}$$

We shall ponder the following:

$$x^2 \tag{2033}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2034}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2035}$$

Obviously, the derivative of this is equal to

$$0 \tag{2036}$$

Consider the following:

$$x^2 \tag{2037}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2038}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{2039}$$

Obviously, the derivative of this is equal to

$$1 - 0 \tag{2040}$$

We shall ponder the following:

$$1 \tag{2041}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2042}$$

The following is worth a closer look:

$$x^2 \tag{2043}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2044}$$

We are going to study the following:

$$2 \cdot x \tag{2045}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2046}$$

The following is worth a closer look:

$$1 \tag{2047}$$

Trivially, the derivative of this is equal to

$$0 \tag{2048}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2049}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2050}$$

We are going to study the following:

$$2 \tag{2051}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2052}$$

We shall ponder the following:

$$1 \tag{2053}$$

Clearly, the derivative of this is equal to

$$0 \tag{2054}$$

We are going to study the following:

$$1 \tag{2055}$$

As you can see, the derivative of this is equal to

$$0 \tag{2056}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2057}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2058}$$

The object of our ultimate interest is the following:

$$1 \tag{2059}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2060}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2061}$$

Trivially, the derivative of this is equal to

$$0 \tag{2062}$$

We will take a closer look at this:

$$x - 2 \tag{2063}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{2064}$$

Let us take a look at this:

$$1 \tag{2065}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2066}$$

We shall ponder the following:

$$x^2 \tag{2067}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2068}$$

Consider the following:

$$1 \tag{2069}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2070}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2071}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2072}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2073}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2074}$$

Let us take a look at this:

$$1 \tag{2075}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2076}$$

We shall ponder the following:

$$x^2 \tag{2077}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2078}$$

We are going to study the following:

$$2 \tag{2079}$$

Obviously, the derivative of this is equal to

$$0 \tag{2080}$$

The object of our ultimate interest is the following:

$$1 \tag{2081}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2082}$$

Consider the following:

$$1 \tag{2083}$$

Clearly, the derivative of this is equal to

$$0 \tag{2084}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2085}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2086}$$

Consider the following:

$$1 \tag{2087}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2088}$$

The object of our ultimate interest is the following:

$$1 \tag{2089}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2090}$$

The following is worth a closer look:

$$2 \cdot x \tag{2091}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2092}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2093}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2094}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2095}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2096}$$

Consider the following:

$$2 \tag{2097}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2098}$$

Consider the following:

$$1 \tag{2099}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2100}$$

The object of our ultimate interest is the following:

$$1 \tag{2101}$$

Clearly, the derivative of this is equal to

$$0 \tag{2102}$$

We will take a closer look at this:

$$x^2 \tag{2103}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2104}$$

Let us take a look at this:

$$1 \tag{2105}$$

As you can see, the derivative of this is equal to

$$0 \tag{2106}$$

We will take a closer look at this:

$$1 \tag{2107}$$

Clearly, the derivative of this is equal to

$$0 \quad (2108)$$

We will take a closer look at this:

$$1 \quad (2109)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2110)$$

The object of our ultimate interest is the following:

$$x^2 \quad (2111)$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2112)$$

We will take a closer look at this:

$$2 \cdot x \quad (2113)$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2114)$$

The object of our ultimate interest is the following:

$$1 \quad (2115)$$

Trivially, the derivative of this is equal to

$$0 \quad (2116)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (2117)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2118)$$

Consider the following:

$$2 \quad (2119)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2120)$$

Consider the following:

$$1 \quad (2121)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2122)$$

One shall regard the object in question with utmost interest:

$$1 \quad (2123)$$

Clearly, the derivative of this is equal to

$$0 \quad (2124)$$

We will take a closer look at this:

$$x^2 \tag{2125}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2126}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2127}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2128}$$

We will take a closer look at this:

$$2 \cdot x \tag{2129}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2130}$$

Let us take a look at this:

$$1 \tag{2131}$$

Clearly, the derivative of this is equal to

$$0 \tag{2132}$$

Let us take a look at this:

$$x^2 \tag{2133}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2134}$$

We will take a closer look at this:

$$2 \tag{2135}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2136}$$

The object of our ultimate interest is the following:

$$1 \tag{2137}$$

Clearly, the derivative of this is equal to

$$0 \tag{2138}$$

The following is worth a closer look:

$$1 \tag{2139}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2140}$$

The following is worth a closer look:

$$x^2 \tag{2141}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2142}$$

We are going to study the following:

$$2 \tag{2143}$$

Clearly, the derivative of this is equal to

$$0 \tag{2144}$$

Consider the following:

$$2 \cdot x \tag{2145}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2146}$$

The object of our ultimate interest is the following:

$$1 \tag{2147}$$

Obviously, the derivative of this is equal to

$$0 \tag{2148}$$

We are going to study the following:

$$x^2 \tag{2149}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2150}$$

We will take a closer look at this:

$$2 \tag{2151}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2152}$$

We will take a closer look at this:

$$2 \cdot x \tag{2153}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2154}$$

The object of our ultimate interest is the following:

$$1 \tag{2155}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2156}$$

We shall ponder the following:

$$x^2 \tag{2157}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2158}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{2159}$$

Trivially, the derivative of this is equal to (2160)

We are going to study the following: (2161)

As you can see, the derivative of this is equal to (2162)

We will take a closer look at this: (2163)

Obviously, the derivative of this is equal to (2164)

The object of our ultimate interest is the following: (2165)

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to (2166)

We will take a closer look at this: (2167)

Unsurprisingly, the derivative of this is equal to (2168)

Let us take a look at this: (2169)

Clearly, the derivative of this is equal to (2170)

One shall regard the object in question with utmost interest: (2171)

Obviously, the derivative of this is equal to (2172)

We are going to study the following: (2173)

As you can see, the derivative of this is equal to (2174)

The object of our ultimate interest is the following: (2175)

Clearly, the derivative of this is equal to (2176)

Let us take a look at this: (2177)

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2178)$$

The following is worth a closer look:

$$1 \quad (2179)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2180)$$

We shall ponder the following:

$$1 \quad (2181)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2182)$$

We will take a closer look at this:

$$x - 2 \quad (2183)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \quad (2184)$$

We shall ponder the following:

$$1 \quad (2185)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2186)$$

The following is worth a closer look:

$$x^2 \quad (2187)$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2188)$$

We shall ponder the following:

$$2 \cdot x \quad (2189)$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2190)$$

Let us take a look at this:

$$1 \quad (2191)$$

As you can see, the derivative of this is equal to

$$0 \quad (2192)$$

The object of our ultimate interest is the following:

$$x^2 \quad (2193)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2194)$$

We will take a closer look at this:

$$2 \tag{2195}$$

As you can see, the derivative of this is equal to

$$0 \tag{2196}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2197}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2198}$$

The object of our ultimate interest is the following:

$$1 \tag{2199}$$

As you can see, the derivative of this is equal to

$$0 \tag{2200}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2201}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2202}$$

We shall ponder the following:

$$1 \tag{2203}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2204}$$

The object of our ultimate interest is the following:

$$1 \tag{2205}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2206}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2207}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2208}$$

We are going to study the following:

$$1 \tag{2209}$$

As you can see, the derivative of this is equal to

$$0 \tag{2210}$$

We will take a closer look at this:

$$x^2 \tag{2211}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2212}$$

The following is worth a closer look:

$$2 \tag{2213}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2214}$$

Let us take a look at this:

$$1 \tag{2215}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2216}$$

We shall ponder the following:

$$1 \tag{2217}$$

As you can see, the derivative of this is equal to

$$0 \tag{2218}$$

We will take a closer look at this:

$$x^2 \tag{2219}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2220}$$

We shall ponder the following:

$$1 \tag{2221}$$

Obviously, the derivative of this is equal to

$$0 \tag{2222}$$

The following is worth a closer look:

$$1 \tag{2223}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2224}$$

Let us take a look at this:

$$1 \tag{2225}$$

Obviously, the derivative of this is equal to

$$0 \tag{2226}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2227}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2228}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2229}$$

Clearly, the derivative of this is equal to

$$0 \tag{2230}$$

We shall ponder the following:

$$1 \tag{2231}$$

Trivially, the derivative of this is equal to

$$0 \tag{2232}$$

Consider the following:

$$x^2 \tag{2233}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2234}$$

The following is worth a closer look:

$$x - 2 \tag{2235}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{2236}$$

The following is worth a closer look:

$$1 \tag{2237}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2238}$$

We will take a closer look at this:

$$x^2 \tag{2239}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2240}$$

The following is worth a closer look:

$$2 \cdot x \tag{2241}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2242}$$

The following is worth a closer look:

$$1 \tag{2243}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2244}$$

We will take a closer look at this:

$$x^2 \tag{2245}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2246}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2247}$$

Obviously, the derivative of this is equal to

$$0 \tag{2248}$$

We shall ponder the following:

$$1 \tag{2249}$$

Clearly, the derivative of this is equal to

$$0 \tag{2250}$$

Let us take a look at this:

$$1 \tag{2251}$$

Obviously, the derivative of this is equal to

$$0 \tag{2252}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2253}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2254}$$

We will take a closer look at this:

$$1 \tag{2255}$$

Trivially, the derivative of this is equal to

$$0 \tag{2256}$$

We will take a closer look at this:

$$1 \tag{2257}$$

Trivially, the derivative of this is equal to

$$0 \tag{2258}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{2259}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{2260}$$

Let us take a look at this:

$$1 \tag{2261}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2262}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2263}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2264}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2265}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2266}$$

We are going to study the following:

$$x^2 \tag{2267}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2268}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2269}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2270}$$

The object of our ultimate interest is the following:

$$1 \tag{2271}$$

Clearly, the derivative of this is equal to

$$0 \tag{2272}$$

The following is worth a closer look:

$$x^2 \tag{2273}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2274}$$

We are going to study the following:

$$2 \tag{2275}$$

Trivially, the derivative of this is equal to

$$0 \tag{2276}$$

The object of our ultimate interest is the following:

$$1 \tag{2277}$$

Trivially, the derivative of this is equal to

$$0 \tag{2278}$$

Let us take a look at this:

$$1 \tag{2279}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2280}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2281}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2282)$$

The following is worth a closer look:

$$1 \quad (2283)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2284)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \quad (2285)$$

Obviously, the derivative of this is equal to

$$0 \quad (2286)$$

Consider the following:

$$x - 2 \quad (2287)$$

Clearly, the derivative of this is equal to

$$1 - 0 \quad (2288)$$

Let us take a look at this:

$$1 \quad (2289)$$

As you can see, the derivative of this is equal to

$$0 \quad (2290)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \quad (2291)$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2292)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \quad (2293)$$

As you can see, the derivative of this is equal to

$$0 \quad (2294)$$

The following is worth a closer look:

$$x^2 \quad (2295)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2296)$$

The following is worth a closer look:

$$x - 2 \quad (2297)$$

Trivially, the derivative of this is equal to

$$1 - 0 \quad (2298)$$

We are going to study the following:

$$x + 1 \tag{2299}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{2300}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{2301}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2302}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\sin x \tag{2303}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2304}$$

We are going to study the following:

$$1 \tag{2305}$$

As you can see, the derivative of this is equal to

$$0 \tag{2306}$$

Consider the following:

$$x^2 \tag{2307}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2308}$$

We will take a closer look at this:

$$2 \cdot x \tag{2309}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2310}$$

Consider the following:

$$1 \tag{2311}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2312}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2313}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2314}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{2315}$$

As you can see, the derivative of this is equal to

$$0 \quad (2316)$$

The following is worth a closer look:

$$1 \quad (2317)$$

Trivially, the derivative of this is equal to

$$0 \quad (2318)$$

One shall regard the object in question with utmost interest:

$$1 \quad (2319)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2320)$$

We are going to study the following:

$$x^2 \quad (2321)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2322)$$

We are going to study the following:

$$1 \quad (2323)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2324)$$

We are going to study the following:

$$1 \quad (2325)$$

Clearly, the derivative of this is equal to

$$0 \quad (2326)$$

The object of our ultimate interest is the following:

$$2 \cdot x \quad (2327)$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2328)$$

One shall regard the object in question with utmost interest:

$$1 \quad (2329)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2330)$$

The object of our ultimate interest is the following:

$$x^2 \quad (2331)$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2332)$$

We shall ponder the following:

$$2 \tag{2333}$$

As you can see, the derivative of this is equal to

$$0 \tag{2334}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2335}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2336}$$

Consider the following:

$$1 \tag{2337}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2338}$$

The following is worth a closer look:

$$x^2 \tag{2339}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2340}$$

Let us take a look at this:

$$1 \tag{2341}$$

Clearly, the derivative of this is equal to

$$0 \tag{2342}$$

We shall ponder the following:

$$1 \tag{2343}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2344}$$

We shall ponder the following:

$$1 \tag{2345}$$

Clearly, the derivative of this is equal to

$$0 \tag{2346}$$

We are going to study the following:

$$x^2 \tag{2347}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2348}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{2349}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2350}$$

The following is worth a closer look:

$$1 \tag{2351}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2352}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2353}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2354}$$

Let us take a look at this:

$$2 \tag{2355}$$

Obviously, the derivative of this is equal to

$$0 \tag{2356}$$

The object of our ultimate interest is the following:

$$1 \tag{2357}$$

Obviously, the derivative of this is equal to

$$0 \tag{2358}$$

The object of our ultimate interest is the following:

$$1 \tag{2359}$$

As you can see, the derivative of this is equal to

$$0 \tag{2360}$$

The following is worth a closer look:

$$x^2 \tag{2361}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2362}$$

The following is worth a closer look:

$$1 \tag{2363}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2364}$$

We will take a closer look at this:

$$2 \cdot x \tag{2365}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2366}$$

Consider the following:

$$1 \tag{2367}$$

As you can see, the derivative of this is equal to

$$0 \quad (2368)$$

The following is worth a closer look:

$$x^2 \quad (2369)$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2370)$$

One shall regard the object in question with utmost interest:

$$2 \quad (2371)$$

As you can see, the derivative of this is equal to

$$0 \quad (2372)$$

Let us take a look at this:

$$1 \quad (2373)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2374)$$

We are going to study the following:

$$1 \quad (2375)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2376)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \quad (2377)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2378)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \quad (2379)$$

Trivially, the derivative of this is equal to

$$0 \quad (2380)$$

We will take a closer look at this:

$$2 \cdot x \quad (2381)$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2382)$$

One shall regard the object in question with utmost interest:

$$1 \quad (2383)$$

Obviously, the derivative of this is equal to (2384)

$$0$$

We are going to study the following:

$$x^2 \tag{2385}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2386}$$

We will take a closer look at this:

$$2 \tag{2387}$$

Trivially, the derivative of this is equal to

$$0 \tag{2388}$$

We are going to study the following:

$$2 \cdot x \tag{2389}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2390}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2391}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2392}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2393}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2394}$$

The object of our ultimate interest is the following:

$$2 \tag{2395}$$

Obviously, the derivative of this is equal to

$$0 \tag{2396}$$

Let us take a look at this:

$$1 \tag{2397}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2398}$$

The following is worth a closer look:

$$2 \tag{2399}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2400}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2401}$$

Obviously, the derivative of this is equal to

$$0 \tag{2402}$$

Consider the following:

$$1 \tag{2403}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2404}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2405}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2406}$$

Let us take a look at this:

$$2 \tag{2407}$$

Trivially, the derivative of this is equal to

$$0 \tag{2408}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2409}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2410}$$

The object of our ultimate interest is the following:

$$1 \tag{2411}$$

As you can see, the derivative of this is equal to

$$0 \tag{2412}$$

We will take a closer look at this:

$$x^2 \tag{2413}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2414}$$

We are going to study the following:

$$1 \tag{2415}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2416}$$

Let us take a look at this:

$$1 \tag{2417}$$

Obviously, the derivative of this is equal to

$$0 \quad (2418)$$

The following is worth a closer look:

$$x - 2 \quad (2419)$$

As you can see, the derivative of this is equal to

$$1 - 0 \quad (2420)$$

Let us take a look at this:

$$1 \quad (2421)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2422)$$

We will take a closer look at this:

$$x^2 \quad (2423)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2424)$$

Consider the following:

$$2 \cdot x \quad (2425)$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2426)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \quad (2427)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2428)$$

The object of our ultimate interest is the following:

$$x^2 \quad (2429)$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2430)$$

We shall ponder the following:

$$2 \quad (2431)$$

Clearly, the derivative of this is equal to

$$0 \quad (2432)$$

We will take a closer look at this:

$$1 \quad (2433)$$

Trivially, the derivative of this is equal to

$$0 \quad (2434)$$

Consider the following:

$$1 \quad (2435)$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2436}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2437}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2438}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2439}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2440}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2441}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2442}$$

We shall ponder the following:

$$2 \cdot x \tag{2443}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2444}$$

We will take a closer look at this:

$$1 \tag{2445}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2446}$$

We shall ponder the following:

$$x^2 \tag{2447}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2448}$$

Consider the following:

$$2 \tag{2449}$$

Trivially, the derivative of this is equal to

$$0 \tag{2450}$$

We will take a closer look at this:

$$1 \tag{2451}$$

Obviously, the derivative of this is equal to

$$0 \tag{2452}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2453}$$

Obviously, the derivative of this is equal to

$$0 \tag{2454}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2455}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2456}$$

The following is worth a closer look:

$$1 \tag{2457}$$

As you can see, the derivative of this is equal to

$$0 \tag{2458}$$

We will take a closer look at this:

$$1 \tag{2459}$$

Trivially, the derivative of this is equal to

$$0 \tag{2460}$$

We will take a closer look at this:

$$1 \tag{2461}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2462}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2463}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2464}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2465}$$

As you can see, the derivative of this is equal to

$$0 \tag{2466}$$

The following is worth a closer look:

$$1 \tag{2467}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2468}$$

The following is worth a closer look:

$$x^2 \tag{2469}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2470)$$

Consider the following:

$$x - 2 \quad (2471)$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \quad (2472)$$

One shall regard the object in question with utmost interest:

$$1 \quad (2473)$$

As you can see, the derivative of this is equal to

$$0 \quad (2474)$$

We shall ponder the following:

$$x^2 \quad (2475)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2476)$$

Let us take a look at this:

$$2 \cdot x \quad (2477)$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2478)$$

We will take a closer look at this:

$$1 \quad (2479)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2480)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (2481)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2482)$$

The object of our ultimate interest is the following:

$$2 \quad (2483)$$

Trivially, the derivative of this is equal to

$$0 \quad (2484)$$

The object of our ultimate interest is the following:

$$1 \quad (2485)$$

As you can see, the derivative of this is equal to

$$0 \quad (2486)$$

One shall regard the object in question with utmost interest:

$$1 \tag{2487}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2488}$$

The following is worth a closer look:

$$x^2 \tag{2489}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2490}$$

We are going to study the following:

$$1 \tag{2491}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2492}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2493}$$

Clearly, the derivative of this is equal to

$$0 \tag{2494}$$

The following is worth a closer look:

$$x - 2 \tag{2495}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{2496}$$

We shall ponder the following:

$$1 \tag{2497}$$

Trivially, the derivative of this is equal to

$$0 \tag{2498}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2499}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2500}$$

We will take a closer look at this:

$$1 \tag{2501}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2502}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2503}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2504}$$

The following is worth a closer look:

$$2 \cdot x \tag{2505}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2506}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2507}$$

As you can see, the derivative of this is equal to

$$0 \tag{2508}$$

Let us take a look at this:

$$x^2 \tag{2509}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2510}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{2511}$$

As you can see, the derivative of this is equal to

$$0 \tag{2512}$$

We are going to study the following:

$$1 \tag{2513}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2514}$$

We will take a closer look at this:

$$1 \tag{2515}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2516}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2517}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2518}$$

We shall ponder the following:

$$1 \tag{2519}$$

Clearly, the derivative of this is equal to

$$0 \tag{2520}$$

The object of our ultimate interest is the following:

$$1 \tag{2521}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2522}$$

The following is worth a closer look:

$$x - 2 \tag{2523}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{2524}$$

We will take a closer look at this:

$$1 \tag{2525}$$

As you can see, the derivative of this is equal to

$$0 \tag{2526}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2527}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2528}$$

The following is worth a closer look:

$$1 \tag{2529}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2530}$$

We shall ponder the following:

$$x^2 \tag{2531}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2532}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{2533}$$

As you can see, the derivative of this is equal to

$$1 - 0 \tag{2534}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{2535}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{2536}$$

Let us take a look at this:

$$1 \tag{2537}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2538}$$

We will take a closer look at this:

$$2 \tag{2539}$$

Trivially, the derivative of this is equal to

$$0 \tag{2540}$$

We will take a closer look at this:

$$\sin x \tag{2541}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2542}$$

The following is worth a closer look:

$$x + 1 \tag{2543}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{2544}$$

The object of our ultimate interest is the following:

$$4 \tag{2545}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2546}$$

Consider the following:

$$2 \tag{2547}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2548}$$

Consider the following:

$$\cos x \tag{2549}$$

Unsurprisingly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{2550}$$

The following is worth a closer look:

$$x + 1 \tag{2551}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{2552}$$

The object of our ultimate interest is the following:

$$2 \tag{2553}$$

Obviously, the derivative of this is equal to

$$0 \tag{2554}$$

Let us take a look at this:

$$\sin x \tag{2555}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2556}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2557}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2558}$$

The following is worth a closer look:

$$x^2 \tag{2559}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2560}$$

We shall ponder the following:

$$2 \cdot x \tag{2561}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2562}$$

We shall ponder the following:

$$1 \tag{2563}$$

Clearly, the derivative of this is equal to

$$0 \tag{2564}$$

Consider the following:

$$x^2 \tag{2565}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2566}$$

Consider the following:

$$2 \tag{2567}$$

Obviously, the derivative of this is equal to

$$0 \tag{2568}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2569}$$

Trivially, the derivative of this is equal to

$$0 \tag{2570}$$

We will take a closer look at this:

$$1 \tag{2571}$$

As you can see, the derivative of this is equal to

$$0 \tag{2572}$$

Let us take a look at this:

$$x^2 \tag{2573}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2574}$$

We shall ponder the following:

$$1 \tag{2575}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2576}$$

We will take a closer look at this:

$$1 \tag{2577}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2578}$$

We shall ponder the following:

$$2 \cdot x \tag{2579}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2580}$$

We will take a closer look at this:

$$1 \tag{2581}$$

Obviously, the derivative of this is equal to

$$0 \tag{2582}$$

The following is worth a closer look:

$$x^2 \tag{2583}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2584}$$

Let us take a look at this:

$$2 \tag{2585}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2586}$$

We are going to study the following:

$$1 \tag{2587}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2588}$$

We will take a closer look at this:

$$1 \tag{2589}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2590}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2591}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2592}$$

We shall ponder the following:

$$1 \tag{2593}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2594}$$

Consider the following:

$$1 \tag{2595}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2596}$$

We shall ponder the following:

$$1 \tag{2597}$$

Obviously, the derivative of this is equal to

$$0 \tag{2598}$$

Consider the following:

$$x^2 \tag{2599}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2600}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2601}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2602}$$

The object of our ultimate interest is the following:

$$1 \tag{2603}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2604}$$

We are going to study the following:

$$x^2 \tag{2605}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2606}$$

The following is worth a closer look:

$$2 \tag{2607}$$

Trivially, the derivative of this is equal to

$$0 \tag{2608}$$

Consider the following:

$$1 \tag{2609}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2610}$$

Consider the following:

$$1 \tag{2611}$$

Clearly, the derivative of this is equal to

$$0 \tag{2612}$$

Let us take a look at this:

$$x^2 \tag{2613}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2614}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2615}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2616}$$

Let us take a look at this:

$$2 \cdot x \tag{2617}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2618}$$

We are going to study the following:

$$1 \tag{2619}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2620}$$

We are going to study the following:

$$x^2 \tag{2621}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2622}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2623}$$

Clearly, the derivative of this is equal to

$$0 \tag{2624}$$

We will take a closer look at this:

$$1 \tag{2625}$$

Clearly, the derivative of this is equal to

$$0 \quad (2626)$$

We are going to study the following:

$$1 \quad (2627)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2628)$$

We are going to study the following:

$$x^2 \quad (2629)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2630)$$

We shall ponder the following:

$$2 \quad (2631)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2632)$$

Consider the following:

$$2 \cdot x \quad (2633)$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2634)$$

We are going to study the following:

$$1 \quad (2635)$$

As you can see, the derivative of this is equal to

$$0 \quad (2636)$$

The object of our ultimate interest is the following:

$$x^2 \quad (2637)$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2638)$$

We will take a closer look at this:

$$2 \quad (2639)$$

Clearly, the derivative of this is equal to

$$0 \quad (2640)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \quad (2641)$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2642)$$

The following is worth a closer look:

$$1 \quad (2643)$$

Clearly, the derivative of this is equal to (2644)

One shall regard the object in question with utmost interest:

$$x^2 \tag{2645}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2646}$$

Let us take a look at this:

$$2 \tag{2647}$$

Clearly, the derivative of this is equal to

$$0 \tag{2648}$$

Let us take a look at this:

$$1 \tag{2649}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2650}$$

The following is worth a closer look:

$$2 \tag{2651}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2652}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2653}$$

Obviously, the derivative of this is equal to

$$0 \tag{2654}$$

Let us take a look at this:

$$1 \tag{2655}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2656}$$

Let us take a look at this:

$$x^2 \tag{2657}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2658}$$

The following is worth a closer look:

$$2 \tag{2659}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2660}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2661}$$

Obviously, the derivative of this is equal to (2662)

$$0$$

Let us take a look at this:

$$1 \tag{2663}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2664}$$

Let us take a look at this:

$$x^2 \tag{2665}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2666}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2667}$$

Clearly, the derivative of this is equal to

$$0 \tag{2668}$$

Let us take a look at this:

$$1 \tag{2669}$$

Obviously, the derivative of this is equal to

$$0 \tag{2670}$$

We are going to study the following:

$$x - 2 \tag{2671}$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{2672}$$

Consider the following:

$$1 \tag{2673}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2674}$$

We are going to study the following:

$$x^2 \tag{2675}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2676}$$

We shall ponder the following:

$$2 \cdot x \tag{2677}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2678}$$

We are going to study the following:

$$1 \tag{2679}$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2680)$$

Consider the following:

$$x^2 \quad (2681)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2682)$$

We will take a closer look at this:

$$2 \quad (2683)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2684)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \quad (2685)$$

Clearly, the derivative of this is equal to

$$0 \quad (2686)$$

The following is worth a closer look:

$$1 \quad (2687)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2688)$$

The following is worth a closer look:

$$x^2 \quad (2689)$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2690)$$

Consider the following:

$$1 \quad (2691)$$

As you can see, the derivative of this is equal to

$$0 \quad (2692)$$

The following is worth a closer look:

$$1 \quad (2693)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2694)$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \quad (2695)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2696)$$

The object of our ultimate interest is the following:

$$1 \tag{2697}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2698}$$

Let us take a look at this:

$$x^2 \tag{2699}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2700}$$

The object of our ultimate interest is the following:

$$2 \tag{2701}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2702}$$

The following is worth a closer look:

$$1 \tag{2703}$$

As you can see, the derivative of this is equal to

$$0 \tag{2704}$$

We are going to study the following:

$$1 \tag{2705}$$

Obviously, the derivative of this is equal to

$$0 \tag{2706}$$

We will take a closer look at this:

$$x^2 \tag{2707}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2708}$$

We are going to study the following:

$$1 \tag{2709}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2710}$$

We will take a closer look at this:

$$1 \tag{2711}$$

Trivially, the derivative of this is equal to

$$0 \tag{2712}$$

The object of our ultimate interest is the following:

$$1 \tag{2713}$$

Clearly, the derivative of this is equal to

$$0 \tag{2714}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2715}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2716}$$

We shall ponder the following:

$$1 \tag{2717}$$

Obviously, the derivative of this is equal to

$$0 \tag{2718}$$

The object of our ultimate interest is the following:

$$1 \tag{2719}$$

Obviously, the derivative of this is equal to

$$0 \tag{2720}$$

The following is worth a closer look:

$$x^2 \tag{2721}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2722}$$

We shall ponder the following:

$$x - 2 \tag{2723}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{2724}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2725}$$

Clearly, the derivative of this is equal to

$$0 \tag{2726}$$

Consider the following:

$$x^2 \tag{2727}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2728}$$

We will take a closer look at this:

$$2 \cdot x \tag{2729}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2730}$$

We will take a closer look at this:

$$1 \tag{2731}$$

Obviously, the derivative of this is equal to (2732)

$$0$$

The object of our ultimate interest is the following:

$$x^2 \tag{2733}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2734}$$

We are going to study the following:

$$2 \tag{2735}$$

Trivially, the derivative of this is equal to

$$0 \tag{2736}$$

Consider the following:

$$1 \tag{2737}$$

As you can see, the derivative of this is equal to

$$0 \tag{2738}$$

Consider the following:

$$1 \tag{2739}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2740}$$

We are going to study the following:

$$x^2 \tag{2741}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2742}$$

Consider the following:

$$1 \tag{2743}$$

Trivially, the derivative of this is equal to

$$0 \tag{2744}$$

The object of our ultimate interest is the following:

$$1 \tag{2745}$$

Trivially, the derivative of this is equal to

$$0 \tag{2746}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{2747}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{2748}$$

Consider the following:

$$1 \tag{2749}$$

Trivially, the derivative of this is equal to

$$0 \tag{2750}$$

We will take a closer look at this:

$$x^2 \tag{2751}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2752}$$

We are going to study the following:

$$1 \tag{2753}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2754}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2755}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2756}$$

We shall ponder the following:

$$2 \cdot x \tag{2757}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2758}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2759}$$

Obviously, the derivative of this is equal to

$$0 \tag{2760}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2761}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2762}$$

The object of our ultimate interest is the following:

$$2 \tag{2763}$$

Obviously, the derivative of this is equal to

$$0 \tag{2764}$$

The object of our ultimate interest is the following:

$$1 \tag{2765}$$

Obviously, the derivative of this is equal to

$$0 \tag{2766}$$

The object of our ultimate interest is the following:

$$1 \tag{2767}$$

Clearly, the derivative of this is equal to

$$0 \tag{2768}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2769}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2770}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2771}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2772}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2773}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2774}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x - 2 \tag{2775}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{2776}$$

Let us take a look at this:

$$1 \tag{2777}$$

Clearly, the derivative of this is equal to

$$0 \tag{2778}$$

Let us take a look at this:

$$x^2 \tag{2779}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2780}$$

Consider the following:

$$1 \tag{2781}$$

Clearly, the derivative of this is equal to

$$0 \tag{2782}$$

Let us take a look at this:

$$x^2 \tag{2783}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2784)$$

We will take a closer look at this:

$$x - 2 \quad (2785)$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \quad (2786)$$

We shall ponder the following:

$$x + 1 \quad (2787)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \quad (2788)$$

Let us take a look at this:

$$1 \quad (2789)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2790)$$

The following is worth a closer look:

$$2 \quad (2791)$$

As you can see, the derivative of this is equal to

$$0 \quad (2792)$$

One shall regard the object in question with utmost interest:

$$\sin x \quad (2793)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \quad (2794)$$

We are going to study the following:

$$x + 1 \quad (2795)$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \quad (2796)$$

Consider the following:

$$4 \quad (2797)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2798)$$

We are going to study the following:

$$2 \quad (2799)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2800)$$

Let us take a look at this:

$$\cos x \tag{2801}$$

It is now obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{2802}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{2803}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{2804}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{2805}$$

Trivially, the derivative of this is equal to

$$0 \tag{2806}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\sin x \tag{2807}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2808}$$

We shall ponder the following:

$$1 \tag{2809}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2810}$$

Let us take a look at this:

$$x^2 \tag{2811}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2812}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{2813}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2814}$$

The object of our ultimate interest is the following:

$$1 \tag{2815}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2816}$$

We are going to study the following:

$$x^2 \tag{2817}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2818}$$

We are going to study the following:

$$2 \tag{2819}$$

Obviously, the derivative of this is equal to

$$0 \tag{2820}$$

We will take a closer look at this:

$$1 \tag{2821}$$

As you can see, the derivative of this is equal to

$$0 \tag{2822}$$

We will take a closer look at this:

$$1 \tag{2823}$$

As you can see, the derivative of this is equal to

$$0 \tag{2824}$$

Consider the following:

$$x^2 \tag{2825}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2826}$$

We will take a closer look at this:

$$1 \tag{2827}$$

Obviously, the derivative of this is equal to

$$0 \tag{2828}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2829}$$

Clearly, the derivative of this is equal to

$$0 \tag{2830}$$

Let us take a look at this:

$$x - 2 \tag{2831}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{2832}$$

We are going to study the following:

$$1 \tag{2833}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2834}$$

We are going to study the following:

$$x^2 \tag{2835}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2836)$$

We are going to study the following:

$$1 \quad (2837)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2838)$$

Consider the following:

$$x^2 \quad (2839)$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2840)$$

We shall ponder the following:

$$x - 2 \quad (2841)$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \quad (2842)$$

We shall ponder the following:

$$x + 1 \quad (2843)$$

Trivially, the derivative of this is equal to

$$1 + 0 \quad (2844)$$

One shall regard the object in question with utmost interest:

$$1 \quad (2845)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2846)$$

The following is worth a closer look:

$$2 \quad (2847)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2848)$$

Let us take a look at this:

$$\sin x \quad (2849)$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \quad (2850)$$

One shall regard the object in question with utmost interest:

$$x + 1 \quad (2851)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \quad (2852)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2853}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2854}$$

The following is worth a closer look:

$$4 \tag{2855}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2856}$$

The following is worth a closer look:

$$2 \tag{2857}$$

Trivially, the derivative of this is equal to

$$0 \tag{2858}$$

Let us take a look at this:

$$\cos x \tag{2859}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{2860}$$

Let us take a look at this:

$$x + 1 \tag{2861}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{2862}$$

The following is worth a closer look:

$$16 \tag{2863}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2864}$$

Let us take a look at this:

$$0 \tag{2865}$$

Trivially, the derivative of this is equal to

$$0 \tag{2866}$$

Consider the following:

$$4 \tag{2867}$$

Clearly, the derivative of this is equal to

$$0 \tag{2868}$$

The object of our ultimate interest is the following:

$$2 \tag{2869}$$

Clearly, the derivative of this is equal to

$$0 \tag{2870}$$

The following is worth a closer look:

$$1 \tag{2871}$$

Clearly, the derivative of this is equal to

$$0 \tag{2872}$$

Let us take a look at this:

$$\sin x \tag{2873}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2874}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{2875}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{2876}$$

We shall ponder the following:

$$1 \tag{2877}$$

Clearly, the derivative of this is equal to

$$0 \tag{2878}$$

We shall ponder the following:

$$4 \tag{2879}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2880}$$

We will take a closer look at this:

$$2 \tag{2881}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2882}$$

Let us take a look at this:

$$\cos x \tag{2883}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{2884}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{2885}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{2886}$$

Let us take a look at this:

$$2 \tag{2887}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2888}$$

We shall ponder the following:

$$\sin x \quad (2889)$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \quad (2890)$$

We are going to study the following:

$$x + 1 \quad (2891)$$

As you can see, the derivative of this is equal to

$$1 + 0 \quad (2892)$$

We are going to study the following:

$$1 \quad (2893)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2894)$$

One shall regard the object in question with utmost interest:

$$2 \quad (2895)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \quad (2896)$$

The object of our ultimate interest is the following:

$$\sin x \quad (2897)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \quad (2898)$$

One shall regard the object in question with utmost interest:

$$x + 1 \quad (2899)$$

Trivially, the derivative of this is equal to

$$1 + 0 \quad (2900)$$

Let us take a look at this:

$$4 \quad (2901)$$

Clearly, the derivative of this is equal to

$$0 \quad (2902)$$

One shall regard the object in question with utmost interest:

$$2 \quad (2903)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (2904)$$

We shall ponder the following:

$$\cos x \quad (2905)$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{2906}$$

We will take a closer look at this:

$$x + 1 \tag{2907}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{2908}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2909}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2910}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2911}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2912}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\sin x \tag{2913}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{2914}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{2915}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{2916}$$

The following is worth a closer look:

$$4 \tag{2917}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2918}$$

We shall ponder the following:

$$2 \tag{2919}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2920}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\cos x \tag{2921}$$

Clearly, the derivative of this is equal to

$$-\sin x \cdot 1 \quad (2922)$$

Let us take a look at this:

$$x + 1 \quad (2923)$$

Trivially, the derivative of this is equal to

$$1 + 0 \quad (2924)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \quad (2925)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (2926)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\sin x \quad (2927)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \quad (2928)$$

The object of our ultimate interest is the following:

$$1 \quad (2929)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (2930)$$

The object of our ultimate interest is the following:

$$x^2 \quad (2931)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2932)$$

Consider the following:

$$2 \cdot x \quad (2933)$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (2934)$$

We will take a closer look at this:

$$1 \quad (2935)$$

Trivially, the derivative of this is equal to

$$0 \quad (2936)$$

One shall regard the object in question with utmost interest:

$$x^2 \quad (2937)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (2938)$$

We will take a closer look at this:

$$2 \tag{2939}$$

Obviously, the derivative of this is equal to

$$0 \tag{2940}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2941}$$

As you can see, the derivative of this is equal to

$$0 \tag{2942}$$

We shall ponder the following:

$$1 \tag{2943}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2944}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2945}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2946}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2947}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2948}$$

We are going to study the following:

$$1 \tag{2949}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2950}$$

The following is worth a closer look:

$$2 \cdot x \tag{2951}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2952}$$

We will take a closer look at this:

$$1 \tag{2953}$$

Clearly, the derivative of this is equal to

$$0 \tag{2954}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2955}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2956}$$

We shall ponder the following:

$$2 \tag{2957}$$

Trivially, the derivative of this is equal to

$$0 \tag{2958}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2959}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2960}$$

Consider the following:

$$1 \tag{2961}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2962}$$

We will take a closer look at this:

$$x^2 \tag{2963}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2964}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2965}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2966}$$

We shall ponder the following:

$$1 \tag{2967}$$

Obviously, the derivative of this is equal to

$$0 \tag{2968}$$

The object of our ultimate interest is the following:

$$1 \tag{2969}$$

Obviously, the derivative of this is equal to

$$0 \tag{2970}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2971}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2972}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{2973}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2974}$$

Consider the following:

$$1 \tag{2975}$$

Obviously, the derivative of this is equal to

$$0 \tag{2976}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2977}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2978}$$

We will take a closer look at this:

$$2 \tag{2979}$$

Clearly, the derivative of this is equal to

$$0 \tag{2980}$$

Consider the following:

$$1 \tag{2981}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2982}$$

The following is worth a closer look:

$$1 \tag{2983}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2984}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2985}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2986}$$

We will take a closer look at this:

$$1 \tag{2987}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2988}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{2989}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2990}$$

Consider the following:

$$1 \tag{2991}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2992}$$

We will take a closer look at this:

$$x^2 \tag{2993}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2994}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2995}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2996}$$

We will take a closer look at this:

$$1 \tag{2997}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2998}$$

We will take a closer look at this:

$$1 \tag{2999}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3000}$$

We will take a closer look at this:

$$x^2 \tag{3001}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3002}$$

The following is worth a closer look:

$$2 \tag{3003}$$

Obviously, the derivative of this is equal to

$$0 \tag{3004}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{3005}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3006}$$

Consider the following:

$$1 \tag{3007}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3008}$$

Consider the following:

$$x^2 \tag{3009}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3010}$$

We shall ponder the following:

$$2 \tag{3011}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3012}$$

The following is worth a closer look:

$$2 \cdot x \tag{3013}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3014}$$

We are going to study the following:

$$1 \tag{3015}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3016}$$

The following is worth a closer look:

$$x^2 \tag{3017}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3018}$$

The following is worth a closer look:

$$2 \tag{3019}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3020}$$

We shall ponder the following:

$$1 \tag{3021}$$

Obviously, the derivative of this is equal to

$$0 \tag{3022}$$

We shall ponder the following:

$$2 \tag{3023}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3024}$$

Let us take a look at this:

$$2 \tag{3025}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3026}$$

The object of our ultimate interest is the following:

$$1 \tag{3027}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3028}$$

Consider the following:

$$x^2 \tag{3029}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3030}$$

We will take a closer look at this:

$$2 \tag{3031}$$

Trivially, the derivative of this is equal to

$$0 \tag{3032}$$

We are going to study the following:

$$1 \tag{3033}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3034}$$

The following is worth a closer look:

$$1 \tag{3035}$$

Trivially, the derivative of this is equal to

$$0 \tag{3036}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{3037}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3038}$$

Consider the following:

$$1 \tag{3039}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3040}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3041}$$

Obviously, the derivative of this is equal to

$$0 \tag{3042}$$

Let us take a look at this:

$$x - 2 \tag{3043}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{3044}$$

The following is worth a closer look:

$$1 \tag{3045}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3046}$$

We are going to study the following:

$$x^2 \tag{3047}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3048}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{3049}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3050}$$

We shall ponder the following:

$$1 \tag{3051}$$

Obviously, the derivative of this is equal to

$$0 \tag{3052}$$

We shall ponder the following:

$$x^2 \tag{3053}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3054}$$

Consider the following:

$$2 \tag{3055}$$

Clearly, the derivative of this is equal to

$$0 \tag{3056}$$

We are going to study the following:

$$1 \tag{3057}$$

Clearly, the derivative of this is equal to

$$0 \tag{3058}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3059}$$

Trivially, the derivative of this is equal to

$$0 \tag{3060}$$

The following is worth a closer look:

$$x^2 \tag{3061}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3062}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3063}$$

As you can see, the derivative of this is equal to

$$0 \tag{3064}$$

Consider the following:

$$1 \tag{3065}$$

Clearly, the derivative of this is equal to

$$0 \tag{3066}$$

The following is worth a closer look:

$$2 \cdot x \tag{3067}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3068}$$

The following is worth a closer look:

$$1 \tag{3069}$$

Clearly, the derivative of this is equal to

$$0 \tag{3070}$$

We are going to study the following:

$$x^2 \tag{3071}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3072}$$

The following is worth a closer look:

$$2 \tag{3073}$$

Trivially, the derivative of this is equal to

$$0 \tag{3074}$$

The object of our ultimate interest is the following:

$$1 \tag{3075}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3076}$$

The object of our ultimate interest is the following:

$$1 \tag{3077}$$

Clearly, the derivative of this is equal to

$$0 \tag{3078}$$

Consider the following:

$$x^2 \tag{3079}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3080)$$

The object of our ultimate interest is the following:

$$1 \quad (3081)$$

Trivially, the derivative of this is equal to

$$0 \quad (3082)$$

We are going to study the following:

$$1 \quad (3083)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (3084)$$

Consider the following:

$$1 \quad (3085)$$

Obviously, the derivative of this is equal to

$$0 \quad (3086)$$

We shall ponder the following:

$$x^2 \quad (3087)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3088)$$

One shall regard the object in question with utmost interest:

$$1 \quad (3089)$$

Obviously, the derivative of this is equal to

$$0 \quad (3090)$$

We will take a closer look at this:

$$1 \quad (3091)$$

Trivially, the derivative of this is equal to

$$0 \quad (3092)$$

We shall ponder the following:

$$x^2 \quad (3093)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3094)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x - 2 \quad (3095)$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \quad (3096)$$

One shall regard the object in question with utmost interest:

$$1 \quad (3097)$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3098}$$

We will take a closer look at this:

$$x^2 \tag{3099}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3100}$$

We shall ponder the following:

$$2 \cdot x \tag{3101}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3102}$$

The following is worth a closer look:

$$1 \tag{3103}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3104}$$

The object of our ultimate interest is the following:

$$x^2 \tag{3105}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3106}$$

We shall ponder the following:

$$2 \tag{3107}$$

Clearly, the derivative of this is equal to

$$0 \tag{3108}$$

Consider the following:

$$1 \tag{3109}$$

Trivially, the derivative of this is equal to

$$0 \tag{3110}$$

We will take a closer look at this:

$$1 \tag{3111}$$

Obviously, the derivative of this is equal to

$$0 \tag{3112}$$

Consider the following:

$$x^2 \tag{3113}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3114}$$

The following is worth a closer look:

$$1 \tag{3115}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3116}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3117}$$

Obviously, the derivative of this is equal to

$$0 \tag{3118}$$

We will take a closer look at this:

$$x - 2 \tag{3119}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{3120}$$

The object of our ultimate interest is the following:

$$1 \tag{3121}$$

Clearly, the derivative of this is equal to

$$0 \tag{3122}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{3123}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3124}$$

The following is worth a closer look:

$$1 \tag{3125}$$

Obviously, the derivative of this is equal to

$$0 \tag{3126}$$

Let us take a look at this:

$$x^2 \tag{3127}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3128}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{3129}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3130}$$

Let us take a look at this:

$$1 \tag{3131}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3132}$$

We are going to study the following:

$$x^2 \tag{3133}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3134}$$

We are going to study the following:

$$2 \tag{3135}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3136}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3137}$$

Obviously, the derivative of this is equal to

$$0 \tag{3138}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3139}$$

As you can see, the derivative of this is equal to

$$0 \tag{3140}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{3141}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3142}$$

The following is worth a closer look:

$$1 \tag{3143}$$

Trivially, the derivative of this is equal to

$$0 \tag{3144}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3145}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3146}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{3147}$$

As you can see, the derivative of this is equal to

$$1 - 0 \tag{3148}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3149}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3150}$$

We will take a closer look at this:

$$x^2 \tag{3151}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3152}$$

The following is worth a closer look:

$$1 \tag{3153}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3154}$$

We are going to study the following:

$$x^2 \tag{3155}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3156}$$

Let us take a look at this:

$$x - 2 \tag{3157}$$

Obviously, the derivative of this is equal to

$$1 - 0 \tag{3158}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{3159}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3160}$$

We are going to study the following:

$$1 \tag{3161}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3162}$$

The object of our ultimate interest is the following:

$$2 \tag{3163}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3164}$$

Let us take a look at this:

$$\sin x \tag{3165}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3166}$$

Consider the following:

$$x + 1 \tag{3167}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3168}$$

The following is worth a closer look:

$$4 \tag{3169}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3170}$$

We shall ponder the following:

$$2 \tag{3171}$$

Trivially, the derivative of this is equal to

$$0 \tag{3172}$$

The following is worth a closer look:

$$\cos x \tag{3173}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3174}$$

We shall ponder the following:

$$x + 1 \tag{3175}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3176}$$

We shall ponder the following:

$$2 \tag{3177}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3178}$$

We will take a closer look at this:

$$\sin x \tag{3179}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3180}$$

The object of our ultimate interest is the following:

$$1 \tag{3181}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3182}$$

Consider the following:

$$x^2 \tag{3183}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3184}$$

Consider the following:

$$2 \cdot x \tag{3185}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3186}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3187}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3188}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{3189}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3190}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3191}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3192}$$

We are going to study the following:

$$1 \tag{3193}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3194}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3195}$$

Obviously, the derivative of this is equal to

$$0 \tag{3196}$$

The following is worth a closer look:

$$x^2 \tag{3197}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3198}$$

Let us take a look at this:

$$1 \tag{3199}$$

Trivially, the derivative of this is equal to

$$0 \tag{3200}$$

The object of our ultimate interest is the following:

$$1 \tag{3201}$$

As you can see, the derivative of this is equal to

$$0 \tag{3202}$$

Let us take a look at this:

$$x - 2 \tag{3203}$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{3204}$$

We shall ponder the following:

$$1 \tag{3205}$$

Obviously, the derivative of this is equal to

$$0 \tag{3206}$$

Consider the following:

$$x^2 \tag{3207}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3208}$$

Let us take a look at this:

$$1 \tag{3209}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3210}$$

We shall ponder the following:

$$x^2 \tag{3211}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3212}$$

We will take a closer look at this:

$$x - 2 \tag{3213}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{3214}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3215}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3216}$$

We are going to study the following:

$$1 \tag{3217}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3218}$$

We will take a closer look at this:

$$2 \tag{3219}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3220}$$

We are going to study the following:

$$\sin x \tag{3221}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3222}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3223}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3224}$$

We will take a closer look at this:

$$1 \tag{3225}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3226}$$

One shall regard the object in question with utmost interest:

$$4 \tag{3227}$$

Trivially, the derivative of this is equal to

$$0 \tag{3228}$$

We will take a closer look at this:

$$2 \tag{3229}$$

As you can see, the derivative of this is equal to

$$0 \tag{3230}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\cos x \tag{3231}$$

It is now obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3232}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3233}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3234}$$

The object of our ultimate interest is the following:

$$16 \tag{3235}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3236}$$

We shall ponder the following:

$$0 \tag{3237}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3238}$$

One shall regard the object in question with utmost interest:

$$4 \tag{3239}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3240}$$

The object of our ultimate interest is the following:

$$2 \tag{3241}$$

Trivially, the derivative of this is equal to

$$0 \tag{3242}$$

We will take a closer look at this:

$$1 \tag{3243}$$

Clearly, the derivative of this is equal to

$$0 \tag{3244}$$

The following is worth a closer look:

$$\sin x \tag{3245}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3246}$$

Let us take a look at this:

$$x + 1 \tag{3247}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3248}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3249}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3250}$$

Consider the following:

$$4 \tag{3251}$$

Obviously, the derivative of this is equal to

$$0 \tag{3252}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3253}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3254}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{3255}$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3256}$$

The following is worth a closer look:

$$x + 1 \tag{3257}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3258}$$

Let us take a look at this:

$$2 \tag{3259}$$

Obviously, the derivative of this is equal to

$$0 \tag{3260}$$

The following is worth a closer look:

$$\sin x \tag{3261}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3262}$$

Consider the following:

$$x + 1 \tag{3263}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3264}$$

The following is worth a closer look:

$$1 \tag{3265}$$

As you can see, the derivative of this is equal to

$$0 \tag{3266}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3267}$$

As you can see, the derivative of this is equal to

$$0 \tag{3268}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\sin x \tag{3269}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3270}$$

The following is worth a closer look:

$$x + 1 \tag{3271}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3272}$$

We shall ponder the following:

$$4 \tag{3273}$$

As you can see, the derivative of this is equal to

$$0 \tag{3274}$$

We will take a closer look at this:

$$2 \tag{3275}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3276}$$

The object of our ultimate interest is the following:

$$\cos x \tag{3277}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3278}$$

Let us take a look at this:

$$x + 1 \tag{3279}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3280}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3281}$$

Clearly, the derivative of this is equal to

$$0 \tag{3282}$$

We shall ponder the following:

$$2 \tag{3283}$$

As you can see, the derivative of this is equal to

$$0 \tag{3284}$$

We shall ponder the following:

$$\sin x \tag{3285}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3286}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3287}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3288}$$

One shall regard the object in question with utmost interest:

$$4 \tag{3289}$$

As you can see, the derivative of this is equal to

$$0 \tag{3290}$$

We are going to study the following:

$$2 \tag{3291}$$

Obviously, the derivative of this is equal to

$$0 \tag{3292}$$

We shall ponder the following:

$$\cos x \tag{3293}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$- \sin x \cdot 1 \tag{3294}$$

We shall ponder the following:

$$x + 1 \tag{3295}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3296}$$

Let us take a look at this:

$$2 \tag{3297}$$

Trivially, the derivative of this is equal to

$$0 \tag{3298}$$

We are going to study the following:

$$\sin x \tag{3299}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3300}$$

Consider the following:

$$1 \tag{3301}$$

Trivially, the derivative of this is equal to

$$0 \tag{3302}$$

We will take a closer look at this:

$$x^2 \tag{3303}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3304}$$

We are going to study the following:

$$2 \cdot x \tag{3305}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \quad (3306)$$

Consider the following:

$$1 \quad (3307)$$

Obviously, the derivative of this is equal to

$$0 \quad (3308)$$

We will take a closer look at this:

$$x^2 \quad (3309)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3310)$$

One shall regard the object in question with utmost interest:

$$2 \quad (3311)$$

Trivially, the derivative of this is equal to

$$0 \quad (3312)$$

Consider the following:

$$1 \quad (3313)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (3314)$$

Consider the following:

$$1 \quad (3315)$$

Unsurprisingly, the derivative of this is equal to

$$0 \quad (3316)$$

We are going to study the following:

$$x^2 \quad (3317)$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \quad (3318)$$

The object of our ultimate interest is the following:

$$1 \quad (3319)$$

Obviously, the derivative of this is equal to

$$0 \quad (3320)$$

We shall ponder the following:

$$1 \quad (3321)$$

Clearly, the derivative of this is equal to

$$0 \quad (3322)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x - 2 \quad (3323)$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{3324}$$

The object of our ultimate interest is the following:

$$1 \tag{3325}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3326}$$

Let us take a look at this:

$$x^2 \tag{3327}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3328}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3329}$$

Trivially, the derivative of this is equal to

$$0 \tag{3330}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{3331}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3332}$$

Consider the following:

$$x - 2 \tag{3333}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{3334}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3335}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3336}$$

The following is worth a closer look:

$$1 \tag{3337}$$

As you can see, the derivative of this is equal to

$$0 \tag{3338}$$

We are going to study the following:

$$2 \tag{3339}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3340}$$

Consider the following:

$$\sin x \tag{3341}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3342}$$

We are going to study the following:

$$x + 1 \tag{3343}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3344}$$

The following is worth a closer look:

$$1 \tag{3345}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3346}$$

We will take a closer look at this:

$$4 \tag{3347}$$

Obviously, the derivative of this is equal to

$$0 \tag{3348}$$

We shall ponder the following:

$$2 \tag{3349}$$

Trivially, the derivative of this is equal to

$$0 \tag{3350}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{3351}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3352}$$

Let us take a look at this:

$$x + 1 \tag{3353}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3354}$$

We are going to study the following:

$$16 \tag{3355}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3356}$$

We will take a closer look at this:

$$4 \tag{3357}$$

As you can see, the derivative of this is equal to

$$0 \tag{3358}$$

The following is worth a closer look:

$$2 \tag{3359}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3360}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3361}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3362}$$

We will take a closer look at this:

$$x + 1 \tag{3363}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3364}$$

We are going to study the following:

$$1 \tag{3365}$$

Clearly, the derivative of this is equal to

$$0 \tag{3366}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \tag{3367}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3368}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3369}$$

Clearly, the derivative of this is equal to

$$0 \tag{3370}$$

We are going to study the following:

$$\cos x \tag{3371}$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3372}$$

We are going to study the following:

$$x + 1 \tag{3373}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3374}$$

The object of our ultimate interest is the following:

$$2 \tag{3375}$$

Clearly, the derivative of this is equal to

$$0 \tag{3376}$$

The following is worth a closer look:

$$\sin x \tag{3377}$$

Clearly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3378}$$

The following is worth a closer look:

$$x + 1 \tag{3379}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3380}$$

Consider the following:

$$1 \tag{3381}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3382}$$

We are going to study the following:

$$2 \tag{3383}$$

Clearly, the derivative of this is equal to

$$0 \tag{3384}$$

We will take a closer look at this:

$$\sin x \tag{3385}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3386}$$

We shall ponder the following:

$$x + 1 \tag{3387}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3388}$$

We will take a closer look at this:

$$4 \tag{3389}$$

Trivially, the derivative of this is equal to

$$0 \tag{3390}$$

The following is worth a closer look:

$$2 \tag{3391}$$

Trivially, the derivative of this is equal to

$$0 \tag{3392}$$

We are going to study the following:

$$\cos x \tag{3393}$$

Unsurprisingly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3394}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{3395}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3396}$$

Let us take a look at this:

$$1 \tag{3397}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3398}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3399}$$

As you can see, the derivative of this is equal to

$$0 \tag{3400}$$

Consider the following:

$$\sin x \tag{3401}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3402}$$

We will take a closer look at this:

$$x + 1 \tag{3403}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3404}$$

Let us take a look at this:

$$4 \tag{3405}$$

Clearly, the derivative of this is equal to

$$0 \tag{3406}$$

We will take a closer look at this:

$$2 \tag{3407}$$

Clearly, the derivative of this is equal to

$$0 \tag{3408}$$

The object of our ultimate interest is the following:

$$\cos x \tag{3409}$$

It can be easily proved, that the derivative of this is equal to

$$- \sin x \cdot 1 \tag{3410}$$

Consider the following:

$$x + 1 \tag{3411}$$

Obviously, the derivative of this is equal to (3412)

$$1 + 0$$

Let us take a look at this: (3413)

$$2$$

Obviously, the derivative of this is equal to (3414)

$$0$$

We shall ponder the following: (3415)

$$\sin x$$

Trivially, the derivative of this is equal to (3416)

$$\cos x \cdot 1$$

The object of our ultimate interest is the following: (3417)

$$1$$

Obviously, the derivative of this is equal to (3418)

$$0$$

We are going to study the following: (3419)

$$x^2$$

Trivially, the derivative of this is equal to (3420)

$$2 \cdot x^{2-1} \cdot 1$$

Consider the following: (3421)

$$x - 2$$

It is now obvious, that the derivative of this is equal to (3422)

$$1 - 0$$

One shall regard the object in question with utmost interest: (3423)

$$x + 1$$

Clearly, the derivative of this is equal to (3424)

$$1 + 0$$

We will take a closer look at this: (3425)

$$x + 1$$

Obviously, the derivative of this is equal to (3426)

$$1 + 0$$

We are going to study the following: (3427)

$$2$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to (3428)

$$0$$

Let us take a look at this: (3429)

$$2$$

Trivially, the derivative of this is equal to (3430)

$$0$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3431}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3432}$$

The following is worth a closer look:

$$x + 1 \tag{3433}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3434}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3435}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3436}$$

The following is worth a closer look:

$$4 \tag{3437}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3438}$$

We shall ponder the following:

$$2 \tag{3439}$$

Clearly, the derivative of this is equal to

$$0 \tag{3440}$$

The object of our ultimate interest is the following:

$$\cos x \tag{3441}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3442}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{3443}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3444}$$

The following is worth a closer look:

$$1 \tag{3445}$$

As you can see, the derivative of this is equal to

$$0 \tag{3446}$$

We are going to study the following:

$$4 \tag{3447}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3448}$$

We shall ponder the following:

$$2 \tag{3449}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3450}$$

We shall ponder the following:

$$\cos x \tag{3451}$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3452}$$

We will take a closer look at this:

$$x + 1 \tag{3453}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3454}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3455}$$

As you can see, the derivative of this is equal to

$$0 \tag{3456}$$

We are going to study the following:

$$16 \tag{3457}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3458}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \tag{3459}$$

As you can see, the derivative of this is equal to

$$0 \tag{3460}$$

We will take a closer look at this:

$$2 \tag{3461}$$

Clearly, the derivative of this is equal to

$$0 \tag{3462}$$

The object of our ultimate interest is the following:

$$\sin x \tag{3463}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3464}$$

We are going to study the following:

$$x + 1 \tag{3465}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3466}$$

Consider the following:

$$1 \tag{3467}$$

As you can see, the derivative of this is equal to

$$0 \tag{3468}$$

Consider the following:

$$16 \tag{3469}$$

Obviously, the derivative of this is equal to

$$0 \tag{3470}$$

We shall ponder the following:

$$4 \tag{3471}$$

Clearly, the derivative of this is equal to

$$0 \tag{3472}$$

The object of our ultimate interest is the following:

$$2 \tag{3473}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3474}$$

We shall ponder the following:

$$\sin x \tag{3475}$$

Clearly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3476}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3477}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3478}$$

Consider the following:

$$256 \tag{3479}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3480}$$

We will take a closer look at this:

$$16 \tag{3481}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3482}$$

We shall ponder the following:

$$4 \tag{3483}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3484}$$

The object of our ultimate interest is the following:

$$2 \tag{3485}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3486}$$

We shall ponder the following:

$$\cos x \tag{3487}$$

Clearly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3488}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{3489}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3490}$$

We will take a closer look at this:

$$1 \tag{3491}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3492}$$

We will take a closer look at this:

$$4 \tag{3493}$$

Trivially, the derivative of this is equal to

$$0 \tag{3494}$$

We shall ponder the following:

$$2 \tag{3495}$$

Clearly, the derivative of this is equal to

$$0 \tag{3496}$$

The object of our ultimate interest is the following:

$$\cos x \tag{3497}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3498}$$

We will take a closer look at this:

$$x + 1 \tag{3499}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3500}$$

The object of our ultimate interest is the following:

$$1 \tag{3501}$$

Trivially, the derivative of this is equal to

$$0 \tag{3502}$$

We will take a closer look at this:

$$16 \tag{3503}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3504}$$

The following is worth a closer look:

$$4 \tag{3505}$$

Clearly, the derivative of this is equal to

$$0 \tag{3506}$$

We will take a closer look at this:

$$2 \tag{3507}$$

Trivially, the derivative of this is equal to

$$0 \tag{3508}$$

We are going to study the following:

$$\sin x \tag{3509}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3510}$$

We are going to study the following:

$$x + 1 \tag{3511}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3512}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3513}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3514}$$

We shall ponder the following:

$$\sin x \tag{3515}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3516}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3517}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3518}$$

Let us take a look at this:

$$1 \tag{3519}$$

Trivially, the derivative of this is equal to

$$0 \tag{3520}$$

The object of our ultimate interest is the following:

$$2 \tag{3521}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3522}$$

Consider the following:

$$\sin x \tag{3523}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3524}$$

Let us take a look at this:

$$x + 1 \tag{3525}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3526}$$

We shall ponder the following:

$$1 \tag{3527}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3528}$$

Let us take a look at this:

$$4 \tag{3529}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3530}$$

We are going to study the following:

$$2 \tag{3531}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3532}$$

The object of our ultimate interest is the following:

$$\cos x \tag{3533}$$

Trivially, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3534}$$

We are going to study the following:

$$x + 1 \tag{3535}$$

Trivially, the derivative of this is equal to (3536)

$$1 + 0$$

The following is worth a closer look:

$$16 \tag{3537}$$

Clearly, the derivative of this is equal to

$$0 \tag{3538}$$

The following is worth a closer look:

$$4 \tag{3539}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3540}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3541}$$

Trivially, the derivative of this is equal to

$$0 \tag{3542}$$

Let us take a look at this:

$$\sin x \tag{3543}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3544}$$

The following is worth a closer look:

$$x + 1 \tag{3545}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3546}$$

The following is worth a closer look:

$$1 \tag{3547}$$

Obviously, the derivative of this is equal to

$$0 \tag{3548}$$

The following is worth a closer look:

$$4 \tag{3549}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3550}$$

We will take a closer look at this:

$$2 \tag{3551}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3552}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\cos x \tag{3553}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3554}$$

The following is worth a closer look:

$$x + 1 \tag{3555}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3556}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3557}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3558}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3559}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3560}$$

The object of our ultimate interest is the following:

$$\sin x \tag{3561}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3562}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{3563}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3564}$$

The object of our ultimate interest is the following:

$$4 \tag{3565}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3566}$$

Consider the following:

$$2 \tag{3567}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3568}$$

The object of our ultimate interest is the following:

$$\cos x \tag{3569}$$

Unsurprisingly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3570}$$

Let us take a look at this:

$$x + 1 \tag{3571}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3572}$$

The object of our ultimate interest is the following:

$$2 \tag{3573}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3574}$$

We are going to study the following:

$$\sin x \tag{3575}$$

Clearly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3576}$$

Let us take a look at this:

$$x + 1 \tag{3577}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3578}$$

The following is worth a closer look:

$$1 \tag{3579}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3580}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3581}$$

Clearly, the derivative of this is equal to

$$0 \tag{3582}$$

Consider the following:

$$\sin x \tag{3583}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3584}$$

Consider the following:

$$x + 1 \tag{3585}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3586}$$

The object of our ultimate interest is the following:

$$1 \tag{3587}$$

As you can see, the derivative of this is equal to

$$0 \quad (3588)$$

The object of our ultimate interest is the following:

$$4 \quad (3589)$$

Clearly, the derivative of this is equal to

$$0 \quad (3590)$$

The following is worth a closer look:

$$2 \quad (3591)$$

Trivially, the derivative of this is equal to

$$0 \quad (3592)$$

Consider the following:

$$\cos x \quad (3593)$$

Clearly, the derivative of this is equal to

$$-\sin x \cdot 1 \quad (3594)$$

Consider the following:

$$x + 1 \quad (3595)$$

Obviously, the derivative of this is equal to

$$1 + 0 \quad (3596)$$

We shall ponder the following:

$$16 \quad (3597)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (3598)$$

The object of our ultimate interest is the following:

$$0 \quad (3599)$$

Clearly, the derivative of this is equal to

$$0 \quad (3600)$$

Let us take a look at this:

$$4 \quad (3601)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (3602)$$

The following is worth a closer look:

$$2 \quad (3603)$$

Obviously, the derivative of this is equal to

$$0 \quad (3604)$$

We will take a closer look at this:

$$1 \quad (3605)$$

Obviously, the derivative of this is equal to

$$0 \quad (3606)$$

The object of our ultimate interest is the following:

$$\sin x \tag{3607}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3608}$$

The following is worth a closer look:

$$x + 1 \tag{3609}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3610}$$

Let us take a look at this:

$$1 \tag{3611}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3612}$$

The object of our ultimate interest is the following:

$$4 \tag{3613}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3614}$$

Let us take a look at this:

$$2 \tag{3615}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3616}$$

The object of our ultimate interest is the following:

$$\cos x \tag{3617}$$

Clearly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3618}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3619}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3620}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3621}$$

Trivially, the derivative of this is equal to

$$0 \tag{3622}$$

We shall ponder the following:

$$2 \tag{3623}$$

Trivially, the derivative of this is equal to

$$0 \tag{3624}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3625}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3626}$$

Consider the following:

$$x + 1 \tag{3627}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3628}$$

We shall ponder the following:

$$4 \tag{3629}$$

Clearly, the derivative of this is equal to

$$0 \tag{3630}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3631}$$

Obviously, the derivative of this is equal to

$$0 \tag{3632}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{3633}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3634}$$

Let us take a look at this:

$$x + 1 \tag{3635}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3636}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3637}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3638}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\sin x \tag{3639}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3640}$$

Consider the following:

$$x + 1 \tag{3641}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3642}$$

We will take a closer look at this:

$$1 \tag{3643}$$

Clearly, the derivative of this is equal to

$$0 \tag{3644}$$

The object of our ultimate interest is the following:

$$2 \tag{3645}$$

As you can see, the derivative of this is equal to

$$0 \tag{3646}$$

We shall ponder the following:

$$\sin x \tag{3647}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3648}$$

Consider the following:

$$x + 1 \tag{3649}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3650}$$

One shall regard the object in question with utmost interest:

$$4 \tag{3651}$$

Trivially, the derivative of this is equal to

$$0 \tag{3652}$$

Consider the following:

$$2 \tag{3653}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3654}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{3655}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$- \sin x \cdot 1 \tag{3656}$$

Let us take a look at this:

$$x + 1 \tag{3657}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3658}$$

Consider the following:

$$1 \tag{3659}$$

Trivially, the derivative of this is equal to

$$0 \tag{3660}$$

Consider the following:

$$2 \tag{3661}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3662}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\sin x \tag{3663}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3664}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3665}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3666}$$

Let us take a look at this:

$$1 \tag{3667}$$

Trivially, the derivative of this is equal to

$$0 \tag{3668}$$

We shall ponder the following:

$$4 \tag{3669}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3670}$$

Let us take a look at this:

$$2 \tag{3671}$$

Clearly, the derivative of this is equal to

$$0 \tag{3672}$$

Consider the following:

$$\cos x \tag{3673}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3674}$$

We will take a closer look at this:

$$x + 1 \tag{3675}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3676}$$

We are going to study the following:

$$16 \tag{3677}$$

Obviously, the derivative of this is equal to

$$0 \tag{3678}$$

The object of our ultimate interest is the following:

$$0 \tag{3679}$$

Obviously, the derivative of this is equal to

$$0 \tag{3680}$$

One shall regard the object in question with utmost interest:

$$4 \tag{3681}$$

Trivially, the derivative of this is equal to

$$0 \tag{3682}$$

Consider the following:

$$2 \tag{3683}$$

Obviously, the derivative of this is equal to

$$0 \tag{3684}$$

We shall ponder the following:

$$1 \tag{3685}$$

Clearly, the derivative of this is equal to

$$0 \tag{3686}$$

Let us take a look at this:

$$\sin x \tag{3687}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3688}$$

We shall ponder the following:

$$x + 1 \tag{3689}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3690}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3691}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3692}$$

The following is worth a closer look:

$$4 \tag{3693}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3694}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3695}$$

Clearly, the derivative of this is equal to

$$0 \tag{3696}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{3697}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3698}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3699}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3700}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3701}$$

Trivially, the derivative of this is equal to

$$0 \tag{3702}$$

The following is worth a closer look:

$$\sin x \tag{3703}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3704}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3705}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3706}$$

We are going to study the following:

$$1 \tag{3707}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3708}$$

We will take a closer look at this:

$$2 \tag{3709}$$

As you can see, the derivative of this is equal to

$$0 \tag{3710}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3711}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3712}$$

Let us take a look at this:

$$x + 1 \tag{3713}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3714}$$

Let us take a look at this:

$$4 \tag{3715}$$

Clearly, the derivative of this is equal to

$$0 \tag{3716}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3717}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3718}$$

Consider the following:

$$\cos x \tag{3719}$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3720}$$

We will take a closer look at this:

$$x + 1 \tag{3721}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3722}$$

The following is worth a closer look:

$$1 \tag{3723}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3724}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3725}$$

Trivially, the derivative of this is equal to

$$0 \tag{3726}$$

Consider the following:

$$\sin x \tag{3727}$$

Clearly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3728}$$

We are going to study the following:

$$x + 1 \tag{3729}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \quad (3730)$$

The object of our ultimate interest is the following:

$$4 \quad (3731)$$

It can be easily proved, that the derivative of this is equal to

$$0 \quad (3732)$$

The object of our ultimate interest is the following:

$$2 \quad (3733)$$

It is now obvious, that the derivative of this is equal to

$$0 \quad (3734)$$

We are going to study the following:

$$\cos x \quad (3735)$$

Trivially, the derivative of this is equal to

$$- \sin x \cdot 1 \quad (3736)$$

The object of our ultimate interest is the following:

$$x + 1 \quad (3737)$$

Trivially, the derivative of this is equal to

$$1 + 0 \quad (3738)$$

We shall ponder the following:

$$2 \quad (3739)$$

Trivially, the derivative of this is equal to

$$0 \quad (3740)$$

One shall regard the object in question with utmost interest:

$$\sin x \quad (3741)$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \quad (3742)$$

Now the proof that the Taylor series of this function at $x = 0$ is equal to

$$B + \left((\arctan 1)^{-2} + A \right) \cdot \frac{x^2}{2} + (G + H) \cdot \frac{x^3}{6} \quad (3743)$$

Where:

- $A = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot (\ln \arctan 1 - 2 \cdot 0) - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $B = 0 + (\arctan 1)^{-2} \cdot \frac{x^0}{1} + (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot \frac{x^1}{1}$
- $C = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot (\ln \arctan 1 - 2 \cdot 0) - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $D = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$

- $E = \frac{1}{\arctan 1} \cdot 0.5 + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2} + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2} - 2 \cdot 0$
- $F = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $G = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) - 1.5 \cdot (\arctan 1)^{-2} + (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0)$
- $H = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) + (C) \cdot (\ln \arctan 1 - 2 \cdot 0) - D + (\arctan 1)^{-2} \cdot (E) - F$

has a truly wondrous solution, which is sadly too massive to be shown here. Unsurprisingly, if we simplify this we wil get

$$G + \left(F + (\arctan 1)^{-2} \cdot \ln \arctan 1 + D + E \right) \cdot \frac{x^3}{6} \quad (3744)$$

Where:

- $A = (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot \ln \arctan 1 - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $B = (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot \ln \arctan 1 - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $C = \frac{1}{\arctan 1} \cdot 0.5 + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2} + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $D = (B) \cdot \ln \arctan 1 - (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $E = (\arctan 1)^{-2} \cdot (C) - (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $F = (\arctan 1)^{-2} \cdot \ln \arctan 1 - 1.5 \cdot (\arctan 1)^{-2} + (\arctan 1)^{-2} \cdot \ln \arctan 1$
- $G = (\arctan 1)^{-2} + (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot x + \left((\arctan 1)^{-2} + A \right) \cdot \frac{x^2}{2}$
