Abstract

Wonderful article

1 Derivative

Let us find the derivative of the following function:

$$(x+1)^{\frac{\sin x}{2}} \cdot \left(\arctan \sqrt{x^2+1}\right)^{x-2} \tag{1}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3}$$

We shall ponder the following:

$$x^2 \tag{4}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{5}$$

We are going to study the following:

$$x - 2 \tag{6}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{7}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{8}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{9}$$

We will take a closer look at this:

$$2 \tag{10}$$

As you can see, the derivative of this is equal to

$$0 \tag{11}$$

The object of our ultimate interest is the following:

$$\sin x \tag{12}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{13}$$

Now the proof that the derivative of this function is equal to

$$(x+1)^{\frac{\sin x}{2}} \cdot (A) \cdot \left(\arctan \sqrt{x^2+1}\right)^{x-2} + (x+1)^{\frac{\sin x}{2}} \cdot \left(\arctan \sqrt{x^2+1}\right)^{x-2} \cdot (C) \tag{14}$$

Where:

- $A = \frac{\cos x \cdot 1 \cdot 2 - \sin x \cdot 0}{2^2} \cdot \ln(x+1) + \frac{\sin x}{2} \cdot \frac{1+0}{x+1}$
- $B = \frac{1}{1+\left(\sqrt{x^2+1}\right)^2} \cdot \frac{1}{2 \cdot \sqrt{x^2+1}} \cdot \left(2 \cdot x^{2-1} \cdot 1 + 0\right)$
- $C = (1-0) \cdot \ln \arctan \sqrt{x^2+1} + (x-2) \cdot \frac{B}{\arctan \sqrt{x^2+1}}$

2

shall be considered an amusing exercise for the reader. Any self-respecting mathematician would find it obvious, that if we simplify this we wil get

$$A \cdot \left(\arctan \sqrt{x^2 + 1} \right)^{x-2} + (x+1)^{\frac{\sin x}{2}} \cdot C \tag{15}$$

Where:

- $A = (x+1)^{\frac{\sin x}{2}} \cdot \left(\frac{\cos x \cdot 2}{4} \cdot \ln(x+1) + \frac{\sin x}{2} \cdot \frac{1}{x+1} \right)$
- $B = \frac{1}{1+\left(\sqrt{x^2+1}\right)^2} \cdot \frac{1}{2 \cdot \sqrt{x^2+1}} \cdot 2 \cdot x$
- $C = \left(\arctan \sqrt{x^2 + 1} \right)^{x-2} \cdot \left(\ln \arctan \sqrt{x^2 + 1} + (x-2) \cdot \frac{B}{\arctan \sqrt{x^2+1}} \right)$

2   Taylor series

Let us find the Taylor series at $x = 0$ of the following function:

$$(x+1)^{\frac{\sin x}{2}} \cdot \left(\arctan \sqrt{x^2 + 1} \right)^{x-2} \tag{16}$$

We are going to study the following:

$$1 \tag{17}$$

Clearly, the derivative of this is equal to

$$0 \tag{18}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{19}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{20}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{21}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{22}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{23}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{24}$$

We are going to study the following:

$$2 \tag{25}$$

Trivially, the derivative of this is equal to

$$0 \tag{26}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{27}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{28}$$

One shall regard the object in question with utmost interest:

$$1 \tag{29}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{30}$$

Consider the following:

$$x^2 \tag{31}$$

4

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{32}$$

Consider the following:
$$2 \cdot x \tag{33}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{34}$$

We are going to study the following:
$$1 \tag{35}$$

As you can see, the derivative of this is equal to

$$0 \tag{36}$$

Let us take a look at this:
$$x^2 \tag{37}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{38}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{39}$$

Obviously, the derivative of this is equal to
$$0 \tag{40}$$

The object of our ultimate interest is the following:

$$1 \tag{41}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{42}$$

Consider the following:
$$1 \tag{43}$$

As you can see, the derivative of this is equal to

$$0 \tag{44}$$

Consider the following:
$$x^2 \tag{45}$$

Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{46}$$

The following is worth a closer look:
$$1 \tag{47}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{48}$$

We shall ponder the following:

$$1 \tag{49}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{50}$$

We are going to study the following:

$$x - 2 \tag{51}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{52}$$

The following is worth a closer look:

$$1 \tag{53}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{54}$$

We shall ponder the following:

$$x^2 \tag{55}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{56}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{57}$$

As you can see, the derivative of this is equal to

$$0 \tag{58}$$

Consider the following:

$$x^2 \tag{59}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{60}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{61}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{62}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{63}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{64}$$

Consider the following:

$$2 \tag{65}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{66}$$

We are going to study the following:
$$\sin x \tag{67}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{68}$$

We are going to study the following:
$$1 \tag{69}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{70}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{71}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{72}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{73}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{74}$$

We are going to study the following:
$$x + 1 \tag{75}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{76}$$

The object of our ultimate interest is the following:

$$1 \tag{77}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{78}$$

Let us take a look at this:
$$2 \tag{79}$$

Obviously, the derivative of this is equal to
$$0 \tag{80}$$

The object of our ultimate interest is the following:

$$\sin x \tag{81}$$

7

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{82}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{83}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{84}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \tag{85}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{86}$$

The object of our ultimate interest is the following:

$$2 \tag{87}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{88}$$

The following is worth a closer look:

$$\cos x \tag{89}$$

Unsurprisingly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{90}$$

The following is worth a closer look:

$$x + 1 \tag{91}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{92}$$

The object of our ultimate interest is the following:

$$2 \tag{93}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{94}$$

We will take a closer look at this:

$$\sin x \tag{95}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{96}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{97}$$

Trivially, the derivative of this is equal to

$$0 \tag{98}$$

The object of our ultimate interest is the following:

$$x^2 \tag{99}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{100}$$

We will take a closer look at this:

$$2 \cdot x \tag{101}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{102}$$

We will take a closer look at this:

$$1 \tag{103}$$

Clearly, the derivative of this is equal to

$$0 \tag{104}$$

We shall ponder the following:

$$x^2 \tag{105}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{106}$$

We will take a closer look at this:

$$2 \tag{107}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{108}$$

We are going to study the following:

$$1 \tag{109}$$

Obviously, the derivative of this is equal to

$$0 \tag{110}$$

We are going to study the following:

$$1 \tag{111}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{112}$$

We shall ponder the following:

$$x^2 \tag{113}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{114}$$

Let us take a look at this:

$$1 \tag{115}$$

As you can see, the derivative of this is equal to

$$0 \tag{116}$$

The following is worth a closer look:
$$1 \tag{117}$$
As you can see, the derivative of this is equal to

$$0 \tag{118}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{119}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{120}$$

The object of our ultimate interest is the following:

$$1 \tag{121}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{122}$$

We are going to study the following:
$$x^2 \tag{123}$$
It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{124}$$

Let us take a look at this:
$$2 \tag{125}$$
As you can see, the derivative of this is equal to

$$0 \tag{126}$$

We will take a closer look at this:
$$1 \tag{127}$$
Clearly, the derivative of this is equal to
$$0 \tag{128}$$

The following is worth a closer look:
$$1 \tag{129}$$
Trivially, the derivative of this is equal to
$$0 \tag{130}$$

Consider the following:
$$x^2 \tag{131}$$
Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{132}$$

10

We are going to study the following:
$$1 \tag{133}$$
Obviously, the derivative of this is equal to
$$0 \tag{134}$$

Let us take a look at this:
$$1 \tag{135}$$
Trivially, the derivative of this is equal to
$$0 \tag{136}$$

Let us take a look at this:
$$1 \tag{137}$$
As you can see, the derivative of this is equal to

$$0 \tag{138}$$

We will take a closer look at this:
$$x^2 \tag{139}$$
Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{140}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{141}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{142}$$

Let us take a look at this:
$$1 \tag{143}$$
Trivially, the derivative of this is equal to
$$0 \tag{144}$$

Let us take a look at this:
$$x^2 \tag{145}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{146}$$

We shall ponder the following:
$$2 \tag{147}$$
As you can see, the derivative of this is equal to

$$0 \tag{148}$$

We are going to study the following:
$$1 \tag{149}$$
Clearly, the derivative of this is equal to
$$0 \tag{150}$$

Consider the following:

$$1 \tag{151}$$

Obviously, the derivative of this is equal to

$$0 \tag{152}$$

Let us take a look at this:

$$x^2 \tag{153}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{154}$$

The following is worth a closer look:

$$1 \tag{155}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{156}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{157}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{158}$$

The object of our ultimate interest is the following:

$$1 \tag{159}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{160}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{161}$$

Unsurprisingly, the derivative of this is equal to

Trivially, the derivative of this is equal to

$$0 \tag{244}$$

We shall ponder the following:

$$1 \tag{245}$$

Clearly, the derivative of this is equal to

$$0 \tag{246}$$

The following is worth a closer look:

$$x^2 \tag{247}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{248}$$

Consider the following:

$$1 \tag{249}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{250}$$

One shall regard the object in question with utmost interest:

$$1 \tag{251}$$

Obviously, the derivative of this is equal to

$$0 \tag{252}$$

Consider the following:

$$1 \tag{253}$$

Obviously, the derivative of this is equal to

$$0 \tag{254}$$

17

One shall regard the object in question with utmost interest:

$$x^2 \tag{255}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{256}$$

The following is worth a closer look:

$$1 \tag{257}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{258}$$

We will take a closer look at this:

$$1 \tag{259}$$

Obviously, the derivative of this is equal to

$$0 \tag{260}$$

We will take a closer look at this:

$$x^2 \tag{261}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{262}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{263}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{264}$$

The object of our ultimate interest is the following:

$$1 \tag{265}$$

As you can see, the derivative of this is equal to

$$0 \tag{266}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{267}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{268}$$

We shall ponder the following:

$$2 \cdot x \tag{269}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{270}$$

One shall regard the object in question with utmost interest:

$$1 \tag{271}$$

Clearly, the derivative of this is equal to

$$0 \tag{272}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{273}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{274}$$

One shall regard the object in question with utmost interest:

$$2 \tag{275}$$

Obviously, the derivative of this is equal to

$$0 \tag{276}$$

We are going to study the following:

$$1 \tag{277}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{278}$$

We are going to study the following:

$$1 \tag{279}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{280}$$

The following is worth a closer look:

$$x^2 \tag{281}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{282}$$

One shall regard the object in question with utmost interest:

$$1 \tag{283}$$

As you can see, the derivative of this is equal to

$$0 \tag{284}$$

We will take a closer look at this:

$$1 \tag{285}$$

Obviously, the derivative of this is equal to

$$0 \tag{286}$$

Consider the following:

$$x - 2 \tag{287}$$

19

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{288}$$

One shall regard the object in question with utmost interest:

$$1 \tag{289}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{290}$$

We are going to study the following:
$$x^2 \tag{291}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{292}$$

We will take a closer look at this:
$$1 \tag{293}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{294}$$

We shall ponder the following:
$$x^2 \tag{295}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{296}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{297}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{298}$$

We will take a closer look at this:
$$1 \tag{299}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{300}$$

We will take a closer look at this:
$$x^2 \tag{301}$$

Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{302}$$

Consider the following:
$$2 \tag{303}$$

As you can see, the derivative of this is equal to

$$0 \tag{304}$$

20

The following is worth a closer look:
$$1 \tag{305}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{306}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{307}$$
Trivially, the derivative of this is equal to
$$0 \tag{308}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{309}$$
It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{310}$$

We will take a closer look at this:
$$1 \tag{311}$$
It can be easily proved, that the derivative of this is equal to

$$0 \tag{312}$$

The object of our ultimate interest is the following:

$$1 \tag{313}$$
Trivially, the derivative of this is equal to
$$0 \tag{314}$$

Let us take a look at this:
$$x - 2 \tag{315}$$
Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{316}$$

We shall ponder the following:
$$1 \tag{317}$$
Trivially, the derivative of this is equal to
$$0 \tag{318}$$

We shall ponder the following:
$$x^2 \tag{319}$$
Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{320}$$

We shall ponder the following:
$$1 \tag{321}$$
It can be easily proved, that the derivative of this is equal to

$$0 \tag{322}$$

21

The following is worth a closer look:
$$x^2 \tag{323}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{324}$$

We will take a closer look at this:
$$x - 2 \tag{325}$$
Clearly, the derivative of this is equal to
$$1 - 0 \tag{326}$$

The object of our ultimate interest is the following:
$$x + 1 \tag{327}$$
Unsurprisingly, the derivative of this is equal to
$$1 + 0 \tag{328}$$

We are going to study the following:
$$2 \tag{329}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{330}$$

We will take a closer look at this:
$$\sin x \tag{331}$$
Trivially, the derivative of this is equal to
$$\cos x \cdot 1 \tag{332}$$

One shall regard the object in question with utmost interest:
$$1 \tag{333}$$
As you can see, the derivative of this is equal to
$$0 \tag{334}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{335}$$
It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{336}$$

We shall ponder the following:
$$2 \cdot x \tag{337}$$
It is now obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{338}$$

We are going to study the following:
$$1 \tag{339}$$
Obviously, the derivative of this is equal to
$$0 \tag{340}$$

22

The object of our ultimate interest is the following:

$$x^2 \tag{341}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{342}$$

One shall regard the object in question with utmost interest:

$$2 \tag{343}$$

Trivially, the derivative of this is equal to

$$0 \tag{344}$$

The following is worth a closer look:

$$1 \tag{345}$$

Trivially, the derivative of this is equal to

$$0 \tag{346}$$

Let us take a look at this:

$$1 \tag{347}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{348}$$

We are going to study the following:

$$x^2 \tag{349}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{350}$$

Consider the following:

$$1 \tag{351}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{352}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{353}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{354}$$

Let us take a look at this:

$$x - 2 \tag{355}$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{356}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{357}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{358}$$

Consider the following:
$$x^2 \tag{359}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{360}$$

Consider the following:
$$1 \tag{361}$$
As you can see, the derivative of this is equal to
$$0 \tag{362}$$

The following is worth a closer look:
$$x^2 \tag{363}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{364}$$

Let us take a look at this:
$$x - 2 \tag{365}$$
Unsurprisingly, the derivative of this is equal to
$$1 - 0 \tag{366}$$

Consider the following:
$$x + 1 \tag{367}$$
It can be easily proved, that the derivative of this is equal to
$$1 + 0 \tag{368}$$

Let us take a look at this:
$$1 \tag{369}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{370}$$

We will take a closer look at this:
$$2 \tag{371}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{372}$$

We shall ponder the following:
$$\sin x \tag{373}$$
As you can see, the derivative of this is equal to
$$\cos x \cdot 1 \tag{374}$$

The object of our ultimate interest is the following:
$$x + 1 \tag{375}$$

24

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{376}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \tag{377}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{378}$$

We shall ponder the following:

$$2 \tag{379}$$

Clearly, the derivative of this is equal to

$$0 \tag{380}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\cos x \tag{381}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{382}$$

We are going to study the following:

$$x + 1 \tag{383}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{384}$$

Consider the following:

$$2 \tag{385}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{386}$$

Consider the following:

$$\sin x \tag{387}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{388}$$

The following is worth a closer look:

$$1 \tag{389}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{390}$$

The following is worth a closer look:

$$x^2 \tag{391}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{392}$$

25

Consider the following:
$$2 \cdot x \tag{393}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{394}$$

We shall ponder the following:
$$1 \tag{395}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{396}$$

We are going to study the following:
$$x^2 \tag{397}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{398}$$

We are going to study the following:
$$2 \tag{399}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{400}$$

One shall regard the object in question with utmost interest:
$$1 \tag{401}$$
As you can see, the derivative of this is equal to
$$0 \tag{402}$$

We will take a closer look at this:
$$1 \tag{403}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{404}$$

The object of our ultimate interest is the following:
$$x^2 \tag{405}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{406}$$

Let us take a look at this:
$$1 \tag{407}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{408}$$

We are going to study the following:
$$1 \tag{409}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{410}$$

The following is worth a closer look:
$$x - 2 \tag{411}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{412}$$

The following is worth a closer look:
$$1 \tag{413}$$

Clearly, the derivative of this is equal to
$$0 \tag{414}$$

Consider the following:
$$x^2 \tag{415}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{416}$$

One shall regard the object in question with utmost interest:

$$1 \tag{417}$$

Obviously, the derivative of this is equal to
$$0 \tag{418}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{419}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{420}$$

We are going to study the following:
$$x - 2 \tag{421}$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{422}$$

We are going to study the following:
$$x + 1 \tag{423}$$

Clearly, the derivative of this is equal to
$$1 + 0 \tag{424}$$

The object of our ultimate interest is the following:

$$1 \tag{425}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{426}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{427}$$

Clearly, the derivative of this is equal to

$$0 \tag{428}$$

Consider the following:

$$\sin x \tag{429}$$

Clearly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{430}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{431}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{432}$$

One shall regard the object in question with utmost interest:

$$4 \tag{433}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{434}$$

Consider the following:

$$2 \tag{435}$$

As you can see, the derivative of this is equal to

$$0 \tag{436}$$

The object of our ultimate interest is the following:

$$\cos x \tag{437}$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{438}$$

We shall ponder the following:

$$x + 1 \tag{439}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{440}$$

We are going to study the following:

$$2 \tag{441}$$

Trivially, the derivative of this is equal to

$$0 \tag{442}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{443}$$

28

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{444}$$

The following is worth a closer look:

$$1 \tag{445}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{446}$$

The following is worth a closer look:

$$x^2 \tag{447}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{448}$$

Consider the following:

$$x - 2 \tag{449}$$

As you can see, the derivative of this is equal to

$$1 - 0 \tag{450}$$

We are going to study the following:

$$x + 1 \tag{451}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{452}$$

Let us take a look at this:

$$1 \tag{453}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{454}$$

We are going to study the following:

$$2 \tag{455}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{456}$$

We are going to study the following:

$$\sin x \tag{457}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{458}$$

The following is worth a closer look:

$$x + 1 \tag{459}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{460}$$

Consider the following:

$$1 \tag{461}$$

29

Clearly, the derivative of this is equal to
$$0 \tag{462}$$

We will take a closer look at this:
$$4 \tag{463}$$

As you can see, the derivative of this is equal to
$$0 \tag{464}$$

The following is worth a closer look:
$$2 \tag{465}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{466}$$

One shall regard the object in question with utmost interest:
$$\cos x \tag{467}$$

As you can see, the derivative of this is equal to
$$-\sin x \cdot 1 \tag{468}$$

The object of our ultimate interest is the following:
$$x + 1 \tag{469}$$

Trivially, the derivative of this is equal to
$$1 + 0 \tag{470}$$

We shall ponder the following:
$$16 \tag{471}$$

Clearly, the derivative of this is equal to
$$0 \tag{472}$$

We are going to study the following:
$$0 \tag{473}$$

Trivially, the derivative of this is equal to
$$0 \tag{474}$$

Let us take a look at this:
$$4 \tag{475}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{476}$$

The following is worth a closer look:
$$2 \tag{477}$$

Trivially, the derivative of this is equal to
$$0 \tag{478}$$

The object of our ultimate interest is the following:
$$1 \tag{479}$$

30

Unsurprisingly, the derivative of this is equal to

$$0 \tag{480}$$

We are going to study the following:
$$\sin x \tag{481}$$
It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{482}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{483}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{484}$$

We are going to study the following:
$$1 \tag{485}$$
Clearly, the derivative of this is equal to
$$0 \tag{486}$$

The object of our ultimate interest is the following:

$$4 \tag{487}$$

As you can see, the derivative of this is equal to

$$0 \tag{488}$$

The following is worth a closer look:
$$2 \tag{489}$$
Obviously, the derivative of this is equal to
$$0 \tag{490}$$

Let us take a look at this:
$$\cos x \tag{491}$$
Clearly, the derivative of this is equal to
$$-\sin x \cdot 1 \tag{492}$$

We will take a closer look at this:
$$x + 1 \tag{493}$$
It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{494}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{495}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{496}$$

31

The object of our ultimate interest is the following:

$$\sin x \tag{497}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{498}$$

Let us take a look at this:

$$x + 1 \tag{499}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{500}$$

Let us take a look at this:

$$1 \tag{501}$$

Clearly, the derivative of this is equal to

$$0 \tag{502}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{503}$$

Trivially, the derivative of this is equal to

$$0 \tag{504}$$

We shall ponder the following:

$$\sin x \tag{505}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{506}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{507}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{508}$$

The following is worth a closer look:

$$4 \tag{509}$$

Obviously, the derivative of this is equal to

$$0 \tag{510}$$

The object of our ultimate interest is the following:

$$2 \tag{511}$$

Trivially, the derivative of this is equal to

$$0 \tag{512}$$

We shall ponder the following:

$$\cos x \tag{513}$$

Trivially, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{514}$$

The following is worth a closer look:
$$x + 1 \tag{515}$$
Trivially, the derivative of this is equal to
$$1 + 0 \tag{516}$$

One shall regard the object in question with utmost interest:
$$1 \tag{517}$$
As you can see, the derivative of this is equal to
$$0 \tag{518}$$

We will take a closer look at this:
$$2 \tag{519}$$
As you can see, the derivative of this is equal to
$$0 \tag{520}$$

The following is worth a closer look:
$$\sin x \tag{521}$$
It can be easily proved, that the derivative of this is equal to
$$\cos x \cdot 1 \tag{522}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x + 1 \tag{523}$$
Clearly, the derivative of this is equal to
$$1 + 0 \tag{524}$$

The object of our ultimate interest is the following:
$$4 \tag{525}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{526}$$

One shall regard the object in question with utmost interest:
$$2 \tag{527}$$
Trivially, the derivative of this is equal to
$$0 \tag{528}$$

Let us take a look at this:
$$\cos x \tag{529}$$
Clearly, the derivative of this is equal to
$$-\sin x \cdot 1 \tag{530}$$

The following is worth a closer look:
$$x + 1 \tag{531}$$
It is now obvious, that the derivative of this is equal to
$$1 + 0 \tag{532}$$

33

The following is worth a closer look:
$$2 \tag{533}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{534}$$

We will take a closer look at this:
$$\sin x \tag{535}$$
As you can see, the derivative of this is equal to
$$\cos x \cdot 1 \tag{536}$$

The following is worth a closer look:
$$1 \tag{537}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{538}$$

The object of our ultimate interest is the following:
$$x^2 \tag{539}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{540}$$

We are going to study the following:
$$2 \cdot x \tag{541}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{542}$$

We shall ponder the following:
$$1 \tag{543}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{544}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{545}$$
Trivially, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{546}$$

We will take a closer look at this:
$$2 \tag{547}$$
As you can see, the derivative of this is equal to
$$0 \tag{548}$$

Consider the following:
$$1 \tag{549}$$

34

Obviously, the derivative of this is equal to

$$0 \tag{550}$$

Consider the following:

$$1 \tag{551}$$

As you can see, the derivative of this is equal to

$$0 \tag{552}$$

We shall ponder the following:

$$x^2 \tag{553}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{554}$$

Consider the following:

$$1 \tag{555}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{556}$$

The object of our ultimate interest is the following:

$$1 \tag{557}$$

Obviously, the derivative of this is equal to

$$0 \tag{558}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{559}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{560}$$

The following is worth a closer look:

$$x^2 \tag{561}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{562}$$

Consider the following:

$$2 \tag{563}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{564}$$

We are going to study the following:

$$2 \cdot x \tag{565}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{566}$$

Consider the following:

$$1 \tag{567}$$

As you can see, the derivative of this is equal to

$$0 \tag{568}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{569}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{570}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{571}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{572}$$

We are going to study the following:

$$1 \tag{573}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{574}$$

We will take a closer look at this:

$$1 \tag{575}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{576}$$

Consider the following:

$$x^2 \tag{577}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{578}$$

The following is worth a closer look:

$$1 \tag{579}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{580}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{581}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{582}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{583}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{584}$$

Let us take a look at this:
$$1 \tag{585}$$
Obviously, the derivative of this is equal to
$$0 \tag{586}$$

Consider the following:
$$x^2 \tag{587}$$
It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{588}$$

We will take a closer look at this:
$$2 \tag{589}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{590}$$

We will take a closer look at this:
$$1 \tag{591}$$
As you can see, the derivative of this is equal to

$$0 \tag{592}$$

We will take a closer look at this:
$$1 \tag{593}$$
Clearly, the derivative of this is equal to
$$0 \tag{594}$$

Consider the following:
$$x^2 \tag{595}$$
Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{596}$$

The following is worth a closer look:
$$1 \tag{597}$$
Obviously, the derivative of this is equal to
$$0 \tag{598}$$

We shall ponder the following:
$$1 \tag{599}$$
As you can see, the derivative of this is equal to

$$0 \tag{600}$$

Let us take a look at this:
$$1 \tag{601}$$

37

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{602}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{603}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{604}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{605}$$

Clearly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{606}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{607}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{608}$$

Consider the following:
$$x^2 \tag{609}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{610}$$

We are going to study the following:
$$2 \tag{611}$$

Trivially, the derivative of this is equal to
$$0 \tag{612}$$

Let us take a look at this:
$$1 \tag{613}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{614}$$

Let us take a look at this:
$$1 \tag{615}$$

Clearly, the derivative of this is equal to
$$0 \tag{616}$$

We will take a closer look at this:
$$x^2 \tag{617}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{618}$$

We are going to study the following:
$$1 \tag{619}$$
Trivially, the derivative of this is equal to
$$0 \tag{620}$$
The following is worth a closer look:
$$2 \cdot x \tag{621}$$
As you can see, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{622}$$
Let us take a look at this:
$$1 \tag{623}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{624}$$
The following is worth a closer look:
$$x^2 \tag{625}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{626}$$
One shall regard the object in question with utmost interest:
$$2 \tag{627}$$
Clearly, the derivative of this is equal to
$$0 \tag{628}$$
We shall ponder the following:
$$1 \tag{629}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{630}$$
Consider the following:
$$1 \tag{631}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{632}$$
One shall regard the object in question with utmost interest:
$$x^2 \tag{633}$$
It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{634}$$
We shall ponder the following:
$$2 \tag{635}$$
Trivially, the derivative of this is equal to
$$0 \tag{636}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{637}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{638}$$

Let us take a look at this:

$$1 \tag{639}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{640}$$

Consider the following:

$$x^2 \tag{641}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{642}$$

We shall ponder the following:

$$2 \tag{643}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{644}$$

We shall ponder the following:

$$2 \cdot x \tag{645}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{646}$$

Let us take a look at this:

$$1 \tag{647}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{648}$$

We are going to study the following:

$$x^2 \tag{649}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{650}$$

Consider the following:

$$2 \tag{651}$$

Obviously, the derivative of this is equal to

$$0 \tag{652}$$

The following is worth a closer look:

$$1 \tag{653}$$

Trivially, the derivative of this is equal to

$$0 \tag{654}$$

We shall ponder the following:
$$2 \tag{655}$$
Clearly, the derivative of this is equal to
$$0 \tag{656}$$

We are going to study the following:
$$2 \tag{657}$$
Obviously, the derivative of this is equal to
$$0 \tag{658}$$

We will take a closer look at this:
$$1 \tag{659}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{660}$$

Let us take a look at this:
$$x^2 \tag{661}$$
It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{662}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \tag{663}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{664}$$

The object of our ultimate interest is the following:
$$1 \tag{665}$$
Obviously, the derivative of this is equal to
$$0 \tag{666}$$

Consider the following:
$$1 \tag{667}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{668}$$

We shall ponder the following:
$$x^2 \tag{669}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{670}$$

We will take a closer look at this:
$$1 \tag{671}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{672}$$

41

We shall ponder the following:
$$1 \tag{673}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{674}$$

Let us take a look at this:
$$1 \tag{675}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{676}$$

Consider the following:
$$x^2 \tag{677}$$
Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{678}$$

Let us take a look at this:
$$2 \cdot x \tag{679}$$
As you can see, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{680}$$

We shall ponder the following:
$$1 \tag{681}$$
Obviously, the derivative of this is equal to
$$0 \tag{682}$$

Let us take a look at this:
$$x^2 \tag{683}$$
It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{684}$$

Consider the following:
$$2 \tag{685}$$
As you can see, the derivative of this is equal to
$$0 \tag{686}$$

We shall ponder the following:
$$1 \tag{687}$$
Clearly, the derivative of this is equal to
$$0 \tag{688}$$

We shall ponder the following:
$$1 \tag{689}$$
Trivially, the derivative of this is equal to
$$0 \tag{690}$$

The following is worth a closer look:
$$x^2 \tag{691}$$
It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{692}$$
We shall ponder the following:
$$1 \tag{693}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{694}$$
One shall regard the object in question with utmost interest:
$$2 \cdot x \tag{695}$$
Unsurprisingly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{696}$$
We shall ponder the following:
$$1 \tag{697}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{698}$$
Consider the following:
$$x^2 \tag{699}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{700}$$
The object of our ultimate interest is the following:
$$2 \tag{701}$$
As you can see, the derivative of this is equal to
$$0 \tag{702}$$
We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{703}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{704}$$
Let us take a look at this:
$$1 \tag{705}$$
Trivially, the derivative of this is equal to
$$0 \tag{706}$$
The object of our ultimate interest is the following:
$$x^2 \tag{707}$$

43

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{708}$$

Consider the following:
$$2 \tag{709}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{710}$$

We shall ponder the following:
$$2 \cdot x \tag{711}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{712}$$

We will take a closer look at this:
$$1 \tag{713}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{714}$$

The following is worth a closer look:
$$x^2 \tag{715}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{716}$$

We shall ponder the following:
$$2 \tag{717}$$

Obviously, the derivative of this is equal to
$$0 \tag{718}$$

We shall ponder the following:
$$2 \cdot x \tag{719}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{720}$$

Consider the following:
$$1 \tag{721}$$

Obviously, the derivative of this is equal to
$$0 \tag{722}$$

The following is worth a closer look:
$$x^2 \tag{723}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{724}$$

We are going to study the following:
$$2 \tag{725}$$

44

It is now obvious, that the derivative of this is equal to

$$0 \tag{726}$$

The object of our ultimate interest is the following:

$$1 \tag{727}$$

Clearly, the derivative of this is equal to

$$0 \tag{728}$$

Consider the following:

$$2 \tag{729}$$

Obviously, the derivative of this is equal to

$$0 \tag{730}$$

We are going to study the following:

$$2 \tag{731}$$

Trivially, the derivative of this is equal to

$$0 \tag{732}$$

One shall regard the object in question with utmost interest:

$$1 \tag{733}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{734}$$

Consider the following:

$$x^2 \tag{735}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{736}$$

We shall ponder the following:

$$2 \tag{737}$$

Obviously, the derivative of this is equal to

$$0 \tag{738}$$

We shall ponder the following:

$$1 \tag{739}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{740}$$

We shall ponder the following:

$$1 \tag{741}$$

Trivially, the derivative of this is equal to

$$0 \tag{742}$$

Consider the following:

$$x^2 \tag{743}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{744}$$

The following is worth a closer look:

$$1 \tag{745}$$

As you can see, the derivative of this is equal to

$$0 \tag{746}$$

The following is worth a closer look:

$$1 \tag{747}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{748}$$

We will take a closer look at this:

$$2 \cdot x \tag{749}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{750}$$

Consider the following:

$$1 \tag{751}$$

Trivially, the derivative of this is equal to

$$0 \tag{752}$$

We will take a closer look at this:

$$x^2 \tag{753}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{754}$$

Consider the following:

$$2 \tag{755}$$

Obviously, the derivative of this is equal to

$$0 \tag{756}$$

Consider the following:

$$1 \tag{757}$$

As you can see, the derivative of this is equal to

$$0 \tag{758}$$

The object of our ultimate interest is the following:

$$1 \tag{759}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{760}$$

We will take a closer look at this:

$$x^2 \tag{761}$$

46

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{762}$$

Consider the following:

$$1 \tag{763}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{764}$$

We shall ponder the following:

$$1 \tag{765}$$

Trivially, the derivative of this is equal to

$$0 \tag{766}$$

Let us take a look at this:

$$2 \cdot x \tag{767}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{768}$$

Consider the following:

$$1 \tag{769}$$

Obviously, the derivative of this is equal to

$$0 \tag{770}$$

We shall ponder the following:

$$x^2 \tag{771}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{772}$$

We shall ponder the following:

$$2 \tag{773}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{774}$$

The following is worth a closer look:

$$1 \tag{775}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{776}$$

The object of our ultimate interest is the following:

$$1 \tag{777}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{778}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{779}$$

47

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{780}$$

The object of our ultimate interest is the following:

$$1 \tag{781}$$

As you can see, the derivative of this is equal to

$$0 \tag{782}$$

The object of our ultimate interest is the following:

$$1 \tag{783}$$

Obviously, the derivative of this is equal to

$$0 \tag{784}$$

We are going to study the following:

$$2 \cdot x \tag{785}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{786}$$

We will take a closer look at this:

$$1 \tag{787}$$

Obviously, the derivative of this is equal to

$$0 \tag{788}$$

The object of our ultimate interest is the following:

$$x^2 \tag{789}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{790}$$

The following is worth a closer look:

$$2 \tag{791}$$

As you can see, the derivative of this is equal to

$$0 \tag{792}$$

The following is worth a closer look:

$$1 \tag{793}$$

Clearly, the derivative of this is equal to

$$0 \tag{794}$$

One shall regard the object in question with utmost interest:

$$1 \tag{795}$$

Obviously, the derivative of this is equal to

$$0 \tag{796}$$

We shall ponder the following:

$$x^2 \tag{797}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{798}$$

We shall ponder the following:

$$1 \tag{799}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{800}$$

Let us take a look at this:

$$2 \cdot x \tag{801}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{802}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{803}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{804}$$

The object of our ultimate interest is the following:

$$x^2 \tag{805}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{806}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{807}$$

Trivially, the derivative of this is equal to

$$0 \tag{808}$$

The object of our ultimate interest is the following:

$$1 \tag{809}$$

As you can see, the derivative of this is equal to

$$0 \tag{810}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{811}$$

Clearly, the derivative of this is equal to

$$0 \tag{812}$$

Let us take a look at this:

$$x^2 \tag{813}$$

49

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{814}$$

We will take a closer look at this:

$$2 \tag{815}$$

As you can see, the derivative of this is equal to

$$0 \tag{816}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{817}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{818}$$

Consider the following:

$$1 \tag{819}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{820}$$

The object of our ultimate interest is the following:

$$x^2 \tag{821}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{822}$$

The following is worth a closer look:

$$2 \tag{823}$$

As you can see, the derivative of this is equal to

$$0 \tag{824}$$

We shall ponder the following:

$$2 \cdot x \tag{825}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{826}$$

We will take a closer look at this:

$$1 \tag{827}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{828}$$

We will take a closer look at this:

$$x^2 \tag{829}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{830}$$

Consider the following:
$$2 \tag{831}$$
Clearly, the derivative of this is equal to
$$0 \tag{832}$$

The object of our ultimate interest is the following:
$$1 \tag{833}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{834}$$

We will take a closer look at this:
$$2 \tag{835}$$
As you can see, the derivative of this is equal to
$$0 \tag{836}$$

We will take a closer look at this:
$$2 \tag{837}$$
Trivially, the derivative of this is equal to
$$0 \tag{838}$$

We shall ponder the following:
$$1 \tag{839}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{840}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{841}$$
It can be easily proved, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{842}$$

Let us take a look at this:
$$2 \tag{843}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{844}$$

We are going to study the following:
$$1 \tag{845}$$
Obviously, the derivative of this is equal to
$$0 \tag{846}$$

We will take a closer look at this:
$$1 \tag{847}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{848}$$

51

We shall ponder the following:
$$x^2 \tag{849}$$

It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{850}$$

The object of our ultimate interest is the following:
$$1 \tag{851}$$

Obviously, the derivative of this is equal to
$$0 \tag{852}$$

Let us take a look at this:
$$1 \tag{853}$$

Obviously, the derivative of this is equal to
$$0 \tag{854}$$

We will take a closer look at this:
$$1 \tag{855}$$

As you can see, the derivative of this is equal to
$$0 \tag{856}$$

The following is worth a closer look:
$$x^2 \tag{857}$$

It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{858}$$

We are going to study the following:
$$2 \cdot x \tag{859}$$

Trivially, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{860}$$

Let us take a look at this:
$$1 \tag{861}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{862}$$

We shall ponder the following:
$$x^2 \tag{863}$$

Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{864}$$

We shall ponder the following:
$$2 \tag{865}$$

Trivially, the derivative of this is equal to
$$0 \tag{866}$$

We shall ponder the following:
$$2 \cdot x \tag{867}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{868}$$

The object of our ultimate interest is the following:
$$1 \tag{869}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{870}$$

We are going to study the following:
$$x^2 \tag{871}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{872}$$

Consider the following:
$$2 \tag{873}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{874}$$

The following is worth a closer look:
$$1 \tag{875}$$
Obviously, the derivative of this is equal to
$$0 \tag{876}$$

The following is worth a closer look:
$$2 \tag{877}$$
Clearly, the derivative of this is equal to
$$0 \tag{878}$$

We shall ponder the following:
$$2 \tag{879}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{880}$$

We will take a closer look at this:
$$1 \tag{881}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{882}$$

We are going to study the following:
$$x^2 \tag{883}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{884}$$

53

One shall regard the object in question with utmost interest:

$$2 \tag{885}$$

Obviously, the derivative of this is equal to

$$0 \tag{886}$$

The following is worth a closer look:

$$1 \tag{887}$$

Obviously, the derivative of this is equal to

$$0 \tag{888}$$

Consider the following:

$$1 \tag{889}$$

As you can see, the derivative of this is equal to

$$0 \tag{890}$$

We will take a closer look at this:

$$x^2 \tag{891}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{892}$$

We will take a closer look at this:

$$1 \tag{893}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{894}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{895}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{896}$$

We shall ponder the following:

$$1 \tag{897}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{898}$$

We shall ponder the following:

$$x^2 \tag{899}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{900}$$

One shall regard the object in question with utmost interest:

$$2 \tag{901}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{902}$$

The object of our ultimate interest is the following:

$$1 \tag{903}$$

As you can see, the derivative of this is equal to

$$0 \tag{904}$$

The object of our ultimate interest is the following:

$$1 \tag{905}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{906}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{907}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{908}$$

We are going to study the following:

$$2 \tag{909}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{910}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{911}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{912}$$

We shall ponder the following:

$$1 \tag{913}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{914}$$

We shall ponder the following:

$$x^2 \tag{915}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{916}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{917}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{918}$$

The following is worth a closer look:
$$1 \tag{919}$$
Trivially, the derivative of this is equal to
$$0 \tag{920}$$

We are going to study the following:
$$1 \tag{921}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{922}$$

We are going to study the following:
$$x^2 \tag{923}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{924}$$

We will take a closer look at this:
$$1 \tag{925}$$
Clearly, the derivative of this is equal to
$$0 \tag{926}$$

The object of our ultimate interest is the following:
$$2 \cdot x \tag{927}$$
As you can see, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{928}$$

We will take a closer look at this:
$$1 \tag{929}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{930}$$

Let us take a look at this:
$$x^2 \tag{931}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{932}$$

Let us take a look at this:
$$2 \tag{933}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{934}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{935}$$
As you can see, the derivative of this is equal to
$$0 \tag{936}$$

56

Let us take a look at this:

$$1 \tag{937}$$

Trivially, the derivative of this is equal to

$$0 \tag{938}$$

The object of our ultimate interest is the following:

$$x^2 \tag{939}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{940}$$

Let us take a look at this:

$$2 \tag{941}$$

Obviously, the derivative of this is equal to

$$0 \tag{942}$$

The following is worth a closer look:

$$1 \tag{943}$$

Obviously, the derivative of this is equal to

$$0 \tag{944}$$

Consider the following:

$$x^2 \tag{945}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{946}$$

Let us take a look at this:

$$1 \tag{947}$$

As you can see, the derivative of this is equal to

$$0 \tag{948}$$

Consider the following:

$$2 \tag{949}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{950}$$

The following is worth a closer look:

$$2 \cdot x \tag{951}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{952}$$

Consider the following:

$$1 \tag{953}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{954}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{955}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{956}$$

Consider the following:

$$2 \tag{957}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{958}$$

Consider the following:

$$1 \tag{959}$$

As you can see, the derivative of this is equal to

$$0 \tag{960}$$

We shall ponder the following:

$$1 \tag{961}$$

As you can see, the derivative of this is equal to

$$0 \tag{962}$$

Consider the following:

$$x^2 \tag{963}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{964}$$

We shall ponder the following:

$$2 \tag{965}$$

As you can see, the derivative of this is equal to

$$0 \tag{966}$$

Let us take a look at this:

$$1 \tag{967}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{968}$$

We will take a closer look at this:

$$x^2 \tag{969}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{970}$$

Consider the following:

$$1 \tag{971}$$

As you can see, the derivative of this is equal to

$$0 \tag{972}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{973}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{974}$$

One shall regard the object in question with utmost interest:

$$1 \tag{975}$$

As you can see, the derivative of this is equal to

$$0 \tag{976}$$

We shall ponder the following:

$$x^2 \tag{977}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{978}$$

The following is worth a closer look:

$$2 \tag{979}$$

Clearly, the derivative of this is equal to

$$0 \tag{980}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{981}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{982}$$

We are going to study the following:

$$1 \tag{983}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{984}$$

Let us take a look at this:

$$x^2 \tag{985}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{986}$$

We are going to study the following:

$$2 \tag{987}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{988}$$

We shall ponder the following:

$$1 \tag{989}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{990}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{991}$$

Trivially, the derivative of this is equal to

$$0 \tag{992}$$

We shall ponder the following:

$$2 \tag{993}$$

Obviously, the derivative of this is equal to

$$0 \tag{994}$$

We will take a closer look at this:

$$1 \tag{995}$$

As you can see, the derivative of this is equal to

$$0 \tag{996}$$

Let us take a look at this:

$$x^2 \tag{997}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{998}$$

Let us take a look at this:

$$2 \tag{999}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1000}$$

The object of our ultimate interest is the following:

$$1 \tag{1001}$$

Clearly, the derivative of this is equal to

$$0 \tag{1002}$$

We will take a closer look at this:

$$1 \tag{1003}$$

As you can see, the derivative of this is equal to

$$0 \tag{1004}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1005}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1006}$$

We shall ponder the following:

$$2 \tag{1007}$$

Clearly, the derivative of this is equal to

$$0 \tag{1008}$$

We shall ponder the following:

$$2 \cdot x \tag{1009}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1010}$$

Consider the following:

$$1 \tag{1011}$$

Trivially, the derivative of this is equal to

$$0 \tag{1012}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1013}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1014}$$

We are going to study the following:

$$2 \tag{1015}$$

Clearly, the derivative of this is equal to

$$0 \tag{1016}$$

Consider the following:

$$1 \tag{1017}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1018}$$

We shall ponder the following:

$$2 \cdot x \tag{1019}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1020}$$

The following is worth a closer look:

$$1 \tag{1021}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1022}$$

We will take a closer look at this:

$$x^2 \tag{1023}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1024}$$

The following is worth a closer look:

$$2 \tag{1025}$$

61

Trivially, the derivative of this is equal to

$$0 \tag{1026}$$

The object of our ultimate interest is the following:

$$1 \tag{1027}$$

As you can see, the derivative of this is equal to

$$0 \tag{1028}$$

The object of our ultimate interest is the following:

$$2 \tag{1029}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1030}$$

The object of our ultimate interest is the following:

$$2 \tag{1031}$$

As you can see, the derivative of this is equal to

$$0 \tag{1032}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1033}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1034}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1035}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1036}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1037}$$

Obviously, the derivative of this is equal to

$$0 \tag{1038}$$

We shall ponder the following:

$$2 \cdot x \tag{1039}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1040}$$

We will take a closer look at this:

$$1 \tag{1041}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1042}$$

The following is worth a closer look:
$$x^2 \tag{1043}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1044}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1045}$$

Clearly, the derivative of this is equal to
$$0 \tag{1046}$$

The object of our ultimate interest is the following:

$$1 \tag{1047}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1048}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{1049}$$

Clearly, the derivative of this is equal to
$$0 \tag{1050}$$

Consider the following:
$$2 \cdot x \tag{1051}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1052}$$

We will take a closer look at this:
$$1 \tag{1053}$$

As you can see, the derivative of this is equal to

$$0 \tag{1054}$$

Consider the following:
$$x^2 \tag{1055}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1056}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{1057}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1058}$$

63

We are going to study the following:
$$2 \cdot x \tag{1059}$$
It can be easily proved, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{1060}$$

The object of our ultimate interest is the following:
$$1 \tag{1061}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{1062}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{1063}$$
Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1064}$$

The object of our ultimate interest is the following:
$$2 \tag{1065}$$
Trivially, the derivative of this is equal to
$$0 \tag{1066}$$

We shall ponder the following:
$$1 \tag{1067}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{1068}$$

We will take a closer look at this:
$$2 \tag{1069}$$
As you can see, the derivative of this is equal to
$$0 \tag{1070}$$

We will take a closer look at this:
$$1 \tag{1071}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{1072}$$

The object of our ultimate interest is the following:
$$x^2 \tag{1073}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1074}$$

The object of our ultimate interest is the following:

$$2 \tag{1075}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1076}$$

Consider the following:

$$2 \tag{1077}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1078}$$

We are going to study the following:

$$2 \cdot x \tag{1079}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1080}$$

We are going to study the following:

$$1 \tag{1081}$$

Clearly, the derivative of this is equal to

$$0 \tag{1082}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1083}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1084}$$

Let us take a look at this:

$$2 \tag{1085}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1086}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1087}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1088}$$

The following is worth a closer look:

$$2 \tag{1089}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1090}$$

We will take a closer look at this:

$$1 \tag{1091}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1092}$$

We are going to study the following:

$$x^2 \tag{1093}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1094}$$

We shall ponder the following:

$$2 \tag{1095}$$

As you can see, the derivative of this is equal to

$$0 \tag{1096}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{1097}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1098}$$

The following is worth a closer look:

$$1 \tag{1099}$$

Trivially, the derivative of this is equal to

$$0 \tag{1100}$$

Let us take a look at this:

$$x^2 \tag{1101}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1102}$$

We shall ponder the following:

$$2 \tag{1103}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1104}$$

We shall ponder the following:

$$2 \cdot x \tag{1105}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1106}$$

We will take a closer look at this:

$$1 \tag{1107}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1108}$$

Consider the following:
$$x^2 \tag{1109}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1110}$$

The following is worth a closer look:
$$2 \tag{1111}$$
Obviously, the derivative of this is equal to
$$0 \tag{1112}$$

We will take a closer look at this:
$$1 \tag{1113}$$
As you can see, the derivative of this is equal to
$$0 \tag{1114}$$

One shall regard the object in question with utmost interest:
$$2 \tag{1115}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{1116}$$

We will take a closer look at this:
$$2 \tag{1117}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{1118}$$

We shall ponder the following:
$$1 \tag{1119}$$
Obviously, the derivative of this is equal to
$$0 \tag{1120}$$

The object of our ultimate interest is the following:
$$x^2 \tag{1121}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1122}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \tag{1123}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{1124}$$

We will take a closer look at this:
$$1 \tag{1125}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1126}$$

We will take a closer look at this:
$$2 \tag{1127}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1128}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1129}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1130}$$

We shall ponder the following:
$$1 \tag{1131}$$

As you can see, the derivative of this is equal to

$$0 \tag{1132}$$

We are going to study the following:
$$x^2 \tag{1133}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1134}$$

The following is worth a closer look:
$$2 \tag{1135}$$

As you can see, the derivative of this is equal to

$$0 \tag{1136}$$

The following is worth a closer look:
$$2 \cdot x \tag{1137}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1138}$$

The object of our ultimate interest is the following:

$$1 \tag{1139}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1140}$$

We shall ponder the following:
$$x^2 \tag{1141}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1142}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1143}$$

Clearly, the derivative of this is equal to

$$0 \tag{1144}$$

We shall ponder the following:

$$1 \tag{1145}$$

Clearly, the derivative of this is equal to

$$0 \tag{1146}$$

The following is worth a closer look:

$$2 \tag{1147}$$

Trivially, the derivative of this is equal to

$$0 \tag{1148}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1149}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1150}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1151}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1152}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1153}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1154}$$

Let us take a look at this:

$$1 \tag{1155}$$

As you can see, the derivative of this is equal to

$$0 \tag{1156}$$

The following is worth a closer look:

$$2 \cdot x \tag{1157}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1158}$$

We shall ponder the following:

$$1 \tag{1159}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1160}$$

Consider the following:

$$x^2 \tag{1161}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1162}$$

The following is worth a closer look:

$$2 \tag{1163}$$

Trivially, the derivative of this is equal to

$$0 \tag{1164}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1165}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1166}$$

Let us take a look at this:

$$1 \tag{1167}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1168}$$

Let us take a look at this:

$$x^2 \tag{1169}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1170}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1171}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1172}$$

Consider the following:

$$1 \tag{1173}$$

Obviously, the derivative of this is equal to

$$0 \tag{1174}$$

We will take a closer look at this:

$$2 \tag{1175}$$

Trivially, the derivative of this is equal to

$$0 \tag{1176}$$

The following is worth a closer look:

$$2 \tag{1177}$$

Trivially, the derivative of this is equal to
$$0 \tag{1178}$$

We shall ponder the following:
$$1 \tag{1179}$$

Trivially, the derivative of this is equal to
$$0 \tag{1180}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{1181}$$

It can be easily proved, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1182}$$

The object of our ultimate interest is the following:
$$2 \tag{1183}$$

It is now obvious, that the derivative of this is equal to
$$0 \tag{1184}$$

One shall regard the object in question with utmost interest:
$$1 \tag{1185}$$

Clearly, the derivative of this is equal to
$$0 \tag{1186}$$

Let us take a look at this:
$$1 \tag{1187}$$

Clearly, the derivative of this is equal to
$$0 \tag{1188}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{1189}$$

Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1190}$$

We shall ponder the following:
$$1 \tag{1191}$$

Clearly, the derivative of this is equal to
$$0 \tag{1192}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \cdot x \tag{1193}$$

As you can see, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{1194}$$

71

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1195}$$

Obviously, the derivative of this is equal to

$$0 \tag{1196}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1197}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1198}$$

We will take a closer look at this:

$$2 \tag{1199}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1200}$$

Let us take a look at this:

$$1 \tag{1201}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1202}$$

The object of our ultimate interest is the following:

$$1 \tag{1203}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1204}$$

Consider the following:

$$x^2 \tag{1205}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1206}$$

We are going to study the following:

$$2 \tag{1207}$$

Obviously, the derivative of this is equal to

$$0 \tag{1208}$$

We are going to study the following:

$$2 \cdot x \tag{1209}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1210}$$

We are going to study the following:

$$1 \tag{1211}$$

72

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1212}$$

We shall ponder the following:
$$x^2 \tag{1213}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1214}$$

Let us take a look at this:
$$2 \tag{1215}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1216}$$

We shall ponder the following:
$$1 \tag{1217}$$

As you can see, the derivative of this is equal to

$$0 \tag{1218}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1219}$$

Trivially, the derivative of this is equal to
$$0 \tag{1220}$$

The following is worth a closer look:
$$x^2 \tag{1221}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1222}$$

We are going to study the following:
$$1 \tag{1223}$$

Obviously, the derivative of this is equal to
$$0 \tag{1224}$$

The following is worth a closer look:
$$1 \tag{1225}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1226}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1227}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1228}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1229}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1230}$$

We shall ponder the following:

$$x^2 \tag{1231}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1232}$$

The following is worth a closer look:

$$2 \tag{1233}$$

As you can see, the derivative of this is equal to

$$0 \tag{1234}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1235}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1236}$$

We are going to study the following:

$$1 \tag{1237}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1238}$$

We are going to study the following:

$$x^2 \tag{1239}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1240}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1241}$$

As you can see, the derivative of this is equal to

$$0 \tag{1242}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1243}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1244}$$

We shall ponder the following:

$$1 \tag{1245}$$

Clearly, the derivative of this is equal to

$$0 \tag{1246}$$

We are going to study the following:

$$x^2 \tag{1247}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1248}$$

The following is worth a closer look:

$$2 \tag{1249}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1250}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1251}$$

Obviously, the derivative of this is equal to

$$0 \tag{1252}$$

The following is worth a closer look:

$$1 \tag{1253}$$

Trivially, the derivative of this is equal to

$$0 \tag{1254}$$

Let us take a look at this:

$$x^2 \tag{1255}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1256}$$

Let us take a look at this:

$$2 \tag{1257}$$

Obviously, the derivative of this is equal to

$$0 \tag{1258}$$

Consider the following:

$$2 \cdot x \tag{1259}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1260}$$

Let us take a look at this:

$$1 \tag{1261}$$

Obviously, the derivative of this is equal to

$$0 \tag{1262}$$

We will take a closer look at this:

$$x^2 \tag{1263}$$

Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1264}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \tag{1265}$$

As you can see, the derivative of this is equal to
$$0 \tag{1266}$$

We shall ponder the following:
$$2 \cdot x \tag{1267}$$
Unsurprisingly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{1268}$$

We are going to study the following:
$$1 \tag{1269}$$
Trivially, the derivative of this is equal to
$$0 \tag{1270}$$

We are going to study the following:
$$x^2 \tag{1271}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1272}$$

One shall regard the object in question with utmost interest:
$$2 \tag{1273}$$

Trivially, the derivative of this is equal to
$$0 \tag{1274}$$

Consider the following:
$$1 \tag{1275}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{1276}$$

We are going to study the following:
$$2 \tag{1277}$$

As you can see, the derivative of this is equal to
$$0 \tag{1278}$$

We shall ponder the following:
$$2 \tag{1279}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{1280}$$

We shall ponder the following:
$$1 \tag{1281}$$

Trivially, the derivative of this is equal to

$$0 \tag{1282}$$

Consider the following:

$$x^2 \tag{1283}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1284}$$

We are going to study the following:

$$2 \tag{1285}$$

Clearly, the derivative of this is equal to

$$0 \tag{1286}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1287}$$

As you can see, the derivative of this is equal to

$$0 \tag{1288}$$

Let us take a look at this:

$$1 \tag{1289}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1290}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1291}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1292}$$

The following is worth a closer look:

$$1 \tag{1293}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1294}$$

Let us take a look at this:

$$1 \tag{1295}$$

Obviously, the derivative of this is equal to

$$0 \tag{1296}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x - 2 \tag{1297}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{1298}$$

77

We shall ponder the following:
$$1 \tag{1299}$$
It is now obvious, that the derivative of this is equal to

$$0 \tag{1300}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1301}$$

Trivially, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1302}$$

Consider the following:
$$2 \cdot x \tag{1303}$$
Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1304}$$

We will take a closer look at this:
$$1 \tag{1305}$$
Obviously, the derivative of this is equal to
$$0 \tag{1306}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1307}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1308}$$

We shall ponder the following:
$$2 \tag{1309}$$
As you can see, the derivative of this is equal to

$$0 \tag{1310}$$

Consider the following:
$$1 \tag{1311}$$
Trivially, the derivative of this is equal to
$$0 \tag{1312}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1313}$$

Trivially, the derivative of this is equal to
$$0 \tag{1314}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1315}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1316}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1317}$$

As you can see, the derivative of this is equal to

$$0 \tag{1318}$$

The object of our ultimate interest is the following:

$$1 \tag{1319}$$

Obviously, the derivative of this is equal to

$$0 \tag{1320}$$

We shall ponder the following:
$$2 \cdot x \tag{1321}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1322}$$

The object of our ultimate interest is the following:

$$1 \tag{1323}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1324}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1325}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1326}$$

The object of our ultimate interest is the following:

$$2 \tag{1327}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1328}$$

The object of our ultimate interest is the following:

$$1 \tag{1329}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1330}$$

We shall ponder the following:
$$1 \tag{1331}$$

Obviously, the derivative of this is equal to

$$0 \tag{1332}$$

We shall ponder the following:

$$x^2 \tag{1333}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1334}$$

The object of our ultimate interest is the following:

$$1 \tag{1335}$$

As you can see, the derivative of this is equal to

$$0 \tag{1336}$$

The following is worth a closer look:

$$1 \tag{1337}$$

Clearly, the derivative of this is equal to

$$0 \tag{1338}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1339}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1340}$$

We are going to study the following:

$$x^2 \tag{1341}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1342}$$

We shall ponder the following:

$$2 \cdot x \tag{1343}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1344}$$

The object of our ultimate interest is the following:

$$1 \tag{1345}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1346}$$

The following is worth a closer look:

$$x^2 \tag{1347}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1348}$$

The following is worth a closer look:

$$2 \tag{1349}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1350}$$

Let us take a look at this:

$$1 \tag{1351}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1352}$$

Consider the following:

$$1 \tag{1353}$$

As you can see, the derivative of this is equal to

$$0 \tag{1354}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1355}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1356}$$

The object of our ultimate interest is the following:

$$1 \tag{1357}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1358}$$

Consider the following:

$$2 \cdot x \tag{1359}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1360}$$

We shall ponder the following:

$$1 \tag{1361}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1362}$$

Let us take a look at this:

$$x^2 \tag{1363}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1364}$$

The following is worth a closer look:

$$2 \tag{1365}$$

81

It is now obvious, that the derivative of this is equal to

$$0 \tag{1366}$$

We shall ponder the following:

$$1 \tag{1367}$$

Obviously, the derivative of this is equal to

$$0 \tag{1368}$$

The object of our ultimate interest is the following:

$$1 \tag{1369}$$

Trivially, the derivative of this is equal to

$$0 \tag{1370}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1371}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1372}$$

We will take a closer look at this:

$$2 \tag{1373}$$

Clearly, the derivative of this is equal to

$$0 \tag{1374}$$

We will take a closer look at this:

$$2 \cdot x \tag{1375}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1376}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1377}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1378}$$

We are going to study the following:

$$x^2 \tag{1379}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1380}$$

The object of our ultimate interest is the following:

$$2 \tag{1381}$$

As you can see, the derivative of this is equal to

$$0 \tag{1382}$$

We will take a closer look at this:

$$2 \cdot x \tag{1383}$$

82

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1384}$$

The object of our ultimate interest is the following:

$$1 \tag{1385}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1386}$$

We will take a closer look at this:

$$x^2 \tag{1387}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1388}$$

Consider the following:

$$2 \tag{1389}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1390}$$

The object of our ultimate interest is the following:

$$1 \tag{1391}$$

As you can see, the derivative of this is equal to

$$0 \tag{1392}$$

The object of our ultimate interest is the following:

$$2 \tag{1393}$$

Trivially, the derivative of this is equal to

$$0 \tag{1394}$$

Let us take a look at this:

$$2 \tag{1395}$$

Clearly, the derivative of this is equal to

$$0 \tag{1396}$$

Consider the following:

$$1 \tag{1397}$$

As you can see, the derivative of this is equal to

$$0 \tag{1398}$$

Consider the following:

$$x^2 \tag{1399}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1400}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1401}$$

Obviously, the derivative of this is equal to

$$0 \tag{1402}$$

We shall ponder the following:

$$1 \tag{1403}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1404}$$

The object of our ultimate interest is the following:

$$1 \tag{1405}$$

Trivially, the derivative of this is equal to

$$0 \tag{1406}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1407}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1408}$$

We will take a closer look at this:

$$1 \tag{1409}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1410}$$

We shall ponder the following:

$$1 \tag{1411}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1412}$$

We shall ponder the following:

$$1 \tag{1413}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1414}$$

We shall ponder the following:

$$x^2 \tag{1415}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1416}$$

Let us take a look at this:

$$2 \cdot x \tag{1417}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1418}$$

The object of our ultimate interest is the following:

$$1 \tag{1419}$$

As you can see, the derivative of this is equal to

$$0 \tag{1420}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1421}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1422}$$

The object of our ultimate interest is the following:

$$2 \tag{1423}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1424}$$

We will take a closer look at this:
$$1 \tag{1425}$$
Obviously, the derivative of this is equal to
$$0 \tag{1426}$$

We shall ponder the following:
$$1 \tag{1427}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1428}$$

We will take a closer look at this:
$$x^2 \tag{1429}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1430}$$

The following is worth a closer look:
$$1 \tag{1431}$$
As you can see, the derivative of this is equal to

$$0 \tag{1432}$$

We will take a closer look at this:
$$1 \tag{1433}$$
As you can see, the derivative of this is equal to

$$0 \tag{1434}$$

The following is worth a closer look:
$$2 \cdot x \tag{1435}$$
Trivially, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{1436}$$

One shall regard the object in question with utmost interest:
$$1 \tag{1437}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{1438}$$

We shall ponder the following:
$$x^2 \tag{1439}$$
It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1440}$$

Let us take a look at this:
$$2 \tag{1441}$$
Obviously, the derivative of this is equal to
$$0 \tag{1442}$$

One shall regard the object in question with utmost interest:
$$1 \tag{1443}$$
Clearly, the derivative of this is equal to
$$0 \tag{1444}$$

We are going to study the following:
$$1 \tag{1445}$$
Obviously, the derivative of this is equal to
$$0 \tag{1446}$$

The following is worth a closer look:
$$x^2 \tag{1447}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1448}$$

One shall regard the object in question with utmost interest:
$$1 \tag{1449}$$
Obviously, the derivative of this is equal to
$$0 \tag{1450}$$

Let us take a look at this:
$$1 \tag{1451}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{1452}$$

Let us take a look at this:
$$1 \tag{1453}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{1454}$$

We are going to study the following:
$$x^2 \tag{1455}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1456}$$

The object of our ultimate interest is the following:
$$2 \cdot x \tag{1457}$$
It is now obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{1458}$$

The object of our ultimate interest is the following:
$$1 \tag{1459}$$
As you can see, the derivative of this is equal to
$$0 \tag{1460}$$

Let us take a look at this:
$$x^2 \tag{1461}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1462}$$

The object of our ultimate interest is the following:
$$2 \tag{1463}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{1464}$$

We are going to study the following:
$$1 \tag{1465}$$
Trivially, the derivative of this is equal to
$$0 \tag{1466}$$

We shall ponder the following:
$$1 \tag{1467}$$
Clearly, the derivative of this is equal to
$$0 \tag{1468}$$

We shall ponder the following:
$$x^2 \tag{1469}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1470}$$

87

The object of our ultimate interest is the following:

$$1 \tag{1471}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1472}$$

Let us take a look at this:

$$2 \cdot x \tag{1473}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1474}$$

Consider the following:

$$1 \tag{1475}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1476}$$

The following is worth a closer look:

$$x^2 \tag{1477}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1478}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1479}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1480}$$

Consider the following:

$$1 \tag{1481}$$

Obviously, the derivative of this is equal to

$$0 \tag{1482}$$

We are going to study the following:

$$1 \tag{1483}$$

As you can see, the derivative of this is equal to

$$0 \tag{1484}$$

Let us take a look at this:

$$x^2 \tag{1485}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1486}$$

We are going to study the following:

$$2 \tag{1487}$$

As you can see, the derivative of this is equal to

$$0 \tag{1488}$$

Consider the following:
$$2 \cdot x \tag{1489}$$
It is now obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{1490}$$

Let us take a look at this:
$$1 \tag{1491}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{1492}$$

We are going to study the following:
$$x^2 \tag{1493}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1494}$$

The object of our ultimate interest is the following:
$$2 \tag{1495}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{1496}$$

Consider the following:
$$2 \cdot x \tag{1497}$$
Obviously, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{1498}$$

The object of our ultimate interest is the following:
$$1 \tag{1499}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{1500}$$

Let us take a look at this:
$$x^2 \tag{1501}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1502}$$

We will take a closer look at this:
$$2 \tag{1503}$$
Trivially, the derivative of this is equal to
$$0 \tag{1504}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{1505}$$

89

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1506}$$

We will take a closer look at this:
$$2 \tag{1507}$$

Obviously, the derivative of this is equal to
$$0 \tag{1508}$$

Consider the following:
$$2 \tag{1509}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1510}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1511}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1512}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1513}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1514}$$

We shall ponder the following:
$$2 \tag{1515}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1516}$$

We will take a closer look at this:
$$1 \tag{1517}$$

Trivially, the derivative of this is equal to
$$0 \tag{1518}$$

The following is worth a closer look:
$$1 \tag{1519}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1520}$$

The following is worth a closer look:
$$x^2 \tag{1521}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1522}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1523}$$

As you can see, the derivative of this is equal to

$$0 \tag{1524}$$

Consider the following:

$$1 \tag{1525}$$

Trivially, the derivative of this is equal to

$$0 \tag{1526}$$

Consider the following:

$$2 \cdot x \tag{1527}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1528}$$

We shall ponder the following:

$$1 \tag{1529}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1530}$$

Let us take a look at this:

$$x^2 \tag{1531}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1532}$$

We shall ponder the following:

$$2 \tag{1533}$$

As you can see, the derivative of this is equal to

$$0 \tag{1534}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1535}$$

Obviously, the derivative of this is equal to

$$0 \tag{1536}$$

We are going to study the following:

$$1 \tag{1537}$$

Trivially, the derivative of this is equal to

$$0 \tag{1538}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1539}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1540}$$

We are going to study the following:

$$1 \tag{1541}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1542}$$

The object of our ultimate interest is the following:

$$1 \tag{1543}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1544}$$

Let us take a look at this:

$$1 \tag{1545}$$

Obviously, the derivative of this is equal to

$$0 \tag{1546}$$

The following is worth a closer look:

$$x^2 \tag{1547}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1548}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1549}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1550}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1551}$$

Clearly, the derivative of this is equal to

$$0 \tag{1552}$$

We will take a closer look at this:

$$x^2 \tag{1553}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1554}$$

We shall ponder the following:

$$2 \tag{1555}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1556}$$

The following is worth a closer look:

$$1 \tag{1557}$$

92

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1558}$$

Consider the following:
$$1 \tag{1559}$$

As you can see, the derivative of this is equal to

$$0 \tag{1560}$$

We are going to study the following:
$$x^2 \tag{1561}$$

Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1562}$$

Let us take a look at this:
$$1 \tag{1563}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1564}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1565}$$

Obviously, the derivative of this is equal to
$$0 \tag{1566}$$

We are going to study the following:
$$2 \cdot x \tag{1567}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1568}$$

We shall ponder the following:
$$1 \tag{1569}$$

As you can see, the derivative of this is equal to

$$0 \tag{1570}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1571}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1572}$$

The following is worth a closer look:
$$2 \tag{1573}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1574}$$

The object of our ultimate interest is the following:

$$1 \tag{1575}$$

Trivially, the derivative of this is equal to

$$0 \tag{1576}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1577}$$

As you can see, the derivative of this is equal to

$$0 \tag{1578}$$

We shall ponder the following:

$$x^2 \tag{1579}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1580}$$

We shall ponder the following:

$$1 \tag{1581}$$

Trivially, the derivative of this is equal to

$$0 \tag{1582}$$

We will take a closer look at this:

$$2 \cdot x \tag{1583}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1584}$$

The object of our ultimate interest is the following:

$$1 \tag{1585}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1586}$$

Consider the following:

$$x^2 \tag{1587}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1588}$$

We will take a closer look at this:

$$2 \tag{1589}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1590}$$

The object of our ultimate interest is the following:

$$1 \tag{1591}$$

94

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1592}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1593}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1594}$$

Let us take a look at this:
$$x^2 \tag{1595}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1596}$$

We are going to study the following:
$$2 \tag{1597}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1598}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1599}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1600}$$

We will take a closer look at this:
$$1 \tag{1601}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1602}$$

The following is worth a closer look:
$$x^2 \tag{1603}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1604}$$

We shall ponder the following:
$$2 \tag{1605}$$

Obviously, the derivative of this is equal to

$$0 \tag{1606}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1607}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1608}$$

95

Consider the following:
$$1 \tag{1609}$$
It is now obvious, that the derivative of this is equal to

$$0 \tag{1610}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{1611}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1612}$$

The object of our ultimate interest is the following:
$$2 \tag{1613}$$
It is now obvious, that the derivative of this is equal to

$$0 \tag{1614}$$

We shall ponder the following:
$$1 \tag{1615}$$
Trivially, the derivative of this is equal to
$$0 \tag{1616}$$

The following is worth a closer look:
$$2 \tag{1617}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{1618}$$

The object of our ultimate interest is the following:
$$2 \tag{1619}$$
As you can see, the derivative of this is equal to
$$0 \tag{1620}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{1621}$$
As you can see, the derivative of this is equal to
$$0 \tag{1622}$$

We are going to study the following:
$$x^2 \tag{1623}$$
Trivially, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1624}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1625}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1626}$$

The following is worth a closer look:

$$1 \tag{1627}$$

Trivially, the derivative of this is equal to

$$0 \tag{1628}$$

We are going to study the following:

$$1 \tag{1629}$$

As you can see, the derivative of this is equal to

$$0 \tag{1630}$$

Consider the following:

$$x^2 \tag{1631}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1632}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1633}$$

Trivially, the derivative of this is equal to

$$0 \tag{1634}$$

Let us take a look at this:

$$1 \tag{1635}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1636}$$

We will take a closer look at this:

$$1 \tag{1637}$$

As you can see, the derivative of this is equal to

$$0 \tag{1638}$$

We will take a closer look at this:

$$x^2 \tag{1639}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1640}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1641}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1642}$$

We shall ponder the following:
$$1 \tag{1643}$$
Obviously, the derivative of this is equal to
$$0 \tag{1644}$$

Consider the following:
$$x^2 \tag{1645}$$
Trivially, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1646}$$

We shall ponder the following:
$$x - 2 \tag{1647}$$
Unsurprisingly, the derivative of this is equal to
$$1 - 0 \tag{1648}$$

We shall ponder the following:
$$1 \tag{1649}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{1650}$$

The following is worth a closer look:
$$x^2 \tag{1651}$$
It can be easily proved, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1652}$$

One shall regard the object in question with utmost interest:
$$2 \cdot x \tag{1653}$$
Unsurprisingly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{1654}$$

We shall ponder the following:
$$1 \tag{1655}$$
Obviously, the derivative of this is equal to
$$0 \tag{1656}$$

The following is worth a closer look:
$$x^2 \tag{1657}$$
It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1658}$$

The object of our ultimate interest is the following:
$$2 \tag{1659}$$
Clearly, the derivative of this is equal to
$$0 \tag{1660}$$

98

The object of our ultimate interest is the following:

$$1 \tag{1661}$$

Clearly, the derivative of this is equal to

$$0 \tag{1662}$$

We will take a closer look at this:

$$1 \tag{1663}$$

Trivially, the derivative of this is equal to

$$0 \tag{1664}$$

We are going to study the following:

$$x^2 \tag{1665}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1666}$$

The following is worth a closer look:

$$1 \tag{1667}$$

Trivially, the derivative of this is equal to

$$0 \tag{1668}$$

Consider the following:

$$1 \tag{1669}$$

Trivially, the derivative of this is equal to

$$0 \tag{1670}$$

We will take a closer look at this:

$$2 \cdot x \tag{1671}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1672}$$

Consider the following:

$$1 \tag{1673}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1674}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1675}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1676}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{1677}$$

Clearly, the derivative of this is equal to

$$0 \tag{1678}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1679}$$

Clearly, the derivative of this is equal to

$$0 \tag{1680}$$

The following is worth a closer look:

$$1 \tag{1681}$$

Clearly, the derivative of this is equal to

$$0 \tag{1682}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1683}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1684}$$

We shall ponder the following:

$$1 \tag{1685}$$

Trivially, the derivative of this is equal to

$$0 \tag{1686}$$

The object of our ultimate interest is the following:

$$1 \tag{1687}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1688}$$

The object of our ultimate interest is the following:

$$1 \tag{1689}$$

As you can see, the derivative of this is equal to

$$0 \tag{1690}$$

The following is worth a closer look:

$$x^2 \tag{1691}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1692}$$

Consider the following:

$$2 \cdot x \tag{1693}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1694}$$

The object of our ultimate interest is the following:

$$1 \tag{1695}$$

100

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1696}$$

Consider the following:
$$x^2 \tag{1697}$$

Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1698}$$

We shall ponder the following:
$$2 \tag{1699}$$

Clearly, the derivative of this is equal to
$$0 \tag{1700}$$

We are going to study the following:
$$1 \tag{1701}$$

Trivially, the derivative of this is equal to
$$0 \tag{1702}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1703}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1704}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1705}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1706}$$

We will take a closer look at this:
$$1 \tag{1707}$$

Clearly, the derivative of this is equal to
$$0 \tag{1708}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1709}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1710}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1711}$$

As you can see, the derivative of this is equal to

$$0 \tag{1712}$$

101

One shall regard the object in question with utmost interest:

$$x^2 \tag{1713}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1714}$$

The object of our ultimate interest is the following:

$$2 \tag{1715}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1716}$$

The following is worth a closer look:

$$1 \tag{1717}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1718}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1719}$$

Clearly, the derivative of this is equal to

$$0 \tag{1720}$$

We are going to study the following:

$$x^2 \tag{1721}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1722}$$

Let us take a look at this:

$$2 \tag{1723}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1724}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{1725}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1726}$$

The following is worth a closer look:

$$1 \tag{1727}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1728}$$

The following is worth a closer look:

$$x^2 \tag{1729}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1730}$$

We are going to study the following:

$$2 \tag{1731}$$

As you can see, the derivative of this is equal to

$$0 \tag{1732}$$

We will take a closer look at this:

$$2 \cdot x \tag{1733}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1734}$$

Consider the following:

$$1 \tag{1735}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1736}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1737}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1738}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1739}$$

As you can see, the derivative of this is equal to

$$0 \tag{1740}$$

The object of our ultimate interest is the following:

$$1 \tag{1741}$$

Clearly, the derivative of this is equal to

$$0 \tag{1742}$$

We shall ponder the following:

$$2 \tag{1743}$$

Obviously, the derivative of this is equal to

$$0 \tag{1744}$$

We will take a closer look at this:

$$2 \tag{1745}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1746}$$

We shall ponder the following:
$$1 \tag{1747}$$
It can be easily proved, that the derivative of this is equal to

$$0 \tag{1748}$$

The following is worth a closer look:
$$x^2 \tag{1749}$$
It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1750}$$

Consider the following:
$$2 \tag{1751}$$
It is now obvious, that the derivative of this is equal to

$$0 \tag{1752}$$

The following is worth a closer look:
$$1 \tag{1753}$$
Obviously, the derivative of this is equal to
$$0 \tag{1754}$$

We shall ponder the following:
$$1 \tag{1755}$$
As you can see, the derivative of this is equal to

$$0 \tag{1756}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1757}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1758}$$

We shall ponder the following:
$$1 \tag{1759}$$
Trivially, the derivative of this is equal to
$$0 \tag{1760}$$

Consider the following:
$$1 \tag{1761}$$
It can be easily proved, that the derivative of this is equal to

$$0 \tag{1762}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{1763}$$
Trivially, the derivative of this is equal to
$$1 - 0 \tag{1764}$$

104

Consider the following:

$$1 \tag{1765}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1766}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1767}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1768}$$

Consider the following:

$$2 \cdot x \tag{1769}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1770}$$

We are going to study the following:

$$1 \tag{1771}$$

Trivially, the derivative of this is equal to

$$0 \tag{1772}$$

The following is worth a closer look:

$$x^2 \tag{1773}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1774}$$

We shall ponder the following:

$$2 \tag{1775}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1776}$$

The object of our ultimate interest is the following:

$$1 \tag{1777}$$

Clearly, the derivative of this is equal to

$$0 \tag{1778}$$

Let us take a look at this:

$$1 \tag{1779}$$

As you can see, the derivative of this is equal to

$$0 \tag{1780}$$

Consider the following:

$$x^2 \tag{1781}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1782}$$

105

One shall regard the object in question with utmost interest:

$$1 \tag{1783}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1784}$$

We will take a closer look at this:

$$1 \tag{1785}$$

Trivially, the derivative of this is equal to

$$0 \tag{1786}$$

We shall ponder the following:

$$2 \cdot x \tag{1787}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1788}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1789}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1790}$$

We shall ponder the following:

$$x^2 \tag{1791}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1792}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1793}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1794}$$

The following is worth a closer look:

$$1 \tag{1795}$$

As you can see, the derivative of this is equal to

$$0 \tag{1796}$$

The following is worth a closer look:

$$1 \tag{1797}$$

As you can see, the derivative of this is equal to

$$0 \tag{1798}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1799}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1800}$$

We are going to study the following:

$$1 \tag{1801}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1802}$$

We are going to study the following:

$$1 \tag{1803}$$

Obviously, the derivative of this is equal to

$$0 \tag{1804}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1805}$$

Trivially, the derivative of this is equal to

$$0 \tag{1806}$$

Consider the following:

$$x^2 \tag{1807}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1808}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1809}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1810}$$

The object of our ultimate interest is the following:

$$1 \tag{1811}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1812}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1813}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1814}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1815}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1816}$$

We are going to study the following:

$$1 \tag{1817}$$

Obviously, the derivative of this is equal to

$$0 \tag{1818}$$

The following is worth a closer look:

$$x^2 \tag{1819}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1820}$$

The following is worth a closer look:

$$2 \tag{1821}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1822}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1823}$$

Trivially, the derivative of this is equal to

$$0 \tag{1824}$$

The object of our ultimate interest is the following:

$$1 \tag{1825}$$

Clearly, the derivative of this is equal to

$$0 \tag{1826}$$

Consider the following:

$$x^2 \tag{1827}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1828}$$

The object of our ultimate interest is the following:

$$1 \tag{1829}$$

Clearly, the derivative of this is equal to

$$0 \tag{1830}$$

Let us take a look at this:

$$1 \tag{1831}$$

Clearly, the derivative of this is equal to

$$0 \tag{1832}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{1833}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{1834}$$

We shall ponder the following:

$$1 \tag{1835}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1836}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1837}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1838}$$

Consider the following:

$$1 \tag{1839}$$

Clearly, the derivative of this is equal to

$$0 \tag{1840}$$

We shall ponder the following:

$$x^2 \tag{1841}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1842}$$

We are going to study the following:

$$x - 2 \tag{1843}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{1844}$$

The following is worth a closer look:

$$1 \tag{1845}$$

Obviously, the derivative of this is equal to

$$0 \tag{1846}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1847}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1848}$$

The following is worth a closer look:

$$2 \cdot x \tag{1849}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1850}$$

We shall ponder the following:

$$1 \tag{1851}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1852}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{1853}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1854}$$

We will take a closer look at this:

$$2 \tag{1855}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{1856}$$

We are going to study the following:

$$1 \tag{1857}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1858}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1859}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1860}$$

Consider the following:

$$x^2 \tag{1861}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1862}$$

Consider the following:

$$1 \tag{1863}$$

Trivially, the derivative of this is equal to

$$0 \tag{1864}$$

We shall ponder the following:

$$1 \tag{1865}$$

As you can see, the derivative of this is equal to

$$0 \tag{1866}$$

We will take a closer look at this:

$$2 \cdot x \tag{1867}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1868}$$

110

Consider the following:
$$1 \tag{1869}$$
As you can see, the derivative of this is equal to

$$0 \tag{1870}$$

We shall ponder the following:
$$x^2 \tag{1871}$$
Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1872}$$

Consider the following:
$$2 \tag{1873}$$
It can be easily proved, that the derivative of this is equal to

$$0 \tag{1874}$$

Consider the following:
$$1 \tag{1875}$$
It can be easily proved, that the derivative of this is equal to

$$0 \tag{1876}$$

One shall regard the object in question with utmost interest:
$$1 \tag{1877}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1878}$$

We will take a closer look at this:
$$x^2 \tag{1879}$$
It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1880}$$

We shall ponder the following:
$$1 \tag{1881}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{1882}$$

We are going to study the following:
$$1 \tag{1883}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{1884}$$

We will take a closer look at this:
$$1 \tag{1885}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \qquad (1886)$$

One shall regard the object in question with utmost interest:

$$x^2 \qquad (1887)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \qquad (1888)$$

The object of our ultimate interest is the following:

$$2 \cdot x \qquad (1889)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \qquad (1890)$$

We are going to study the following:

$$1 \qquad (1891)$$

Trivially, the derivative of this is equal to

$$0 \qquad (1892)$$

Consider the following:

$$x^2 \qquad (1893)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \qquad (1894)$$

Consider the following:

$$2 \qquad (1895)$$

Unsurprisingly, the derivative of this is equal to

$$0 \qquad (1896)$$

The object of our ultimate interest is the following:

$$1 \qquad (1897)$$

It can be easily proved, that the derivative of this is equal to

$$0 \qquad (1898)$$

We are going to study the following:

$$1 \qquad (1899)$$

Trivially, the derivative of this is equal to

$$0 \qquad (1900)$$

The following is worth a closer look:

$$x^2 \qquad (1901)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \qquad (1902)$$

We shall ponder the following:
$$1 \tag{1903}$$
Obviously, the derivative of this is equal to
$$0 \tag{1904}$$

The object of our ultimate interest is the following:
$$2 \cdot x \tag{1905}$$
It is now obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{1906}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{1907}$$
Trivially, the derivative of this is equal to
$$0 \tag{1908}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{1909}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1910}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \tag{1911}$$
Clearly, the derivative of this is equal to
$$0 \tag{1912}$$

The object of our ultimate interest is the following:
$$1 \tag{1913}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{1914}$$

Consider the following:
$$1 \tag{1915}$$
Clearly, the derivative of this is equal to
$$0 \tag{1916}$$

Let us take a look at this:
$$x^2 \tag{1917}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1918}$$

We will take a closer look at this:
$$2 \tag{1919}$$

As you can see, the derivative of this is equal to

$$0 \tag{1920}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{1921}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1922}$$

The following is worth a closer look:

$$1 \tag{1923}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1924}$$

We shall ponder the following:

$$x^2 \tag{1925}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1926}$$

We shall ponder the following:

$$2 \tag{1927}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1928}$$

We shall ponder the following:

$$2 \cdot x \tag{1929}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1930}$$

Let us take a look at this:

$$1 \tag{1931}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{1932}$$

Let us take a look at this:

$$x^2 \tag{1933}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1934}$$

One shall regard the object in question with utmost interest:

$$2 \tag{1935}$$

As you can see, the derivative of this is equal to

$$0 \tag{1936}$$

We will take a closer look at this:
$$1 \tag{1937}$$
Obviously, the derivative of this is equal to
$$0 \tag{1938}$$
We will take a closer look at this:
$$2 \tag{1939}$$
Trivially, the derivative of this is equal to
$$0 \tag{1940}$$
We will take a closer look at this:
$$2 \tag{1941}$$
Obviously, the derivative of this is equal to
$$0 \tag{1942}$$
Let us take a look at this:
$$1 \tag{1943}$$
As you can see, the derivative of this is equal to
$$0 \tag{1944}$$
Consider the following:
$$x^2 \tag{1945}$$
Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1946}$$
The following is worth a closer look:
$$2 \tag{1947}$$
Obviously, the derivative of this is equal to
$$0 \tag{1948}$$
Consider the following:
$$1 \tag{1949}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{1950}$$
We are going to study the following:
$$1 \tag{1951}$$
Obviously, the derivative of this is equal to
$$0 \tag{1952}$$
The object of our ultimate interest is the following:
$$x^2 \tag{1953}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{1954}$$
Consider the following:
$$1 \tag{1955}$$

As you can see, the derivative of this is equal to

$$0 \tag{1956}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1957}$$

Clearly, the derivative of this is equal to

$$0 \tag{1958}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x - 2 \tag{1959}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{1960}$$

The object of our ultimate interest is the following:

$$1 \tag{1961}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1962}$$

The object of our ultimate interest is the following:

$$x^2 \tag{1963}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1964}$$

We are going to study the following:

$$2 \cdot x \tag{1965}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1966}$$

We are going to study the following:

$$1 \tag{1967}$$

Trivially, the derivative of this is equal to

$$0 \tag{1968}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1969}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1970}$$

We shall ponder the following:

$$2 \tag{1971}$$

116

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{1972}$$

Consider the following:
$$1 \tag{1973}$$

Trivially, the derivative of this is equal to
$$0 \tag{1974}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{1975}$$

As you can see, the derivative of this is equal to

$$0 \tag{1976}$$

We will take a closer look at this:
$$x^2 \tag{1977}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{1978}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1979}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1980}$$

One shall regard the object in question with utmost interest:

$$1 \tag{1981}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{1982}$$

Let us take a look at this:
$$2 \cdot x \tag{1983}$$

As you can see, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{1984}$$

The object of our ultimate interest is the following:

$$1 \tag{1985}$$

As you can see, the derivative of this is equal to

$$0 \tag{1986}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{1987}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \qquad (1988)$$

We shall ponder the following:

$$2 \qquad (1989)$$

It is now obvious, that the derivative of this is equal to

$$0 \qquad (1990)$$

We are going to study the following:

$$1 \qquad (1991)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \qquad (1992)$$

One shall regard the object in question with utmost interest:

$$1 \qquad (1993)$$

As you can see, the derivative of this is equal to

$$0 \qquad (1994)$$

We shall ponder the following:

$$x^2 \qquad (1995)$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \qquad (1996)$$

The object of our ultimate interest is the following:

$$1 \qquad (1997)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \qquad (1998)$$

Consider the following:

$$1 \qquad (1999)$$

Unsurprisingly, the derivative of this is equal to

$$0 \qquad (2000)$$

Consider the following:

$$1 \qquad (2001)$$

As you can see, the derivative of this is equal to

$$0 \qquad (2002)$$

Consider the following:

$$x^2 \qquad (2003)$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \qquad (2004)$$

Consider the following:
$$1 \tag{2005}$$
Trivially, the derivative of this is equal to
$$0 \tag{2006}$$

Consider the following:
$$1 \tag{2007}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{2008}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{2009}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2010}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \cdot x \tag{2011}$$
As you can see, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2012}$$

Consider the following:
$$1 \tag{2013}$$
Trivially, the derivative of this is equal to
$$0 \tag{2014}$$

Consider the following:
$$x^2 \tag{2015}$$
Trivially, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2016}$$

We are going to study the following:
$$2 \tag{2017}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{2018}$$

Let us take a look at this:
$$1 \tag{2019}$$
As you can see, the derivative of this is equal to
$$0 \tag{2020}$$

One shall regard the object in question with utmost interest:
$$1 \tag{2021}$$

Clearly, the derivative of this is equal to
$$0 \tag{2022}$$

Consider the following:
$$x^2 \tag{2023}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2024}$$

We are going to study the following:
$$1 \tag{2025}$$

Clearly, the derivative of this is equal to
$$0 \tag{2026}$$

We are going to study the following:
$$1 \tag{2027}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{2028}$$

One shall regard the object in question with utmost interest:
$$x - 2 \tag{2029}$$

Obviously, the derivative of this is equal to
$$1 - 0 \tag{2030}$$

One shall regard the object in question with utmost interest:
$$1 \tag{2031}$$

Obviously, the derivative of this is equal to
$$0 \tag{2032}$$

The object of our ultimate interest is the following:
$$x^2 \tag{2033}$$

Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2034}$$

The following is worth a closer look:
$$1 \tag{2035}$$

Unsurprisingly, the derivative of this is equal to
$$0 \tag{2036}$$

We shall ponder the following:
$$x^2 \tag{2037}$$

Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2038}$$

The following is worth a closer look:
$$x - 2 \tag{2039}$$

Trivially, the derivative of this is equal to
$$1 - 0 \tag{2040}$$

The object of our ultimate interest is the following:
$$1 \tag{2041}$$

Unsurprisingly, the derivative of this is equal to
$$0 \tag{2042}$$

The object of our ultimate interest is the following:
$$x^2 \tag{2043}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2044}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \cdot x \tag{2045}$$

Trivially, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2046}$$

The object of our ultimate interest is the following:
$$1 \tag{2047}$$

It is now obvious, that the derivative of this is equal to
$$0 \tag{2048}$$

Consider the following:
$$x^2 \tag{2049}$$

Trivially, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2050}$$

One shall regard the object in question with utmost interest:
$$2 \tag{2051}$$

Obviously, the derivative of this is equal to
$$0 \tag{2052}$$

Consider the following:
$$1 \tag{2053}$$

Clearly, the derivative of this is equal to
$$0 \tag{2054}$$

The object of our ultimate interest is the following:
$$1 \tag{2055}$$

Trivially, the derivative of this is equal to
$$0 \tag{2056}$$

The object of our ultimate interest is the following:
$$x^2 \tag{2057}$$

Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2058}$$

We will take a closer look at this:
$$1 \tag{2059}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2060}$$

Let us take a look at this:
$$1 \tag{2061}$$

Trivially, the derivative of this is equal to
$$0 \tag{2062}$$

Consider the following:
$$x - 2 \tag{2063}$$

As you can see, the derivative of this is equal to
$$1 - 0 \tag{2064}$$

We shall ponder the following:
$$1 \tag{2065}$$

Unsurprisingly, the derivative of this is equal to
$$0 \tag{2066}$$

We are going to study the following:
$$x^2 \tag{2067}$$

Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2068}$$

We will take a closer look at this:
$$1 \tag{2069}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2070}$$

The object of our ultimate interest is the following:
$$x^2 \tag{2071}$$

It can be easily proved, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2072}$$

We shall ponder the following:
$$2 \cdot x \tag{2073}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2074}$$

We shall ponder the following:
$$1 \tag{2075}$$

As you can see, the derivative of this is equal to

$$0 \tag{2076}$$

Let us take a look at this:
$$x^2 \tag{2077}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2078}$$

We shall ponder the following:
$$2 \tag{2079}$$

Trivially, the derivative of this is equal to
$$0 \tag{2080}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2081}$$

As you can see, the derivative of this is equal to

$$0 \tag{2082}$$

We shall ponder the following:
$$1 \tag{2083}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2084}$$

The following is worth a closer look:
$$x^2 \tag{2085}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2086}$$

Consider the following:
$$1 \tag{2087}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2088}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2089}$$

Trivially, the derivative of this is equal to
$$0 \tag{2090}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{2091}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2092}$$

We are going to study the following:

$$1 \tag{2093}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2094}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2095}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2096}$$

The object of our ultimate interest is the following:

$$2 \tag{2097}$$

Trivially, the derivative of this is equal to

$$0 \tag{2098}$$

We shall ponder the following:

$$1 \tag{2099}$$

Clearly, the derivative of this is equal to

$$0 \tag{2100}$$

The object of our ultimate interest is the following:

$$1 \tag{2101}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2102}$$

Let us take a look at this:

$$x^2 \tag{2103}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2104}$$

Let us take a look at this:

$$1 \tag{2105}$$

As you can see, the derivative of this is equal to

$$0 \tag{2106}$$

The object of our ultimate interest is the following:

$$1 \tag{2107}$$

124

It is now obvious, that the derivative of this is equal to

$$0 \tag{2108}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2109}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2110}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2111}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2112}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2113}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2114}$$

Let us take a look at this:

$$1 \tag{2115}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2116}$$

Consider the following:

$$x^2 \tag{2117}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2118}$$

The object of our ultimate interest is the following:

$$2 \tag{2119}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2120}$$

Consider the following:

$$1 \tag{2121}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2122}$$

Consider the following:

$$1 \tag{2123}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2124}$$

Consider the following:
$$x^2 \tag{2125}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2126}$$

The object of our ultimate interest is the following:

$$1 \tag{2127}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2128}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2129}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2130}$$

Let us take a look at this:
$$1 \tag{2131}$$

Trivially, the derivative of this is equal to
$$0 \tag{2132}$$

Let us take a look at this:
$$x^2 \tag{2133}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2134}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2135}$$

As you can see, the derivative of this is equal to

$$0 \tag{2136}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2137}$$

Clearly, the derivative of this is equal to
$$0 \tag{2138}$$

The object of our ultimate interest is the following:

$$1 \tag{2139}$$

Trivially, the derivative of this is equal to

$$0 \tag{2140}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{2141}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2142}$$

Consider the following:

$$2 \tag{2143}$$

Clearly, the derivative of this is equal to

$$0 \tag{2144}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{2145}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2146}$$

Consider the following:

$$1 \tag{2147}$$

Trivially, the derivative of this is equal to

$$0 \tag{2148}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2149}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2150}$$

Let us take a look at this:

$$2 \tag{2151}$$

As you can see, the derivative of this is equal to

$$0 \tag{2152}$$

The following is worth a closer look:

$$2 \cdot x \tag{2153}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2154}$$

Let us take a look at this:

$$1 \tag{2155}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2156}$$

We will take a closer look at this:
$$x^2 \tag{2157}$$
Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2158}$$

Let us take a look at this:
$$2 \tag{2159}$$
Trivially, the derivative of this is equal to
$$0 \tag{2160}$$

We will take a closer look at this:
$$1 \tag{2161}$$
As you can see, the derivative of this is equal to
$$0 \tag{2162}$$

One shall regard the object in question with utmost interest:
$$2 \tag{2163}$$
Obviously, the derivative of this is equal to
$$0 \tag{2164}$$

Let us take a look at this:
$$2 \tag{2165}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{2166}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{2167}$$
As you can see, the derivative of this is equal to
$$0 \tag{2168}$$

Consider the following:
$$x^2 \tag{2169}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2170}$$

Let us take a look at this:
$$2 \tag{2171}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{2172}$$

We are going to study the following:
$$1 \tag{2173}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{2174}$$

We shall ponder the following:
$$1 \tag{2175}$$
As you can see, the derivative of this is equal to

$$0 \tag{2176}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{2177}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2178}$$

One shall regard the object in question with utmost interest:
$$1 \tag{2179}$$
As you can see, the derivative of this is equal to

$$0 \tag{2180}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{2181}$$
It can be easily proved, that the derivative of this is equal to

$$0 \tag{2182}$$

Let us take a look at this:
$$x - 2 \tag{2183}$$
Clearly, the derivative of this is equal to
$$1 - 0 \tag{2184}$$

Consider the following:
$$1 \tag{2185}$$
It is now obvious, that the derivative of this is equal to

$$0 \tag{2186}$$

Let us take a look at this:
$$x^2 \tag{2187}$$
It can be easily proved, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2188}$$

One shall regard the object in question with utmost interest:
$$2 \cdot x \tag{2189}$$
Trivially, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2190}$$

Let us take a look at this:
$$1 \tag{2191}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2192}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2193}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2194}$$

Consider the following:

$$2 \tag{2195}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2196}$$

The following is worth a closer look:

$$1 \tag{2197}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2198}$$

Consider the following:

$$1 \tag{2199}$$

As you can see, the derivative of this is equal to

$$0 \tag{2200}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2201}$$

Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2202}$$

Consider the following:

$$1 \tag{2203}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2204}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2205}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2206}$$

Consider the following:
$$2 \cdot x \tag{2207}$$

Clearly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2208}$$

We are going to study the following:
$$1 \tag{2209}$$

Obviously, the derivative of this is equal to
$$0 \tag{2210}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{2211}$$

It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2212}$$

We are going to study the following:
$$2 \tag{2213}$$

Clearly, the derivative of this is equal to
$$0 \tag{2214}$$

Consider the following:
$$1 \tag{2215}$$

Clearly, the derivative of this is equal to
$$0 \tag{2216}$$

The following is worth a closer look:
$$1 \tag{2217}$$

As you can see, the derivative of this is equal to
$$0 \tag{2218}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{2219}$$

Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2220}$$

We will take a closer look at this:
$$1 \tag{2221}$$

Obviously, the derivative of this is equal to
$$0 \tag{2222}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{2223}$$

Unsurprisingly, the derivative of this is equal to
$$0 \tag{2224}$$

We are going to study the following:
$$1 \tag{2225}$$

It is now obvious, that the derivative of this is equal to
$$0 \tag{2226}$$

131

Consider the following:
$$x^2 \tag{2227}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2228}$$
Let us take a look at this:
$$1 \tag{2229}$$
Clearly, the derivative of this is equal to
$$0 \tag{2230}$$
The following is worth a closer look:
$$1 \tag{2231}$$
As you can see, the derivative of this is equal to
$$0 \tag{2232}$$
Let us take a look at this:
$$x^2 \tag{2233}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2234}$$
We will take a closer look at this:
$$x - 2 \tag{2235}$$
Trivially, the derivative of this is equal to
$$1 - 0 \tag{2236}$$
Consider the following:
$$1 \tag{2237}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2238}$$
We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{2239}$$
It can be easily proved, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2240}$$
Consider the following:
$$2 \cdot x \tag{2241}$$
Unsurprisingly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2242}$$
We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{2243}$$
As you can see, the derivative of this is equal to
$$0 \tag{2244}$$

We are going to study the following:
$$x^2 \tag{2245}$$
Trivially, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2246}$$

One shall regard the object in question with utmost interest:
$$2 \tag{2247}$$
Clearly, the derivative of this is equal to
$$0 \tag{2248}$$

The object of our ultimate interest is the following:
$$1 \tag{2249}$$
As you can see, the derivative of this is equal to
$$0 \tag{2250}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{2251}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2252}$$

We are going to study the following:
$$x^2 \tag{2253}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2254}$$

Let us take a look at this:
$$1 \tag{2255}$$
Clearly, the derivative of this is equal to
$$0 \tag{2256}$$

The following is worth a closer look:
$$1 \tag{2257}$$
Obviously, the derivative of this is equal to
$$0 \tag{2258}$$

The object of our ultimate interest is the following:
$$x - 2 \tag{2259}$$
It can be easily proved, that the derivative of this is equal to
$$1 - 0 \tag{2260}$$

Let us take a look at this:
$$1 \tag{2261}$$

Obviously, the derivative of this is equal to
$$0 \tag{2262}$$

Consider the following:
$$x^2 \tag{2263}$$

Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2264}$$

The object of our ultimate interest is the following:
$$1 \tag{2265}$$

Obviously, the derivative of this is equal to
$$0 \tag{2266}$$

Consider the following:
$$x^2 \tag{2267}$$

Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2268}$$

Let us take a look at this:
$$2 \cdot x \tag{2269}$$

It is now obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2270}$$

One shall regard the object in question with utmost interest:
$$1 \tag{2271}$$

Unsurprisingly, the derivative of this is equal to
$$0 \tag{2272}$$

We shall ponder the following:
$$x^2 \tag{2273}$$

Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2274}$$

Let us take a look at this:
$$2 \tag{2275}$$

Trivially, the derivative of this is equal to
$$0 \tag{2276}$$

The object of our ultimate interest is the following:
$$1 \tag{2277}$$

It is now obvious, that the derivative of this is equal to
$$0 \tag{2278}$$

134

The object of our ultimate interest is the following:

$$1 \tag{2279}$$

Trivially, the derivative of this is equal to

$$0 \tag{2280}$$

Let us take a look at this:

$$x^2 \tag{2281}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2282}$$

The object of our ultimate interest is the following:

$$1 \tag{2283}$$

Obviously, the derivative of this is equal to

$$0 \tag{2284}$$

We will take a closer look at this:

$$1 \tag{2285}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2286}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{2287}$$

Obviously, the derivative of this is equal to

$$1 - 0 \tag{2288}$$

We will take a closer look at this:

$$1 \tag{2289}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2290}$$

Let us take a look at this:

$$x^2 \tag{2291}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2292}$$

Consider the following:

$$1 \tag{2293}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2294}$$

The following is worth a closer look:

$$x^2 \tag{2295}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2296}$$

The object of our ultimate interest is the following:

$$x - 2 \tag{2297}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{2298}$$

We are going to study the following:

$$x + 1 \tag{2299}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{2300}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2301}$$

As you can see, the derivative of this is equal to

$$0 \tag{2302}$$

Consider the following:

$$\sin x \tag{2303}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2304}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2305}$$

Obviously, the derivative of this is equal to

$$0 \tag{2306}$$

We shall ponder the following:

$$x^2 \tag{2307}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2308}$$

We will take a closer look at this:

$$2 \cdot x \tag{2309}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2310}$$

We are going to study the following:

$$1 \tag{2311}$$

As you can see, the derivative of this is equal to

$$0 \tag{2312}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2313}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2314}$$

The following is worth a closer look:
$$2 \tag{2315}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{2316}$$

We are going to study the following:
$$1 \tag{2317}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{2318}$$

Consider the following:
$$1 \tag{2319}$$
Trivially, the derivative of this is equal to
$$0 \tag{2320}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2321}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2322}$$

Let us take a look at this:
$$1 \tag{2323}$$
Obviously, the derivative of this is equal to
$$0 \tag{2324}$$

We shall ponder the following:
$$1 \tag{2325}$$
Obviously, the derivative of this is equal to
$$0 \tag{2326}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2327}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2328}$$

The following is worth a closer look:
$$1 \tag{2329}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{2330}$$

The following is worth a closer look:
$$x^2 \tag{2331}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2332}$$

The object of our ultimate interest is the following:

$$2 \tag{2333}$$

Obviously, the derivative of this is equal to

$$0 \tag{2334}$$

We will take a closer look at this:

$$1 \tag{2335}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2336}$$

Let us take a look at this:

$$1 \tag{2337}$$

Obviously, the derivative of this is equal to

$$0 \tag{2338}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2339}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2340}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2341}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2342}$$

The following is worth a closer look:

$$1 \tag{2343}$$

Obviously, the derivative of this is equal to

$$0 \tag{2344}$$

Consider the following:

$$1 \tag{2345}$$

Clearly, the derivative of this is equal to

$$0 \tag{2346}$$

Consider the following:

$$x^2 \tag{2347}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2348}$$

Consider the following:

$$2 \cdot x \tag{2349}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2350}$$

Let us take a look at this:
$$1 \tag{2351}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{2352}$$

Consider the following:
$$x^2 \tag{2353}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2354}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \tag{2355}$$
As you can see, the derivative of this is equal to
$$0 \tag{2356}$$

Consider the following:
$$1 \tag{2357}$$
As you can see, the derivative of this is equal to
$$0 \tag{2358}$$

The object of our ultimate interest is the following:
$$1 \tag{2359}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2360}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{2361}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2362}$$

The object of our ultimate interest is the following:
$$1 \tag{2363}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{2364}$$

We will take a closer look at this:
$$2 \cdot x \tag{2365}$$
Trivially, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2366}$$

We are going to study the following:
$$1 \tag{2367}$$

139

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2368}$$

The following is worth a closer look:

$$x^2 \tag{2369}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2370}$$

Consider the following:

$$2 \tag{2371}$$

Clearly, the derivative of this is equal to

$$0 \tag{2372}$$

We shall ponder the following:

$$1 \tag{2373}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2374}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2375}$$

As you can see, the derivative of this is equal to

$$0 \tag{2376}$$

We will take a closer look at this:

$$x^2 \tag{2377}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2378}$$

We will take a closer look at this:

$$2 \tag{2379}$$

As you can see, the derivative of this is equal to

$$0 \tag{2380}$$

Let us take a look at this:

$$2 \cdot x \tag{2381}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2382}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2383}$$

Clearly, the derivative of this is equal to

$$0 \tag{2384}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2385}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2386}$$

We shall ponder the following:

$$2 \tag{2387}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2388}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{2389}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2390}$$

We are going to study the following:

$$1 \tag{2391}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2392}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2393}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2394}$$

The following is worth a closer look:

$$2 \tag{2395}$$

Obviously, the derivative of this is equal to

$$0 \tag{2396}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2397}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2398}$$

Consider the following:

$$2 \tag{2399}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2400}$$

Let us take a look at this:

$$2 \tag{2401}$$

Trivially, the derivative of this is equal to
$$0 \tag{2402}$$

Consider the following:
$$1 \tag{2403}$$
Clearly, the derivative of this is equal to
$$0 \tag{2404}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{2405}$$
Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2406}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \tag{2407}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{2408}$$

The following is worth a closer look:
$$1 \tag{2409}$$
Trivially, the derivative of this is equal to
$$0 \tag{2410}$$

One shall regard the object in question with utmost interest:
$$1 \tag{2411}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{2412}$$

We shall ponder the following:
$$x^2 \tag{2413}$$
Trivially, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2414}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{2415}$$
Obviously, the derivative of this is equal to
$$0 \tag{2416}$$

Let us take a look at this:
$$1 \tag{2417}$$
As you can see, the derivative of this is equal to
$$0 \tag{2418}$$

One shall regard the object in question with utmost interest:

$$x - 2 \qquad (2419)$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \qquad (2420)$$

We will take a closer look at this:

$$1 \qquad (2421)$$

Unsurprisingly, the derivative of this is equal to

$$0 \qquad (2422)$$

One shall regard the object in question with utmost interest:

$$x^2 \qquad (2423)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \qquad (2424)$$

We are going to study the following:

$$2 \cdot x \qquad (2425)$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \qquad (2426)$$

The following is worth a closer look:

$$1 \qquad (2427)$$

Unsurprisingly, the derivative of this is equal to

$$0 \qquad (2428)$$

The following is worth a closer look:

$$x^2 \qquad (2429)$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \qquad (2430)$$

The following is worth a closer look:

$$2 \qquad (2431)$$

Trivially, the derivative of this is equal to

$$0 \qquad (2432)$$

One shall regard the object in question with utmost interest:

$$1 \qquad (2433)$$

Obviously, the derivative of this is equal to

$$0 \qquad (2434)$$

We shall ponder the following:

$$1 \qquad (2435)$$

As you can see, the derivative of this is equal to

$$0 \tag{2436}$$

Let us take a look at this:
$$x^2 \tag{2437}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2438}$$

The following is worth a closer look:
$$1 \tag{2439}$$

Trivially, the derivative of this is equal to
$$0 \tag{2440}$$

We shall ponder the following:
$$1 \tag{2441}$$

As you can see, the derivative of this is equal to

$$0 \tag{2442}$$

We are going to study the following:
$$2 \cdot x \tag{2443}$$

Clearly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2444}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2445}$$

Trivially, the derivative of this is equal to
$$0 \tag{2446}$$

We are going to study the following:
$$x^2 \tag{2447}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2448}$$

Let us take a look at this:
$$2 \tag{2449}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2450}$$

We will take a closer look at this:
$$1 \tag{2451}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2452}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2453}$$

144

As you can see, the derivative of this is equal to

$$0 \tag{2454}$$

We are going to study the following:

$$x^2 \tag{2455}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2456}$$

The object of our ultimate interest is the following:

$$1 \tag{2457}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2458}$$

We shall ponder the following:

$$1 \tag{2459}$$

Trivially, the derivative of this is equal to

$$0 \tag{2460}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2461}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2462}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2463}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2464}$$

We shall ponder the following:

$$1 \tag{2465}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2466}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2467}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2468}$$

The following is worth a closer look:

$$x^2 \tag{2469}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2470}$$

Let us take a look at this:

$$x - 2 \tag{2471}$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \tag{2472}$$

We will take a closer look at this:

$$1 \tag{2473}$$

As you can see, the derivative of this is equal to

$$0 \tag{2474}$$

We will take a closer look at this:

$$x^2 \tag{2475}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2476}$$

The following is worth a closer look:

$$2 \cdot x \tag{2477}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2478}$$

Consider the following:

$$1 \tag{2479}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2480}$$

Let us take a look at this:

$$x^2 \tag{2481}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2482}$$

We will take a closer look at this:

$$2 \tag{2483}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2484}$$

Consider the following:

$$1 \tag{2485}$$

Trivially, the derivative of this is equal to

$$0 \tag{2486}$$

The object of our ultimate interest is the following:

$$1 \tag{2487}$$

146

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2488}$$

We will take a closer look at this:

$$x^2 \tag{2489}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2490}$$

Consider the following:

$$1 \tag{2491}$$

Trivially, the derivative of this is equal to

$$0 \tag{2492}$$

We shall ponder the following:

$$1 \tag{2493}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2494}$$

The following is worth a closer look:

$$x - 2 \tag{2495}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{2496}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2497}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2498}$$

We shall ponder the following:

$$x^2 \tag{2499}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2500}$$

We are going to study the following:

$$1 \tag{2501}$$

Obviously, the derivative of this is equal to

$$0 \tag{2502}$$

We will take a closer look at this:

$$x^2 \tag{2503}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2504}$$

The following is worth a closer look:

$$2 \cdot x \tag{2505}$$

147

Clearly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2506}$$

The object of our ultimate interest is the following:
$$1 \tag{2507}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2508}$$

Consider the following:
$$x^2 \tag{2509}$$

Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2510}$$

We will take a closer look at this:
$$2 \tag{2511}$$

Clearly, the derivative of this is equal to
$$0 \tag{2512}$$

One shall regard the object in question with utmost interest:
$$1 \tag{2513}$$

Trivially, the derivative of this is equal to
$$0 \tag{2514}$$

Let us take a look at this:
$$1 \tag{2515}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{2516}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{2517}$$

As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2518}$$

We shall ponder the following:
$$1 \tag{2519}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2520}$$

The object of our ultimate interest is the following:
$$1 \tag{2521}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2522}$$

The following is worth a closer look:
$$x - 2 \tag{2523}$$
It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{2524}$$

We are going to study the following:
$$1 \tag{2525}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{2526}$$

We are going to study the following:
$$x^2 \tag{2527}$$
It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2528}$$

We shall ponder the following:
$$1 \tag{2529}$$
Clearly, the derivative of this is equal to
$$0 \tag{2530}$$

Let us take a look at this:
$$x^2 \tag{2531}$$
Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2532}$$

We are going to study the following:
$$x - 2 \tag{2533}$$
It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{2534}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{2535}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{2536}$$

The object of our ultimate interest is the following:

$$1 \tag{2537}$$

As you can see, the derivative of this is equal to

$$0 \tag{2538}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{2539}$$

149

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2540}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\sin x \tag{2541}$$

Clearly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2542}$$

We are going to study the following:

$$x + 1 \tag{2543}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{2544}$$

Let us take a look at this:

$$4 \tag{2545}$$

Obviously, the derivative of this is equal to

$$0 \tag{2546}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2547}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2548}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{2549}$$

Unsurprisingly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{2550}$$

Consider the following:

$$x + 1 \tag{2551}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{2552}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2553}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2554}$$

Let us take a look at this:

$$\sin x \tag{2555}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{2556}$$

150

We shall ponder the following:
$$1 \tag{2557}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{2558}$$

We shall ponder the following:
$$x^2 \tag{2559}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2560}$$

The object of our ultimate interest is the following:
$$2 \cdot x \tag{2561}$$
Trivially, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2562}$$

We are going to study the following:
$$1 \tag{2563}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2564}$$

The following is worth a closer look:
$$x^2 \tag{2565}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2566}$$

Consider the following:
$$2 \tag{2567}$$
Trivially, the derivative of this is equal to
$$0 \tag{2568}$$

Let us take a look at this:
$$1 \tag{2569}$$
As you can see, the derivative of this is equal to
$$0 \tag{2570}$$

We are going to study the following:
$$1 \tag{2571}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2572}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{2573}$$
It can be easily proved, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2574}$$

We shall ponder the following:
$$1 \tag{2575}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{2576}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{2577}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2578}$$

Let us take a look at this:
$$2 \cdot x \tag{2579}$$
Trivially, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2580}$$

One shall regard the object in question with utmost interest:
$$1 \tag{2581}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{2582}$$

The object of our ultimate interest is the following:
$$x^2 \tag{2583}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2584}$$

The object of our ultimate interest is the following:
$$2 \tag{2585}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{2586}$$

The following is worth a closer look:
$$1 \tag{2587}$$
Clearly, the derivative of this is equal to
$$0 \tag{2588}$$

We are going to study the following:
$$1 \tag{2589}$$
Trivially, the derivative of this is equal to
$$0 \tag{2590}$$

We are going to study the following:
$$x^2 \tag{2591}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2592}$$

We will take a closer look at this:
$$1 \tag{2593}$$

As you can see, the derivative of this is equal to

$$0 \tag{2594}$$

We will take a closer look at this:
$$1 \tag{2595}$$

Trivially, the derivative of this is equal to
$$0 \tag{2596}$$

The object of our ultimate interest is the following:

$$1 \tag{2597}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2598}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2599}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2600}$$

The following is worth a closer look:
$$2 \cdot x \tag{2601}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2602}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2603}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2604}$$

Consider the following:
$$x^2 \tag{2605}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2606}$$

We will take a closer look at this:
$$2 \tag{2607}$$

Obviously, the derivative of this is equal to
$$0 \tag{2608}$$

The object of our ultimate interest is the following:

$$1 \tag{2609}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2610}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2611}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2612}$$

Let us take a look at this:

$$x^2 \tag{2613}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2614}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2615}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2616}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{2617}$$

Obviously, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2618}$$

We shall ponder the following:

$$1 \tag{2619}$$

Obviously, the derivative of this is equal to

$$0 \tag{2620}$$

Consider the following:

$$x^2 \tag{2621}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2622}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{2623}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2624}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2625}$$

Obviously, the derivative of this is equal to

$$0 \tag{2626}$$

We will take a closer look at this:

$$1 \tag{2627}$$

Trivially, the derivative of this is equal to

$$0 \tag{2628}$$

Let us take a look at this:

$$x^2 \tag{2629}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2630}$$

We are going to study the following:

$$2 \tag{2631}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2632}$$

We are going to study the following:

$$2 \cdot x \tag{2633}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2634}$$

We shall ponder the following:

$$1 \tag{2635}$$

Obviously, the derivative of this is equal to

$$0 \tag{2636}$$

Let us take a look at this:

$$x^2 \tag{2637}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2638}$$

We will take a closer look at this:

$$2 \tag{2639}$$

As you can see, the derivative of this is equal to

$$0 \tag{2640}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \cdot x \tag{2641}$$

Trivially, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2642}$$

155

The following is worth a closer look:
$$1 \tag{2643}$$
Clearly, the derivative of this is equal to
$$0 \tag{2644}$$

Let us take a look at this:
$$x^2 \tag{2645}$$
It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2646}$$

One shall regard the object in question with utmost interest:
$$2 \tag{2647}$$
Obviously, the derivative of this is equal to
$$0 \tag{2648}$$

The following is worth a closer look:
$$1 \tag{2649}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2650}$$

The object of our ultimate interest is the following:
$$2 \tag{2651}$$
Trivially, the derivative of this is equal to
$$0 \tag{2652}$$

We shall ponder the following:
$$2 \tag{2653}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{2654}$$

The following is worth a closer look:
$$1 \tag{2655}$$
Clearly, the derivative of this is equal to
$$0 \tag{2656}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{2657}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2658}$$

The object of our ultimate interest is the following:
$$2 \tag{2659}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{2660}$$

156

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2661}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2662}$$

We will take a closer look at this:

$$1 \tag{2663}$$

Trivially, the derivative of this is equal to

$$0 \tag{2664}$$

We will take a closer look at this:

$$x^2 \tag{2665}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2666}$$

Consider the following:

$$1 \tag{2667}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2668}$$

Consider the following:

$$1 \tag{2669}$$

Obviously, the derivative of this is equal to

$$0 \tag{2670}$$

The following is worth a closer look:

$$x - 2 \tag{2671}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{2672}$$

We will take a closer look at this:

$$1 \tag{2673}$$

Trivially, the derivative of this is equal to

$$0 \tag{2674}$$

We shall ponder the following:

$$x^2 \tag{2675}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2676}$$

We are going to study the following:

$$2 \cdot x \tag{2677}$$

Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2678}$$

We are going to study the following:

$$1 \tag{2679}$$

Clearly, the derivative of this is equal to
$$0 \tag{2680}$$

Consider the following:
$$x^2 \tag{2681}$$

It can be easily proved, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2682}$$

We shall ponder the following:
$$2 \tag{2683}$$

Obviously, the derivative of this is equal to
$$0 \tag{2684}$$

The following is worth a closer look:
$$1 \tag{2685}$$

As you can see, the derivative of this is equal to
$$0 \tag{2686}$$

One shall regard the object in question with utmost interest:
$$1 \tag{2687}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{2688}$$

We will take a closer look at this:
$$x^2 \tag{2689}$$

It can be easily proved, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2690}$$

The following is worth a closer look:
$$1 \tag{2691}$$

Obviously, the derivative of this is equal to
$$0 \tag{2692}$$

We shall ponder the following:
$$1 \tag{2693}$$

Unsurprisingly, the derivative of this is equal to
$$0 \tag{2694}$$

Let us take a look at this:
$$2 \cdot x \tag{2695}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2696}$$

Consider the following:
$$1 \tag{2697}$$

Trivially, the derivative of this is equal to
$$0 \tag{2698}$$

We shall ponder the following:
$$x^2 \tag{2699}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2700}$$

Let us take a look at this:
$$2 \tag{2701}$$

Obviously, the derivative of this is equal to
$$0 \tag{2702}$$

The following is worth a closer look:
$$1 \tag{2703}$$

Clearly, the derivative of this is equal to
$$0 \tag{2704}$$

Let us take a look at this:
$$1 \tag{2705}$$

Clearly, the derivative of this is equal to
$$0 \tag{2706}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{2707}$$

Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2708}$$

The following is worth a closer look:
$$1 \tag{2709}$$

Clearly, the derivative of this is equal to
$$0 \tag{2710}$$

One shall regard the object in question with utmost interest:
$$1 \tag{2711}$$

It is now obvious, that the derivative of this is equal to
$$0 \tag{2712}$$

We are going to study the following:
$$1 \tag{2713}$$

Trivially, the derivative of this is equal to
$$0 \tag{2714}$$

The object of our ultimate interest is the following:
$$x^2 \tag{2715}$$

It can be easily proved, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2716}$$

We shall ponder the following:
$$1 \tag{2717}$$
Trivially, the derivative of this is equal to
$$0 \tag{2718}$$

We will take a closer look at this:
$$1 \tag{2719}$$
Obviously, the derivative of this is equal to
$$0 \tag{2720}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{2721}$$
Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2722}$$

Let us take a look at this:
$$x - 2 \tag{2723}$$
Unsurprisingly, the derivative of this is equal to
$$1 - 0 \tag{2724}$$

Consider the following:
$$1 \tag{2725}$$
As you can see, the derivative of this is equal to
$$0 \tag{2726}$$

We are going to study the following:
$$x^2 \tag{2727}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2728}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \cdot x \tag{2729}$$
As you can see, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2730}$$

We shall ponder the following:
$$1 \tag{2731}$$
Trivially, the derivative of this is equal to
$$0 \tag{2732}$$

The following is worth a closer look:
$$x^2 \tag{2733}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2734}$$

160

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{2735}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2736}$$

We will take a closer look at this:

$$1 \tag{2737}$$

Obviously, the derivative of this is equal to

$$0 \tag{2738}$$

The object of our ultimate interest is the following:

$$1 \tag{2739}$$

Trivially, the derivative of this is equal to

$$0 \tag{2740}$$

Consider the following:

$$x^2 \tag{2741}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2742}$$

We will take a closer look at this:

$$1 \tag{2743}$$

As you can see, the derivative of this is equal to

$$0 \tag{2744}$$

Consider the following:

$$1 \tag{2745}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2746}$$

We shall ponder the following:

$$x - 2 \tag{2747}$$

Trivially, the derivative of this is equal to

$$1 - 0 \tag{2748}$$

The object of our ultimate interest is the following:

$$1 \tag{2749}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2750}$$

The following is worth a closer look:

$$x^2 \tag{2751}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2752}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2753}$$

Clearly, the derivative of this is equal to

$$0 \tag{2754}$$

Consider the following:

$$x^2 \tag{2755}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2756}$$

Let us take a look at this:

$$2 \cdot x \tag{2757}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2758}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2759}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2760}$$

Let us take a look at this:

$$x^2 \tag{2761}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2762}$$

We shall ponder the following:

$$2 \tag{2763}$$

As you can see, the derivative of this is equal to

$$0 \tag{2764}$$

We shall ponder the following:

$$1 \tag{2765}$$

As you can see, the derivative of this is equal to

$$0 \tag{2766}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2767}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2768}$$

Consider the following:

$$x^2 \tag{2769}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2770}$$

We will take a closer look at this:

$$1 \tag{2771}$$

Obviously, the derivative of this is equal to

$$0 \tag{2772}$$

We shall ponder the following:

$$1 \tag{2773}$$

Trivially, the derivative of this is equal to

$$0 \tag{2774}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x - 2 \tag{2775}$$

Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{2776}$$

Let us take a look at this:

$$1 \tag{2777}$$

As you can see, the derivative of this is equal to

$$0 \tag{2778}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2779}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2780}$$

The object of our ultimate interest is the following:

$$1 \tag{2781}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2782}$$

The following is worth a closer look:

$$x^2 \tag{2783}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2784}$$

The following is worth a closer look:

$$x - 2 \tag{2785}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{2786}$$

163

Let us take a look at this:
$$x + 1 \tag{2787}$$
Trivially, the derivative of this is equal to
$$1 + 0 \tag{2788}$$

Let us take a look at this:
$$1 \tag{2789}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{2790}$$

We shall ponder the following:
$$2 \tag{2791}$$
Clearly, the derivative of this is equal to
$$0 \tag{2792}$$

We will take a closer look at this:
$$\sin x \tag{2793}$$
Obviously, the derivative of this is equal to
$$\cos x \cdot 1 \tag{2794}$$

We shall ponder the following:
$$x + 1 \tag{2795}$$
Trivially, the derivative of this is equal to
$$1 + 0 \tag{2796}$$

We will take a closer look at this:
$$4 \tag{2797}$$
Obviously, the derivative of this is equal to
$$0 \tag{2798}$$

Consider the following:
$$2 \tag{2799}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{2800}$$

Consider the following:
$$\cos x \tag{2801}$$
Trivially, the derivative of this is equal to
$$- \sin x \cdot 1 \tag{2802}$$

We shall ponder the following:
$$x + 1 \tag{2803}$$
Trivially, the derivative of this is equal to
$$1 + 0 \tag{2804}$$

The object of our ultimate interest is the following:
$$2 \tag{2805}$$

164

As you can see, the derivative of this is equal to

$$0 \tag{2806}$$

We shall ponder the following:
$$\sin x \tag{2807}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{2808}$$

Let us take a look at this:
$$1 \tag{2809}$$
Trivially, the derivative of this is equal to

$$0 \tag{2810}$$

Consider the following:
$$x^2 \tag{2811}$$
It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2812}$$

Let us take a look at this:
$$2 \cdot x \tag{2813}$$
Unsurprisingly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2814}$$

The following is worth a closer look:
$$1 \tag{2815}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{2816}$$

Let us take a look at this:
$$x^2 \tag{2817}$$
It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2818}$$

We will take a closer look at this:
$$2 \tag{2819}$$
As you can see, the derivative of this is equal to

$$0 \tag{2820}$$

We shall ponder the following:
$$1 \tag{2821}$$
Obviously, the derivative of this is equal to

$$0 \tag{2822}$$

Consider the following:
$$1 \tag{2823}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2824}$$

The following is worth a closer look:
$$x^2 \tag{2825}$$
Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2826}$$

The object of our ultimate interest is the following:

$$1 \tag{2827}$$

As you can see, the derivative of this is equal to

$$0 \tag{2828}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2829}$$

As you can see, the derivative of this is equal to

$$0 \tag{2830}$$

Consider the following:
$$x - 2 \tag{2831}$$
It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{2832}$$

Consider the following:
$$1 \tag{2833}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{2834}$$

The following is worth a closer look:
$$x^2 \tag{2835}$$
Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2836}$$

The object of our ultimate interest is the following:

$$1 \tag{2837}$$

Obviously, the derivative of this is equal to
$$0 \tag{2838}$$

The following is worth a closer look:
$$x^2 \tag{2839}$$
As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2840}$$

166

Let us take a look at this:
$$x - 2 \tag{2841}$$
As you can see, the derivative of this is equal to
$$1 - 0 \tag{2842}$$
We are going to study the following:
$$x + 1 \tag{2843}$$
Clearly, the derivative of this is equal to
$$1 + 0 \tag{2844}$$
We will take a closer look at this:
$$1 \tag{2845}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{2846}$$
We are going to study the following:
$$2 \tag{2847}$$
Trivially, the derivative of this is equal to
$$0 \tag{2848}$$
Let us take a look at this:
$$\sin x \tag{2849}$$
Obviously, the derivative of this is equal to
$$\cos x \cdot 1 \tag{2850}$$
We shall ponder the following:
$$x + 1 \tag{2851}$$
It is now obvious, that the derivative of this is equal to
$$1 + 0 \tag{2852}$$
The object of our ultimate interest is the following:
$$1 \tag{2853}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{2854}$$
One shall regard the object in question with utmost interest:
$$4 \tag{2855}$$
Obviously, the derivative of this is equal to
$$0 \tag{2856}$$
Let us take a look at this:
$$2 \tag{2857}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{2858}$$

167

Let us take a look at this:
$$\cos x \tag{2859}$$
Obviously, the derivative of this is equal to
$$-\sin x \cdot 1 \tag{2860}$$

The object of our ultimate interest is the following:
$$x + 1 \tag{2861}$$
As you can see, the derivative of this is equal to
$$1 + 0 \tag{2862}$$

We shall ponder the following:
$$16 \tag{2863}$$
Trivially, the derivative of this is equal to
$$0 \tag{2864}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$0 \tag{2865}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2866}$$

We will take a closer look at this:
$$4 \tag{2867}$$
As you can see, the derivative of this is equal to
$$0 \tag{2868}$$

We will take a closer look at this:
$$2 \tag{2869}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{2870}$$

Let us take a look at this:
$$1 \tag{2871}$$
Obviously, the derivative of this is equal to
$$0 \tag{2872}$$

We shall ponder the following:
$$\sin x \tag{2873}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$\cos x \cdot 1 \tag{2874}$$

We shall ponder the following:
$$x + 1 \tag{2875}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$1 + 0 \tag{2876}$$

One shall regard the object in question with utmost interest:

$$1 \tag{2877}$$

Trivially, the derivative of this is equal to

$$0 \tag{2878}$$

We are going to study the following:

$$4 \tag{2879}$$

Trivially, the derivative of this is equal to

$$0 \tag{2880}$$

We will take a closer look at this:

$$2 \tag{2881}$$

Trivially, the derivative of this is equal to

$$0 \tag{2882}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\cos x \tag{2883}$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{2884}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{2885}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{2886}$$

Let us take a look at this:

$$2 \tag{2887}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2888}$$

The object of our ultimate interest is the following:

$$\sin x \tag{2889}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{2890}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{2891}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{2892}$$

We are going to study the following:

$$1 \tag{2893}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2894}$$

We shall ponder the following:
$$2 \tag{2895}$$

Obviously, the derivative of this is equal to
$$0 \tag{2896}$$

Let us take a look at this:
$$\sin x \tag{2897}$$

Clearly, the derivative of this is equal to
$$\cos x \cdot 1 \tag{2898}$$

Let us take a look at this:
$$x + 1 \tag{2899}$$

Clearly, the derivative of this is equal to
$$1 + 0 \tag{2900}$$

We will take a closer look at this:
$$4 \tag{2901}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2902}$$

One shall regard the object in question with utmost interest:

$$2 \tag{2903}$$

Obviously, the derivative of this is equal to
$$0 \tag{2904}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{2905}$$

Clearly, the derivative of this is equal to
$$-\sin x \cdot 1 \tag{2906}$$

The following is worth a closer look:
$$x + 1 \tag{2907}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{2908}$$

Consider the following:
$$1 \tag{2909}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{2910}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{2911}$$

Clearly, the derivative of this is equal to
$$0 \tag{2912}$$

We will take a closer look at this:
$$\sin x \tag{2913}$$
Trivially, the derivative of this is equal to
$$\cos x \cdot 1 \tag{2914}$$

We are going to study the following:
$$x + 1 \tag{2915}$$
It is now obvious, that the derivative of this is equal to
$$1 + 0 \tag{2916}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$4 \tag{2917}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{2918}$$

We shall ponder the following:
$$2 \tag{2919}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{2920}$$

We shall ponder the following:
$$\cos x \tag{2921}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$- \sin x \cdot 1 \tag{2922}$$

We shall ponder the following:
$$x + 1 \tag{2923}$$
Unsurprisingly, the derivative of this is equal to
$$1 + 0 \tag{2924}$$

We are going to study the following:
$$2 \tag{2925}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{2926}$$

The object of our ultimate interest is the following:
$$\sin x \tag{2927}$$
Obviously, the derivative of this is equal to
$$\cos x \cdot 1 \tag{2928}$$

171

Let us take a look at this:
$$1 \tag{2929}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{2930}$$

Let us take a look at this:
$$x^2 \tag{2931}$$
It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2932}$$

Consider the following:
$$2 \cdot x \tag{2933}$$
Clearly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{2934}$$

We shall ponder the following:
$$1 \tag{2935}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{2936}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{2937}$$
It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2938}$$

We are going to study the following:
$$2 \tag{2939}$$
Clearly, the derivative of this is equal to
$$0 \tag{2940}$$

The following is worth a closer look:
$$1 \tag{2941}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{2942}$$

The following is worth a closer look:
$$1 \tag{2943}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{2944}$$

We are going to study the following:
$$x^2 \tag{2945}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{2946}$$

172

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2947}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2948}$$

We shall ponder the following:

$$1 \tag{2949}$$

As you can see, the derivative of this is equal to

$$0 \tag{2950}$$

One shall regard the object in question with utmost interest:

$$2 \cdot x \tag{2951}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2952}$$

Consider the following:

$$1 \tag{2953}$$

Trivially, the derivative of this is equal to

$$0 \tag{2954}$$

We will take a closer look at this:

$$x^2 \tag{2955}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2956}$$

We shall ponder the following:

$$2 \tag{2957}$$

Clearly, the derivative of this is equal to

$$0 \tag{2958}$$

Consider the following:

$$1 \tag{2959}$$

As you can see, the derivative of this is equal to

$$0 \tag{2960}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2961}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{2962}$$

One shall regard the object in question with utmost interest:

$$x^2 \tag{2963}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2964}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2965}$$

As you can see, the derivative of this is equal to

$$0 \tag{2966}$$

We will take a closer look at this:

$$1 \tag{2967}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2968}$$

Let us take a look at this:

$$1 \tag{2969}$$

Obviously, the derivative of this is equal to

$$0 \tag{2970}$$

The object of our ultimate interest is the following:

$$x^2 \tag{2971}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2972}$$

Consider the following:

$$2 \cdot x \tag{2973}$$

It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2974}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{2975}$$

As you can see, the derivative of this is equal to

$$0 \tag{2976}$$

The following is worth a closer look:

$$x^2 \tag{2977}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2978}$$

Consider the following:

$$2 \tag{2979}$$

Trivially, the derivative of this is equal to

$$0 \tag{2980}$$

174

One shall regard the object in question with utmost interest:

$$1 \tag{2981}$$

Clearly, the derivative of this is equal to

$$0 \tag{2982}$$

We will take a closer look at this:

$$1 \tag{2983}$$

As you can see, the derivative of this is equal to

$$0 \tag{2984}$$

We will take a closer look at this:

$$x^2 \tag{2985}$$

It can be easily proved, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2986}$$

Consider the following:

$$1 \tag{2987}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{2988}$$

The following is worth a closer look:

$$2 \cdot x \tag{2989}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{2990}$$

The following is worth a closer look:

$$1 \tag{2991}$$

As you can see, the derivative of this is equal to

$$0 \tag{2992}$$

Consider the following:

$$x^2 \tag{2993}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{2994}$$

Let us take a look at this:

$$2 \tag{2995}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{2996}$$

We shall ponder the following:

$$1 \tag{2997}$$

Clearly, the derivative of this is equal to

$$0 \tag{2998}$$

Consider the following:
$$1 \tag{2999}$$
As you can see, the derivative of this is equal to
$$0 \tag{3000}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{3001}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3002}$$

Consider the following:
$$2 \tag{3003}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{3004}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \cdot x \tag{3005}$$
It is now obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{3006}$$

The following is worth a closer look:
$$1 \tag{3007}$$
Clearly, the derivative of this is equal to
$$0 \tag{3008}$$

The object of our ultimate interest is the following:
$$x^2 \tag{3009}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3010}$$

We will take a closer look at this:
$$2 \tag{3011}$$
Trivially, the derivative of this is equal to
$$0 \tag{3012}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \cdot x \tag{3013}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{3014}$$

The following is worth a closer look:
$$1 \tag{3015}$$

Trivially, the derivative of this is equal to
$$0 \tag{3016}$$

Consider the following:
$$x^2 \tag{3017}$$

Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3018}$$

We will take a closer look at this:
$$2 \tag{3019}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{3020}$$

Let us take a look at this:
$$1 \tag{3021}$$

Clearly, the derivative of this is equal to
$$0 \tag{3022}$$

The following is worth a closer look:
$$2 \tag{3023}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{3024}$$

Consider the following:
$$2 \tag{3025}$$

It is now obvious, that the derivative of this is equal to
$$0 \tag{3026}$$

One shall regard the object in question with utmost interest:
$$1 \tag{3027}$$

Trivially, the derivative of this is equal to
$$0 \tag{3028}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{3029}$$

As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3030}$$

Consider the following:
$$2 \tag{3031}$$

Trivially, the derivative of this is equal to
$$0 \tag{3032}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{3033}$$

Clearly, the derivative of this is equal to
$$0 \tag{3034}$$

We shall ponder the following:
$$1 \tag{3035}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3036}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x^2 \tag{3037}$$

As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3038}$$

Let us take a look at this:
$$1 \tag{3039}$$

Trivially, the derivative of this is equal to
$$0 \tag{3040}$$

The object of our ultimate interest is the following:

$$1 \tag{3041}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3042}$$

We shall ponder the following:
$$x - 2 \tag{3043}$$

It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{3044}$$

We will take a closer look at this:
$$1 \tag{3045}$$

Obviously, the derivative of this is equal to
$$0 \tag{3046}$$

Let us take a look at this:
$$x^2 \tag{3047}$$

As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3048}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{3049}$$

Clearly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{3050}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3051}$$

178

Clearly, the derivative of this is equal to
$$0 \tag{3052}$$

Let us take a look at this:
$$x^2 \tag{3053}$$

Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3054}$$

We are going to study the following:
$$2 \tag{3055}$$

Trivially, the derivative of this is equal to
$$0 \tag{3056}$$

We shall ponder the following:
$$1 \tag{3057}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{3058}$$

One shall regard the object in question with utmost interest:
$$1 \tag{3059}$$

It is now obvious, that the derivative of this is equal to
$$0 \tag{3060}$$

We shall ponder the following:
$$x^2 \tag{3061}$$

Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3062}$$

Consider the following:
$$1 \tag{3063}$$

As you can see, the derivative of this is equal to
$$0 \tag{3064}$$

One shall regard the object in question with utmost interest:
$$1 \tag{3065}$$

Obviously, the derivative of this is equal to
$$0 \tag{3066}$$

We shall ponder the following:
$$2 \cdot x \tag{3067}$$

Clearly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{3068}$$

We are going to study the following:
$$1 \tag{3069}$$

Trivially, the derivative of this is equal to
$$0 \tag{3070}$$

Consider the following:
$$x^2 \tag{3071}$$

Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3072}$$

Consider the following:
$$2 \tag{3073}$$

Trivially, the derivative of this is equal to
$$0 \tag{3074}$$

We are going to study the following:
$$1 \tag{3075}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3076}$$

Let us take a look at this:
$$1 \tag{3077}$$

Trivially, the derivative of this is equal to
$$0 \tag{3078}$$

We will take a closer look at this:
$$x^2 \tag{3079}$$

Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3080}$$

Let us take a look at this:
$$1 \tag{3081}$$

It is now obvious, that the derivative of this is equal to
$$0 \tag{3082}$$

Let us take a look at this:
$$1 \tag{3083}$$

Unsurprisingly, the derivative of this is equal to
$$0 \tag{3084}$$

Let us take a look at this:
$$1 \tag{3085}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{3086}$$

Let us take a look at this:
$$x^2 \tag{3087}$$

Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3088}$$

We will take a closer look at this:
$$1 \tag{3089}$$

Trivially, the derivative of this is equal to
$$0 \tag{3090}$$

Consider the following:
$$1 \tag{3091}$$

Clearly, the derivative of this is equal to
$$0 \tag{3092}$$

Let us take a look at this:
$$x^2 \tag{3093}$$

Trivially, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3094}$$

We will take a closer look at this:
$$x - 2 \tag{3095}$$

Trivially, the derivative of this is equal to
$$1 - 0 \tag{3096}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3097}$$

As you can see, the derivative of this is equal to

$$0 \tag{3098}$$

The object of our ultimate interest is the following:

$$x^2 \tag{3099}$$

As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3100}$$

We shall ponder the following:
$$2 \cdot x \tag{3101}$$

Clearly, the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{3102}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3103}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3104}$$

We are going to study the following:
$$x^2 \tag{3105}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3106}$$

181

We will take a closer look at this:
$$2 \tag{3107}$$

Obviously, the derivative of this is equal to
$$0 \tag{3108}$$

The object of our ultimate interest is the following:
$$1 \tag{3109}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3110}$$

Let us take a look at this:
$$1 \tag{3111}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{3112}$$

The object of our ultimate interest is the following:
$$x^2 \tag{3113}$$

Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3114}$$

We shall ponder the following:
$$1 \tag{3115}$$

Unsurprisingly, the derivative of this is equal to
$$0 \tag{3116}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{3117}$$

Clearly, the derivative of this is equal to
$$0 \tag{3118}$$

We shall ponder the following:
$$x - 2 \tag{3119}$$

It can be easily proved, that the derivative of this is equal to
$$1 - 0 \tag{3120}$$

One shall regard the object in question with utmost interest:
$$1 \tag{3121}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{3122}$$

Let us take a look at this:
$$x^2 \tag{3123}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3124}$$

We are going to study the following:

$$1 \tag{3125}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3126}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{3127}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3128}$$

Let us take a look at this:

$$2 \cdot x \tag{3129}$$

It can be easily proved, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3130}$$

We shall ponder the following:

$$1 \tag{3131}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3132}$$

The object of our ultimate interest is the following:

$$x^2 \tag{3133}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3134}$$

We shall ponder the following:

$$2 \tag{3135}$$

Trivially, the derivative of this is equal to

$$0 \tag{3136}$$

Let us take a look at this:

$$1 \tag{3137}$$

Obviously, the derivative of this is equal to

$$0 \tag{3138}$$

The object of our ultimate interest is the following:

$$1 \tag{3139}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3140}$$

We will take a closer look at this:

$$x^2 \tag{3141}$$

183

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3142}$$

Let us take a look at this:

$$1 \tag{3143}$$

Obviously, the derivative of this is equal to

$$0 \tag{3144}$$

The object of our ultimate interest is the following:

$$1 \tag{3145}$$

As you can see, the derivative of this is equal to

$$0 \tag{3146}$$

Consider the following:

$$x - 2 \tag{3147}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{3148}$$

Consider the following:

$$1 \tag{3149}$$

Obviously, the derivative of this is equal to

$$0 \tag{3150}$$

The object of our ultimate interest is the following:

$$x^2 \tag{3151}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3152}$$

We are going to study the following:

$$1 \tag{3153}$$

Trivially, the derivative of this is equal to

$$0 \tag{3154}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x^2 \tag{3155}$$

As you can see, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3156}$$

One shall regard the object in question with utmost interest:

$$x - 2 \tag{3157}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{3158}$$

The following is worth a closer look:

$$x + 1 \tag{3159}$$

184

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3160}$$

We shall ponder the following:

$$1 \tag{3161}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3162}$$

We shall ponder the following:

$$2 \tag{3163}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3164}$$

We shall ponder the following:

$$\sin x \tag{3165}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3166}$$

We will take a closer look at this:

$$x + 1 \tag{3167}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3168}$$

We will take a closer look at this:

$$4 \tag{3169}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3170}$$

The object of our ultimate interest is the following:

$$2 \tag{3171}$$

Clearly, the derivative of this is equal to

$$0 \tag{3172}$$

We will take a closer look at this:

$$\cos x \tag{3173}$$

It is now obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3174}$$

Consider the following:

$$x + 1 \tag{3175}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3176}$$

We will take a closer look at this:

$$2 \tag{3177}$$

185

Trivially, the derivative of this is equal to
$$0 \tag{3178}$$

Consider the following:
$$\sin x \tag{3179}$$
Obviously, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3180}$$

We shall ponder the following:
$$1 \tag{3181}$$
As you can see, the derivative of this is equal to
$$0 \tag{3182}$$

The following is worth a closer look:
$$x^2 \tag{3183}$$
It is now obvious, that the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3184}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \cdot x \tag{3185}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \cdot x + 2 \cdot 1 \tag{3186}$$

One shall regard the object in question with utmost interest:
$$1 \tag{3187}$$
Trivially, the derivative of this is equal to
$$0 \tag{3188}$$

We shall ponder the following:
$$x^2 \tag{3189}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3190}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \tag{3191}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3192}$$

We are going to study the following:
$$1 \tag{3193}$$
As you can see, the derivative of this is equal to
$$0 \tag{3194}$$

We are going to study the following:
$$1 \tag{3195}$$
Obviously, the derivative of this is equal to
$$0 \tag{3196}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{3197}$$
Obviously, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3198}$$

The following is worth a closer look:
$$1 \tag{3199}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3200}$$

We shall ponder the following:
$$1 \tag{3201}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{3202}$$

We will take a closer look at this:
$$x - 2 \tag{3203}$$
Obviously, the derivative of this is equal to
$$1 - 0 \tag{3204}$$

We will take a closer look at this:
$$1 \tag{3205}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3206}$$

We are going to study the following:
$$x^2 \tag{3207}$$
Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3208}$$

The object of our ultimate interest is the following:
$$1 \tag{3209}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{3210}$$

We will take a closer look at this:
$$x^2 \tag{3211}$$
Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3212}$$

187

We are going to study the following:
$$x - 2 \tag{3213}$$
Unsurprisingly, the derivative of this is equal to

$$1 - 0 \tag{3214}$$

Consider the following:
$$x + 1 \tag{3215}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3216}$$

We shall ponder the following:
$$1 \tag{3217}$$
As you can see, the derivative of this is equal to

$$0 \tag{3218}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3219}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3220}$$

We shall ponder the following:
$$\sin x \tag{3221}$$
It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3222}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3223}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3224}$$

We will take a closer look at this:
$$1 \tag{3225}$$
It can be easily proved, that the derivative of this is equal to

$$0 \tag{3226}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \tag{3227}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3228}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3229}$$

Clearly, the derivative of this is equal to

$$0 \tag{3230}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\cos x \tag{3231}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3232}$$

We shall ponder the following:

$$x + 1 \tag{3233}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3234}$$

One shall regard the object in question with utmost interest:

$$16 \tag{3235}$$

Trivially, the derivative of this is equal to

$$0 \tag{3236}$$

Let us take a look at this:

$$0 \tag{3237}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3238}$$

The object of our ultimate interest is the following:

$$4 \tag{3239}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3240}$$

Let us take a look at this:

$$2 \tag{3241}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3242}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3243}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3244}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3245}$$

Clearly, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3246}$$

Let us take a look at this:
$$x + 1 \tag{3247}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3248}$$

The object of our ultimate interest is the following:

$$1 \tag{3249}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3250}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \tag{3251}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3252}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3253}$$

Trivially, the derivative of this is equal to
$$0 \tag{3254}$$

Consider the following:
$$\cos x \tag{3255}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3256}$$

Let us take a look at this:
$$x + 1 \tag{3257}$$

Trivially, the derivative of this is equal to
$$1 + 0 \tag{3258}$$

The following is worth a closer look:
$$2 \tag{3259}$$

As you can see, the derivative of this is equal to

$$0 \tag{3260}$$

Let us take a look at this:
$$\sin x \tag{3261}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3262}$$

The object of our ultimate interest is the following:
$$x + 1 \tag{3263}$$
Obviously, the derivative of this is equal to
$$1 + 0 \tag{3264}$$
The following is worth a closer look:
$$1 \tag{3265}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3266}$$
We will take a closer look at this:
$$2 \tag{3267}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3268}$$
We are going to study the following:
$$\sin x \tag{3269}$$
Trivially, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3270}$$
The following is worth a closer look:
$$x + 1 \tag{3271}$$
It can be easily proved, that the derivative of this is equal to
$$1 + 0 \tag{3272}$$
The following is worth a closer look:
$$4 \tag{3273}$$
Obviously, the derivative of this is equal to
$$0 \tag{3274}$$
The following is worth a closer look:
$$2 \tag{3275}$$
Trivially, the derivative of this is equal to
$$0 \tag{3276}$$
The following is worth a closer look:
$$\cos x \tag{3277}$$
It can be easily proved, that the derivative of this is equal to
$$-\sin x \cdot 1 \tag{3278}$$
Consider the following:
$$x + 1 \tag{3279}$$
Trivially, the derivative of this is equal to
$$1 + 0 \tag{3280}$$
Let us take a look at this:
$$1 \tag{3281}$$

Clearly, the derivative of this is equal to
$$0 \tag{3282}$$

One shall regard the object in question with utmost interest:
$$2 \tag{3283}$$

It is now obvious, that the derivative of this is equal to
$$0 \tag{3284}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$\sin x \tag{3285}$$

As you can see, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3286}$$

Let us take a look at this:
$$x + 1 \tag{3287}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$1 + 0 \tag{3288}$$

Consider the following:
$$4 \tag{3289}$$

Trivially, the derivative of this is equal to
$$0 \tag{3290}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \tag{3291}$$

It is now obvious, that the derivative of this is equal to
$$0 \tag{3292}$$

The object of our ultimate interest is the following:
$$\cos x \tag{3293}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$-\sin x \cdot 1 \tag{3294}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x + 1 \tag{3295}$$

Unsurprisingly, the derivative of this is equal to
$$1 + 0 \tag{3296}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \tag{3297}$$

As you can see, the derivative of this is equal to

$$0 \tag{3298}$$

We shall ponder the following:
$$\sin x \tag{3299}$$
It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3300}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3301}$$

As you can see, the derivative of this is equal to

$$0 \tag{3302}$$

We shall ponder the following:
$$x^2 \tag{3303}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3304}$$

The following is worth a closer look:
$$2 \cdot x \tag{3305}$$
It is now obvious, that the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3306}$$

We shall ponder the following:
$$1 \tag{3307}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{3308}$$

Let us take a look at this:
$$x^2 \tag{3309}$$
Clearly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3310}$$

The object of our ultimate interest is the following:

$$2 \tag{3311}$$

Obviously, the derivative of this is equal to
$$0 \tag{3312}$$

The object of our ultimate interest is the following:

$$1 \tag{3313}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3314}$$

193

The following is worth a closer look:
$$1 \tag{3315}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{3316}$$
The following is worth a closer look:
$$x^2 \tag{3317}$$
Trivially, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3318}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{3319}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{3320}$$
We will take a closer look at this:
$$1 \tag{3321}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{3322}$$

One shall regard the object in question with utmost interest:
$$x - 2 \tag{3323}$$
Unsurprisingly, the derivative of this is equal to
$$1 - 0 \tag{3324}$$

The following is worth a closer look:
$$1 \tag{3325}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3326}$$

Consider the following:
$$x^2 \tag{3327}$$
Unsurprisingly, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3328}$$

We will take a closer look at this:
$$1 \tag{3329}$$
Clearly, the derivative of this is equal to
$$0 \tag{3330}$$

Let us take a look at this:
$$x^2 \tag{3331}$$

194

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \qquad (3332)$$

The object of our ultimate interest is the following:

$$x - 2 \qquad (3333)$$

It is now obvious, that the derivative of this is equal to

$$1 - 0 \qquad (3334)$$

Let us take a look at this:

$$x + 1 \qquad (3335)$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \qquad (3336)$$

We are going to study the following:

$$1 \qquad (3337)$$

Obviously, the derivative of this is equal to

$$0 \qquad (3338)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \qquad (3339)$$

As you can see, the derivative of this is equal to

$$0 \qquad (3340)$$

We shall ponder the following:

$$\sin x \qquad (3341)$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \qquad (3342)$$

We will take a closer look at this:

$$x + 1 \qquad (3343)$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \qquad (3344)$$

The object of our ultimate interest is the following:

$$1 \qquad (3345)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \qquad (3346)$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \qquad (3347)$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3348}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3349}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3350}$$

Let us take a look at this:
$$\cos x \tag{3351}$$
It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3352}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3353}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3354}$$

The following is worth a closer look:
$$16 \tag{3355}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{3356}$$

We will take a closer look at this:
$$4 \tag{3357}$$
Clearly, the derivative of this is equal to
$$0 \tag{3358}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3359}$$

As you can see, the derivative of this is equal to

$$0 \tag{3360}$$

Consider the following:
$$\sin x \tag{3361}$$
Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3362}$$

We will take a closer look at this:
$$x + 1 \tag{3363}$$
Clearly, the derivative of this is equal to
$$1 + 0 \tag{3364}$$

We will take a closer look at this:

$$1 \tag{3365}$$

Clearly, the derivative of this is equal to

$$0 \tag{3366}$$

One shall regard the object in question with utmost interest:

$$4 \tag{3367}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3368}$$

We will take a closer look at this:

$$2 \tag{3369}$$

Obviously, the derivative of this is equal to

$$0 \tag{3370}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{3371}$$

It is now obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3372}$$

The following is worth a closer look:

$$x + 1 \tag{3373}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3374}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3375}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3376}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\sin x \tag{3377}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3378}$$

Consider the following:

$$x + 1 \tag{3379}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3380}$$

We shall ponder the following:

$$1 \tag{3381}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3382}$$

We will take a closer look at this:
$$2 \tag{3383}$$
Trivially, the derivative of this is equal to
$$0 \tag{3384}$$

Let us take a look at this:
$$\sin x \tag{3385}$$
Trivially, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3386}$$

We shall ponder the following:
$$x + 1 \tag{3387}$$
Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3388}$$

One shall regard the object in question with utmost interest:

$$4 \tag{3389}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3390}$$

One shall regard the object in question with utmost interest:

$$2 \tag{3391}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3392}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\cos x \tag{3393}$$

Trivially, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3394}$$

The following is worth a closer look:
$$x + 1 \tag{3395}$$
As you can see, the derivative of this is equal to

$$1 + 0 \tag{3396}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3397}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3398}$$

We shall ponder the following:
$$2 \tag{3399}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3400}$$

We will take a closer look at this:
$$\sin x \tag{3401}$$

Clearly, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3402}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3403}$$

Trivially, the derivative of this is equal to
$$1 + 0 \tag{3404}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \tag{3405}$$

Trivially, the derivative of this is equal to
$$0 \tag{3406}$$

We shall ponder the following:
$$2 \tag{3407}$$

As you can see, the derivative of this is equal to

$$0 \tag{3408}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{3409}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3410}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3411}$$

Trivially, the derivative of this is equal to
$$1 + 0 \tag{3412}$$

Consider the following:
$$2 \tag{3413}$$

Obviously, the derivative of this is equal to
$$0 \tag{3414}$$

Consider the following:
$$\sin x \tag{3415}$$

Clearly, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3416}$$

We are going to study the following:
$$1 \tag{3417}$$
As you can see, the derivative of this is equal to
$$0 \tag{3418}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{3419}$$
As you can see, the derivative of this is equal to
$$2 \cdot x^{2-1} \cdot 1 \tag{3420}$$

We will take a closer look at this:
$$x - 2 \tag{3421}$$
It is now obvious, that the derivative of this is equal to
$$1 - 0 \tag{3422}$$

We shall ponder the following:
$$x + 1 \tag{3423}$$
Obviously, the derivative of this is equal to
$$1 + 0 \tag{3424}$$

The object of our ultimate interest is the following:
$$x + 1 \tag{3425}$$
As you can see, the derivative of this is equal to
$$1 + 0 \tag{3426}$$

We shall ponder the following:
$$2 \tag{3427}$$
Trivially, the derivative of this is equal to
$$0 \tag{3428}$$

The following is worth a closer look:
$$2 \tag{3429}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{3430}$$

We shall ponder the following:
$$\sin x \tag{3431}$$
Obviously, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3432}$$

Let us take a look at this:
$$x + 1 \tag{3433}$$
It can be easily proved, that the derivative of this is equal to
$$1 + 0 \tag{3434}$$

We will take a closer look at this:
$$1 \tag{3435}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3436}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$4 \tag{3437}$$

Trivially, the derivative of this is equal to
$$0 \tag{3438}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$2 \tag{3439}$$

Obviously, the derivative of this is equal to
$$0 \tag{3440}$$

We shall ponder the following:
$$\cos x \tag{3441}$$

It can be easily proved, that the derivative of this is equal to
$$-\sin x \cdot 1 \tag{3442}$$

We shall ponder the following:
$$x + 1 \tag{3443}$$

Clearly, the derivative of this is equal to
$$1 + 0 \tag{3444}$$

Consider the following:
$$1 \tag{3445}$$

Clearly, the derivative of this is equal to
$$0 \tag{3446}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$4 \tag{3447}$$

Obviously, the derivative of this is equal to
$$0 \tag{3448}$$

We shall ponder the following:
$$2 \tag{3449}$$

Obviously, the derivative of this is equal to
$$0 \tag{3450}$$

Let us take a look at this:
$$\cos x \tag{3451}$$

It can be easily proved, that the derivative of this is equal to
$$-\sin x \cdot 1 \tag{3452}$$

Let us take a look at this:
$$x + 1 \tag{3453}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3454}$$

Consider the following:
$$1 \tag{3455}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3456}$$

One shall regard the object in question with utmost interest:

$$16 \tag{3457}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3458}$$

We are going to study the following:
$$4 \tag{3459}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3460}$$

Let us take a look at this:
$$2 \tag{3461}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3462}$$

We will take a closer look at this:
$$\sin x \tag{3463}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3464}$$

Consider the following:
$$x + 1 \tag{3465}$$

Obviously, the derivative of this is equal to
$$1 + 0 \tag{3466}$$

Let us take a look at this:
$$1 \tag{3467}$$

Trivially, the derivative of this is equal to
$$0 \tag{3468}$$

The following is worth a closer look:
$$16 \tag{3469}$$

Trivially, the derivative of this is equal to
$$0 \tag{3470}$$

We will take a closer look at this:
$$4 \tag{3471}$$

Clearly, the derivative of this is equal to
$$0 \tag{3472}$$

Let us take a look at this:
$$2 \tag{3473}$$

Trivially, the derivative of this is equal to
$$0 \tag{3474}$$

We shall ponder the following:
$$\sin x \tag{3475}$$

It can be easily proved, that the derivative of this is equal to
$$\cos x \cdot 1 \tag{3476}$$

We are going to study the following:
$$x + 1 \tag{3477}$$

It is now obvious, that the derivative of this is equal to
$$1 + 0 \tag{3478}$$

Consider the following:
$$256 \tag{3479}$$

Trivially, the derivative of this is equal to
$$0 \tag{3480}$$

The following is worth a closer look:
$$16 \tag{3481}$$

Obviously, the derivative of this is equal to
$$0 \tag{3482}$$

The following is worth a closer look:
$$4 \tag{3483}$$

Trivially, the derivative of this is equal to
$$0 \tag{3484}$$

We are going to study the following:
$$2 \tag{3485}$$

Trivially, the derivative of this is equal to
$$0 \tag{3486}$$

We are going to study the following:
$$\cos x \tag{3487}$$

Trivially, the derivative of this is equal to
$$-\sin x \cdot 1 \tag{3488}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x + 1 \tag{3489}$$

Clearly, the derivative of this is equal to
$$1 + 0 \tag{3490}$$

We shall ponder the following:
$$1 \tag{3491}$$

Trivially, the derivative of this is equal to
$$0 \tag{3492}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$4 \tag{3493}$$

Trivially, the derivative of this is equal to
$$0 \tag{3494}$$

We shall ponder the following:
$$2 \tag{3495}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{3496}$$

Consider the following:
$$\cos x \tag{3497}$$

It can be easily proved, that the derivative of this is equal to
$$-\sin x \cdot 1 \tag{3498}$$

One shall regard the object in question with utmost interest:
$$x + 1 \tag{3499}$$

It can be easily proved, that the derivative of this is equal to
$$1 + 0 \tag{3500}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{3501}$$

Obviously, the derivative of this is equal to
$$0 \tag{3502}$$

We will take a closer look at this:
$$16 \tag{3503}$$

Obviously, the derivative of this is equal to
$$0 \tag{3504}$$

One shall regard the object in question with utmost interest:
$$4 \tag{3505}$$

It can be easily proved, that the derivative of this is equal to
$$0 \tag{3506}$$

Consider the following:
$$2 \tag{3507}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3508}$$

Let us take a look at this:
$$\sin x \tag{3509}$$
It is now obvious, that the derivative of this is equal to
$$\cos x \cdot 1 \tag{3510}$$

We will take a closer look at this:
$$x + 1 \tag{3511}$$
Trivially, the derivative of this is equal to
$$1 + 0 \tag{3512}$$

The following is worth a closer look:
$$2 \tag{3513}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{3514}$$

Consider the following:
$$\sin x \tag{3515}$$
Trivially, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3516}$$

We are going to study the following:
$$x + 1 \tag{3517}$$
It is now obvious, that the derivative of this is equal to
$$1 + 0 \tag{3518}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$1 \tag{3519}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3520}$$

Consider the following:
$$2 \tag{3521}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3522}$$

We are going to study the following:
$$\sin x \tag{3523}$$
It can be easily proved, that the derivative of this is equal to
$$\cos x \cdot 1 \tag{3524}$$

The following is worth a closer look:
$$x + 1 \tag{3525}$$
It can be easily proved, that the derivative of this is equal to
$$1 + 0 \tag{3526}$$

205

The object of our ultimate interest is the following:

$$1 \tag{3527}$$

Clearly, the derivative of this is equal to

$$0 \tag{3528}$$

The following is worth a closer look:

$$4 \tag{3529}$$

As you can see, the derivative of this is equal to

$$0 \tag{3530}$$

The object of our ultimate interest is the following:

$$2 \tag{3531}$$

As you can see, the derivative of this is equal to

$$0 \tag{3532}$$

The object of our ultimate interest is the following:

$$\cos x \tag{3533}$$

Obviously, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3534}$$

The following is worth a closer look:

$$x + 1 \tag{3535}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3536}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$16 \tag{3537}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3538}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \tag{3539}$$

As you can see, the derivative of this is equal to

$$0 \tag{3540}$$

Consider the following:

$$2 \tag{3541}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3542}$$

The following is worth a closer look:

$$\sin x \tag{3543}$$

Clearly, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3544}$$

We will take a closer look at this:
$$x + 1 \tag{3545}$$

Clearly, the derivative of this is equal to
$$1 + 0 \tag{3546}$$

The following is worth a closer look:
$$1 \tag{3547}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3548}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$4 \tag{3549}$$

Unsurprisingly, the derivative of this is equal to
$$0 \tag{3550}$$

One shall regard the object in question with utmost interest:
$$2 \tag{3551}$$

It is now obvious, that the derivative of this is equal to
$$0 \tag{3552}$$

Let us take a look at this:
$$\cos x \tag{3553}$$

Unsurprisingly, the derivative of this is equal to
$$-\sin x \cdot 1 \tag{3554}$$

Consider the following:
$$x + 1 \tag{3555}$$

Obviously, the derivative of this is equal to
$$1 + 0 \tag{3556}$$

One shall regard the object in question with utmost interest:
$$1 \tag{3557}$$

Unsurprisingly, the derivative of this is equal to
$$0 \tag{3558}$$

One shall regard the object in question with utmost interest:
$$2 \tag{3559}$$

As you can see, the derivative of this is equal to
$$0 \tag{3560}$$

207

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$\sin x \tag{3561}$$

Trivially, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3562}$$

Consider the following:

$$x + 1 \tag{3563}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3564}$$

We shall ponder the following:

$$4 \tag{3565}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3566}$$

The following is worth a closer look:

$$2 \tag{3567}$$

As you can see, the derivative of this is equal to

$$0 \tag{3568}$$

One shall regard the object in question with utmost interest:

$$\cos x \tag{3569}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$- \sin x \cdot 1 \tag{3570}$$

The following is worth a closer look:

$$x + 1 \tag{3571}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3572}$$

The following is worth a closer look:

$$2 \tag{3573}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3574}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3575}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3576}$$

Consider the following:

$$x + 1 \tag{3577}$$

208

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3578}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3579}$$

Obviously, the derivative of this is equal to

$$0 \tag{3580}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3581}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3582}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3583}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3584}$$

We shall ponder the following:

$$x + 1 \tag{3585}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 + 0 \tag{3586}$$

Consider the following:

$$1 \tag{3587}$$

Trivially, the derivative of this is equal to

$$0 \tag{3588}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \tag{3589}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3590}$$

Let us take a look at this:

$$2 \tag{3591}$$

Trivially, the derivative of this is equal to

$$0 \tag{3592}$$

The following is worth a closer look:

$$\cos x \tag{3593}$$

Unsurprisingly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3594}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3595}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3596}$$

The object of our ultimate interest is the following:

$$16 \tag{3597}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3598}$$

Consider the following:

$$0 \tag{3599}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3600}$$

We are going to study the following:

$$4 \tag{3601}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3602}$$

Let us take a look at this:

$$2 \tag{3603}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3604}$$

Let us take a look at this:

$$1 \tag{3605}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3606}$$

We shall ponder the following:

$$\sin x \tag{3607}$$

It is now obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3608}$$

Let us take a look at this:

$$x + 1 \tag{3609}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3610}$$

Let us take a look at this:

$$1 \tag{3611}$$

Obviously, the derivative of this is equal to

$$0 \tag{3612}$$

Consider the following:
$$4 \tag{3613}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{3614}$$
Let us take a look at this:
$$2 \tag{3615}$$
Unsurprisingly, the derivative of this is equal to
$$0 \tag{3616}$$
We are going to study the following:
$$\cos x \tag{3617}$$
Obviously, the derivative of this is equal to
$$-\sin x \cdot 1 \tag{3618}$$
The following is worth a closer look:
$$x + 1 \tag{3619}$$
As you can see, the derivative of this is equal to
$$1 + 0 \tag{3620}$$
The following is worth a closer look:
$$1 \tag{3621}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{3622}$$
We shall ponder the following:
$$2 \tag{3623}$$
As you can see, the derivative of this is equal to
$$0 \tag{3624}$$
The object of our ultimate interest is the following:
$$\sin x \tag{3625}$$
Trivially, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3626}$$
One shall regard the object in question with utmost interest:
$$x + 1 \tag{3627}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$1 + 0 \tag{3628}$$
We will take a closer look at this:
$$4 \tag{3629}$$

As you can see, the derivative of this is equal to

$$0 \tag{3630}$$

The following is worth a closer look:
$$2 \tag{3631}$$

Trivially, the derivative of this is equal to
$$0 \tag{3632}$$

We are going to study the following:
$$\cos x \tag{3633}$$

As you can see, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3634}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3635}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3636}$$

Consider the following:
$$2 \tag{3637}$$

As you can see, the derivative of this is equal to

$$0 \tag{3638}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3639}$$

Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3640}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{3641}$$

Obviously, the derivative of this is equal to
$$1 + 0 \tag{3642}$$

We shall ponder the following:
$$1 \tag{3643}$$

Obviously, the derivative of this is equal to
$$0 \tag{3644}$$

The object of our ultimate interest is the following:

$$2 \tag{3645}$$

Obviously, the derivative of this is equal to
$$0 \tag{3646}$$

We will take a closer look at this:
$$\sin x \tag{3647}$$
Clearly, the derivative of this is equal to
$$\cos x \cdot 1 \tag{3648}$$

Let us take a look at this:
$$x + 1 \tag{3649}$$
It is now obvious, that the derivative of this is equal to
$$1 + 0 \tag{3650}$$

Consider the following:
$$4 \tag{3651}$$
It is now obvious, that the derivative of this is equal to
$$0 \tag{3652}$$

We are going to study the following:
$$2 \tag{3653}$$
It can be easily proved, that the derivative of this is equal to
$$0 \tag{3654}$$

We shall ponder the following:
$$\cos x \tag{3655}$$
Clearly, the derivative of this is equal to
$$-\sin x \cdot 1 \tag{3656}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:
$$x + 1 \tag{3657}$$
As you can see, the derivative of this is equal to
$$1 + 0 \tag{3658}$$

The following is worth a closer look:
$$1 \tag{3659}$$
As you can see, the derivative of this is equal to
$$0 \tag{3660}$$

The object of our ultimate interest is the following:
$$2 \tag{3661}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to
$$0 \tag{3662}$$

The object of our ultimate interest is the following:
$$\sin x \tag{3663}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3664}$$

Consider the following:
$$x + 1 \tag{3665}$$
Trivially, the derivative of this is equal to
$$1 + 0 \tag{3666}$$

We will take a closer look at this:
$$1 \tag{3667}$$
As you can see, the derivative of this is equal to

$$0 \tag{3668}$$

We shall ponder the following:
$$4 \tag{3669}$$
Clearly, the derivative of this is equal to
$$0 \tag{3670}$$

The following is worth a closer look:
$$2 \tag{3671}$$
As you can see, the derivative of this is equal to

$$0 \tag{3672}$$

The following is worth a closer look:
$$\cos x \tag{3673}$$
Clearly, the derivative of this is equal to
$$-\sin x \cdot 1 \tag{3674}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3675}$$

Trivially, the derivative of this is equal to
$$1 + 0 \tag{3676}$$

One shall regard the object in question with utmost interest:

$$16 \tag{3677}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3678}$$

We are going to study the following:
$$0 \tag{3679}$$
Clearly, the derivative of this is equal to
$$0 \tag{3680}$$

We will take a closer look at this:
$$4 \tag{3681}$$

214

As you can see, the derivative of this is equal to

$$0 \tag{3682}$$

Let us take a look at this:
$$2 \tag{3683}$$
Clearly, the derivative of this is equal to
$$0 \tag{3684}$$

We will take a closer look at this:
$$1 \tag{3685}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3686}$$

We shall ponder the following:
$$\sin x \tag{3687}$$
Obviously, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3688}$$

Consider the following:
$$x + 1 \tag{3689}$$
It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3690}$$

We will take a closer look at this:
$$1 \tag{3691}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{3692}$$

One shall regard the object in question with utmost interest:

$$4 \tag{3693}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3694}$$

The following is worth a closer look:
$$2 \tag{3695}$$
It is now obvious, that the derivative of this is equal to

$$0 \tag{3696}$$

The following is worth a closer look:
$$\cos x \tag{3697}$$
Unsurprisingly, the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3698}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3699}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3700}$$

Consider the following:

$$2 \tag{3701}$$

Obviously, the derivative of this is equal to

$$0 \tag{3702}$$

The following is worth a closer look:

$$\sin x \tag{3703}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3704}$$

Consider the following:

$$x + 1 \tag{3705}$$

As you can see, the derivative of this is equal to

$$1 + 0 \tag{3706}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$1 \tag{3707}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3708}$$

We are going to study the following:

$$2 \tag{3709}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3710}$$

Let us take a look at this:

$$\sin x \tag{3711}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3712}$$

One shall regard the object in question with utmost interest:

$$x + 1 \tag{3713}$$

It can be easily proved, that the derivative of this is equal to

$$1 + 0 \tag{3714}$$

We will take a closer look at this:

$$4 \tag{3715}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3716}$$

Consider the following:

$$2 \tag{3717}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3718}$$

The object of our ultimate interest is the following:

$$\cos x \tag{3719}$$

It is now obvious, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3720}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3721}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3722}$$

We will take a closer look at this:

$$1 \tag{3723}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3724}$$

We will take a closer look at this:

$$2 \tag{3725}$$

Obviously, the derivative of this is equal to

$$0 \tag{3726}$$

We will take a closer look at this:

$$\sin x \tag{3727}$$

Unsurprisingly, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3728}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3729}$$

Obviously, the derivative of this is equal to

$$1 + 0 \tag{3730}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$4 \tag{3731}$$

Trivially, the derivative of this is equal to

$$0 \tag{3732}$$

217

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$2 \tag{3733}$$

As you can see, the derivative of this is equal to

$$0 \tag{3734}$$

We shall ponder the following:
$$\cos x \tag{3735}$$

It can be easily proved, that the derivative of this is equal to

$$-\sin x \cdot 1 \tag{3736}$$

The object of our ultimate interest is the following:

$$x + 1 \tag{3737}$$

Clearly, the derivative of this is equal to
$$1 + 0 \tag{3738}$$

We are going to study the following:

$$2 \tag{3739}$$

Obviously, the derivative of this is equal to

$$0 \tag{3740}$$

Consider the following:
$$\sin x \tag{3741}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3742}$$

Now the proof that the Taylor series of this function at $x = 0$ is equal to

$$B + \left((\arctan 1)^{-2} + A \right) \cdot \frac{(x - 0)^2}{2} + (G + H) \cdot \frac{(x - 0)^3}{6} \tag{3743}$$

Where:

- $A = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot (\ln \arctan 1 - 2 \cdot 0) - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $B = 0 + (\arctan 1)^{-2} \cdot \frac{(x - 0)^0}{1} + (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot \frac{(x - 0)^1}{1}$
- $C = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot (\ln \arctan 1 - 2 \cdot 0) - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $D = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $E = \frac{1}{\arctan 1} \cdot 0.5 + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2} + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2} - 2 \cdot 0$
- $F = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $G = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) - 1.5 \cdot (\arctan 1)^{-2} + (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0)$
- $H = (\arctan 1)^{-2} \cdot (\ln \arctan 1 - 2 \cdot 0) + (C) \cdot (\ln \arctan 1 - 2 \cdot 0) - D + (\arctan 1)^{-2} \cdot (E) - F$

has a truly wondrous solution, which is sadly too massive to be shown here. Unsurprisingly, if we simplify this we wil get

$$G + \left(F + (\arctan 1)^{-2} \cdot \ln \arctan 1 + D + E \right) \cdot \frac{x^3}{6} \tag{3744}$$

Where:

- $A = (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot \ln \arctan 1 - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$

- $B = (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot \ln \arctan 1 - (\arctan 1)^{-2} \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $C = \frac{1}{\arctan 1} \cdot 0.5 + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2} + \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $D = (B) \cdot \ln \arctan 1 - (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $E = (\arctan 1)^{-2} \cdot (C) - (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot 2 \cdot \frac{0.5 \cdot \arctan 1}{(\arctan 1)^2}$
- $F = (\arctan 1)^{-2} \cdot \ln \arctan 1 - 1.5 \cdot (\arctan 1)^{-2} + (\arctan 1)^{-2} \cdot \ln \arctan 1$
- $G = (\arctan 1)^{-2} + (\arctan 1)^{-2} \cdot \ln \arctan 1 \cdot x + \left((\arctan 1)^{-2} + A \right) \cdot \frac{x^2}{2}$

3 Tangent

Let us find the Taylor series at $x = 5$ of the following function:

$$(x+1)^{\frac{\sin x}{2}} \cdot \left(\arctan \sqrt{x^2+1}\right)^{x-2} \tag{3745}$$

Let us take a look at this:

$$1 \tag{3746}$$

Clearly, the derivative of this is equal to

$$0 \tag{3747}$$

We will take a closer look at this:

$$x^2 \tag{3748}$$

Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3749}$$

We will take a closer look at this:

$$x - 2 \tag{3750}$$

Clearly, the derivative of this is equal to

$$1 - 0 \tag{3751}$$

Let us take a look at this:

$$x + 1 \tag{3752}$$

Trivially, the derivative of this is equal to

$$1 + 0 \tag{3753}$$

We will take a closer look at this:

$$2 \tag{3754}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3755}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3756}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3757}$$

Consider the following:

$$1 \tag{3758}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3759}$$

The object of our ultimate interest is the following:

$$x^2 \tag{3760}$$

Unsurprisingly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3761}$$

The object of our ultimate interest is the following:

$$2 \cdot x \tag{3762}$$

Clearly, the derivative of this is equal to

$$0 \cdot x + 2 \cdot 1 \tag{3763}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3764}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3765}$$

Let us take a look at this:

$$x^2 \tag{3766}$$

Trivially, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3767}$$

The object of our ultimate interest is the following:

$$2 \tag{3768}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3769}$$

One shall regard the object in question with utmost interest:

$$1 \tag{3770}$$

Unsurprisingly, the derivative of this is equal to

$$0 \tag{3771}$$

We are going to study the following:

$$1 \tag{3772}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3773}$$

The object of our ultimate interest is the following:

$$x^2 \tag{3774}$$

Clearly, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3775}$$

We are going to study the following:

$$1 \tag{3776}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3777}$$

The following is worth a closer look:

$$1 \tag{3778}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3779}$$

Let us take a look at this:
$$x - 2 \tag{3780}$$
It can be easily proved, that the derivative of this is equal to

$$1 - 0 \tag{3781}$$

We are going to study the following:
$$1 \tag{3782}$$
Unsurprisingly, the derivative of this is equal to

$$0 \tag{3783}$$

One shall regard the object in question with utmost interest:
$$x^2 \tag{3784}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3785}$$

We will take a closer look at this:
$$1 \tag{3786}$$
It can be easily proved, that the derivative of this is equal to

$$0 \tag{3787}$$

The object of our ultimate interest is the following:
$$x^2 \tag{3788}$$
Obviously, the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3789}$$

Consider the following:
$$x - 2 \tag{3790}$$
Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$1 - 0 \tag{3791}$$

The object of our ultimate interest is the following:
$$x + 1 \tag{3792}$$
As you can see, the derivative of this is equal to

$$1 + 0 \tag{3793}$$

The object of our ultimate interest is the following:

$$2 \tag{3794}$$

As you can see, the derivative of this is equal to

$$0 \tag{3795}$$

One shall regard the object in question with utmost interest:

$$\sin x \tag{3796}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3797}$$

Consider the following:

$$1 \tag{3798}$$

It is now obvious, that the derivative of this is equal to

$$0 \tag{3799}$$

We shall ponder the following:

$$x^2 \tag{3800}$$

It is now obvious, that the derivative of this is equal to

$$2 \cdot x^{2-1} \cdot 1 \tag{3801}$$

Consider the following:

$$x - 2 \tag{3802}$$

As you can see, the derivative of this is equal to

$$1 - 0 \tag{3803}$$

Consider the following:

$$x + 1 \tag{3804}$$

Clearly, the derivative of this is equal to

$$1 + 0 \tag{3805}$$

We will take a closer look at this:

$$1 \tag{3806}$$

Trivially, the derivative of this is equal to

$$0 \tag{3807}$$

We will take a closer look at this:

$$2 \tag{3808}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3809}$$

We are going to study the following:

$$\sin x \tag{3810}$$

It can be easily proved, that the derivative of this is equal to

$$\cos x \cdot 1 \tag{3811}$$

Consider the following:

$$x + 1 \tag{3812}$$

It is now obvious, that the derivative of this is equal to

$$1 + 0 \tag{3813}$$

We are going to study the following:

$$4 \tag{3814}$$

Any self-respecting mathematician would find it obvious, that the derivative of this is equal to

$$0 \tag{3815}$$

We are going to study the following:

$$2 \tag{3816}$$

It can be easily proved, that the derivative of this is equal to

$$0 \tag{3817}$$

We shall ponder the following:

$$\cos x \tag{3818}$$

Obviously, the derivative of this is equal to

$$- \sin x \cdot 1 \tag{3819}$$

We will allow ourselves to divert the reader's attention to this gem of mathematical wonder:

$$x + 1 \tag{3820}$$

Unsurprisingly, the derivative of this is equal to

$$1 + 0 \tag{3821}$$

Let us take a look at this:

$$2 \tag{3822}$$

Clearly, the derivative of this is equal to

$$0 \tag{3823}$$

Consider the following:

$$\sin x \tag{3824}$$

As you can see, the derivative of this is equal to

$$\cos x \cdot 1 \tag{3825}$$

Now the proof that the Taylor series of this function at $x = 5$ is equal to

$$0 + 6^{\frac{\sin 5}{2}} \cdot \left(\arctan \sqrt{26}\right)^3 \cdot \frac{(x-5)^0}{1} + \left(B + 6^{\frac{\sin 5}{2}} \cdot \left(\arctan \sqrt{26}\right)^3 \cdot (A)\right) \cdot \frac{(x-5)^1}{1} \tag{3826}$$

Where:

- $A = \ln \arctan \sqrt{26} + 3 \cdot \frac{\frac{1}{1+(\sqrt{26})^2} \cdot \frac{1}{2 \cdot \sqrt{26}} \cdot 10}{\arctan \sqrt{26}}$
- $B = 6^{\frac{\sin 5}{2}} \cdot \left(\frac{\cos 5 \cdot 2}{4} \cdot \ln 6 + \frac{\sin 5}{2} \cdot 0.166667\right) \cdot \left(\arctan \sqrt{26}\right)^3$

is too trivial to be shown here. As you can see, if we simplify this we wil get

$$6^{\frac{\sin 5}{2}} \cdot \left(\arctan \sqrt{26}\right)^3 + \left(B + 6^{\frac{\sin 5}{2}} \cdot \left(\arctan \sqrt{26}\right)^3 \cdot (A)\right) \cdot (x - 5) \tag{3827}$$

Where:

- $A = \ln \arctan \sqrt{26} + 3 \cdot \dfrac{\frac{1}{1+(\sqrt{26})^2} \cdot \frac{1}{2 \cdot \sqrt{26}} \cdot 10}{\arctan \sqrt{26}}$
- $B = 6^{\frac{\sin 5}{2}} \cdot \left(\frac{\cos 5 \cdot 2}{4} \cdot \ln 6 + \frac{\sin 5}{2} \cdot 0.166667 \right) \cdot \left(\arctan \sqrt{26} \right)^3$
